CONTENTS.

SCARCITY IN 1891-92.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 2nd January 1893.

RESOLUTION No. 17Agri.

READ again—

(1) Correspondence with the Commissioners of the Patna, Bhagalpur, and Rajshahi Divisions regarding the recent scarcity in parts of those Divisions.
(2) Records of the relief operations of 1873-74 and 1888-89.
(3) Bengal Famine Code, revised edition of January, 1892.
(4) This Government's Resolution No. 1529Agri., dated the 16th April, 1892.

Read—

Final reports of the relief operations of 1891-92, viz.—

(5) Letters No. 577M., dated 1st September, 1892, and No. 592Mct., dated 31st October, 1892, from the Commissioner of the Rajshahi Division, with enclosures.
(6) Letter No. 728G., dated the 10th October, 1892, from the Commissioner of the Patna Division, with enclosures.
(7) Letters No. 2116R., dated 12th October, 1892, No. 2174R., dated 15th October, 1892, and No. 2270R., dated [illegible]th October, 1892, from the Commissioner of the Bhagalpur Division, with enclosures.

THE rainfall of 1891 was below the average over the whole of Bengal, but the deficiency was most marked in Behar and the districts of Bengal north of the Ganges. Although the *bhadoi* crop was not generally affected, much

damage was caused to the great winter rice crop of the Province. The information received from the localities suffering from drought indicated at an early stage possibilities of widespread distress, and the apprehensions which the Lieutenant-Governor had entertained were borne out by his observations when travelling through the Patna Division in November, 1891. It was, however, still possible then that a good fall of winter rain would enable a plentiful *rabi* crop to be reaped. This hope was disappointed; no rain fell in December or January, and the *rabi* crop, except on irrigated or low-lying lands, was almost a total failure. Full and periodical reports were called for from the local officers, and, in order to maintain the administration in readiness to meet famine should it come, the lists of works available for purposes of relief were prepared afresh, and a revised edition of the Bengal Famine Code was issued in January, 1892. In March and April, when relief operations were actually in progress, the Lieutenant-Governor visited the affected tracts in the districts of Monghyr, Bhagalpur, and Purnea, and found that on certain points the provisions of the Code were not precisely suited to the exact stage of distress which had then been reached. Detailed instructions were, therefore, issued in the Resolution of 16th April, 1892, quoted in the preamble, for the guidance of the officers concerned, as to the classification of relief works and workers, the calculation of the wage to be paid, the amount of work to be exacted from each labourer, the registers to be kept, and the returns and reports to be submitted in connection with relief works as well as gratuitous relief. The Lieutenant-Governor also reminded the District Boards that, as an integral part of the administration, they were required in times of scarcity or famine to do more than merely provide funds for relief works under Chapter XI of the Famine Code; that it was incumbent on them to recast their budgets; and that, after providing for all obligatory expenditure such as establishment, maintenance of works and buildings, and completion of works in progress which would suffer seriously from being stopped and entail great loss in the end, all the rest of their expenditure on public works should be devoted to such operations as could be classed as relief works.

2. Before the situation was fully developed, it was at first anticipated that the tracts which would suffer most would be the Gaya, Muzaffarpur, and Darbhanga districts, a portion of Shahabad, and the Monghyr, Bhagalpur, Purnea, Dinajpur and Bogra districts. Champaran, which had suffered severely in 1873-74 as well as in 1888-89, was subsequently included in the number of affected areas. Appendix I to this Resolution shows the rainfall in each of these districts from 1st May, 1891, to 31st July, 1892, the fall during the months of May to August, inclusive, in 1891, and for the two individual months of September and October, being compared with the normal rainfall and the actuals in 1873 and 1888. The short rainfall in 1891 was chiefly confined to the last two months of the ordinary monsoon period: the *bhadoi* or early rain-crop was probably a full average; and this fact, combined with the good harvest of the preceding year, mainly accounts for the comparative immunity from distress of all the districts in which the *bhadoi* is largely sown, in spite of the failure of the winter and spring crops. In the Patna Division, taken as a whole, and for the whole province the *bhadoi* crop was estimated by the Director of the Department of Land Records and Agriculture at 12 annas, an estimate which proved to be correct. But, except in the districts of Champaran and Bogra, and in the canal-irrigated portions of the district of Shahabad, the estimated outturn of the winter rice crop was nowhere above 6 annas in the districts about which anxiety was felt. There was a fairly general, though light, fall of rain in Bihár and Northern Bengal about the middle of February, but this rain was generally too late to do much good to the *rabi* crops. Happily no serious distress requiring the intervention of Government ever made its appearance in the districts of Bogra, Champaran, Shahabad, and Gaya. In Bogra, which was one of the districts considered likely in 1873-74 to be the severest sufferers, about one-third of the normal area had not been planted at all with winter rice for want of water at the time of transplanting. But the rain which fell in this district in September improved the prospects, and a 10-anna crop was obtained. The outturn of the *bhadoi* crop having been over 16 annas, there was no actual distress. The price

of common rice averaged 12 seers 11 chittaks, and test works opened at three places in the beginning of March, 1892, attracted very few labourers, and were closed on the 9th April. In Champaran the estimated average outturn of the winter rice was 10 annas, but, the *rabi* having generally failed, it was feared that there would be some distress among the labouring classes. In the Kesairi thana of the Sadar sub-division, the worst part of the district, test works were opened in June, and 516 persons attended on the 4th, and 490 on the 5th; but heavy rain fell on the night of the 5th, and, very few persons having come to work on the following morning, the works were closed on the 7th. In Shahabad, a great part of the district is protected by the Sone Canals; irrigation produced a magnificent rice crop and was extended to a much larger area of *rabi* than had ever been previously watered; still some anxiety was felt for the Bhabhua sub-division, especially the Chainpur and Mohania parganas, comprising an area of 1,000 square miles, and distress was also apprehended in a portion of Chausa (Buxar). In the Bhabhua tract, where population is sparse, the *bhadoi* outturn was estimated at 4 annas, and the winter rice from 1 to 8 annas. But the *rabi* yielded from 8 to 12 annas, and there were eventually no symptoms of distress. The improvement in this sub-division was attributed chiefly to the rainfall, such as it was, in February, but was to some extent the result of embanking a hill stream called the Dargaoti, to which Government contributed Rs. 2,000. By this means a considerable area of country was irrigated, and a fine *rabi* crop secured. In the Buxar tract also the danger was averted by the outturn of the *rabi* crop, which was estimated at 10 annas at least. The position of Gaya was at one time more alarming, the worst parts of the district being half of the Aurangabad thana, and a portion of the Jahanabad sub-division, out of the reach of canal irrigation. The outturn of the winter rice was only 5½ annas, and that of the *rabi* crop varied from six to eight annas. From March to June, 1892, the price of common rice varied from 12 to 10¾ seers, and that of wheat from 15 to 13 seers, for a rupee. Test works were opened in different places from time to time, but the population nowhere availed themselves of the opportunities of obtaining work, although in one case a daily wage of 2 annas was offered. The explanation is that relief was effectually provided by agricultural works of improvement and by the advances made to carry them out. Up to 31st March, 1892, Rs. 35,000 were granted under the Land Improvement Loans Act, and Rs. 12,000 under the Agriculturists' Loans Act, and from 1st April to the end of June, 1892, the advances under these Acts amounted to Rs. 12,950 and Rs. 1,396 respectively. In Gaya there is an excellent system of catching the surface rain water, and leading it by channels into shallow reservoirs held up by earthen embankments. To carry out this method of irrigation a large amount of earthwork is required, and, with the advances made by Government, there was no dearth of employment. The effects of the scarcity were felt among the classes not accustomed to severe manual labour; the number of beggars increased, and a tendency was noticed among the poorer classes to abandon their helpless relatives and dependents, but private charity met all the necessities of the case, and the Mahant at Bodh Gaya is reported to have given alms to all applicants.

The districts where relief operations were actually carried on for any length of time were Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea and Dinajpur; and of each of these a detailed account is given below.

Muzaffarpur.

3. The tracts which suffered most in 1892 in the district of Muzaffarpur were the Lalganj thána of the Hajipur sub-division, and the Belsand and Shiuhar thánas, *i.e*, the south-western part of the Sitamarhi sub-division. There was also considerable distress in a tract to the west of Muzaffarpur between Paru, Sahibganj, and Bamraj, and in parts of the Katra and Muzaffarpur thánas in the Sadar sub-division. The outturn of the *bhadoi* of the year 1891 had been excellent, being estimated at 16 annas in the Sitamarhi and Sadar sub-divisions, and 14 annas in the Hajipur sub-division. Up to the middle of September of that year the prospects of the winter rice also were good, but from that time the crop began to be affected by want of rain, and to wither on the higher

lands. Early in October the reports became less favourable, and eventually the crop gave an outturn of 7 annas in the Sitamarhi sub-division, and of 5 annas and 3 annas in the Sadar and Hajipur sub-divisions respectively. In the Hajipur sub-division the rice crop is not important, but the *rabi* too failed, the estimated outturn for the district being 2 to 3 annas. Happily the northern part of the Sitamarhi sub-division, which had been the chief seat of distress in 1888-89, escaped entirely, being saved by the plentiful *bhadoi* crop, and the winter rice, the most important crop in this tract, was comparatively good. In March 1892, the Pupri thána of the Sitamarhi sub-division gave some cause for alarm, which, however, was never realised. When the distress was at its highest in May, the total area affected comprised 1,300 square miles, with a population of 1,173,785 persons. There was no lack of food in the district, and the imports and exports of food-grains by rail from the beginning of April to the middle of July 1892 were 1,52,438 maunds and 32,521 maunds respectively. Imports were largest in May and June, and exports increased as soon as the advent of the rains revived the confidence of the trading community. A comparative statement of prices of the principal food-grains for this as well as the other districts is given in Appendix II to this Resolution.

Relief works were opened in the first week of March, and the largest daily average number of persons employed was 14,147 (10,760 men, 1,568 women, and 1,819 children) in the week ending 4th June. From the second week of June the numbers steadily decreased until the works were finally closed on the 11th July, when field work became abundant. The relief operations have resulted in several valuable additions to the district communications. Many cart tracks, which were almost impassable in the rains, have been converted into raised roads of serviceable breadth. An embankment which protects the town of Muzaffarpur has been extended and strengthened, and the excavation of 17 tanks has been completed. A special feature of the relief operations in this district is that there were very few C class labourers, and no gratuitous relief was distributed. The average quantity of earth-work done by each labourer in one day was also large, being 92 cubic feet, and the average cost per 1,000 cubic feet, with a lead under 50 feet, was Re. 1-3-6. Mr. J. H. Bernard, who was Collector during the greater part of the relief operations, has recorded his opinion, based upon practical experience, that one rupee per 1,000 cubic feet with a short lead would be a sufficiently liberal rate for earth-work.

During the period of distress Rs. 25,616 were distributed as loans under the Agriculturists' Loans Act, and Rs. 200 under the Land Improvement Loans Act.

No death from starvation was reported or is believed to have occurred, though it may be accepted as a truism that it is likely that distress hastened the deaths of those who were already feeble from illness and old age.

In this district no private individuals assisted Government by opening relief works, but several indigo-planters rendered valuable service in supervising relief works, and also in the distribution of loans, which obviated the necessity of employing a large number of circle officers, and thus saved Government a considerable amount of expenditure on account of establishment. Their local knowledge was of the greatest assistance to the district authorities, and the punctuality and completeness with which they carried out instructions and sent in returns were most satisfactory. The Lieutenant-Governor desires that the thanks of Government may be conveyed to each of these gentlemen. Mr. A. Forbes was Collector of the district at the commencement of the relief operations, and was succeeded on the 17th May by Mr. J. H. Bernard. The latter has brought to the favourable notice of Government the good work done by Mr. E. V. Levinge, Sub-divisional Officer of Sitamarhi, and by Mr. L. F. Morshead, Sub-divisional Officer of Hajipur. Mr. G. W. Disney, as District Engineer, had immediate charge of the relief works, and by his knowledge of the district and able management rendered great help to the Collector.

Darbhanga.

4. The effects of the drought and consequent scarcity were more acutely felt in the Darbhanga district than elsewhere. The affected tracts were the Roserah and Bahera thánas, and a small portion of the Darbhanga thána to the east of the Darbhanga town in the Sadar sub-division; the Benipati and Khajauli thánas,

the northern half of the Madhubani tháná and parts of the Phulparas tháná, in the Madhubani sub-division. The Khajauli tháná formed a part of the tract along the Nepal frontier, 90 miles in length, which suffered severely in 1888-89. These tracts, comprising in all 1,185 square miles, or about one-third of the total area of the district, are especially liable to famine, as they depend mainly on the winter rice crop. The outturn of the *bhadoi* crop of 1891 was 14 annas and 12 annas in the Sadar and Madhubani sub-divisions respectively, but this crop covers a comparatively small area. The winter rice crop of 1891-92 on the high lands was a total failure over the greater part of the district, and the outturn of the crop was only about 5 annas in both sub-divisions. Enquiries made in various places, however, tended to show that there were stocks of grain in the district, and from April to July 1892, inclusive, 3,02,622 maunds of food-grains were imported into the district, and 75,529 maunds exported, by rail. No difficulty was at any time experienced in providing supplies of food for the labourers on relief works. The statement given in Appendix II to this Resolution shows how remarkably little the prices of food-grains fluctuated. During the period of eight months common rice varied only between 14 seers per rupee as a maximum and 12 seers per rupee as a minimum. When the distress was at its height in May and the beginning of June, the highest price of *marua* (*eleusine corocana*), the staple food of the lower classes, was 17 seers 9 chittaks per rupee. As the normal price of this grain at that time of the year is about 25 seers the rupee, the ruling rate of the bazar indicates no great pressure. The observation is probably correct that it was a famine of money and not of grain, for those who suffered were the labouring classes for whom there was no work and the petty cultivators who, in ordinary years, live on the produce of their fields, eked out with labour paid for in kind in preparing the lands of wealthier raiyats.

The distressed tracts were divided into seven circles, viz., Benipati, Murukhia, and Bheja in the Madhubani sub-division, and Salehpur, Bahera, Hati, and Buchauli in the Sadar sub-division. The first works, consisting of three tanks, were opened in the Bheja circle (at first called Nawada) in the beginning of March. The Murukhia circle (at first called Katowna) was opened on the 14th March. In the Sadar sub-division operations were commenced on the 28th March, and by the beginning of April all the circles were at work except Benipati, which was opened on the 16th May. The distress in this circle was never so severe as elsewhere, and the task of Government, including the District Board, was lightened by measures taken by the Maharaja of Darbhanga, who owns a large portion of the land in the Benipati tháná. Fears were entertained in May that the numbers of people on relief works were becoming so large as to exceed the capacity of the District Officer to organise them properly. Mr. D. R. Lyall, C.S.I., member of the Board of Revenue, paid a visit of inspection to Darbhanga, and his report satisfied the Lieutenant-Governor that the control over the masses of labourers was fairly efficient and that a good return was being obtained for the wages paid. The highest number of labourers, employed on the 11th June, was 47,452 (36,015 men, 6,162 women, and 5,275 children), but the rate of Re. 1-6-6 per 1,000 cubic feet of earthwork then allowed was suspected to have attracted a large number of professional diggers, such as *nonias* and *beldars*, and was reduced to Re. 1, the rate then prevailing in the district of Muzaffarpur. Consequently, by the 18th June the numbers had fallen to 25,815, and by the 2nd July to 12,89[illegible]. This may be ascribed partly to the reduction of the piece-work rate, and partly to the rain which, about this time, began to fall and induced the people to return to their ordinary occupations in the fields. The number of labourers continued to decrease, and circle after circle was closed until on the 19th of July there was no relief work open in any part of the district. More difficulty was experienced in this district, by reason of the greater numbers involved, than elsewhere in the organization of the labourers employed on relief works. As a matter of fact, the distinction between classes A and B, *i.e.*, labourers paid by piece-work and those paid by task-work, respectively, was observed only in the Murukhia circle, and there was no difficulty in arranging for two classes only, A (labourers at piece-work rates) and C (persons capable of very light work and paid by daily wages), the people classed by the overseers as B themselves

preferring to work in class A. The intention of Government is that class B should be confined to those who are unaccustomed to earth-work, or are temporarily enfeebled by want, and that as soon as they grow strong and skilful enough to earn a full wage by piece-work, they should be transferred to the A class. As the District Engineer, Mr. H. W. Stevens, has reported, two classes, A and C, are practically sufficient, and in this district the stage of distress was never reached at which the permanent maintenance of an intermediate class was required.

The relief works carried out consisted of tanks and roads. Altogether 67 tanks have been dug at an actual cost, excluding establishment and other charges, of Rs. 94,310, the total quantity of earth excavated being 39,952,124 cubic feet. The total storage capacity of the tanks for water is 47,433,825 cubic feet, which would irrigate 19,764 bighas with two inches of water, and Mr. Dalton considers this enough to save the rice crop in the event of its being endangered by any future failure of the October rains. Work was taken in hand on 994 miles of road, of which 582½ miles have been finished, the total amount of earthwork done being 81,986,820 cubic feet, at a cost of Rs. 1,00,902, exclusive of establishment, the average rate per thousand cubic feet being Re. 1-3-8.

Gratuitous relief was found necessary only in four circles—Bheja, Murukhia, Salehpur, and Bahera. In Bheja and Murukhia, where this form of relief was commenced towards the latter end of April, there was, however, no great demand for it. In the Salehpur and Bahera circles gratuitous relief had to be given on a large scale. In these circles, respectively, the average number of recipients of such relief was 357 and 147 daily. The attention of the local officers was at first directed chiefly towards the northern and southerly circles of the district; the country about Bahera and Salehpur was not believed to be in so much danger; relief works were not opened in these circles till the beginning of April, and the regular distribution of gratuitous relief was not commenced till the 15th of May, when many persons of the most indigent classes had been weakened by insufficient food. The largest number in receipt of gratuitous relief, viz. 1,550 (248 men, 692 women, and 610 children), was reached in the week ending 28th May, and this form of relief was finally closed on the 23rd July. The total amount expended on gratuitous relief was Rs. 1,577-5-10, which was more than covered by the following contributions:—

		Rs.
Maharaja of Darbhanga, Rs. 500 a month for three months	...	1,500
Raja Rameshwar Sing	...	500
Rai Ganga Prasad	...	500
Total	...	2,500

C class labour being only another form of gratuitous relief, the Lieutenant-Governor approves the Collector's proposal that, when the final adjustment of accounts is made, this amount should be set off against the combined cost of gratuitous relief and C class labour.

As few individuals of the better classes received gratuitous relief in this district, there was little scope for successful efforts in the direction of obtaining some return for the weekly dole. A small amount of cotton-spinning was done by some *parda-nishin* women in the Bahera circle. The quantity of cotton spun was sold for Rs. 33-6, leaving a small profit to the famine account.

There was a great clamour for agricultural loans, which was not confined to the affected area, and it is a question whether many of the applicants did not contemplate lending the money again at higher interest. Of 2,186 applications received, all except 349 were rejected, and, in accordance with instructions given by Government, loans were restricted to the affected area and limited ordinarily to Rs. 2 per bigha. The advances made amounted to Rs. 11,880 in the Sadar and Rs. 19,992 in the Madhubani sub-division. There is no doubt that these loans enabled many of the poorer among the Brahman and Rajput cultivators to afford employment to a considerable number of labourers, and no lands anywhere lay uncultivated for want of either seed or labour.

There was no authenticated instance of a person previously enjoying average health and strength having died from inanition, but in Darbhanga, as in Muzaffarpur, the Collector heard of cases of old men and women dying, whose death was in all probability accelerated by insufficient nourishment. During the period of scarcity cholera was raging in the district, and some deaths, reported to be from starvation, were found on enquiry to be due to that disease.

The Maharaja of Darbhanga afforded material aid in the relief of distress. Besides paying a total contribution of Rs. 1,500 towards gratuitous relief, as already mentioned, he opened four tanks in May in the Raj circle of Rahika in which Benipati is situated, and instructed his sub-manager to attend to individual cases of want. He also provided four doctors for the treatment of the sick in the affected tracts, gave advances to his raiyats, and distributed a large quantity of seed *dhan*. The Lieutenant-Governor has much pleasure in recognizing the valuable assistance which the Maharaja of Darbhanga afforded to Government.

Mr. G. J. B. T. Dalton was Collector of Darbhanga throughout the period of distress, and though in bad health, never spared himself in the most trying weather. The works were directly under the District Engineer, Mr. H. W. Stevens, whose long acquaintance with the district was of much service in the relief operations. Mr. A. E. Harward was engaged during part of the time in visiting the distressed areas and reporting on the works.

Monghyr.

5. In the district of Monghyr anxiety was felt chiefly for a low tract of country in the Sadar sub-division on the north of the Ganges, extending to the boundaries of the districts of Bhagalpur and Darbhanga. Local exaggerations at the outset created a wrong impression of the real state of affairs. Ultimately Government relief operations were found necessary only in the extreme north of this belt, within the jurisdiction of the Bakhtiarpur outpost of the Gogri thána, which was a relief centre in 1874. The recollection of that year was still fresh among the people, and led to some apathy on their part, as they fancied that Government would again interfere with trade and import grain in large quantities. Mr. C. E. A. W. Oldham, Assistant Magistrate, was in charge of the relief operations. The distress in the tract affected was accentuated by the extreme poverty of the population in all seasons, the sandy nature of the soil over the greater part of the area, and the failure of the rains for two successive seasons. In 1891 the *bhadoi* outturn in the Gogri thána was only a four-anna crop, the yield of the following winter rice in Bakhtiarpur was about four annas, while the *rabi* crop of 1891-92 may be estimated at three annas. No figures are available as to the movements of food-grains in this particular tract, but the figures for the whole district, from the middle of May to the middle of August, show 1,43,059 maunds exported and only 28,303 maunds imported by railway.

Work was opened on two roads on the 7th February, but failed to attract persons in need of relief, as would have been the case if there had been real distress, till the latter end of May, when the excavation of some tanks in the extreme north of the district was started with the result that there was a sudden rush of labourers. It is believed that the people of the affected tract at first had recourse to the relief works in the Bhagalpur district, which were very close, and came back when tank work was started on the Monghyr side of the border. The Lieutenant-Governor does not feel sure that the real cause of the low numbers in April and May has ever been ascertained, but though close enquiry was made, nothing was found to raise a suspicion that the works were badly managed and that the labourers did not receive a fair wage for their work, though certainly the average outturn of work was very small. Mr. Vowell, as Collector of the district, visited the relief works on the 3rd July, and is stated to have been of opinion that tank work tended to relax discipline, which could be better exacted along a line of road. The Lieutenant-Governor does not understand why this should be the case, and considers that, within the comparatively small area of a tank, supervision can be exercised better than over a line of labourers stretching along several furlongs of road. But, as observed by Mr. Quinn in his report on the district of Bhagalpur, the

labourers may secure some special, and probably illegitimate, advantage in tank work; this, however, should be prevented to a great extent by close supervision and strict measurement.

The highest average attendance on relief works was reached in the week ending the 2nd July, when the average daily number was 1,815 (1,060 men, 500 women, and 255 children). The rains set in from the beginning of this month, and by the middle of it the situation was so far relieved and the prospects of the *bhadoi* crop were so assured that the labourers rapidly dwindled away and the works were closed on the 23rd. The works undertaken consisted of three tanks, and the raising of five, and construction of two roads, of which only the tanks were finished. The rate during the first week or two was 1½ annas per 100 cubic feet to males, and one anna to females for a corresponding task. Subsequently the rate was lowered to 1¼ annas for males. In Mr. Oldham's opinion this rate was not the least too high, and afforded as perfect a test as possible. Gratuitous relief was commenced in the latter part of February, and was continued till the 20th August, *i.e.*, a month longer than the works. The highest figure was reached in the week ending 5th March, when 250 persons were relieved. When the Lieutenant-Governor visited this district in the beginning of April, he saw the distribution of relief at Bakhtiarpur, and was pleased with the order and method observed. For the relief of women above the lowest orders, 30½ maunds of cotton were distributed to be spun into thread. The cost of the cotton was Rs. 542-13, and the value of the thread is estimated at Rs. 623, so that there is a probable gain of Rs. 80-13. Loans were confined to cultivators holding from 10 to 30 bighas of land. The total amount distributed was Rs. 19,088. There was no death from starvation, but the officer in charge of the relief operations came upon cases, of destitution, discovered by personal enquiries, in which private charity had failed and state aid had to be given. There is nothing to indicate that the death-rate of the affected tract was in any way increased by the distress. In this district, as well as in Bhagalpur and Purnea to a certain extent, two roots, known as *chichar* and *bisaur*, proved a great help to the poorer classes. The former (*cyperus rotundus*) is a bulb somewhat like a very small potato, growing in low-lying swamps, and the latter is the root of an aquatic plant. Mr. Oldham has described how in every village a crowd of women and children might be seen digging up these roots and drying them for food, and he calculates that about 5,000 people were living more or less entirely on these roots.

The following zamindars came to the favourable notice of Government for their considerate treatment of their raiyats and their willing co-operation with the officials in the administration of relief:—Maharaja Ravaneswar Prasad Singh Bahadur of Gidhour, Babu Lachmi Prasad Singh of Saharpara in the Beguserai sub-division, Babu Kamaleswari Prasad of Monghyr, Babu Tarini Prasad and Chaudhri Mahbub Ali of Bakhtiarpur. They helped their raiyats by providing employment chiefly on irrigation and protective works, as well as by showing consideration in other ways. The estates of these proprietors, except the last, lie outside the Bakhtiarpur outpost where the Government relief operations were carried on; but there was quite sufficient pinching among the raiyats and labouring classes in the south of the district to afford scope for the benevolence of the zamindars The Lieutenant-Governor appreciates the value of the services rendered by the gentlemen above-named, and desires that the thanks of Government may be conveyed to them in suitable terms.

Mr. R. M. Waller was in charge of the district until the 25th June, when he was succeeded by Mr. C. H. Vowell. During the latter's absence on short leave, the final report of the scarcity and relief was submitted by Mr. C. E. A. W. Oldham, who had been locally in charge of the relief operations, assisted by Babu Annada Charan Gupta, Sub-Deputy Collector.

Bhagalpur.

6. Three tracts were specially affected in the district of Bhagalpur. The first was a small area on the northern frontier of the district, lying west of the Birbandh; the second lay immediately round Supaul. In these tracts, each extending over an area of about 20 square miles, the distress was never very acute. The third tract of about 400 square miles was by far the largest and most seriously

affected. It extended from the Darbhanga boundary through the Bangaon thana of the Supaul sub-division and the Sadar thana of the Madhipura sub-division. The worst parts were those west of the Dimra, along the Darbhanga boundary and in the corner between Darbhanga and Monghyr. The three tracts together comprise 485 square miles, with a total population of 283,000. The Collector, Mr. Wace, who conducted the relief operations from February to May, was of opinion that the area affected was much larger, and the failure of each crop in it worse, than in 1888-89. The outturn of the *bhadoi* crops of 1891 was estimated by the local officers at only 3 or 4 annas in the affected tracts. An equally low estimate was formed of the winter rice crop in the affected parts, and it is stated that in the Bangaon thana the failure of this crop was all but complete, and that the yield of the *rabi* crops was less than 3 annas. But throughout the worst period the exports of food-grains by railway considerably exceeded the imports, the figures furnished for the months of December 1891 to August 1892, inclusive, being, exports 2,34,885 maunds, and imports 65,688 maunds (including 3,834 maunds of potatoes). This comparison shows that, though the food-stocks of the poorer classes were to a great extent depleted, while they stood in need of help in the shape of wages or loans to buy fresh supplies, the general store in and about the affected tracts was sufficient for local requirements. It has also been inferred by the Collector that the grain required for the food of the people in North Bhagalpur is very small in comparison with the quantity produced in normal years; for, although there was a failure of over 75 per cent. of the three principal crops, the prices, in spite of the quantities of grain exported, never reached famine point.

Work was first opened in the latter end of January on the Rajanpur embankment, in the Supaul sub-division, but was mismanaged, the work actually done being much too little and the wages paid too high. This was therefore no proper test of distress. Some tanks were taken in hand in February in both sub-divisions, but the relief operations cannot be said to have fairly commenced till the beginning of March; by the middle of that month 1,376 people were at work on them. Mr. H. R. H. Coxe, who succeeded Mr. Wace, reports that the first half of May was the most anxious time of the whole period of distress; there was hardly any rain, and it appeared probable that the young crops would wither, and that the rain would not come in time to allow the *bhadoi* rice to be properly sown. Rain, however, began to fall towards the end of May; the situation was then completely changed, and by the end of June the severity of the distress had passed. The daily average number of persons on relief works was highest in the second week of June, being 12,370 (6,333 men, 4,083 women, and 1,954 children); the numbers then declined owing to the vigour with which agricultural operations were carried on, and the excellent prospects of the crops, but it was not found possible to close the works finally till the 20th August, when the *bhadoi* rice came into the market. The works completed include one embankment, 26 tanks, and 10 roads. The Commissioner remarks that the fact that the value of the work done calculated at the normal rates considerably exceeds the amount expended in wages is evidence of good organization and supervision.

Gratuitous relief was not organised so soon in Bhagalpur as in other districts; the intention at first was that those who required such assistance should receive it at the works. A regular distribution of doles was commenced in the end of April, and closed in the third week of August simultaneously with the close of the relief works. The highest number of persons in receipt of gratuitous relief was 1,527 (399 men, 799 women and 329 children) in the week ending 23rd June. The recipients of gratuitous relief were in return required to spin cotton and, subsequently, to make string out of *sawai* grass. At first some pressure was required to get the work done, but, when the system was in full working order, it did not result in as large a diminution of attendance as might have been expected, thus showing that those who were not entirely helpless had by that time been more or less eliminated from the register.

The total sum advanced as loans was Rs. 37,180, of which the bulk was distributed between the middle of April and the middle of June.

There were no deaths from starvation, and it is evident that the distress never reached such a degree of intensity as to influence the death-rate materially.

The Lieutenant-Governor notices with great satisfaction the important part played by private relief in this district. The greatest assistance was given by the Maharaja of Sonbarsa, who spent Rs. 10,000 on the construction of a road, and excavated two large tanks. He has been made a Companion of the Order of the Indian Empire in recognition of his good services rendered on this occasion. The Maharaja of Darbhanga, who owns property in the tracts affected, spent Rs. 4,000 on tanks and Rs. 10,000 on advances, in addition to the expenditure incurred by him in the district of Darbhanga. Babu Ganput Singh distributed charitable aid and gave employment to labourers in the pargana of Harawat at a cost of about Rs. 5,000. He also made advances to cultivators to an almost equal amount. The Banaili Raj spent about Rs. 2,000 on relief works, and Rani Sitabati, Raja Padmanand Singh, and Babu Janardhan Singh of Barail each gave Rs. 1,000 in charity, the last-named gentleman devoting his own time and services to the distribution of his charity in accordance with the principles adopted by Government. Babu Tejendra Narain Singh distributed about Rs. 5,000 in the relief of distress. The total sum thus contributed towards the relief of distress was about Rs. 47,000, and His Honour desires that the thanks of Government may be conveyed to the donors individually for their liberality and public spirit. Sir Charles Elliott's thanks are due also to Mr. H. D. Christian, an indigo-planter of Bangaon, whose charge of the relief work near his factory took the place of official supervision. Mr. Maguire was officiating as Collector when the first measures for the administration of relief had to be taken: he was succeeded in February by Mr. Wace, who thoroughly organized the system to be followed and was in charge until 28th May, when Mr. Coxe relieved him. The Sub-divisional Officers of Supaul and Madhipur, respectively, were Babu Surya Kumar Sen and Babu Purna Chandra Gupta.

Purnea.

7. The area of actual distress in Purnea lay within well defined boundaries in the Kadwa and Amour thánas of the Sadar sub-division, and comprised in all 644 square miles, with a total population of 261,770 souls. The greater severity of distress in the Amour thána as compared with Kadwa is ascribed to the fact that the former is not so favourably situated as regards supplies as the latter, through which the railway runs with two stations, Katihar and Sonali, within the thána. The *bhadoi* crop of 1891 in the Sadar sub-division was estimated to have given an outturn of 6 to 12 annas. This was followed by a very poor winter rice crop in 1891-92, the estimated outturn in the affected tracts being only 2 annas, while the *rabi* ultimately yielded from 5 to 6 annas. The stock of food-grains had been much reduced by heavy sales in the previous year. This is borne out by the fact that there was no exportation of food-grains from the affected thánas, while between January and August about 1,76,090 maunds were imported from North Bihár, Bhagalpur, Malda, Bolepur and Nepál (until the Government of the country last-named prohibited exports). Numerous conflagrations occurred also, caused, it is said, by labourers with a view to stimulating the demand for labour. Some increase in crime also took place, attributable to the scarcity.

In this district relief was commenced about the same time as in Bhagalpur, and closed earlier than elsewhere, work having been opened on the 27th January and finally closed on the 28th May. The laying out of the works and the organization of labour were carefully carried out, but for a long time there was difficulty in exacting sufficient work from the labourers. Their numbers were too large for the officers available to supervise. This was noticed by the Commissioner, Mr. C. C. Quinn, early in March, and the introduction of the piece-work system under his orders effected some improvement in this respect from the latter end of the month; but the work done by each labourer continued to be very small till towards the end. In explanation of this, he states that the people of Purnea have never shown much aptitude for road work, and that the classes employed on the works were

enfeebled by fever which was very prevalent at that time. The cost of 1,000 cubic feet of earth work was at first so high as Rs. 6-2-5, and was gradually reduced to Re. 1-6-2 as better supervision was secured. The normal rate of cost in the district is Re. 1-12 to Re. 1-14 per 1,000 cubic feet. The highest daily average number of labourers employed was 4,826 (3,207 men, 917 women, and 702 children) in the week ending 12th March. Towards the end of April some 1,000 persons left the works on the introduction of lower rates of wages. About this time there was a sufficient fall of rain, which made work available at better rates elsewhere. Henceforward there was a steady reduction in the number of labourers. The works undertaken consisted of the raising of nine roads, of which three were finished.

Gratuitous relief, which in this district bore a larger proportion to works than elsewhere, was commenced on the 30th January, *i.e.*, about the same time as the relief works, but was continued nearly a month longer, having been closed on the 17th June. The highest number of persons on the register was 1,360 in the week ending 9th April. Some light work in the shape of making string from hemp and thread from cotton was done in return for the weekly doles. The total amount spent on gratuitous relief was Rs. 3,410 (including contingent expenditure of Rs. 211-12-7), of which Rs. 2,380 were borne by private subscriptions, the remainder devolving upon Government.

Enquiries in connection with the distribution of loans were more promptly undertaken in Purnea than in the other districts of the Bhagalpur Division. The advances amounted to Rs. 22,691, of which only Rs. 140 were granted under the Land Improvement Act, and the remainder under the Agriculturists' Loans Act. This form of relief was not, however, confined to the Kadwa and Amour thánas, but was extended to a tract in the Sadar thána, a small portion of Gondwara, and the khas mahal estate Belwa in Manihari. Except in very exceptional cases no loans were allowed to cultivators who owned much less or much more than 20 bighas: the amounts varied from Rs. 2 to Rs. 30.

The rate of mortality was high in March and April, being just over 4 per cent., but this was due to the sickliness of the year. A high death-rate, chiefly caused by fever, had set in long before the scarcity, and continued throughout. There were no deaths from starvation. Mr. C. H. Vowell was Collector of the district during the period of the relief operations; Mr. F. W. Duke, the Joint-Magistrate, was directly in charge of them, and worked with praiseworthy assiduity and energy. The completeness of the report of the scarcity and relief, submitted by Mr. Faulder, as Collector, is appreciated by Government. His subordinates, Maulvi Muhamed Habibullah, Deputy Collector, and Maulvi Shah Muhamad Azam, Sub-Deputy Collector, have been specially mentioned to Government for the performance of their duties. The services rendered by Babu Dharam Chand, a zamindar of this district, who gave loans and remitted rents where necessary, have already been acknowledged by Government.

Dinajpur.

8. Mr. A. C. Tute, by whom the final report has been submitted, has, in the absence of official documents, found difficulty in describing the earlier course of the scarcity and the measures taken to meet it. He assumed charge of the district on the 23rd November 1891; up to that date his predecessor and the District Engineer were in constant communication, but their correspondence was not brought on record. The want of such records must always cause great inconvenience, and the Lieutenant-Governor directs that, when distress is anticipated, and even before it is declared to exist, all the initial stages and steps taken should be carefully recorded for future reference.

The district of Dinajpur depends for its food-supply almost entirely on the winter harvest. The autumn rice is ordinarily a little over one anna of the whole produce, or about one-twelfth of the winter rice, while the *rabi*, which consists chiefly of oil-seeds, is of importance only as a money-producing crop like jute. The area affected in this district lay north of the Dinajpur branch of the Northern Bengal State Railway, extending over 1,030 square miles, with an estimated population of 447,000 persons. It comprised Western Thakurgaon, Ranisankoil thána, a part of the Pirganj thána in the Thakurgaon

subdivision, the Hemtabad thána, excluding Raiganj outpost, and a part of the Birganj thána in the Sadar sub-division. The tract lies between a line drawn from Birganj to Pirganj and the Railway. In this area there were bumper crops of winter rice and jute in 1890-91, the outturn of the autumn rice of 1891 was about 11 annas, and the yield of the winter rice of 1891-92 was estimated at three annas. As the ordinary condition of the people of Dinajpur in regard to the means of subsistence is distinctly above the average of Bengal, the distress in this district was never so acute as in Bihar. The Commissioner twice offered to find very remunerative work on the Duars Railway for the people of the tract where the failure had been greatest, but no one cared to migrate for this purpose. On the other hand, the villagers, who during the scarcity worked on roads for about half the current rate of wages, ordinarily decline such work on any terms, leaving it to immigrants from Bihar. This shows that, although the pressure never passed a certain point, there was unusual dearth of employment. No precise figures have been furnished by the Collector as to exports and imports, but it appears that from the district, as a whole, there was steady exportation to other districts, and that there was some importation of food-grains into the affected tracts from the south of the district. In Appendix II to this Resolution a table is given showing the prices of common rice which is the staple food of the district. But, as the Collector observes, as Dinajpur is a large exporting district, and two railways run through it, local prices are not governed by the quantity of grain stored in the district which would be available in a year of famine, but by the prices ruling in Calcutta or elsewhere, and are not therefore an infallible test for guidance. The ordinary cultivator always keeps a year's stock in hand before he sells anything, and is not affected by the prices ruling in the market until his stock is exhausted, when it is possible that he may have no money to buy, whatever the price may be.

About the 7th November, 1891, some relief works were opened in the extreme north of the district, and a daily wage of 3 annas was fixed, this being three-fourths of the ordinary rate in the district. In the course of a few days it came to light that the labourers would do no work, and Mr. Tute, soon after he had taken charge of the district, passed orders for strict task-work, which had the effect of closing the works altogether. The test applied by these works showed that an exaggerated idea had been formed of the distress then perceptible in the district. Mr. Tute stopped the preparation of formal lists of persons to be relieved, as improper claims for relief were advanced, and took other steps to allay the panic which prevailed at the time. He also noticed that the people were under the impression,—an idea fostered by persons who intended to profit by the situation,—that Government was going to stop exports and interfere with trade. He accordingly convened a meeting of all the traders in Raiganj, and told them that even if they brought out all their rice and burnt it he would not interfere. The opening of relief works was ultimately rendered necessary by the absence of the winter rain required to save the very large area sown in *rabi*. Relief works were opened in January, but there were no large numbers at work till about the middle of February, when the *rabi* had perished and the prospects of the *bhadoi* became gloomy. Heavy rain began to fall on the 16th March and changed the whole situation. The highest daily average number of labourers employed was 2,406 (1,995 men, 231 women, and 180 children) in the week ending 7th May. The number then gradually diminished until the works were closed on the 2nd July. During this period the rates of payment for labour were constantly regulated so as to prevent people from coming on the works who were not absolutely in need of employment. Work was undertaken on 16 roads and 3 tanks, none of which were finished during the period of distress.

No gratuitous relief was found necessary till after the close of the works, when, of the labourers who remained at the works till the last moment, about a dozen widows were found fit objects for charity. These women were taken care of until they were handed over to their zamindars, and the total amount spent under this head was Rs. 3-15. It was a satisfactory feature of the situation that the helpless poor were looked after by their zamindars, and in this respect all the zamindars in the district did their duty loyally, so that at no time was there an influx of beggars or cripples at the Government centres.

Several small *jotedars* (cultivators), who in ordinary years would have been helped by their mahajans, were at first refused assistance by them. They were in danger of having to sell their cattle and thus be deprived of the means of cultivating their fields. Steps were promptly taken to grant loans, and no sooner had a sum of Rs. 4,540 been thus advanced, than the mahajans and zamindars, knowing that the repayment of a Government loan would be a first charge, came forward, and thus the class of *jotedars* who might otherwise have suffered never came on the relief works at all. The total sum advanced was Rs. 5,838. There were no deaths from starvation. Mr. Tute makes the following deductions from the operations carried out, with which the Lieutenant-Governor desires to express his full concurrence:—

1st.—One year of scarcity will not cause a famine in this district. It may, and probably will, necessitate helping landless labourers to some extent, but as long as a *jotedar*, who cannot cultivate all his own land, has the means to do so, he will employ landless labourers;

2nd.—takávi loans are the best form of relief for small *jotedars* when mahajans refuse to lend; otherwise they are unnecessary. The issue of such loans has the effect of bringing out the mahajan's money, and the raiyats prefer dealing with him to dealing with Government for loans;

3rd.—in a year of scarcity like this, the zamindars of the district, if properly appealed to, are able and willing to cope with actual starvation and provide for the helpless;

4th.—the people of this as of all other districts are very easily demoralized, but are able to perceive that exceptional measures will not be taken solely because interested people desire them.

The Lieutenant-Governor desires to acknowledge Mr. Tute's judicious and efficient management of the scarcity and relief administration from almost the beginning to its close. Mr. Tute has brought to the notice of Government the services rendered by Babu Atul Krishna Mukharji, the District Engineer, who was indefatigable in visiting the works, watching their progress and controlling expenditure. The zamindar of Churaman is the only local resident specially mentioned for his charitable actions, but all the zamindars are said to have done their duty to the helpless and the poor.

---

9. Appendix III to this Resolution shows the progress of the relief operations in each district week by week, and in Appendix IV a diagram is given to illustrate the rise and fall of the numbers on relief works. The following is an abstract statement of the principal figures compared with those of 1873-74 and 1888-89 :—

District.	Area of the district in square miles.	Total population of the district.	Number of square miles affected.	Population of the affected area.	Duration of relief operations.	Relief works. Largest number of labourers employed on any day. Number of labourers and date.	Relief works. Percentage on population, column 5.	Relief works. Total amount disbursed as wages.	Gratuitous relief. Largest number relieved on any day. Number relieved and date.	Gratuitous relief. Percentage on population, column 5.	Gratuitous relief. Total amount disbursed.	Advances. Under the Land Improvement Loans Act.	Advances. Under the Agriculturists' Loans Act.	Advances. Total.	Advances. Per 100 of population: percentage of column 15 on column 5.

* Includes 117 square miles affected by floods outside the drought-stricken area in the district of Champaran.

10. The Lieutenant-Governor considers that in each district the necessities of the case were fully met by the measures taken. No poor-house relief or suspension of land revenue was found necessary at any stage of the distress. As far as is known, there were no deaths from starvation, and the people generally were as fit to work and as strong as they ever were, and the works carried out were sufficient to afford employment to those who required it. At the earlier stages there was a tendency to give too high wages, but as time went on, and experience was gained, they were sufficiently reduced to render the works attractive only to those who were really in need of relief. His Honour wishes to place on record his appreciation of the services of the Commissioners* and District Officers concerned, all of whom, during a trying period, loyally carried out the orders of Government and acquitted themselves to his entire satisfaction.

* Mr. D. R. Lyall, C.S.I. } Patna.
Mr. A. Forbes.
Mr. C. C. Quinn. Bhagalpur.
Mr. P. Nolan. Rajshahi.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that copies of it, bound up with copies of the final reports, be forwarded to all Commissioners of Divisions and submitted to the Government of India.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

FINANCIAL RESOLUTION.

FINANCIAL DEPARTMENT—FINANCE.

Calcutta, the 27th December 1892.

RESOLUTION—No. 5191F.

IN the Resolutions of the 17th April and 26th October 1891, the general results of the five years' Provincial contract of 1887 were briefly reviewed. This review was based upon the revised estimates of 1890-91 and the budget estimates of 1891-92. The Accountant-General's memorandum on the accounts of the former year has since been received, and although the accounts of the latter year have not yet been finally closed, the Appropriation Report for the year, furnishing approximate results, is sufficient for all practical purposes. A new contract has now been concluded for another five years, and materials are available for reviewing the Provincial finances during the period of the expired contract. The figures of the revenue and expenditure of the first seven months of the current year have been received from the Accountant-General, and these afford sufficient data for a revised forecast of the probable position of the province in the first year of the period upon which it has now entered.

PART I.—ACCOUNTS OF 1890-91.

2. The actuals of 1890-91 furnished by the Accountant-General in his memorandum on the accounts of the year are compared in the following table with the revised estimate adopted in the Financial Resolution No. 4501, dated the 26th October 1891 :—

5,19,63,000	5,14,84,207	Total ..	5,22,63,000	5,26,87,980
36,77,000	36,76,547	Opening balance ...	......	......
......	......	Closing balance ...	33,77,000	24,72,774
5,56,40,000	5,51,60,754	GRAND TOTAL ...	5,56,40,000	5,51,60,754
		Excess of expenditure over receipts.	3,00,000	12,03,773

3. The revised estimate adopted in the Financial Resolution of the 26th October 1891 assumed that the year 1890-91 had opened with a credit balance of Rs. 36,77,000, and closed with a credit balance of Rs. 33,77,000; that the total amount available for expenditure was Rs. 5,56,40,000, and that Rs. 5,22,63,000 had been spent. The actual result was less favourable than this estimate by Rs. 9,03,773. The amount actually available for expenditure was Rs. 5,51,60,754, and the amount actually expended Rs. 5,26,87,980. The closing credit balance was Rs. 24,72,774.

4. There was a decrease of Rs. 4,78,793 on the Revenue side, of which Rs. 83,707 was under Jails, and this was due to no adjustments being made in the year after the revised estimate had been passed in October last for jail manufactures supplied to other departments, but for which an allowance of a like amount was made in the estimate.

The remainder of the decrease was almost entirely due to the transactions of the Tirhut and Bengal and North-Western Railways. The Government of India have not made any allowance for the loss to the Provincial revenues caused by the transfer of the Tirhut Railway to the Bengal and North-Western Railway Company, for which a credit of Rs. 2,24,334 was taken in the revised estimate. The gross receipts of this railway for 1890-91 and those of the Bengal and North-Western Railway for nine months from 1st July 1890, the date from which the accounts of the two railways have been combined, to 31st March 1891, amounted to Rs. 39,03,251, against Rs. 39,57,547 anticipated in the estimate of October 1891, showing a decrease of Rs. 54,296. The adjustments under Land Revenue on account of the shares of the Company in the net earnings of the Bengal and North-Western Railway for the nine months provided for a payment of Rs. 9,39,000, but the actuals amounted to Rs. 10,49,556, showing a loss of Rs. 1,10,556. The total decrease on account of these transactions thus amounted to Rs. 2,24,334+54,296+1,10,556=3,89,186.

5. The actual expenditure in 1890-91 compared with the revised estimate shows a net increase of Rs. 4,24,980. The fluctuations have been chiefly under (1) Land Revenue (—85,057), (2) Police (+5,72,884) and (3) Working Expenses of State Railways (—71,184).

The decrease under 1) was chiefly under Survey and Settlement charges, which amounted to Rs. 4,16,676 against Rs. 4,90,000, the revised estimate passed by the Government of India. The increase under Police was due to the inclusion of the charges connected with the Chin-Lushai Expedition and the formation of the South Lushai Hills district. In the revised estimate for 1890-91, these charges were eliminated from the Provincial account, as the question of their final adjustment had not then been decided. The decrease under State Railway Working Expenses was in the Tirhut and Bengal and North-Western Railway.

6. The net result of the year, as stated above, was unfavourable to the extent of Rs. 9,03,773, and the year closed with a credit balance of Rs. 24,72,774, against Rs. 33,77,000 anticipated when the revised estimate was framed. The deficit of the year, or the excess of charges over receipts, amounted to Rs. 12,03,773, which was mainly due to a special contribution of ten lakhs paid to the Imperial Revenues in consequence of the financial difficulties of the Government of India, and to a special grant of four lakhs made to the Public Works Department to undertake urgent works, especially to defray the cost of repairs and maintenance of the roads in the Darjeeling district which were much damaged by heavy rains, and the new feeder roads to the railway in Chota Nagpore.

PART II.—APPROXIMATE ACCOUNTS OF 1891-92.

7. The following table compares the approximate actuals for 1891-92 with the latest estimates adopted by the Government of India :—

8. Taking the Civil and Public Works heads together, the Provincial receipts of the year amounted to Rs. 5,78,00,113 against the revised estimate of Rs. 5,69,92,000, and the Provincial expenditure aggregated Rs. 5,78,87,871 against the estimate of Rs. 5,74,65,000. The revised estimate allowed for a special contribution of 3⅓ lakhs from Imperial to Provincial to make up the Provincial balance of 20 lakhs, which under the orders of the Government of India the Government of Bengal is ordinarily bound to maintain. No such grant was, however, necessary, as an unexpected increase occurred in almost all principal revenue heads in the last two months of the year. The main cause of the improvement in the financial position of the province was the increase in the Provincial share of receipts under Railways, as the following statement will show:—

	Estimate passed by the Government of India, 1891-92.	Approximate actuals, 1891-92.
RECEIPTS.	Rs.	Rs.
Eastern Bengal State Railway	70,90,000	68,41,226
Other sections of the Eastern Bengal System ...	43,60,000	46,22,609
Nalhati	90,000	92,353
Tirhut and Bengal and North-Western Railway	48,50,000	48,88,540
	1,63,90,000	1,64,44,728
Deduct—Imperial share of the receipts from Eastern Bengal State Railway (Proper) being excess over 30 lakhs of the net earnings of the Railway	8,25,000	4,05,180
Total ...	1,55,65,000	1,60,39,548
CHARGES.		
Eastern Bengal State Railway ...	32,65,000	34,36,046
Other sections of the Eastern Bengal System ...	28,85,000	28,26,747
Nalhati	60,000	48,177
Tirhut and Bengal and North-Western Railway	42,25,000	41,54,898
Total ...	1,04,35,000	1,04,65,868
Net receipts (Provincial) ...	51,30,000	55,73,680

The charges of the Eastern Bengal State Railway (Proper) amounted to Rs. 34,36,046 against Rs. 32,65,000 passed by the Government of India in the revised estimate. The increase was due to the adjustment of the claim of the East Indian Railway Company for arrear freight on coal amounting to Rs. 2,21,102. This increase raised the expenditure on the broad gauge section to Rs. 34,36,046; and as the receipts on that section fell to Rs. 68,41,226, there remained a surplus of Rs. 34,05,180, of which only Rs. 4,05,180, instead of the estimated surplus of Rs. 8,25,000, passed to Imperial revenues, as the Imperial share was limited to any excess over 30 lakhs of the net earnings of Eastern Bengal State Railway (Proper). Thus, while the gross receipts and charges under Railways exceeded the revised estimates only by Rs. 54,728 and Rs. 30,868 respectively, and the net earnings by Rs. 23,860, the reduction of the Imperial share in these earnings benefited the Provincial revenues to the extent of nearly Rs. 4¼ lakhs.

The revenue derived from the canals classed as Irrigation Major Works amounted to Rs. 16,02,710 against Rs. 14,42,000 provided for in the revised estimate. The excess was due chiefly to larger collections of water-rates.

The heads of revenue and receipts in the Civil Department which chiefly contributed to the increase were Land Revenue (Rs. 58,000), Stamps (Rs. 1,50,000), Excise (Rs. 46,000), Provincial rates (Rs. 1,45,000) and Jails (Rs. 78,000).

9. The total expenditure exceeded the revised estimate by Rs. 4,22,871, and the chief fluctuations are explained below:—

Land Revenue.—The Accountant-General's account showed that the total expenditure under this head amounted to Rs. 41,14,224 against the revised estimate of Rs. 39,50,000. The increase was mainly under Surveys and Settlements which were actively pushed on during the year, and was partly also due to the creation of the Palamau and South Lushai districts.

Law and Justice, Courts of Law.—The actual charges under the heads of (*a*) "Law Officers," (*b*) "Civil and Sessions Courts," and (*c*) "Refunds" exceeded the revised estimates by Rs. 18,000, Rs. 29,000, and Rs. 13,000, respectively. The increase under (*a*) was due to the adjustment of large payments in Calcutta for conducting certain important law suits. The increase under (*b*) was caused by addition to the number of munsifs.

Police.—The revised estimate under this head was Rs. 58,31,000, but the total expenditure amounted to Rs. 59,53,275. The excess was under "Village Police" (Rs. 16,000), "Special Police" (Rs. 64,000), and "Refunds," (Rs. 50,000), the increase under the first head being due to the extension of Act V of 1887 to the district of Lohardaga, and that under the second to heavier expenditure in the South Lushai Hills.

Political.—There was larger expenditure under "Durbar Presents," and the total charges amounted to Rs. 34,505 against the revised estimate of Rs. 12,000. The increase was on account of khilluts purchased for presentation to the recipients of titles sanctioned after the revised estimate had been passed.

Stationery and Printing.—The original budget estimate under this head, amounting to Rs. 10,18,000, was raised by the Government of India to Rs. 13,09,000 on information furnished by the Superintendent of Stationery to meet a large increase of expenditure under "Stationery supplied from Central Stores." The actual charges amounted to Rs. 13,34,909, the increase being due to increased charges on account of rent of godowns and office expenses and miscellaneous, consequent on increased purchases and larger supplies of stationery.

Miscellaneous.—There was an increase of expenditure under "Donations for charitable purposes" (Rs. 25,000), due entirely to the larger payment on account of the contribution to the Calcutta Female Nurses' Institution made at the close of the year, and under "Miscellaneous and unforeseen charges" (Rs. 54,000), chiefly on account of the irrecoverable balance of embankment advances made in the district of Muzaffarpur from 1877 to 1882, amounting to Rs. 42,000, written off under the order of Government to debit of this head. The total expenditure amounted to Rs. 2,94,751 against Rs. 2,07,000, the revised estimate.

Irrigation Major Works.—An expenditure of Rs. 13,54,171 was incurred on account of the working expenses of the canals against Rs. 14,23,000 provided for in the revised estimate. The saving was mainly under the following heads:—

	Revised estimate.	Actuals.
	Rs.	Rs.
Midnapore Canal—		
Establishment	75,000	64,301
Sone Canals—		
Extensions	8,000	3,812
Repairs	2,71,000	2,59,304
Establishment	3,91,000	3,55,573
Refunds of Revenue	13,000	8,980
Total ...	7,58,000	6,92,470

Minor Works and Navigation.—The works in charge of the Public Works Department cost Rs. 15,59,796 against Rs. 16,84,000 provided for in the revised estimate passed by the Government of India. The decrease was mainly for smaller expenditure on the Hidgellee Tidal Canal and under Agricultural Works.

Civil Works in charge of the Public Works Department.—The increase under this head was Rs. 1,37,194, due principally to the increase of stock in the 1st Calcutta Division caused by the purchase of bricks from the lessee of the Government factory at Akra.

Civil Works in charge of Civil Officers.—The charges under this head aggregated Rs. 1,46,306 against Rs. 2,11,000 passed by the Government of India in the revised estimate. One of the chief causes of decrease was that the disturbances in the Lushai district prevented the construction of some projected works.

10. *Closing balance.*—The closing balance, as shown above, amounts to Rs. 23,85,016 against Rs. 20,00,000 estimated by the Government of India, and the increase has been obtained without taking any contributions from the Imperial revenues, while the estimate included a credit of Rs. 3,33,000 to make up the prescribed minimum balance of 20 lakhs.

PART III.—WORKING OF THE PROVINCIAL CONTRACT OF 1887.

11. In the Financial Resolution of the 24th December 1887, the results of the Provincial Contract of 1882, which was in force for the five years 1882-83 to 1886 87, were examined and reviewed. In this Resolution was also given some account of the terms of the contract which has just expired, governing the financial administration of this Province from 1887-88 to 1891-92. This period has now closed, and it will be convenient therefore to examine the operation of that contract.

The contract of 1887 was based for the most part on the arrangements proposed by the Finance Committee. No material advance in the system of decentralisation was made, but by a redistribution of the shares of the Imperial and Provincial Governments in the three principal heads of Land Revenue, Stamps, and Excise, and by certain reductions in expenditure which were considered feasible, a general standard of normal revenue and expenditure was obtained, which was adopted as the "Ruling account." The surplus of this account, amounting to Rs. 6,90,000, was appropriated by the Government of India through the Land Revenue head, leaving the province with a revenue and expenditure exactly equal. The Government of Bengal was admitted to a quarter share in the Land revenue collections, except those from Government estates, whilst under Stamps and Excise its share was changed from one-half in the preceding contract to three-fourths and one-fourth respectively. The proportion of charges under Stamps and Excise followed the proportion of receipts. The cost of surveys and settlements and of the maintenance of agricultural works and embankments was made entirely Provincial. Refunds and Drawbacks followed the proportions assigned for the revenues concerned. The Patna-Gaya State Railway was made Imperial, and the Eastern Bengal State Railway System, Provincial, with this reservation, that any excess over 30 lakhs in the net revenue from the Eastern Bengal State Railway (Proper) was to be credited to Imperial revenues. The interest on funds provided for outlay on State Railways and Irrigation Major Works was borne by the Provincial revenues, and was calculated on the entire capital outlay, including loss by exchange, from the commencement of operations, but excluding the amount advanced from Provincial revenues during the term of the contract.

12. The only important change made since the contract was finally settled is the transfer of the management of the Tirhut State Railway to the Bengal and North-Western Railway Company from 1st July 1890. But the Provincial accounts have been swollen by the inclusion of the receipts and working expenses of that Railway, including the payment to the Company of their share in the net receipts from the entire undertaking.

13. The following statements show at a glance the progress of the Provincial receipts and expenditure during the five years as compared with the assignments made in the contract:—

14. It appears on the face of this statement that the Provincial revenues have increased from the contract estimate of Rs. 4,64,47,000 to Rs. 5,78,00,113, while the expenditure on all accounts has risen from an assignment of a like amount to Rs. 5,78,87,871. But it would be misleading to say that the whole of this growth of more than 100 lakhs in revenue and expenditure has been the outcome of Provincial administration. As already stated, the accounts of the last two years, 1890-91 and 1891-92, have been swollen on both sides by the inclusion of the transactions of the Bengal and North-Western Railway from 1st July 1890, without affecting in any way the finance of the province. The accounts of these two years have also been swollen with excess duty levied under the Succession Act VII of 1889 on probates, letters of administration, &c., which has been paid back in entirety to Imperial through the adjusting head of Land Revenue. Again, out of the total capital outlay on the Orissa Coast Canal, amounting to Rs. 5,04,839, additional assignments of Rs. 3,10,000 and Rs. 1,81,000 were made to Provincial Revenues in 1887-88 and 1889-90 respectively, and advances aggregating Rs. 4,37,216 have also been made from Imperial Revenues during the last three years of the contract, for remodelling the Hidgellee Tidal Canal, the Provincial Government undertaking to pay interest on this last amount till it is paid back.

Since the settlement of the contract the Eastern Bengal Railway Police has been provincialized with effect from 1887-88 with an assignment of Rs. 41,000 a year; the ordinary political charges have been transferred from Imperial to Provincial revenues with effect from 1888-89 with a grant of Rs. 21,000, and the Police of Calcutta and the Suburbs has been made entirely Provincial with effect from the third year of the contract with an assignment of Rs. 2,00,000.

An additional assignment of Rs. 93,000 a year has also been sanctioned to meet the cost of interest on exchange on the capital outlay on State Railways, which was not taken into account when the contract was made.

The opening of the South Lushai Hills district caused a considerable increase of expenditure in the last two years, especially under Police, amounting to Rs. 12,26,860, against which the Provincial Revenues have received in the last year a grant equivalent to half the amount.

A Provincial Loan Account has also been opened from 1888-89, of which only the interest received and paid are entered in the General Account.

15. Eliminating the transactions which are purely formal, and which had no direct effect on Provincial finance during the period covered by the contract, exhibiting separately numerous other adjustments shown in detail in paragraph 17 below, and taking only the net results under Railways, the following table shows the actual growth of revenue and expenditure during the five years in *thousands* of rupees.

	Contract assignment.	Actuals, 1887-88.	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Actuals, 1891-92.

It will be seen that the revenues have risen from Rs. 4,24,52,000 in 1887-88 to Rs. 4,33,31,000 in 1888-89, Rs. 4,51,90,000 in 1889-90, Rs. 4,54,31,000 in 1890-91, and Rs. 4,64,84,000 in 1891-92; that the expenditure has increased from Rs. 4,05,91,000 in 1887-88 to Rs. 4,34,87,000 in 1888-89, Rs. 4,39,04,000 in 1889-90, Rs. 4,54,04,000 in 1890-91, and Rs. 4,71,87,000 in 1891-92; that against this increase of expenditure additional grants aggregating Rs. 25,22,000 in five years have been obtained from the Imperial revenues, while, in addition to the annual payment of Rs. 6,90,000 out of the Provincial surplus, a special contribution of 10 lakhs has been made to the Imperial revenues, in 1890-91. The principal fluctuations under the major heads are explained in the following paragraphs.

16. *Land Revenue*—The receipts from Land Revenue Proper have been as follows:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Gross Land Revenue	3,82,50,000	3,80,01,091	3,73,73,461	3,88,82,119	3,88,19,398	3,86,79,567
Deduct—Percentage on collections from Government estates set apart for management and improvements	3,87,000	3,83,896	3,25,880	3,94,620	3,83,574	4,68,873
	3,78,63,000	3,76,17,195	3,70,47,581	3,84,87,499	3,84,35,824	3,82,10,694
Provincial share	94,66,000	94,04,299	92,61,895	96,21,875	96,08,956	95,52,673
Percentage on collections as above ..	3,87,000	3,83,896	3,25,880	3,94,620	3,83,574	4,68,873
Total ...	98,53,000	97,88,195	95,87,775	1,00,16,495	99,92,530	1,00,21,544

Under the orders of the Government of India, Finance and Commerce Department, No. 4689, dated the 14th December 1886, special efforts were made to collect the full demand for 1886-87 before the contract came into operation, and this led to a considerable diminution of arrear demands for collection in the following year. The decrease in 1888 89 was chiefly due to the failure of the Burdwan Raj to pay its March instalment before the close of the year, and also to smaller collections in Government Estates in Midnapore and Orissa, which suffered from floods and droughts during that year. The short collections in 1887-88 and 1888-89 were made up in the two following years, and the receipts in 1891-92 were smaller than in the preceding year, as the arrear balances had again been comparatively reduced in the latter. The average realizations during the five years have been at the rate of Rs. 3,83,51,000, which shows an improvement of more than a lakh over the contract estimate, and this nearly corresponds to the increase in the current demand. When it is remembered that only a small part of Bengal is temporarily settled, and that there have been years of unfavourable harvest in parts of the country, this improvement may be considered satisfactory. The percentage on collections from Government estates for their management and improvement has been raised from 10 to 12 per cent. under the orders of the Government of India, Home Department, No. 196, dated the 29th May 1891, with effect from the beginning of 1891-92, in order to provide for sanitary improvements in villages, and this accounts for the large increase shown under this minor head in 1891-92. The total Provincial receipts in the five years amounted to Rs. 4,94,06,541, and the gain to the Provincial revenues under this head over the contract assignment of Rs. 5 × 98,53,000 or Rs. 4,92,65,000 *plus* 78,000, the additional percentage, or Rs. 4,93,43,000 has been Rs. 63,541 only.

Total ...	(—)6,89,000	(—)2,40,185	(—)5,01,838	+1,61,032	(—)22,97,338	+13,81,360

For items 8, 9, 15, 27 and 31, grants equivalent to nearly half the additional charges thrown on the Provincial Revenues were sanctioned, and if full assignment had been made, the province would have been better off by nearly twelve lakhs than the results show it to be. On the other hand the Provincial Revenues have been relieved to the extent of Rs. 1,01,941 in consequence of the change in the procedure of charging rewards paid out of criminal fines in Stamp and Excise cases, under the departmental heads of accounts instead of under the wholly Provincial head of Law and Justice, while an increase of revenue, amounting to Rs. 2,34,567, has been obtained under Stamps, in consequence of the duty levied under the Succession Act VII of 1889 on probates, letters of administration and certificates under Act XXVII of 1886, but the entire benefit to the Provincial Revenues which should have accrued from these two sources has been discounted by a debit to Provincial under the adjusting head of Land Revenue. The effect of the net adjustment for supplies and services obtained from, and rendered to, this Government, including those for exciseable articles produced in one Province and consumed in another (items 1, 6, and 7), afforded to Bengal a net credit for Rs. 2,09,931, while for the excess receipts included in the Provincial account on account of the Bengal and North-Western Railway, a sum of Rs. 4,55,513 has been paid back through the head of Land Revenue. A special benevolence of Rs. 10,00,000 was made to the Imperial Revenues in 1890-91.

18. The expenditure charged under Land Revenue has risen from Rs. 34,05,966 in 1887-88 to Rs. 41,14,224 in 1891-92, or by Rs. 7,08,258. The details are these:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.
(a) District Administration	28,37,184	28,32,555	28,36,137	28,48,848	29,14,878
(b) Management of Government estates ..	3,35,277	3,43,981	3,06,811	2,85,358	3,72,708
(c) Survey and Settlement	1,44,373	2,69,393	3,38,481	4,16,676	7,44,585
(d) Land Records and Agriculture ...	89,182	67,130	66,528	80,081	82,053
Total ...	34,05,966	35,13,059	35,47,957	36,30,963	41,14,224

The increase in 1891-92 under (*a*) is due partly to the creation of the new districts of Palámau and South Lushai Hills, and partly to the general growth of administrative charges.

The excess under (*b*) includes about Rs. 41,000 in 1891-92 for sanitary improvements, for which an increase of 2 per cent. in the collections of Government estates has been assigned.

The increase under (*c*) was due to more extensive operations of the Land Settlement and Professional Survey Department. The contract assignment for those charges was Rs. 2,90,000, or Rs. 14,50,000 for the five years. But the total expenditure in these five years amounted to Rs. 19,13,508, or Rs. 4,63,508 in excess of the assignment. Against this excess an additional grant of Rs. 2,27,292, equivalent to half the increase, has been made to the Provincial Revenues through the head of Land Revenue as stated above. A further credit for Rs. 25,047 has been allowed to the Provincial Revenues on account of the Duars survey in the three years from 1888-89 to 1890-91.

19. *Salt.*—The rate of rent of warehouses was reduced from Rs. 5 to Rs. 3 per 100 maunds, with effect from the 1st April 1887, and although in the first instance this led to the decrease of receipts in 1887-88 and 1888-89, the result in the long run has fully justified the change of policy then introduced. A considerable increase in bonding operations in the following two years was directly due to this cause. The increase in these operations in 1890-91 is attributed also to the rise in the price of salt brought about by the influence of the English Salt Syndicate. The decrease in 1891-92 was due to larger clearances, as, in consequence of the increasing importation of salt by steamers *viâ* the Suez Canal, and more rapid and continuous clearance from shipboard, the necessity of keeping large stocks in the golahs has been obviated. This is attributable to the introduction of Kilby's scales which, by simplifying and cheapening the weighment of salt, have rendered it profitable to merchants to import salt by steamers; and thus, though trade has been quickened and importation increased, there is no necessity for storing salt in the warehouses so long as was formerly the case. The result is that the Imperial duty from imports has increased, but the Provincial asset, rent of warehouses, has declined.

From the year 1888-89 the municipal taxes on the Sulkea Salt Golahs were debited to this head instead of to "32—Miscellaneous," which accounts for the increase of expenditure in that year. The increase in 1889-90 and subsequent years was due to the gradual introduction of Mr. Kilby's patent scales for the weighment of salt in Calcutta and other ports in Bengal. The payment of Rs. 10,456 in 1890-91 to the East Indian Railway Company as contribution towards the construction of a siding in the Sulkea Salt Golahs swelled the charges for that year.

20. Under the head, *Stamps*, the development of the revenue has been steady and continuous with a marked increase in every third year as is shown in the following table:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.
Court-fee stamps	1,02,64,782	1,00,88,114	1,03,48,831	1,01,88,732	1,09,51,000
General stamps	34,02,525	36,50,855	37,78,911	39,53,076	40,62,000
Miscellaneous	1,48,730	1,00,016	1,10,289	1,05,118	87,000
Total ...	1,38,16,037	1,38,38,985	1,42,38,031	1,42,46,926	1,51,00,000
Imperial share ...	34,54,009	34,59,746	35,59,508	35,61,732	37,75,000
Provincial share ...	1,03,62,028	1,03,79,239	1,06,78,523	1,06 85,194	1,13,25,000

The gross receipts in 1887-88 amounted to Rs. 1,38,16,000 against the contract estimate of Rs. 1,34,50,000. The increase in 1888-89 was only Rs. 23,000, but in the third year of the contract the receipts were Rs. 1,42,38,000, showing an increase of Rs. 3,99,000 over the receipts of the preceding year. The increase in the following year was only Rs. 9,000, while in the last year of the contract the receipts aggregated Rs. 1,51,00,000, being an increase of Rs. 8,53,000 on that of 1890-91. The increase under general stamps in 1890-91 was almost entirely due to the formation of companies, the transfer of shares, execution of leases, &c., consequent upon the gold speculation in Chota Nagpur, while the increase in 1891-92 was almost entirely in court-fee stamps, and is attributable to an increase in the number of civil suits. It is reasonable to ascribe these results partly to the increased facilities for obtaining justice, partly to a growing tendency to substitute written agreements for verbal contracts, and partly to improved administration and special vigilance in the prevention and detection of frauds. The gain of the Local Government on the contract under this head was 2¾ lakhs in the first year, nearly 3 lakhs in the second, nearly 6 lakhs in the third and the fourth, and 12½ lakhs in the fifth, so that the total Provincial increment come to nearly 30 lakhs in five years. But from this must be deducted Rs. 2,34,567 representing three-fourths of the excess duty under Act VII of 1889 on probates, letters-of-administration, which, as stated above, have been repaid to the Government of India under the adjusting head of Land Revenue. Under the orders of the Government of India the rate of copying fees has been reduced from four to three annas per folio from 1st April 1890, but this reduction has as yet had hardly any appreciable effect on the total revenue.

On the expenditure side the rate of discount on the sale of court-fee stamps of all values above one rupee has been reduced from 3 pies to 1½ pie per rupee from 1st April 1888. The total charges of the Stamp Department rose from Rs. 4,85,621 in 1887-88 to Rs. 4,93,778 in 1888-89, and Rs. 5,12,906 in 1889-90, and then fell to Rs. 4,85,282 in 1890-91 and Rs. 4,50,362 in 1891-92. The charges for stamp paper supplied from the Central Stores fluctuated according to requirements, while the discount paid on stamps varied according to the sale of stamps. The large decrease in 1891-92 is chiefly due to the lower rates secured for the manufacture of stamp papers under the new contracts with Messrs. DeLa Rue and Company. The direct cost of raising the stamp revenue in Bengal has now been reduced to about 3 per cent.

21. *Excise.*—The following table shows the total income derived from country spirit and that derived from other sources during the periods covered by the last three contracts:—

		Revenue from country spirits.	Revenue from other sources.	Total.
		Rs.	Rs.	Rs.
1877-78	...	28,90,000	39,78,000	68,68,000
1878-79	...	29,71,000	40,57,000	70,28,000
1879-80	...	31,89,000	40,18,000	72,07,000
1880-81	...	42,21,000	43,32,000	85,53,000
1881-82	...	46,20,000	47,54,000	93,74,000
1882-83	...	48,26,000	49,63,000	97,89,000
1883-84	...	52,23,000	52,02,000	1,04,25,000
1884-85	...	48,55,000	51,97,000	1,00,52,000
1885-86	...	45,10,000	50,74,000	95,84,000
1886-87	...	47,91 000	53,35,000	1,01,26,000
1887-88	...	52,05,000	56,61,000	1,08,66,000
1888-89	...	50,90,000	58,02,000	1,08,92,000
1889-90	...	47,07,000	57,68,000	1,04,75,000
1890-91	...	45,28,000	59,37,000	1,04,65,000
1891-92	...	48,15,000	63,19,000	1,11,34,000

Under the contract of 1877 the extraordinary development of this branch of revenue was among the most striking feature of the financial history of the period. The receipts rose from Rs. 68,68,000 in 1877-78 to Rs. 93,74,000 in 1881-82 or by 25 lakhs. This remarkable increase was due partly to the introduction and development of the outstill system, and partly to the bumper harvests, the activity of trade, and the general prosperity of the country which marked the three years 1879-80, 1880-81 and 1881-82. But commercial and

agricultural prosperity soon received a check. The rainfall in 1883, 1884 and 1885 was unfavourable in quantity and distribution, and the failure of the crops was so serious as to necessitate the opening of relief works by Government. The revenue from Excise fell from Rs. 1,04,25,000 in 1883-84 to Rs. 1,00,52,000 in 1884-85, and to Rs. 95,84,000 in 1885-86. The return of good harvests and the favourable settlement of outstills led to the revival of the revenue, and it again rose to Rs. 1,08,92,000 in 1888-89; but soon after a reaction took place against a policy which was admitted to have looked too much to revenue, and to have paid insufficient attention to the duty of attempting to reduce consumption. The next three years, which coincide with the period during which the department has been under the administration of a separate Excise Commissioner have been a period of radical change, of difficult experiments, for the most part still incomplete, and of the introduction of new measures, all of which, for the time being, tended to check the expansion of revenue. On 1st April 1889 outstills were abolished in Calcutta, Howrah and the 24-Parganas, and the system of central distilleries introduced. A year later a similar change was made throughout the Presidency, Burdwan and Orissa Divisions. At the same time the number of outstills was reduced in the districts of the Patna, Bhagalpur and Chota Nagpur Divisions, and the upset fees for licenses of all kinds were materially raised. The combined effect of these measures has been a substantial reduction of revenue in 1889 90 and 1890-91. The resistance of the abkars to the excise policy of increasing taxation, the falling off in advance collections owing to the introduction of the distillery system, and agricultural scarcity brought down the revenue from country spirits from about 51 lakhs in 1888-89 to 45¼ lakhs in 1890-91. But it is satisfactory to find that the decline has been only temporary, and that in 1891-92 the revenue rose to Rs. 48,15,000 from country spirits, and the total receipts to Rs. 1,11,34,000, the highest figure ever reached, and this result has been obtained notwithstanding the reduction of the number of shops licensed for the sale of country spirits from 3,025 in 1890-91 to 2,919 in 1891-92, and the decrease of consumption from 877,048 gallons to 814,432 gallons. Compared with the contract assignment of Rs. 24,82,000, the Provincial Government, which has been allowed one-fourth share in these receipts, has made a profit of Rs. 2,34,436 in 1887-88, Rs. 2,40,909 in 1888-89, Rs. 1,36,829 in 1889-90, Rs. 1,34,210 in 1890-91, and Rs. 3,01,490 in 1891-92, so that the total profit amounted to Rs. 10,47,874 during the whole term of the contract.

22. The contract estimate for the Provincial share of expenditure of the Excise Department was taken at Rs. 96,000, but the actuals amounted to Rs. 1,06,629 in 1887-88, rose to Rs. 1,08,602 in 1888-89, Rs. 1,41,480 in 1889-90, Rs. 1,62,972 in 1890-91, and Rs. 1,66,416 in 1891-92. The increase in 1887-88 compared with the contract grant was due to the amalgamation of the offices of Income-Tax Assessors and Excise Inspectors in 20 districts of Bengal, and the inclusion of their entire salaries under this head instead of a moiety under Excise and a moiety under Assessed Taxes. The large increase from 1889-90 under Excise and subsequent years has been, as stated above, due to the creation of the appointment of a Commissioner of Excise, the inclusion of the charges for rewards in Excise cases under this head instead of under *Law and Justice*, the appointment of a larger number of Special Deputy Collectors, and the construction of several distillery buildings. In 1891-92 two Deputy Collectors were appointed as Inspectors of Excise to assist the Excise Commissioner in district inspections, and this led to a further increase of expenditure in that year counterbalanced in some measure by smaller expenditure on distillery buildings. The employment of larger establishments has been the natural outcome of the introduction of the sadar distillery system, which cannot be effectively worked without a large and well-paid staff. The outstill system established everywhere a self-acting detective agency, which tended to keep down illicit distillation. Under the central distillery *régime* no one's self-interest is enlisted on the side of Government, and greater vigilance and activity are demanded from the inspecting and detective staff of the Excise Department. Part of the increase is also attributable to greater liberality in granting rewards for the detection of Excise offences, and to the heavier expenditure on travelling allowances which the present method of administration involves. The appointment of an Excise Commissioner has rendered it possible to pay much closer attention to the supervision of the subordinate Excise officials, and the gradual improvement brought about in the standard of Excise

administration has its effect on the revenue. The appointment of Excise Commissioner, which was at first sanctioned for three years, has now been made permanent, and the Government of India have just sanctioned an elaborate scheme for reorganizing the subordinate establishments somewhat on the lines suggested by the Excise Commission of 1884. The pay and prospects of the subordinate staff have been improved, and a superior class of men have been induced to enter the department. The incidence of the gross Excise revenue is less than Rs. 16 per hundred of the duty paying population.

23. The head *Provincial Rates* represents principally the proceeds of the Public Works Cess, but it includes also the recoveries from district funds of the proportionate cost of collecting Road Cess and the Rates for the general management of Wards' and Attached Estates. The receipts have been as follows:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs
(a) Public works cess		38,19,860	37,97,870	39,11,693	38,93,461	40,79,753
(b) Proportionate cost of collecting road cess.	39,20,000	3,13,524	2,68,084	3,12,096	3,55,052	3,64,355
(c) General management of wards' and attached estates.		1,03,164	90,369	82,235	71,420	80,419
Total ...	39,20,000	42,36,538	41,56,323	43,06,024	43,19,933	45,24,527

The variations under (*a*) were partly due to the same causes which led to the differences in the Land Revenue collections and partly to progress in valuation and revaluation of districts. The gross rental assessed on the introduction of the road cess was Rs. 13,11,68,432, and on the same basis the statistics furnished by the Board of Revenue show that it amounted to Rs. 14,60,45,236 in 1890–91 and Rs. 14,78,83,221 in 1891–92. Large recoveries of the arrears of rates on wards' estates were effected from the Burdwan Raj in 1887-88, and this accounts for the larger receipts under (*c*) in the first year of the contract. The comparatively smaller receipts under (*c*) in 1890 91 and 1891-92 were due to the release from the Government management of a large number of estates during the course of the former year.

Head (*b*) is a new head of account which appeared in the Provincial Account in consequence of the introduction of the Local Self-Government Act. Prior to the extension of the Act, the charges for the collection of both the Road and Public Works Cesses were shown in the District Road accounts, the cost of collecting the Public Works Cess being paid to the District Road Committees through the adjusting head of Contribution, an assignment of Rs. 47,000 being made in the Provincial Contract under that head. The arrangement has now been reversed. The collection of the cess in the districts where the Local Self-Government Act has been introduced is shown as a Provincial charge, and is recovered from the District Funds before the net collections of the Road Cess are made over to the District Boards. The receipts and charges have been as follows:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.
Total expenditure ...	3,47,213	3,17,410	3,37,184	4,05,650	4,34,287
Recoveries from District Funds ...	3,13,524	2,68,084	3,12,096	3,55,052	3,64,355
Cost of collection of Public Works Cess.	33,689	49,326	25,088	50,598	69,932

The increased charges in 1890-91 and 1891-92 were due to revaluations undertaken in several districts, and partly to arrear contributions recovered from District Funds on account of pensions of establishment employed for the collection of cesses. The net proceeds of the Public Works cess have been Rs. 37,86,171 in 1887-88, Rs. 37,48,544 in 1888-89, Rs. 38,86,605 in 1889-90, Rs. 38,42,863 in 1890-91, and Rs. 40,09,821 in 1891-92.

24. It will be interesting to show together the net proceeds of the Public Works cess and the charges properly debitable to them. The cess was originally imposed to enable the Government of Bengal to meet all charges for unremunerative public works made over to Provincial management, and to apply the balance, if any, to the construction and maintenance of public works of

Provincial utility. Accordingly, in 1877, the following works were made over to this Government, with the responsibility for the payment of interest charges on the capital expended on their construction: Northern Bengal Railway, Tirhut Railway, Nalhati Railway, Orissa Canals, Midnapore High Level Canal, Hidgelee Tidal Canal, and Sone Canal. The Calcutta and South-Eastern Railway was also made over; but as the earnings of this line had been barely sufficient to cover the working expenses, no interest was charged on the capital. The amount of capital expenditure on which the Provincial Government was liable for interest up to the end of 1877-78 was—

					Rs.
Railways	...	...		...	2,10,17,000
Canals	...	...		...	4,56,43,000
			Total	...	6,66,60,000

Theum due for interest on this capital at 4½ per cent., which was the rate of interest fixed at the time, was Rs. 30,00,000, while the net surplus of receipts over working expenses of Railways was Rs. 1,63,000, against a net deficit of Rs. 2,08,000 from Canals. During the quinquennial period covered by the contract of 1877, the net proceeds of the Public Works cess aggregated about 161¼ lakhs, the interest charges 157 lakhs, and the result of the Provincial administration of Productive Public Works added about 46 lakhs to Provincial resources. With this additional revenue of about half-a-lakh of rupees and improvements under other heads, the Government of Bengal could spend about 20¾ lakhs for the construction or completion of railways such as those from Sonapore on the Calcutta and South-Eastern Railway to Magrahat, from Parbatipur on the Northern Bengal Railway to Dinajpur, from Kaunia to Dharla, and from Bankipore on the East Indian Railway, to Gaya; and about 39 lakhs on Irrigation, such as those connecting the Gunduck river with the principal watercourses of the Saran district, on the Calcutta Canals, on the Jagooly Scheme, and the Orissa Coast Canal.

Similarly, during the term of the next quinquennial contract, the net proceeds of the public works cess aggregated about 187¼ lakhs, and the net receipts from railways and canals 94 lakhs, while the charge for interest amounted to about 196¾ lakhs. Out of the surplus of about 84½ lakhs from this source, about 29 lakhs was spent for the completion of the Dinajpur Branch of the Northern Bengal State Railway, the Diamond Harbour Branch of the Calcutta and South-Eastern Railway, and the Kaunia-Dharla Railway. More than one lakh was spent on the acquisition of lands and other charges for subsidized railways, and about 31½ lakhs for the prosecution of the Orissa Coast Canal and the improvement of the Calcutta Canals, while in addition to this large expenditure amounting to more than 20 lakhs was incurred for the maintenance of several canals for which no capital account has been kept.

During the five years now under review, a considerable change was made in the financial relations between the Government of Bengal and the Government of India, so far as the railways were concerned, the Northern Bengal State Railway and the Calcutta and South-Eastern Railway with their branches and feeders being included in the Eastern Bengal Railway System, which is rather an Imperial than a Provincial undertaking, and the management of the Tirhut Railway being made over to the Bengal and North-Western Railway Company. Leaving aside the transactions of these railways, which moreover are now able to bear their own interest charges, and can no longer be treated as unremunerative works, and taking only the transactions of the canals, it will be seen that against the total net proceeds of the Public Works cess, amounting to about 192¾ lakhs, the charge for interest on irrigation canals amounted to Rs. 118 lakhs, while the earnings of these canals just covered their working expenses with a deficit of about Rs. 14,000 in five years. Out of the surplus of 74¾ lakhs, Rs. 36,53,000 has been spent on the maintenance and repairs of the Calcutta and other canals classed as "Minor works," Rs. 31,63,000 on Government embankments, Rs. 71,000 for the improvements of the Calcutta and Eastern, Midnapore, and Sone Canals and Damodar project, Rs. 87,000 on surveys, such as the Western Bengal Railway Survey, Darbhanga-Sitamarhi Survey, and Sakri-Jainagar Survey, besides Rs. 6,60,000 advanced on Takavi Embankments and Rs. 9,42,000 expended on the Orissa Coast Canal, and for remodelling the

Hidgelee Tidal Canal, and large amounts disbursed for the improvement of Provincial Road communications.

25. The increase in expenditure under *Customs* over the contract assignment was chiefly due to the adjustment under this head of the rent, rates, and taxes of the Customs buildings which were hitherto adjusted under Miscellaneous, and to the entertainment of additional establishment of appraisers for changes in the Tariff Act, for additional wharf establishment at Budge-Budge in consequence of the introduction of the Petroleum Act just before the close of 1887-88, for a new method of testing distillation of spirits, and for temporary preventive establishment according to the requirements of trade. The only fluctuation in receipts was in 1888-89, and was due to smaller recoveries on account of demurrage.

26. The head *Assessed Taxes* represents the receipts from the income-tax. The contract estimate of the Provincial share, which was limited to half the revenue, was taken at Rs. 17,84,000, whereas the actuals in each year were Rs. 18,69,971, Rs. 19,55,698, Rs. 20,83,503, Rs. 21,19,441, and Rs. 21,54,146. The development of revenue has been steady and continuous. The aggregate gain to the Provincial revenues has been about 12½ lakhs of rupees during the currency of the contract. The average charge for the assessment and collection of the tax as debitable to the Provincial account, which is half of the total expenditure, amounted to Rs. 81,833 a year against the contract assignment of Rs. 85,000; but it rose from Rs. 75,705 in 1887-88 to Rs. 87,930 in 1890-91, and to Rs. 90,014 in 1891-92, and the rise has been in proportion to the growth of revenue, but chiefly for increased charges under the head of travelling allowance. A part of the increase is due to the separation of the offices of Excise Inspector or Sub-Inspector from that of Assessor of Income-tax, which was decided on in 1889, and fully carried out in 1890-91. Service in the Income-tax Department, which had formerly been treated as temporary, was at the same time declared to be permanent and pensionable. Districts were divided into five classes according to the average revenue from income, and five grades of Assessors were appointed on somewhat lower rates of pay than had previously been allowed. The effect of this reorganization has been to provide every district with an officer whose whole time is given to Income-tax work, and will lead to improve the quality of the work done by the Assessors, and make the assessment registers a trustworthy record of the taxable incomes in each district. The average incidence of the tax on the whole population of the province, excluding assessments on the salaries of Government officials, and the interest on Government securities, was in 1891-92 Re. 1 to every 19·2 persons, and the proportion of persons assessed for the whole of Bengal was 1 to 688.

27. The Forest Department in Bengal is of comparatively little importance from a revenue point of view. The following figures compare the net revenue in each year with the contract estimates:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891 92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	7,00,000	6,57,794	6,76,907	7,68,717	7,27,392	7,89,558
Expenditure	4,50,000	3,89,717	3,76,203	3,97,969	4,13,332	[illegible]
Net revenue ...	2,50,000	2,68,077	3,00,704	3,70,748	3,14,060	3,69,083
Provincial share in net revenue ...	1,25,000	1,34,038	1,50,352	1,85,374	1,57,030	1,84,541

There was an abnormal fall in net revenue in 1890-91 in the Sunderbun Division, attributable in a large measure to local agricultural distress, and the presence of excess stock of *sundri* wood in the market. The gross revenue in 1891-92 was the largest ever obtained since the department was formed; and the net revenue amounted to Rs. 3,69,083, notwithstanding a heavy outlay of Rs. 31,500 on account of a new steamer *Swan* purchased for the department, and increased pay of establishment sanctioned by the Government of India. The surplus in 1888-89 would have been larger but for the depression of trade in Chittagong attributable to the frontier raids which prevented access to the more remote parts, and also for the grant of considerable concessions to the inhabitants of Orissa during the scarcity of that year.

The net revenue in each year has been more than was anticipated in the contract, and the net gain to the Provincial Government during the five years has been Rs. 1,86,335.

28. Under the head of *Registration* the figures of gross receipts must not be looked at alone, as this is a Department where, more than in most other cases, increase in expenditure on establishment produces increase of revenues.

The following statement compares the net revenue from Registration in each year with the contract estimates:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	10,76,000	10,17,825	10,93,544	12,00,066	12,39,079	13,34,313
Charges	5,90,000	5,78,462	5,99,459	6,28,631	6,29,743	6,83,474
Net receipts	4,86,000	4,39,363	4,94,085	5,71,435	6,09,336	6,50,839
Provincial share in receipts	2,43,000	2,19,081	2,47,042	2,85,717	3,04,668	3,25,419

It will be seen that, though the net revenue in the first year of the contract showed a decrease compared with the contract estimate, the revenue increased gradually every year, and that the Provincial revenues made a net profit of Rs. 1,67,527 under this head in the quinquennial period. These satisfactory results are greatly due to the steady expansion of Registration offices supervised by special, not official, agency, and to some extent to the speculation in gold and silver mining.

29. *Interest.*—Under the order contained in the Resolution of the Government of India, Finance Department, No. 13, dated the 13th January 1889, the control and management of loans and advances to municipalities and other public bodies (excluding Presidency corporations), to landholders and other notabilities, &c., have been made over to the Local Government. The total amount of loans and advances made under these orders and repayments received are shown in the following table:—

	1888-89.		1889-90.		1890-91.		1891-92.		Closing balance on 31st March 1891.
	Outgoings.	Receipts.	Outgoings.	Receipts.	Outgoings.	Receipts.	Outgoings.	Receipts.

It will be seen that during the last four years sums aggregating Rs. 42,47,000 has been advanced on all accounts, and Rs. 14,44,000 has been repaid. The interest received and paid by the Government of Bengal are:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	......	24,820	34,231	33,676	58,933
Charges	......	45,802	67,637	84,461	1,01,241
Deficit	......	20,982	33,406	50,785	42,308

The charges represent 4 per cent. on the mean balance outstanding on the close of every year, which is payable to the Government of India under the orders quoted above.

The gradual increase on the charge side is due to the larger mean balance outstanding at the close of each succeeding year. The above table shows that the loss to the Provincial Revenue from the new arrangement has amounted to Rs. 20,982 in 1888-89, Rs. 33,406 in 1889-90, Rs. 50,785 in 1890-91, and Rs. 42,308 in 1891-92. The loss for the first year has only been recouped by an additional grant from the Imperial Revenues under the head of Land Revenue. The loss is, however, only temporary, as the whole amount will be more than recovered when the drainage and embankment works, for which the major portion of the advances have been made, are completed, and interest will be recovered with instalments of capital from the zamindars and others who will be benefited by the works. The interest payable on the advances has been included in the capital cost of the works, while interest payable to the Government of India is charged on the amount advanced from the Imperial Treasury; and thus when the recoveries are made, the Government of India will receive only the amounts actually advanced, and the Provincial Government will get the balance, which will include the suspended interest on the capital expended.

Besides the receipts shown above, this head also comprises interest on the securities of the Education Department and interest on arrears of Public Works cess. The aggregate of these receipts, exclusive of interest on loans, amounted to—

	Rs.
1887-88	67,093
1888-89	72,563
1889-90	70,036
1890-91	58,833
1891-92	59,230

30. *Post Office.*—The charges under this head in 1891-92 represented the charges incurred in the South Lushai Hills for the carriage of mails.

31. The General Administration Charges have risen from Rs. 15,42,579 to Rs. 16,16,326 as shown below:—

1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
Rs. 15,42,879	Rs. 15,71,096	Rs. 16,20,623	Rs. 15,84,964	Rs. 16,16,326

The increase in 1888 89 and 1889-90 was due to the deputation of officers on special duty connected with the revision of the statistical accounts of Bengal, and to enquire into the excise systems of the Presidencies of Madras and Bombay. In 1889-90 again the charges under the sub-head "Board of Revenue" included the salary of a Member of the Board of Revenue of the North-Western Provinces paid in Calcutta and recovered by inter-provincial adjustment from the North-Western Provinces. The increase in 1891-92 was partly due to the appointment of a special officer in the Judicial Department of the Secretariat, and partly to the payment in Calcutta of salaries and leave allowances of officers of the local Secretariats of Burma and Assam.

32. *Law and Justice (Judicial Courts).*—The following table compares the receipts and charges under this head with the assignments fixed in the contract:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Courts of Law—						
Receipts	7,69,000	7,74,255	7,89,538	8,04,582	8,96,337	8,82,093
Charges	80,11,000	79,40,386	81,01,737	81,54,810	82,40,807	84,82,793
Net charges	72,42,000	71,66,131	73,12,199	73,50,258	73,44,470	76,00,700

No adequate provision was made in the contract for the improvement of Judicial establishments, which was left to be met from the improveable revenues made over to Provincial management. The increase of nearly 4¾ lakhs in 1891-92 in the contract assignment represents the financial effect of the increase which has been found necessary in the number of Subordinate Judges and Munsifs and Judicial establishments generally. There has also been a partial improvement in the ministerial establishment of the Civil Courts sanctioned

in consequence of the recommendations made in the reports of Messrs. Toynbee and Stevens who were appointed to enquire into the subject.

33. *Jails.*—The receipts and charges of the Jails Department are shown below:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts—Ordinary ...	5,000	4,362	7,753	2,319	2,836	9,214
Manufactures ...	8,41,000	7,05,917	7,67,268	8,57,183	7,63,457	9,18,428
Total ...	8,46,000	7,10,279	7,75,021	8,59,502	7,66,293	9,27,642
Expenditure—Ordinary ...	6,39,000	10,02,033	11,46,915	13,14,794	12,09,569	13,57,196
Manufactures ..	10,89,000	5,29,057	6,48,880	5,84,284	8,30,738	6,64,810
Total ...	17,28,000	15,31,090	17,95,795	18,99,078	20,40,307	20,22,006
Net expenditure ...	8,82,000	8,20,811	10,20,774	10,39,576	12,74,014	10,94,364

The comparative smaller expenditure in 1887-88 was due to the release and remissions granted on the celebration of the Jubilee. The total jail population fell from 14,629 on 1st January 1887 to 13,210 on 31st December 1887, and to 11,990 on 31st March 1888. The Bhagalpur District Jail was abolished in that year. In 1888, 14 District Jails were reduced to the status of intermediate jails, and this reduction was sanctioned on the expectation that provision would have to be made for the accommodation of 11,000 prisoners. The population has, however, since then considerably increased, as the following table will show:—

	1888.	1889.	1890.	1891.	1892.
Number on 1st January	13,210	13,985	15,048	15,211	16,590
Daily average number	13,731	13,076	14,777	15,916	......

and this increase accounts for the growth of charges shown in the table.

34. The falling off of receipts under the head *Police* from Rs. 7,05,000 fixed in the contract to Rs. 3,13,349 in 1887-88 was due to the transfer of pound receipts from Provincial to Local in the districts to which the Local Self-Government Act has been extended. The increase in 1888-89 as compared with the actuals of 1887-88 was due to the inclusion of the recoveries on account of the Village Police in Hazaribagh and Lohardaga, consequent on the introduction of Act V of 1887 in those districts. The increase from 1889-90 was chiefly due to the credit for the first time under the Provincial head of the recoveries on account of the Presidency and Suburban Police, as the Metropolitan Police has been wholly Provincial from that year. On the expenditure side the contract grant was fixed at Rs. 47,48,000, and the actual charges rose from Rs. 47,86,787 in 1887-88 to Rs. 48,34,099 in 1888-89, Rs. 52,93,625 in 1889-90, Rs. 58,65,884 in 1890-91 and Rs. 59,53,275 in 1891-92. The details are these:—

Expenditure.	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Steam-boiler inspection establishment.		13,074	17,611	18,974	20,099	21,483
Refunds		79,842	5,550	6,219	36,350	56,677
State Railway Police ...		68,423	70,573	68,962	67,326	68,544
Total ...	47,48,000	47,86,787	48,34,099	52,93,625	58,65,884	59,53,275
Receipts ...	7,05,000	3,13,349	3,38,197	4,26,742	4,51,678	4,48,640
Net expenditure ...	40,43,000	44,73,438	44,95,902	48,66,883	54,14,206	55,04,635

The increase in 1888-89 was due to the entertainment of a large number of temporary Assistant Superintendents of Police, to the additional force

entertained in Darjeeling and Jalpaiguri, and to larger expenditure on account of contingencies, chiefly for petty construction and repairs, and rents, rates and taxes. The marked increase from 1889-90 has been, as already explained above, due to the entire charges of the Presidency and Suburban Police being paid from Provincial Revenues instead of in the proportion of one-fourth and three fourths as before. Against this increase the Provincial revenues obtained an additional assignment of 2 lakhs from the Imperial revenues through the Land Revenue head. The charges in connection with the subjugation of the South Lushai district and the formation of the South Lushai Hills district have been adjusted in the Provincial accounts under this head from the year 1890-91, and this accounts for the large increase in the last two years. An assignment equal to half the cost of these charges incurred in the two years has been made to the Provincial Revenues and adjusted in the accounts of 1891-92. A part of the increase under District Executive Force in 1891-92 is due to the improvement effected in the position of the force by raising the clothing allowance of all constables from Rs. 4 to Rs. 5 and of the special reserve force from Rs. 6 to Rs. 8; stopping all deductions from pay for superannuation charges; and raising the pay of the lowest class of constables in Bengal Proper from Rs. 6 to Rs. 7. Free-kits are also now supplied to fresh recruits on their first joining the department.

35. The receipts and charges of the Marine Department are shown below:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	8,08,000	9,10,096	9,11,734	8,54,207	9,18,736	9,65,408
Charges	7,81,000	9,16,601	10,71,199	12,11,342	9,40,470	9,42,251
Difference ...	+27,000	—6,505	—1,59,465	—3,57,135	—21,734	+23,157

The chief receipts are pilotage fees, which are of a fluctuating nature, and depend solely on trade and the tonnage of vessels visiting the port. There was a special receipt from the sale of the steamer *Undaunted* credited in 1888-89. A part of the increase since 1890-91 is due to the inclusion of surveyors' fees in the accounts from that year. On the expenditure side the charges in 1888-89 include the cost of building a pilot brig to replace the *Cassandra* at the India Government Dockyard at Bombay, for which an assignment of Rs. 1,91,423 has been received from the Government of India. The accounts of 1889-90 includes the cost of nearly four lakhs incurred in the purchase of the steamer *Guide* to replace the *Undaunted.* The charges for the maintenance of the State yacht *Rhotas* have been transferred to the Bengal Government from April 1890 with an assignment of Rs. 8,500 from the Imperial Revenues.

The net loss to the Provincial Revenues during the five years amounted to Rs. 5,21,682, against a gain of Rs. 27,000 × 5 = Rs. 1,35,000, provided for in the contract, but against this loss of Rs. 5,21,682 + 1,35,000 = 6,56,682 must be set the—

	Rs.	Rs.
Additional assignment sanctioned by the Government of India for the new vessel to replace P. V. *Cassandra*	1,91,423	
Additional assignment sanctioned by the Government of India for up-keep of the *Rhotas*	17,000	
		2,08,423
so that the net loss to the Provincial Revenues compared with the contract assignment has amounted to	......	4,48,259

36. The contract assignment for expenditure on *Education* was Rs. 32,46,000. The actual charges in 1887-88, however, amounted to Rs. 24,22,221. This decrease is nominal and is due to the transfer of certain Government schools to local bodies on the formation of District Boards under the Local Self-Government Act. The grants to the District Boards have been adjusted under the head of Contributions. The combined expenditure from Provincial and District Funds in 1891-92 amounted to Rs. 25,51,574 + 11,05,375 = 36,56,949.

37. The ordinary *Political* charges were provincialised with an annual grant of Rs. 21,000 from the year 1888-89. The loss to the Provincial revenues amounted to Rs. 18,041 during the four years of the contract period.

38. The large increase of receipts under the head *Superannuation* in 1890-91 and 1891-92 arose from recoveries made in those years of the arrear contributions for the pensions of employés transferred to the establishments of District Boards.

39. The large increase under *Printing* receipts in 1890-91 was on account of the supplies of census forms made to other Governments and Administrations, for which there was an increased charge under "30—Stationery and Printing."

40. The contract provided for no capital expenditure on State Railways from the Provincial Funds, but the outlay required for the construction of the Kaunia-Dhurla State Railway, which has been constructed entirely from Provincial funds, continued to be advanced from those Funds. In 1888-89 the steamer *Empress* attached to the Railway was sold, and the proceeds were credited to the Provincial Revenues. The actuals of 1890-91 include the cost of constructing 20 jute wagons for the Railway.

41. The following table shows the net financial results of the working of all Provincial Railways as compared with the contract estimates:—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

Net profit ...	12,56,000	22,56,924	25,23,479	29,87,101	39,32,639	18,75,172

The working of the Tirhut State Railway has been transferred to the management of the Bengal and North-Western Railway Company from the 1st July 1890. Under the orders of the Government of India in the Public Works Department, the gross earnings of the combined system of the Bengal and North-Western Railway and the Tirhut State Railway, and the actual working expenses plus the share of net receipts payable to the Company, were treated as revenue and expenditure respectively in the accounts. In accordance with this arrangement, the earnings of the Bengal and North-Western Railway Company for nine months, from 1st July 1890 to 31st March 1891, were included in the Provincial account for 1890-91, but as the account with the Company had not been closed, the payment to the Company could not be made during that year, and the amount of net earnings was passed over from the Provincial to the Imperial account through the adjusting head of Land Revenue. The amount so credited to Imperial in 1890-91 for the nine months was Rs. 10,49,556. The actual payment to the Company was, however, not made till May 1891. In 1891-92, therefore, the Company obtained the net earnings for three half-years, or for eighteen months, from 1st July 1890 to 31st December 1891, and all these payments were again under the orders of the Government of India shown under Railways in the Provincial account for 1891-92. The payments from Provincial Revenues thus included double payments for six months, and for this over-payment a write-back of Rs. 5,94,043 has been made in favour of the Provincial Revenues through the adjusting head of Land Revenue. The increase of Rs. 8,40,741 in the working expenses of the Eastern Bengal State Railway shown in the above statement was due mainly to renewals of permanent way and partly also to compensation paid for goods lost in flats and arrear charges for freight on coal. The increase under the Tirhut Railway arose from the inclusion of twelve months' expenses of the Bengal and North-Western Railway instead of nine months shown in the preceding year.

42. The contract made no separate provision for charges under *Miscellaneous Railway expenditure*, which mainly represent the share of the Public Works Secretariat debitable to Railways, but these were provided for in the assignment for establishment under Civil Works. The charges on account of surveys for new railway projects incurred on the recommendation of the Local Government were also adjusted under this head. The following table shows the details of the expenditure :—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.
Public Works Secretariat share	68,290	68,246	69,453	79,914	76,163
Western Bengal Railway Survey	......	62,999	12,191	......	......
Darbhanga-Sitamarhi Survey	......	9,067	......	......	......
Sakri-Jaynagar Survey	......	2,380	866	......	......
Total ...	68,290	1,42,692	82,510	79,914	76,163

The total expenditure exclusive of Secretariat Establishment during the five years amounted to Rs. 87,503.

43. The following table shows the net financial result of the working of the Irrigation Major Works :—

	Contract.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Receipts	13,30,000	11,03,229	13,94,369	15,21,274	13,46,728	16,02,710
Working expenses	11,25,000	15,03,585	14,18,090	13,55,565	13,51,272	13,54,171
Net profit ...	(+)2,05,000	(—)4,00,356	(—)23,721	(+)1,65,709	(—)4,544	(+)2,48,539

The table shows that the contract provided for a net annual profit of Rs. 2,05,000 under Major Works, but the actual result amounted to a loss of Rs. 4,00,356 in 1887-88, Rs. 23,721 in 1888-89, and Rs. 4,544 in 1890-91, while there was a gain of Rs. 1,65,709 in 1889-90 and Rs. 2,48,539 in 1891-92. The total loss during the contract period amounted to Rs. 14,373, which was met from savings under other heads, while according to the contract it was estimated that Rs. 2,05,000 × 5 = Rs. 10,25,000 would be available from these canals to meet expenditure in other heads.

44 The expenditure on *Minor Works and Navigation* in charge of the Public Works Department exceeded the contract estimate in each year, as the following table will show:—

In the contract no assignment was made for capital expenditure on Minor Works, but grants aggregating Rs. 4,91,000 were subsequently made for capital expenditure on the Orissa Coast Canal. The charges for remodelling the Hidgellee Tidal Canal have also been met by additional grants from the Imperial Revenues, but the Provincial Government has undertaken to pay interest at 4 per cent. on the capital advanced. The total expenditure under Minor Works in excess of Imperial assignment and grants has amounted to Rs. 8,08,027.

45. The large decrease of receipts under *Civil Works* in charge of civil officers, as compared with the contract estimate, was due to the transfer of ferry receipts from Provincial to Local under the Local Self-Government Act. The receipts of the Public Works Department in 1889-90 included the Provincial share of the sale proceeds of the Barakur Iron Works, while those for 1890-91 included the sale proceeds of the buildings and land in the north-west corner of the Custom House premises, Calcutta, sold to the East Indian Railway Company on the understanding that a sum equivalent to the proceeds would be expended on the construction of a new building for the Calcutta Collectorate and for the improvement of the Custom House.

46. The Contract assignment for *Civil works in charge of the Public Works Department* was Rs. 29,90,000, viz.—

	Rs.
Original works	7,10,000
Repairs	12,22,000
Establishment excluding what is debitable to Railways	10,08,000
Tools and plant	50,000
Total ...	29,90,000

In 1888-89 the Calcutta and Jessore road was transferred to the District Boards of Jessore and the 24-Parganas, the Ganges and Darjeeling Road from Karagola and Titalya to the District Board of Purnea, and the Grand Trunk Road from Pulta ghat to Chote-kund (34 miles) to the District Board of Hooghly.

In 1889-90 the Grand Trunk Road from Chote-kund to Barakar (97¼ miles), the Raniganj-Midnapore road from Raniganj to Damudar river (3 miles), the Sithona road from the Damodar river to the Grand Trunk Road (3½ miles), were transferred to the District Board of Burdwan. The Raniganj and Midnapore road from Damodar to Kurkasole and the Bishenpore Loop-line road (4 miles) were transferred to the District Board of Bankura. The Grand Trank Road from Bhullua Chatti to the Sone river was transferred to the District Board of Gaya, and the Chittagong Trunk Road, passing through the districts of Chittagong, Noakhali and Tippera, was made over to the respective District Boards concerned.

The aggregate cost of the maintenance and repairs of these roads, transferred to the District Boards, amount to Rs. 2,72,472. Excluding these, the total expenditure on Civil works during the five years has been as follows:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	Total.

GRAND TOTAL	27,61,000	39,04,000	31,24,000	35,06,000	38,80,000	1,71,75,000

In the first year of the contract it was necessary to proceed with extreme caution in regard to the expenditure on Public Works. The grant could not be placed at a higher amount than the contract assignment less the cost of establishment debitable to the Irrigation grant, which was included in the assignment under Civil Works. The increased balance at credit of the Provincial Government at the end of the year, and the rapid growth of revenue under Railways, enabled the Lieutenant-Governor to spend on Civil Works during the last three years of the contract sums exceeding the assignment by 4, 8, and 11½ lakhs respectively.

The Provincial grant under this head is almost entirely spent on metalled or unmetalled roads and on Civil buildings. The outlay on Civil Works during the five years amounted to Rs. 1,71,75,000. In Calcutta a new building for the accommodation of the Police Court and the Fire-brigade has been completed, a new wing has been added to the Indian Museum in Sudder Street, a new building has been provided for the Port and Shipping Office, and considerable extension has been made to the Calcutta Small Cause Court. A new building for the Calcutta Collectorate and Income-Tax Office has been commenced, on which Rs. 82,336 has already been expended. The head-quarters of Chittagong have been provided with a set of Revenue and Judicial offices, at a cost exceeding 5 lakhs. Court-houses have been constructed at Dumka, Jalpaiguri, Mymensingh and Noakhali, and several sub-divisional Court-houses and Munsifis have been built. A new collectorate building has been erected for Khulna, and a khas tahsil office at Cox's Bazar sub-division. Considerable expenditure has also been incurred in the construction and improvement of distillery buildings at Russa, Darbhanga, Bankipore, Monghyr, Rajmahal, Godda, Muzaffarpur, Chapra, and Arrah; while Chapra, Buxar, Narainganj, Kutwa, and Khulna have been provided with new circuit-houses.

47. In the contract the amount of contributions to Incorporated Local Funds was fixed at Rs. 1,59,000, thus:—

	Rs.
Payment to Road Committees for collection of Public Works cess	47,000
Payment to Road Committees for road works out of collections from Government estates	58,000
Contribution to District Road account in Chittagong Hill Tracts, Sonthal Parganas, and Singhbhum	54,000
Total ...	1,59,000

The actual grants, however, amounted to Rs. 2,61,063 in 1887-88, Rs. 7,50,184 in 1888-89, Rs. 11,82,950 in 1889-90, Rs. 8,94,450 in 1890-91, and Rs. 8,78,841 in 1891-92. The increase is due to the inclusion of the grants made to the District Boards in adjustment of the excess of charges over receipts transferred to them on the extension of the Local Self Government Act III (B.C.) of 1885.

The provisions of this Act were in force in 16 districts from 1st October 1886 and were extended from the 1st April following to all other districts in the Province except Darjeeling, the Chota Nagpur districts, the Sonthal Parganas and the Chittagong Hill Tracts. District Boards have been constituted in 38 districts, and Local Boards established in nearly all districts where there are sub divisions. The District Boards have been vested with the administrative control and financial responsibility of all cattle-pounds, of Government middle English, middle vernacular and public primary schools, or where there are none of the last-named, their duties are confined to aiding primary schools under private management. Some charitable dispensaries, all bridges, roads and other property hitherto under the care of District or Branch Road Committees, and most of the public ferries and their proceeds, have been placed under their control and administration; and lastly, the provisions of the Act which relate to sanitation have been expressly extended to them. The maintenance and repairs of certain provincial roads have also been transferred to them. Local Boards have been in most districts entrusted with the administration of the grants

for village roads, pounds, ferries and primary education. The net grants payable to the District Boards are shown in the following table:—

	Receipts.	Charges.
	Rs.	Rs.
Pounds (police) ...	4,20,153	22,297 3,758
Ferries (civil works) ...	2,96,076	3,808
Education	24,968	10,39,177
Medical	300	2,424
Stationery	......	16,750
Miscellaneous	......	3,676
Improvement of roads in Government estates out of percentage on collections ...	......	56,298
Administration	......	11,292
Maintenance of provincial roads	......	2,72,472
Total ...	7,41,497	
Net grant ...	6,90,455	
GRAND TOTAL ...	14,31,952	14,31,952

The comparatively smaller grants in 1887-88 were due to the fact that the adjustments for the year were not completed within the year, and the accounts of the next year include necessarily for the most part the net grants for two years.

The principal items of receipt and expenditure besides provincial roads transferred to the Boards are Pounds, Ferries and Education, and the following table shows the progress made in the last two years under these heads:—

	Fixed assignment made from provincial revenue.		1890 91.		1891-92.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Pounds	4,20,153	22,297	4,43,775	29,618	4,72,187	33,874
Ferries	2,96,076	3,808	3,38,558	53,165	3,75,664	38,458
Government grant ...	3,24,085	......	3,24,085	......	3,24,085	......
Total ...	10,65,282	10,65,282	11,39,914	10,84,638	12,09,739	11,77,707
Surplus (+) or Deficit (—)	Nil	Nil	+55,276	......	+32,032	......

The receipts under these heads have increased by Rs. 1,44,457, while the expenditure has risen by Rs. 1,12,425.

48. The general financial results of the contract of 1887 may be summarised thus: the Provincial resources which were estimated at Rs. 4,64,47,000 averaged Rs. 5,15,29,000, being an increase of Rs. 50,82,000; the expenditure, which was estimated at Rs. 4,64,47,000, averaged Rs. 5,14,52,000, showing an increase of Rs. 50,05,000. The chief branches of revenue which contributed to the increase of receipts were Stamps, Provincial Rates, Assessed Taxes and Railways. The contract period began with a balance of Rs. 19,99,000 and closed with a balance of Rs. 23,85,000.

PART IV.—THE NEW CONTRACT.

49. Such were the results of the five years' contract of 1887, the term of which has just expired with the year 1891-92. A new contract has now been made for another period of five years, commencing from 1st April 1892, under which no material change in the system of decentralization has been made, but the contract has been expressly declared to be a consolidated one for all Provincial revenue and

expenditure, and not a collection of separate assignments for each head. The following changes have been made in the Provincial receipts and charges. The cost of surveys and settlements under Land Revenue, which under the last contract was entirely Provincial, has been made Imperial, with the reservation that, if the recoveries on account of the survey and settlement operations in Bihár fall short of the expenditure which is recoverable from the zamindars and raiyats, the difference will be charged to the Provincial Revenues. The whole of the general establishment of the Accountant-General has been made Imperial, but the charges of the Examiner of Local Accounts and his establishment will continue to be Provincial as before. The cost of plain paper used with court-fee stamps will be charged under "6—Stamps" instead of, as in the past, under "30—Stationery." All police charges, including Railway Police, have been made Provincial. The salaries and allowances of officers on the cadre of the Civil Veterinary Department will be Imperial, but all other charges of that department have been made Provincial. Inter-provincial adjustments have been abolished. The Nalhati and the Tirhut State Railways have been made Imperial, while the net receipts of the Eastern Bengal Railway system will be divided equally between the Imperial and the Provincial Revenues. It has also been decided that the Government of Bengal will not exercise any administrative or financial powers in regard to railways. The capital expenditure on the Hidgelee Tidal Canal required to complete the work will be advanced from Imperial Funds, the Provincial Government paying interest as before. After making allowance for all these alterations, the Government of India have adopted the following figures as the estimates of the total Provincial revenue and expenditure for the new contract:—

	Rs.
Revenue from all sources	4,24,93,000
Total Provincial expenditure	4,10,54,000
Surplus	14,39,000

This surplus (Rs. 14,39,000) has been appropriated to the Imperial Revenues through the Land Revenue head, and the Province has thus been left with a revenue and expenditure exactly equal.

BUDGET ESTIMATE FOR 1892-93.

50. The Lieutenant-Governor has already in separate Resolutions reviewed the estimates of receipts and expenditure for the current year. Later information, however, has led to a modification of these in some respects. The following table shows the estimates of the Local Government submitted to the Government of India, the figures accepted by the Government of India, and the estimates which the Lieutenant-Governor has finally resolved to adopt:—

GRAND TOTAL ...	4,33,91,000	4,36,51,000	4,43,22,000
Provincial surplus (+) or deficit (—)	(—)2,57,000	...	(—)2,31,000

RECEIPTS.

51. *Land Revenue.*—The Government of India have accepted the estimate of total collections under this head as passed by the Local Government for 1892-93, amounting to Rs. 3,83,95,000 against Rs. 3,83,51,000, the average receipts of the last five years. The collections in the first five months of the current year amounted to Rs. 74,38,000 against Rs. 70,28,000 in the corresponding period of last year. But the September kist having fallen during the holidays, the collections to the end of that month were Rs. 1,20,57,000 against Rs. 1,30,12,000 obtained during the same period last year. The October returns, however, show that the collection in that month exceeded those of the same month last year by Rs. 8,42,000. In view of these figures the Lieutenant-Governor does not anticipate that there will be any serious falling off at the end of the year, but with reference to the actuals of the last three years amounting to Rs. 3,88,82,000,

Rs. 3,88,19,000, and Rs. 3,86,80,000, would raise the estimate to Rs. 3,85,00,000 and place the Provincial share at Rs. 99,78,000 thus:—

	Rs.
Gross revenue	3,85,00,000
Less percentage on collections from Government estates ...	4,71,000
	3,80,29,000
Provincial share	95,07,000
Percentage on collections	4,71,000
	99,78,000

52. *Adjustments.*—Under the orders of the Government of India in the Public Works Department, the construction of a new Telegraph office at Sirajganj and the maintenance of certain Imperial buildings and works have been transferred to the District Boards with grants amounting to Rs. 32,352. The grants to the District Boards have been passed through the adjusting head of Contributions from Provincial to Local, and, subject to the final orders of the Government of India in the Finance and Commerce Department, a credit for this amount has been taken under Land Revenue. The Government of India have consented to bear from the Imperial Revenues only half the amount of honorarium granted to Mr. Kilby for his patent salt-weighing scale. A credit for Rs. 37,500 has accordingly been taken on this account. The total payment to Imperial Revenues under Land Revenue adjustments will then amount to Rs. 13,01,000, thus:—

	Rs.	Rs.
Fixed contribution to Imperial ...	...	14,39,000
Deduct—		
For transfer of Imperial buildings to Local Funds	32,352	
Honorarium to Mr. Kilby ...	37,500	
Hidgellee Tidal Canal	68,500	
	1,38,352	
	Or in round numbers	1,38,000
	Net payment ...	13,01,000

53. *Salt.*—The receipts from warehouses during the first six months amounted to Rs. 28,152 against Rs. 44,747 during the six months of last year. The total receipts in last year amounted to Rs. 1,11,000. It will not be safe, therefore, to place the estimate for the current year at a higher figure than Rs. 90,000.

54. *Stamps.*—The estimate of total revenue under this head, as passed by the Government of India, amounts to Rs. 1,49,00,000. The statements of the Comptroller-General and District Returns show that the receipts in the first eight months of the current year amounted to Rs. 99,37,000 against Rs. 96,34,000 obtained in the corresponding period of last year, showing an increase of more than three lakhs in eight months. The actual receipts in 1891-92 amounted to Rs. 1,51,00,000, and the Lieutenant-Governor thinks that the estimate for 1892-93 may be raised to Rs. 1,55,00,000. The Provincial share will be Rs. 1,16,25,000.

55. *Excise.*—The estimate of total revenue under this head amounts to Rs. 1,09,50,000. The monthly returns show that the receipts in the first eight months of the current year were Rs. 1,85,000 in excess of the receipts of the corresponding period of last year. The total collections in 1891-92 amounted to Rs. 1,11,34,000, and the results of the recent settlement of excise shops for the current year show an increase of about 4 lakhs in license fees as compared with those of the last year. In view of these figures, and of the fact that the crops in Behar show great promise, the estimate for 1892-93 will be raised to Rs. 1,14,00,000. The Provincial share will stand at Rs. 28,50,000.

56. *Provincial Rates.*—The estimate of total receipts under this head amounts to Rs. 44,17,000 against Rs. 45,25,000, the approximate actuals of 1891-92. The collections in the first eight months of the current year fell short of those of the corresponding period of last year by Rs. 19,000. In view of these figures,

the Lieutenant-Governor does not consider it safe to raise the original estimate, which stands at Rs. 44,17,000 against Rs. 45,25,000, the actuals of last year.

57. The Provincial receipts under Customs during the first seven months of the current year amounted to Rs. 26,424 against Rs. 34,117 in the corresponding period of last year. The total receipts in 1891-92 were Rs. 57,100. The estimate for the current year will be reduced from Rs. 57,000 to Rs. 50,000.

58. *Assessed taxes.*—The receipts under this head during the first eight months of the current year amounted to Rs. 29,91,000 against Rs. 29,28,000 obtained in the corresponding period of last year, showing an increase of Rs. 63,000. The total receipts in 1891-92 amounted to Rs. 43,08,000, and looking to the steady growth of this revenue, the Lieutenant-Governor would raise the estimate to Rs. 43,50,000. The Provincial share will stand at Rs. 21,75,000.

59. *Forests.*—The Conservator of Forests anticipates a decrease of Rs. 32,000, chiefly owing to the abandonment of the departmental system of collections and supply of timber and other forest produce which has been approved by Government, and has also made a reduction of Rs. 27,000 on the expenditure side. The provincial share of receipts has accordingly been reduced from Rs. 4,16,000 to Rs. 4,00,000.

60. The Registration receipts during the first seven months were Rs. 8,31,000 against Rs. 8,02,000 of the same period of last year showing an increase of Rs. 29,000. The actuals of 1891-92 were Rs. 13,34,000. In view of the steady expansion of revenue under this head, the estimate will be raised from Rs. 13,60,000 to Rs. 13,70,000. The provincial share will stand Rs. 6,85,000. A corresponding increase has also been made on the expenditure side.

61. *Police.*—The estimate under this head amounts to Rs. 4,60,000, which includes Rs. 25,000 for recoveries on account of clothing from District Executive Force. Under the orders of the Government of India, No. 458, dated the 31st July 1891, the clothing allowance of the constables has been raised from Rs. 4 to Rs. 5 per head, and in the case of special reserve from Rs. 6 to Rs. 8, and this will be sufficient to cover the cost of uniforms, so that no recoveries will virtually be made from the pay of the force, and free kits are also supplied to fresh recruits on their joining the Department without any deductions from their pay. The provision of Rs. 25,000 will therefore be struck out. But as the actuals of the first seven months of the current year irrespective of these recoveries show an increase of Rs. 18,000 as compared with those of the corresponding period of last year, the original estimate of Rs. 4,60,000 does not appear to be high. As, however, under the orders of Government, No. 3775F., dated the 12th October 1892, two separate local accounts have been opened for the receipts and charges hitherto included under the Provincial Minor head of Village Police, the estimate which includes Rs. 1,94,000 on the receipt side, and Rs. 2,20,000 on the expenditure on this account, will be reduced by these amounts. The estimate of receipts will accordingly be reduced to Rs. 4,60,000—Rs. 1,94,000=2,66,000.

62. *Marine.*—The receipts during the first seven months of the current year amounted to Rs. 4,18,081 against Rs. 5,58,110 obtained in the corresponding period of last year, showing a decrease of Rs. 1,40,000. The fluctuations are chiefly under pilotage receipts. The aggregate receipts in 1891-92 amounted to Rs. 9,65,408, and the Lieutenant-Governor does not think that the estimate for the current year can be placed at a higher figure than Rs. 8,60,000 against Rs. 9,68,000 originally estimated.

63. *Education.*—The actual receipts amounted to Rs. 5,75,686 in 1890-91, and Rs. 5,95,122 in 1891-92. The latter amount, however, includes a special refund of Rs. 19,000 made by the District Board of Jessore on account of charges formerly erroneously debited to Provincial account. The receipts in the first seven months of the current year show a decrease of Rs. 30,000 as compared with those of the corresponding period of last year. Looking to all these circumstances, the Lieutenant-Governor would place the estimate at Rs. 5,75,000, equivalent to the actuals of 1890-91, against Rs. 6,10,000 originally estimated.

64. *Superannuations.*—The estimate of receipts under this head for 1892-93 amounts to Rs. 71,000 against Rs. 1,26,574, the approximate actuals of 1891-92. The actuals of last year included arrear contributions received on account of the employés of District Boards, whose services had been declared to be qualifying for pension. No such arrears are expected this year, and the collections in

the first seven months amounted to Rs. 42,226, against Rs. 84,562 in the corresponding period of last year. Under the orders of the Government of India, Home Department, No. 253, dated the 12th August 1892, no contributions for pensions are now payable by the Sub-Inspectors of Schools transferred to the District Boards. Looking to all the circumstances, the estimate will be reduced to Rs. 65,000.

65. *Railways.*—Under the terms of the new Provincial Contract with the Government of India, the net receipts of the entire Eastern Bengal State Railway System are to be equally divided between the Imperial and Provincial Governments. The other Railways have been made Imperial. The following statement compares the estimate of the Government of India for 1892-93 with the actuals of 1891-92:—

	Actuals, 1891-92.	Estimate passed by the Government of India, 1892-93.
	Rs.	Rs.
Receipts	1,14,63,835	1,18,00,000
Expenditure	62,62,793	54,00,000
Net earnings ...	52,01,042	64,00,000

The approximate gross earnings of the Eastern Bengal State Railway System from 1st April to 26th November 1892 amounted to Rs. 79,36,000 against Rs. 80,27,000 obtained from 1st April to 28th November 1891, but the traffic is now improving, and a large quantity of jute is still waiting for despatch. Looking to all the circumstances, the Lieutenant-Governor does not think that it will be safe to place the estimate of net receipts at a higher figure than Rs. 62,00,000. Half of this, Rs. 31,00,000, is Provincial, and this amount has been entered in the estimate, against Rs. 32,00,000 originally passed by the Government of India.

66. *Irrigation Major Works.*—The latest returns from the Examiner of Accounts show that the receipts during the first six months of the current year were Rs. 2,73,000 in excess of those during the corresponding period of the past year. The actual collections in 1891-92 amounted to Rs. 16,02,710, and the estimate for the current year, which stands at Rs. 14,68,000, will be raised to Rs. 16,00,000.

67. *Irrigation Minor Works.*—The returns of the Examiner show that the receipts in the first six months of the current year from Minor Works in charge of the Public Works Department, amounted to Rs. 3,17,603 against Rs. 3,59,951 realised in the corresponding period of last year. The total receipts in 1891-92 amounted to Rs. 8,17,934: the actuals of the first six months show a decrease of Rs. 42,384. The estimate will be reduced from Rs. 8,43,000 to Rs. 8,00,000. On the other hand the estimate of receipts by Civil Officers will be raised from Rs. 1,03,000 to Rs. 1,17,000 on account of the recoveries to be made of the capitalized maintenance charges of the Dankuni drainage.

EXPENDITURE.

68. *Assignments and compensations.*—The actuals in 1891-92 amounted to Rs. 1,66,129 and included arrear payments. But looking to the actuals of the first six months of the current year, amounting to Rs. 1,00,319, the Lieutenant-Governor would raise the estimate for 1892-93 from Rs. 1,60,000 to Rs. 1,80,000.

69. *Land Revenue.*—The estimate under this head, amounting to Rs. 33,63,000, will be raised by Rs. 2,000 to meet the cost of an accommodation boat for the Collector of Cuttack, and by Rs. 3,000 on account of additional establishment applied for for the South Lushai Hills District. The revised estimate submitted by the Commissioner for this district is under consideration, but, pending final orders, the provision will be allowed to stand. The amalgamation of all criminal and revenue process-serving establishments recently sanctioned may increase the number of naib-nazirs or bukshis in certain districts, but the centralisation of the amalgamated establishment under one controlling authority will lead to a reduction in the number of peons employed, and more than compensate for the additional cost of the nazir's assistant. No increased grant will be necessary on this account. The estimate will stand at Rs. 33,68,000.

70. *Salt.*—The estimate under this head, amounting to Rs. 52,000, will be raised by Rs. 75,000, the payment of which amount has been sanctioned by the Secretary of State to Mr. Kilby as honorarium for his patent scales for the weighment of salt. The grant will now stand at Rs. 1,27,000.

71. *Forests.*—As stated in paragraph 59 above, the Conservator of Forests has reduced the grant of the Forest Department by Rs. 27,000. The Provincial grant will stand at Rs. 2,27,000.

72. *General Administration.*—The grant under this head for the current year will be raised by a transfer of Rs. 4,124 to meet the cost of the additional establishment of the Marine Branch of the Public Works Secretariat, and by Rs. 15,000 for the temporary appointment of an additional Commissioner for the Patna Division. The estimate will now stand at Rs. 15,67,000.

73. *Jails.*—The estimate under this head will be reduced by Rs. 13,607, which has been made over to the Public Works Department for the construction of works for the supply of drinking water to the Arrah Jail. The grant will stand at Rs. 20,86,000.

74. *Police.*—The estimate under this head, amounting to Rs. 57,90,000, includes Rs. 3,73,000 for the South Lushai Hill Force. The revised estimate of the South Lushai District just received from the Commissioner of the Chittagong Division, provides for a total expenditure of Rs. 7,24,146 against Rs. 4,97,000 provided in the budget, thus:—

	Estimate passed by the Government of India.	Revised estimate now resubmitted by the Commissioner.
	Rs.	Rs.
Land Revenue, including postal runners	18,000	21,048
Police—		
Force and establishment	1,57,000	1,45,864
Permanent transport and rations ...	2,16,000	2,29,699
Temporary ditto ...		1,86,009
Proportionate cost of supplies to Military Department, Rs. 76,590, debitable to Police	......	54,376
Medical	19,500	20,282
Political	7,500	7,500
Civil works	79,000	59,368
Total ...	4,97,000	7,24,146

The estimate provides Rs. 4,70,084 for transport and rations and Rs. 1,45,864 for salaries and allowances of the Police and Commissariat Departments. The estimate of transport and rations is no doubt susceptible of considerable reduction, and, pending final orders, a lump provision of 3 lakhs will be made in the budget on this account. The total grant for Police of the South Lushai Hills will then stand at Rs. 4,45,864 against Rs. 3,73,000 passed by the Government of India, making an increase of Rs. 72,864. The total grant of the Police Department will also be raised by Rs. 10,593 to meet the cost of constructing a new steam-launch at the Government Dockyard for the District Superintendent of Police, Backergunge, and by Rs. 5,280 on account of the scheme recently sanctioned, by which the Court Sub-Inspectors will be employed as prosecuting officers, with effect from January 1893. The annual cost of this scheme is estimated at Rs. 21,120. Against these increases the estimate will be reduced by Rs. 2,20,000 on account of the charges hitherto included under village Police. The total grant will stand at Rs. 56,58,737, or Rs. 56,59,000 in round numbers.

75. *Marine.*—The estimate under this head, amounting to Rs. 8,85,000, does not include any provision for the purchase of new vessels. A new vessel to replace the *Coleroon* is now under construction at the Bombay Dockyard at a rough estimated cost of two lakhs, but the Public Works Department has recently reported that a sum of Rs. 25,000 only will be required on this account in the current financial year. The estimates will therefore be raised by Rs. 25,000, and will be placed at Rs. 9,10,000.

76. *Scientific and other Minor Departments.*—The estimate under this head amounting to Rs. 3,25,000, includes a provision of Rs. 15,000 for the maintenance of a "Veterinary School and Hospital" for the construction of which a donation of Rs. 30,000 was received from Babu Shewbux Bagla. As the construction of the hospital has not yet commenced, a grant of Rs. 5,000 will probably be sufficient on this account. Against this saving a grant of Rs. 6,000 has been made to the Indian Museum for the repairs of the Black Pagoda (Kanarak) in the district of Puri, and a grant of Rs. 10,000 has been sanctioned as contribution towards the representation of Indian tea at the Chicago Exhibition. A grant of Rs. 5,000 has also been promised for the repairs of roads in the Royal Botanic Gardens, and a further grant of Rs. 2,000 has been sanctioned to the Asiatic Society for the addition of a third section to the journal dealing with anthropology and ethnography. The total grant will now stand at Rs. 3,38,000.

77. *Superannuations.*—The Provincial expenditure under this head has been as follows:—

			Increase.
		Rs.	Rs.
	1887-88	... 12,80,000	
	1888-89	... 13,70,000	90,000
	1889-90	... 14,36,000	66,000
	1890-91	... 15,13,000	77,000
	1891-92	... 16,00,000	87,000
Estimate	... 1892-93	... 16,20,000	20,000

The increase in the last four years amounted to Rs. 3,20,000, or an average of Rs. 80,000. The actuals of the first seven months of the current year show an increase of about Rs. 63,000 as compared with the corresponding period of last year. In view of these figures, it will not be safe to place the estimate for the current year at a lower figure than Rs. 16,80,000.

78. *Famine Relief.*—The charges shown in the Accountant-General's monthly account for the first five months of the current year amounted to Rs. 1,623 only, but the adjustments with the District Boards will not probably be made before the close of the year. A provision of Rs. 1,50,000 will be made under this head.

79. *Subsidized Company's Land.*—The estimate under this head has been raised from Rs. 8,000 to Rs. 24,000 to meet the cost of land for the Bengal Duars Railway.

80. *Irrigation Major Works.*—The estimate of the Government of India, amounting to Rs. 13,73,000, will be raised by Rs. 50,000 to enable the Public Works Department to meet urgent demands on account of heavy damages done by the floods in Orissa.

81. *Minor Works and Navigation by Public Works Department.*—The estimate under this head as passed by the Government of India amounts to Rs. 16,45,000 A sum of Rs. 637 has been placed at the disposal of the District Board of Malda for the maintenance and repairs of embankments in that district entrusted to the Board's agency for a period of four years. Further grants of Rs. 120 and Rs. 72 have been made to the District Road Account of the Sonthal Parganas and the District Board of Monhgyr to meet the pay of the gauge readers at Sahebgunge and Monghyr respectively. It also appears from the rate of progress of work in the canals that it is unlikely that the full grant will be utilized during the current year, and that it will be enough if the grant is placed at Rs. 15,65,000. But this will be raised by Rs. 52,000 to effect an adjustment of the value of stock stores of the Orissa and Sone canals, which will probably be transferred from Capital to Provincial Minor Works Account.

82. *Minor Works in charge of the Civil Department.*—The actual expenditure in the first five months of the current year has amounted to Rs. 3,035. The estimate for the year will be raised from Rs. 2,000 to Rs. 6,000.

83. *Civil Works by Public Works Department.*—The grant for Provincial Civil Works for the current year was originally fixed by the Local Government at Rs. 31,84,000, but the Government of India, while passing orders on the budgets

for 1892-93, reduced it to Rs. 29,71,000. This has further been reduced to Rs. 27,41,000 by the following additions and deductions:—

		Rs.	Rs.
	As originally fixed		29,71,000
Add—			
	Grant for the supply of drinking-water to the Arrah jail	13,607	
	Cost of land for Veterinary School and Hospital ...	10,000	
	Grant for the additions and alterations to the Russa and Maniktolla distillery ...	27,944	
	Grant for the Hospital at Rajshahi	1,817	
	Grant for the Sirajganj Sub-divisional House and Court	33,186	
			86,554
			30,57,554
Deduct—			
	Amount transferred to General Administration for establishment of the Marine Branch ...	4,124	
	Withdrawal for the new cemetery at Calcutta ..	60,000	
	Amount transferred to District Boards, &c., for the construction and maintenance of Provincial Buildings	3,57,990	
	Amount transferred to Chittagong Hill Tracts ...	6,071	
			4,28,185
			26,29,369
		or in round numbers	26,29,000

A further grant of two lakhs is required to enable the Public Works Department to undertake several urgent works which can no longer be postponed. The total grant will now stand at Rs. 28,29,000.

84. *Civil Works by Civil Department.*—The estimate under this head was originally passed by the Local Government for Rs. 2,20,000, but the Government of India reduced it to Rs. 1,79,000, thus:—

	Local Government.	Government of India.
	Rs.	Rs.
Lushai charges	79,000	79,000
Ferries	13,663	14,000
Contributions	62,000	62,000
Refunds	24,337	24,000
Improvements at Hastings (Calcutta) ..	41,000	.....
Total ...	2,20,000	1,79,000

The revised estimate for the South Lushai Districts, now submitted by the Commissioner of Chittagong, provides Rs. 59,368 for works in that district. The estimate will accordingly be reduced by Rs. 20,000, but as there are several applications from municipalities for grants-in-aid, and the improvements at Hastings may be taken up this year, the grant will be placed at Rs. 2,10,000. This will be further raised by Rs. 37,906, in case it is finally decided to debit to this head the compensation paid during the current year for the acquisition of certain lands adjoining the Cantonment grounds on Lebong spur.

85. *Contributions.*—The grants made to the several District Boards to establish equilibrium between the receipts and charges transferred to their management amount to Rs. 4,44,735, and the grants for the maintenance of Provincial roads transferred to their charge for the current year amount to Rs. 2,39,720. The grants to the District Road Funds and District Road Accounts as passed in the Incorporated Local Funds budget for 1892-93 amount to

Rs. 7,500 and Rs. 59,000 respectively. The total comes up to Rs 7,50,955. The following further grants have since been sanctioned :—

	Rs.
Amount transferred to District Boards, &c., for the construction and maintenance of Provincial Civil Works	3,57,990
Amount transferred to District Boards, &c., for Imperial Civil Works	32,352
Amount transferred to Chittagong Hill Tracts ...	6,071
District Board, Malda, for the maintenance and repairs of embankments	637
District Board, Monghyr, for the pay of gauge reader ...	72
District Road Account, Sonthal Parganas, for gauge reader	120
District Road Fund, Hazáribágh, on account of Government share of the cost of revaluation	2,125
District Road Fund, Singhbhum, on account of Government share of the cost of revaluation	754
District Road Fund, Lohardaga, on account of Government share of the cost of revaluation	4,586
Total ...	4,04,707

These make a total of Rs. 11,55,662, and as some provision is necessary to meet payment of arrear grants, for which applications are constantly received, a lump provision of Rs. 11,80,000 will now be made.

86. *Closing balance.*—According to the estimates passed by the Government of India, it was expected that the year would close with a balance of Rs. 20,00,000. According to the estimates now adopted, the closing balance will be Rs. 21,54,000.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India, Department of Finance and Commerce, for information.

Ordered also that a copy of the above Resolution be forwarded to the Board of Revenue; to all Commissioners of Divisions; to the Accountant-General; to the Inspectors-General of Civil Hospitals, Police, Jails, and Registration; to the Directors of Public Instruction and Land Records and Agriculture; to the Conservator of Forests; to the Port Officer, Calcutta; to the Superintendents of Royal Botanic Garden, Calcutta, and Government Printing, Bengal, and to all Departments of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 31st December, 1892.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.

* Mean of 6 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, i.e., from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 31st of December 1892.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 3rd *January* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 31ST OF DECEMBER 1892.

THE meteorology of the week has again been of little importance, and fine settled weather of ordinary north-east monson character has prevailed throughout the period. On the 25th instant, or the first day of the week, pressure was rising slowly, and was above the normal by about 0·05″ to 0·07,″ while the general temperature of the province was nearly normal, slight defects being registered at the western stations, and slight excess temperatures in the east of the province. Winds were a little more strongly westerly than usual, and light westerly and north-westerly winds were generally reported. On the 26th the changes of pressure were. unimportant, but temperature had fallen and had become below the normal by from 1° to 2° Similar changes were reported on the 27th, but on the 28th pressure and temperature commenced to rise moderately, while on the 29th temperature was still rising slowly, though pressure was falling; on the 30th and 31st instants pressure was practically steady, and a further increase had taken place in the case of temperature, which had become in excess of the normal at all except a few of the eastern stations, the excess ranging up to 4°, 5° and 6° at the western stations in Bihar. During the last two days of the week also humidity had increased very decidedly over the province, and this rather rapid increase in temperature and humidity was apparently connected with a barometric depression which had appeared over North-Western India and which had steadily advanced in an easterly direction towards Bengal, and, as usual in such cases, a rapid increase of temperature and humidity took place in front of the advancing depression. Beyond these changes and a slight increase in cloud proportion at some of the western stations, the depression up to the end of the week had not materially affected Bengal, and winds were still north-westerly and westerly, and rainfall was quite absent from the province up to the close of the week.

Pressure—Has been in excess of the normal throughout the week, and the general excess has equalled about 0·06″ The excess, however, has been smallest at the northern stations, where in many cases it has only equalled about 0·04.″

Temperature—Was in slight defect of the normal for the earlier part of the week, but on the last two days it became rather largely in excess. Hence the mean temperature for the province for the week has been quite normal, the variation being considerably less than a tenth of a degree. Owing, however, to the rapid increase of temperature in the western districts at the end of the week, Bihar and Chota Nagpur show a general excess of about a degree, while North, East and South-West Bengal and Orissa show defects of about half a degree.

The distribution of temperature for the week in the province generally, and its variation from the normal value, are clearly seen in the table below, where the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are compared with their normal values for the period. Again, it will be seen that the night or minimum temperatures continue very decidedly defective.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 31st December 1892.

	Normal mean maximum temperature for the week ending 31st December.	Actual mean maximum temperature for the week ending 31st December 1892.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 31st December.	Actual mean minimum temperature for the week ending 31st December 1892.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 31st December.	Actual mean daily temperature for the week ending 31st December 1892.	Variation of actual mean from the normal

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew; ≡, fog.

C. LITTLE,

SUPPLEMENT TO

The Calcutta Gazette.

WEDNESDAY, JANUARY 11, 1893.

OFFICIAL PAPERS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament, 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 7th January, 1893.

Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The HON'BLE J. T. WOODROFFE, *Offg. Advocate-General.*
The HON'BLE T. T. ALLEN.
The HON'BLE H. J. S. COTTON, C.S.I.
The HON'BLE H. H. RISLEY, C.I.E.
The HON'BLE J. LAMBERT, C.I.E.
The HON'BLE H. LEE.
The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON'BLE A. H. WALLIS.
The HON'BLE MAHARAJAH SIR HARENDRA KISHORE SING BAHADUR, K.C.I.E.
The HON'BLE GONESH CHUNDER CHUNDER.
The HON'BLE P. PLAYFAIR.
The HON'BLE MAULVI SYED FAZL IMAM, KHAN BAHADUR.

NEW MEMBER.

The HON'BLE MAULVI SYED FAZL IMAM, KHAN BAHADUR, took his seat in Council.

STATEMENT OF THE COURSE OF BUSINESS.

THE HON'BLE THE PRESIDENT said:—"Gentlemen, I wish to make a brief statement regarding the prospects of legislative business during the present cold weather session. We have at present before us only two Bills—the Fire-Brigade Bill, and the Bill for amending the Municipal Act of 1884. You are all aware that, in consequence of the passing of the Indian Councils' Act, it is intended to introduce considerable changes into the Council of the Bengal Province, as well as those of the other provinces, and, possibly, the Supreme Legislative Council also; and, as soon as practicable, I understand that the Government of India intend to issue for our guidance the rules under which the business of the new and enlarged Councils will be carried on, and at the same time to instruct us to the extent to which this Council is to be enlarged, and the manner in which representatives are to be appointed to the Council. It seems to me, therefore, better on every ground that any legislation which affects the province at large, and is of great general importance, should be postponed until it can be dealt with by the enlarged and revised Council. But the Fire-Brigade Bill is one of purely local interest, and the interests which are concerned in it are interests which, I understand, will be represented in much the same way in the revised Council as they are now. I believe, for instance, that it is intended that the Calcutta Municipality shall be represented in the enlarged Council; and for that reason I obtained sanction to the appointment to the Council of the Chairman of the Calcutta Corporation to represent the municipality while the present Bill is under discussion, in order that the municipality may not be worse off, but may be as fully represented now as hereafter. I propose, therefore, that as soon as the Select Committee have disposed of

the business, and revised the Bill in the manner that seems best to them, we should proceed with the Bill as early as possible.

"But the Municipal Bill should not be carried further till the Council is revised and enlarged; and with regard to the Municipal Bill, I have to make a short statement as to the intentions of Government in dealing with it. A very large amount of official literature has come in, dealing with the proposed amendments, and these have been under the consideration of the Government; and it seems to me desirable, without in any way interfering with the authority of the Select Committee, that on any points on which the Government has come to a definite conclusion as to the manner in which the amendments proposed shall be dealt with, it would be desirable to facilitate the work of the Select Committee by announcing that decision, and so save them the trouble of discussing any points on which the Government has already decided. There has been a good deal of discontent and remonstrance against the Bill, as interfering with the principles of Local Self-Government, and as being a restrictive and reactionary step, putting the municipalities in a worse position than they were originally put when the present Act was passed in Lord Ripon's time. The sections which mainly come under these remonstrances, and which interfere, or seem to interfere, with the independence of municipalities, are six in number. Under section 4 Government reserves the power to alter the boundaries of a municipality, and to separate from a municipality any areas of land which seem to be unsuitable for municipal administration. At present that power rests only with Municipal Commissioners themselves, and, therefore, taking that power out of their hands, and placing it in the hands of the Government—or rather, not taking it out of their hands, but giving Government the power to act, in places where the municipalities are unwilling to do so—is distinctly an interference with municipal independence. Section 12, sub-clause 4, gives Government the power of placing any municipality in the 2nd Schedule, that is, of removing its power to elect its own Chairman, and to appoint an official Chairman instead. Section 25 gives Government the power to sanction the election of a Vice-Chairman, whereas at present no such sanction is required. These sections are those to which my attention has been specially called, as being the sections most seriously remonstrated against, and which have borne the brunt of a very large portion of the criticism to which this measure has been subjected. It was stated by the HON'BLE MR. RISLEY, when introducing the Bill, and by myself, on more than one occasion, that no serious interference with the authority of Municipal Commissioners was intended; and that Government only intended to use these powers when absolutely obliged to do so, and that they were introduced as being a less serious interference with Municipal liberty than the course provided for such emergencies by the present law. Under sections 65 and 66 of the present law, the Government has larger powers than it would generally desire to use when dissatisfied with the way a municipality is conducted, and when it seems to be necessary to remove the Chairman and appoint an official Chairman. Under the old law the only way was to practically destroy the municipality and reconstruct it. We thought that it was desirable and would not be unpopular to provide a gentle mode of interference than this, but the result shows that we were mistaken, and on further consideration we think it is not necessary to persevere in the proposal. I think you will all agree that it is right and wise of the Government to take note of the objections of those principally concerned; for no Government would act prudently in insisting on reforms distasteful to the majority of those concerned, so long as it was satisfied that the administration could be satisfactorily maintained by taking any other course. We have, as I said, received communications from a great number of quarters, and some of these have particularly attracted any attention, as they are not the representations of the Municipal Commissioners themselves, who might be supposed to be too captious or too ready to discern a slight to their authority which was not intended. I refer to those bodies who represent the public, or certain sections of the public, at large. We have, for instance, received memorials from the Bengal National Chamber of Commerce, from the Bhagalpur Landowners' Association, from the Indian Association, and from the Barrackpore People's Association, all of which have considerable importance and authority. The unanimous tone adopted by all these Associations is that the election of their Chairman is a privilege which is prized above all others by the Municipal Commissioners and the people they represent in the administration of municipalities, and they have represented that no sort of opposition has been shown by the municipalities where the Government has laid its finger on any faults, but that the municipalities have always shown themselves ready and willing to correct these errors to the best of their ability. I am bound to say that this representation

is quite accurate. There were two difficult cases brought before the Government at the time these amendments were introduced—one a case of the choice of an unsuitable Chairman, and the other a case of the inefficiency of a Chairman. In both of these cases the Municipal Commissioners showed a reasonable spirit in accepting the remonstrances of the Government; in the one case an efficient non-official has since been elected, and in the other the appointment of an official Chairman has been asked for. Since this Bill was introduced there have been similar occurrences in Howrah, Arrah, Raniganj, Puri, and Jessore. In all of these it seems to me that the Municipal Commissioners have shown a spirit of tact and concession. In the first four places I have mentioned, the Commissioners agreed to the appointment of an official Chairman till such time as the malpractices or inefficiencies complained of were corrected; and in the Jessore case they at once dismissed the Chairman complained of, and have appointed a thoroughly efficient non-official gentleman in his place. It is the bounden duty of Government to take notice of facts like these, and therefore we came to the conclusion that these two sections of the amending Bill might be dropped, and that we might rely in future, as we have done before, on the stronger coercive sections 65 and 66, to which I have referred—sections which can be employed as a last resource, but which it is seldom necessary for the Government to make use of. I think it also right to inform you that, after we had come to this decision, a despatch was received from the Secretary of State to the Government of India bearing on the same subject. He took very much the same line as I have just mentioned, as representing the course of opinion in my own mind, and considered the sections undesirable, and desired that we should withdraw them. It is right you should know this, and that the public should know it. Our course is very much facilitated by this communication, and we feel strengthened by the knowledge that the Secretary of State has come to the same conclusion as the Government had done independently. There are three other sections which I wish to mention here, which tend in the same direction. Section 29 authorises the appointment of a special officer to put municipal accounts in order, in cases where the auditing officer complains of those accounts being in an unsatisfactory condition, and considers such an appointment absolutely necessary. Section 31 deals with the appointment of assessors; it takes the assessment of taxes upon persons or houses altogether out of the hands of the Commissioners, and places them in the hands of an independent assessor. I have given this matter great consideration, and you are possibly aware that, in addressing a municipality recently in Chota Nagpur, I threw out a suggestion as to amending the Act in such a way as to provide for the appointment of an assessor only when complaints were made by Magistrates and when the Commissioner of the Division agrees that such a course was necessary. This is not a point on which Government has come to any definite conclusion, but desires to be guided by the deliberations of the Select Committee and of the Council. In all matters concerning the independence of the municipalities, and which have given rise to complaints, to the effect that Government is interfering unnecessarily with the powers of municipalities, or is taking a reactionary step, not justified by absolute necessity, the Government desires to be guided by the views of the Select Committee, in the first place, and by this Council in the second; and I hope you will consider this matter in that light, understanding that the Government places itself in your hands, and does not desire to do anything in the restrictive line, which the united wisdom of this Council does not consider necessary for the purpose of good administration. I trust, as far as I can foresee, that in the course of next month, the Council will be reconstituted under rules issued for our guidance; and that we shall then proceed to the discussion of the Municipal Bill, treating it in the spirit I have described to you."

BENGAL MUNICIPAL ACT, 1884, AMENDMENT BILL.

The Hon'ble Mr. Risley moved that the Bill to amend the Bengal Municipal Act, 1884, be referred back to the Select Committee for consideration and report.

The Motion was put and agreed to.

The Hon'ble Mr. Risley also moved that the Hon'ble Maulvi Syed Fazl Imam be added to the Select Committee on the above-mentioned Bill.

The Motion was put and agreed to.

The Council adjourned *sine die.*

C. H. REILY,

Assistant Secretary to the Government of Bengal,
Legislative Department.

Calcutta;
The 10*th January*, 1893.

THE CANAL REVENUE REPORTS FOR 1891-92.

No. 25*I.A.*

GOVERNMENT OF BENGAL,—PUBLIC WORKS DEPARTMENT.

IRRIGATION.

Accounts.

Dated Calcutta, the 7th January 1893.

RESOLUTION.

READ—

The Canal Revenue Reports for 1891-92, and the Chief Engineer's note on the same.

There are now in actual operation in Bengal 916 miles of canal, of which 495¼ miles are for irrigation and navigation, 242¾ miles are for irrigation only, and 178 miles are for navigation only. From the irrigation canals 2,381 miles of distributary channels are taken off. The total area commanded by the canals is 2,488,781 acres, the area irrigable in the present state of the works is 1,480,251 acres, and the area actually irrigated during the year was 742,346 acres, the crops grown on which were valued at Rs. 2,15,13,358. The number of boats plying in the canals during the year was 2,54,870, carrying goods of the aggregate value of Rs. 14,35,09,851.

2. The total outlay, direct and indirect, on canals in Bengal of which capital and revenue accounts are kept, has up to date been Rs. 7,36,27,728. Of this sum, Rs. 6,03,74,079* have been charged to loan funds, Rs. 1,04,00,175* have been provided from Provincial revenues, and Rs. 8,66,000 have been contributed by the Imperial Government from Famine Relief and Insurance Funds.

The outlay on each canal chargeable to capital account to date and during the last two years, is shown in the table below:—

Works.	During 1890-91.			During 1891-92.			To end of 1891-92.

3. The completion of the Orissa Canals has, for various causes,—chiefly delay in preparing the requisite detailed plans and estimates,—been retarded. As stated in last year's Resolution, detailed estimates had then for the most part been sanctioned, and the progress during the year under review has been more satisfactory. During the visit of the Lieutenant-Governor to Orissa in February 1892, the extent to which distributary channels and subsidiary works are to be allowed was finally settled, and revised estimates were submitted to the Government of India immediately after His Honour's return to Calcutta, providing for the expenditure of Rs. 12,38,020 from the 1st April 1892. These estimates have lately been sanctioned by the Secretary of State. It is expected that the canals and subsidiary works will be practically completed by the 1st April 1895. The Taldanda Canal Extension was opened on the 16th of July 1891, and there are now two distinct lines of navigation from Cuttack to the seaboard. The principal works finished in 1891-92 were the Paradeep lock and the Barera weir. During the year 24¾ miles of canal and 125 miles of distributaries were opened, and the irrigable area increased by 55,993 acres.

The Midnapore Canal is complete, the only expenditure incurred during the year debitable to capital account being for dredging plant.

* Exclusive of indirect charges amounting to Rs. 19,87,474.

The extensive remodelling scheme sanctioned in 1888-89 for improving the Hidgellee Canal has, with the exception of two works, been carried out. The canal bed has been lowered, and two new supply sluices leading into long feeder channels, in which the silt will be deposited instead of in the canal itself, have been completed. The new pipe across the Russulpore river and the reconstruction of the Kalinagar lock yet remain to be taken in hand: these works have been postponed partly owing to the difficulty in providing funds, and partly owing to the deterioration of the Russulpore river, which appears to have now ceased in consequence of the construction of the Balliaghye outfall drain.

The Sone Canals are practically complete, the works still remaining to be executed being in connection with village channels and drainage. An estimate providing for the expenditure of Rs. 7,05,707 from the 1st of April 1891, was submitted to the Government of India on the 8th June 1892, and it is understood that it has lately been sanctioned by the Secretary of State This estimate provided for the surrender of Rs. 16,54,994 on the estimate for the complete scheme sanctioned in Government of India's letter No. 118*I*., dated 17th March 1883, for Rs. 2,78,88,697.

4. The revenue accounts of the four canal schemes, classed as Major Irrigation Works, are shown in the table below:—

Particulars.		Year.				
		1887-88.	1888-89.	1889-90.	1890-91.	91-92.

	Other items	84,734	82,395	84,464	89,843	87,894
Total Working Expenses ...		15,72,170	14,87,295	14,22,368	14,32,136	14,37,935
Net revenue ...		—4,85,090	—1,06,116	82,106	—92,995	1,60,673
Charges for interest ...		23,13,446	23,39,849	23,65,030	23,87,119	24,16,363
Deficit ...		27,98,536	24,46,965	22,82,924	24,80,114	22,55,690
Rate per cent. on capital outlay ...		4·68	4·04	3·74	4·02	3·60

The result of the year's operation is a surplus above working expenses of Rs. 1,60,763, the interest charges amounting to Rs. 24,16,363.

The year's gross revenue is the highest yet earned, and the net revenue has only been exceeded in one year, 1885-86, when it amounted to Rs. 3,75,981. In that year, however, instead of, as at present, the actual cost of establishment employed on the works being charged thereto, 23 per cent. on the cost of the works themselves was debited, the balance being charged to buildings and roads. The statement below shows clearly how this item affects the accounts:—

Year.	Receipts less refunds.	Working Expenses.				
		Establishment.		Works and repairs.	Other items.	Total.
		Direction and executive.	Revenue.			
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86	15,74,272	1,52,856	2,43,850	6,64,961	1,36,624	11,98,291
1891-92	15,98,608	3,55,682	2,71,935	6,13,104	1,97,214	14,37,935

Making allowance for the extra establishment charges which, under present rules, would have been debited to working expenses, the net revenue in 1885-86 would have been reduced to Rs. 1,83,258, against Rs. 1,60,673 in the year under review. The collections in 1885-86, it may be added, were largely swollen by the collection of arrears, as will be obvious from the following statement further comparing the results of the two years:—

YEAR.	Balance at commencement of year.	Assessments.	Total.	Remissions.	Collections	Balance.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86 ...	8,94,121	10,32,826	19,26,947	1,82,105	12,03,714	5,41,128
1891-92 ...	4,72,113	11,42,334	16,14,447	48,341	11,61,986	4,04,120

The assessments represent the demands received by collecting officers during the financial year, and not the amount due on the area irrigated during the year, which the Lieutenant-Governor desires may be prominently brought forward in future. On the information available, the amount earned was Rs. 10,26,500 in 1885-86 and Rs. 13,73,844 in 1891-92.

5. There has been, more especially in the case of the Sone canals, great improvement made in the accuracy of the assessments, as well as in the promptitude with which recoveries have been made, as will be evident from the table below, which includes the three great irrigation projects, and extends over seven years:—

YEAR.	Balance at beginning of year.	Balance at end of year.	Remissions, including cancelled demand statements and extraordinary remissions.	Irrecoverable items.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1885-86 ...	8,84,289	5,33,175	1,41,162	41,229
1886-87 ...	5,33,175	3,69,789	57,375	22,612
1887-88 ...	3,69,789	5,59,883	32,356	19,796
1888-89 ...	5,59,883	5,79,987	42,666	14,074
1889-90 ...	5,79,987	5,09,188	80,282	20,592
1890-91 ...	5,09,188	4,72,113	48,674	16,476
1891-92 ...	4,72,113	4,04,120	38,421	12,126

For the remissions other than extraordinary and cancelled demand statements the engineers are mainly responsible, except in Orissa, where, under a system which has now ceased, large areas were included in leases, and, if not irrigated, yearly remissions granted. In the case of the Sone Canals, the balance at the end of the year has fallen from Rs. 6,95,208 in 1885-86 to Rs. 1,11,444 at the end of 1891-92. The amounts remitted by the Engineers or written off by the Collector as irrecoverable have fallen from Rs. 1,27,830 in the former to Rs. 17,427 in the latter year. In the Patna district, the arrears in which for several years had been increasing, the balance at the close of the year was Rs. 29,153, against Rs. 93,744 at its commencement: for this reduction credit is mainly due to Babu Siva Sankar Singh, who was specially deputed from

Shahabad to take charge of the collections. He has since been promoted to be an Officiating Deputy Collector. Sir Charles Elliott desires that, in future reports, the dates on which demand statements are received, whether within the time fixed or not, may be stated, and a comparison made between the amounts assessed by due date, and those in which they are in arrears. Recurrent assessment on long leases will be included in the former figures, as the object is to ascertain the sums which could, with proper energy, be collected within the year.

6. A change of some importance was made in the administrative arrangements for collections in respect to the irrigation revenue derived from the Sone Canals. The establishments in the three districts of Shahabad, Patna and Gaya have been amalgamated and placed in charge of a Deputy Collector, instead of as formerly being dealt with by separate establishments under the control of the District Collectors. The Deputy Collector is placed in charge of what is known as the Revenue Division, exercising powers corresponding with those of an Executive Engineer; but as regards legal and some other matters, he remains under the supervision of the Collectors of the several districts. The principle followed has been to place the entire responsibility of assessments and collections on the Irrigation Department, and more especially on the Superintending Engineer, whilst retaining in the hands of Collectors the fullest powers to secure justice to individuals who may be aggrieved by these assessments. Since the close of the year under review, a revenue division, in charge of a Deputy Collector, has been established in Orissa, and arrangements approximating to those in force in Bihar introduced there.

7. The revenue derived from irrigation for the last five years has been shown in paragraph 4 of this Resolution. The following table shows the areas under irrigation:—

	Orissa Canals.				Midnapore Canal.				Sone Canals.				Total.			
	Kharif.	Rabi.	Perennial.	Total.	Kharif.	Rabi.	Perennial.	Total.	Kharif, including five-year leases.	Rabi and hot weather*	Perennial.	Total.	Kharif.	Rabi.	Perennial.	Total.

1891-92 ..	173,453	3,943	289	177,685	83,905	68	...	*83,973	248,819	210,907	14,997	474,723	553,577	181,319	1,485	736,381

* Exclusive of lands surreptitiously irrigated for which leases were granted in subsequent years.

The area irrigated during the year was 151,403 acres in excess of any year to date, mainly owing to the extensive rabi irrigation on the Sone Canals, consequent on there having been practically no rain since September. The assessments on rabi irrigation are not due until the 1st of April, so that the revenue of the year was only slightly affected thereby. The kharif irrigation also exhibited an advance on previous results.

8. The navigation revenue, which has always formed a satisfactory feature of the Bengal canals, continues to advance slowly, the tollage collection for the last five years and for 1885-86 being given below:—

Year	Orissa Canals.	Midnapore Canal.	Hidgellee Tidal Canal.	Sone Canals.	Total.	Miles open.	Tollage per mile.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1885-86 ...	64,093	1,33,013	52,143	41,711	2,90,960	490	593·7
1887-88 ...	66,628	1,26,574	40,406	50,984	2,84,592	490	580·7
1888-89 ...	69,830	1,46,760	53,910	52,162	3,22,662	496½	649·9
1889-90 ...	78,032	1,45,356	40,338	51,189	3,14,922	496½	634·3
1890-91 ...	1,06,961	1,10,830	27,145	56,593	3,01,529	496½	607·3
1891-92 ...	1,20,761	1,32,572	36,348	57,339	3,47,020	524¼	662·2

9. The progress made towards the completion of the Orissa Canals has already been noticed. In other respects improvement has also been made. The gross income of these canals is the largest on record, and the working expenses show a satisfactory decrease on those incurred during any of the last five years. In the five years ending 1890-91, the working expenses have exceeded the receipts by an average of Rs. 2,11,594. In 1891-92 the deficit has been reduced to Rs. 52,164, and there will, despite heavy expenses for flood damages, be a further improvement in the year now current. The Lieutenant-Governor, on first visiting these canals in January 1891, took exception to the arrangements under which, even on long leases, the demand fluctuated, certain lowlands which ordinarily do not require water being included in the lease, and remissions, necessitating lengthy enquiries, being annually granted when water was not required or taken. Independently of the objection to these yearly investigations, the collections were retarded until the results of the enquiries had been recorded and revised demand statements prepared. The full evil of this system, which is characterized by the Superintending Engineer as pernicious, will be understood when it is stated that Rs. 12,646, out of Rs. 30,485 remitted in 1891-92, appertained to the irrigation of 1889-90, the enquiries regarding which were not completed until the year under review. In February 1892, Sir Charles Elliott again visited Orissa, and a system under which a fixed demand took the place of fluctuating assessment was elaborated, a lower rate being charged for lands not irrigated in ordinary years. The establishment, since the 1st April 1892, of a separate revenue division has already been adverted to, but other improvements were also effected, notably in the Certificate Department, the number of certificates pending having been reduced from 9,044 on the 1st April 1891 to 4,603 on the 1st of April 1892, of which 3.575 had been disposed of by the 1st of August 1892. The effect of the reforms instituted has been that the Collecting Department has been put on a satisfactory footing, whilst a good beginning, more especially in the Brahmini-Byturni Division, has been made towards establishing the assessments on a basis which will, for a term of years, relieve both the cultivators and the engineers from the labour and annoyance inseparable from what are *de facto* settlement operations.

10. The Midnapore Canal is complete, and expenditure debitable to capital, except for the construction of such small works as can be provided for from Provincial funds, has ceased. The area assessed was slightly in excess of that charged during the year previous, but no considerable improvement is practicable, the discharge of the river Cossye, from which water is supplied, falling to 300 cubic feet per second in October when water is much required. The duty in that month, calculated on the average gross supply, was 210 acres per cubic foot per second for the area commanded by the Midnapore weir, which is quite double that which can be obtained elsewhere. Improvements in the detailed arrangements are practicable, and measures have already been taken to introduce what is known as the block system, permits being refused where unleased lands would receive water. Revised water-rate rules are now under consideration, as also the expediency of constructing permanent outlets. Some slight improvement has been made in the percentage of the demand collected during the year, the balance unrealized being Rs. 58,972 at its close against Rs. 64,966 at its commencement. Some of the items, however, appertain to 1890-91 and previous years, showing avoidable delay in dealing with long standing arrears. Approximately half the gross revenue of the canal is derived from navigation dues, *i.e.*, tolls on boats, in the payment of which the regular lines of steamers enjoy considerable advantages. It is reported that the carrying trade is being diverted from the country boats, and that in consequence the number of boats is yearly lessening and the navigation revenue suffering. The expediency of granting concessions to lines of steamers running at fixed intervals, full or empty, is fully recognized, but the necessity of continuing the full deductions for engine space hitherto granted is under consideration. It must not be forgotten that the steamers cause extra expenditure estimated at Rs. 6,000 a year in repairs to the canal banks. The large amount spent on repairs to the Midnapore Canal during the year was due to the desire to avoid closing the canal more frequently than is absolutely necessary. The greater part of the expenditure was incurred on works that can only be carried out when the canal is dry, and there had been no closure since April 1888.

11. The remodelling scheme sanctioned for the Hidgellee Tidal Canal has already been noticed. The construction of the Balliaghye drain has resulted in some improvement of the crossing of the river Rasulpur, which, of late years, has been steadily deteriorating. This improvement is of considerable importance in connection with the Argawal circuit embankments, the demolition of which, involving heavy expenditure, is under consideration. The drain is also being utilized as a canal by boats up to 1,000 maunds burden. This work, besides answering the purpose for which it was designed, has thus been of service in other directions, and it is contemplated to maintain it as a canal, tolls being imposed.

12. The chief incident of the year in respect to the Sone Canals was the large area under irrigation during the year, amounting to 474,723 acres against 223,556 acres in the year previous, and 370,661 acres in 1884-85, which was the highest area attained to date. This large increase was mainly owing to the failure of the autumn rains, and the consequent demand for water for rabi sowings for which irrigation is not usually required. The area irrigated during the rabi season, including 13,325 acres hot-weather irrigation, was 210,907 acres, against 117,960 acres in 1883-84, the highest rabi irrigation to date. The steady increase in the area under long lease is satisfactory. The following tables show the areas irrigated under long and short leases during the last five years:—

		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
Long leases	...	210,164	200,102	224,268	223,556	234,791
Short leases	...	105,216	155,807	81,014	57,458	239,932
Total	...	315,380	355,909	305,282	281,014	474,723

The sudden extension of irrigation caused a great strain on the establishment, which can only be kept up to meet an average demand. On this subject the followig remarks by the Superintending Engineer deserve attention:—

The demand of the year under review was greatest in the Buxar Division, and caused a considerable strain on the establishment, which was well met. Distributaries that had scarcely been used for years had to be run full, with consequent risk of breaches. An area much greater than usual had to be measured, while it is very difficult to enlarge the measuring staff to any considerable extent.

Although, as I have said, we are more accustomed to a great demand for water in the kharif season, it should not be forgotten that the large volume of water which was supplied in the autumn of 1891, could only be given and utilised by careful regulation and by constant supervision on the part of all concerned.

The demand was, on the whole, well met, and the Lieutenant-Governor agrees with the Superintending Engineer's remark that the Department may, in respect to the irrigation in this circle, fairly congratulate itself on the result of the year's work.

13. The Superintending Engineer's report does not clearly show the dates on which the assessment papers reached the Deputy Collector. It appears, however, that out of 474,723 acres irrigated, 354,541 acres were assessed during the year, and 120,182 acres after its close. In 1890-91 the area remaining to be assessed on the 31st March was 2,696 acres only. The increase in rabi irrigation on annual leases, 177,308 acres in 1891-92 against 20,632 acres in the previous year, sufficiently accounts for the difference. The Lieutenant-Governor attaches much importance to promptitude in preparing demand statements, and desires that in future the months in which the demand statements are due and submitted may be shown. It is not, however, desired that accuracy shall be sacrificed in order to attain the object desired, the steady decrease in the remissions, which are practically demands which cannot, when questioned, be upheld, from Rs. 11,284 in 1888-89 to Rs. 3,304 in 1891-92, being a specially satisfactory feature of the year's work. The reduction in the number of certificates instituted for the recovery of water-rates by process of law from 4,891, covering Rs. 46,974 in 1890-91, to 3,178, covering Rs. 31,176 in 1891-92, and of the balance, which, at the commencement of the year, was 1,586 certificates for Rs. 25,284, and at its close 234 certificates for Rs. 9,193, also speaks well for the canal administration, as does the advance made in the registration of village channels, and the increase on the acreage irrigated by each

outlet, which has risen from 59 acres in 1890-91 to 78 acres in the year under review. The increase in the number of complains was a natural result of the increased irrigation under annual leases. The Lieutenant-Governor, in November 1892, for the second time inspected a part of this canal system, and is satisfied that the utmost endeavours are made to utilise to the best advantage the full water-supply the canals are capable of carrying and also that the wants and grievances of the cultivators are carefully enquired into and met in a generous spirit.

14. The financial results of the year's working for the canals classed as minor works are shown in the table following:—

15. Of the canals classed as minor works, the Saran, Eden, and Madhuban Canals are not navigable.

The Saran Canals were intended chiefly to provide water for the manufacture of indigo, and secondarily to supply water for the irrigation of that crop. There was originally a guarantee, which expired on the 1st of April 1891, and since that date the canals have been managed by Mr. Reid of the Moniara Concern on payment of a sum which substantially covers working expenses. The agreement is yearly, and it is doubtful if it will be renewed.

The primary object of the Eden Canal was to supply the Hooghly and Burdwan districts with wholesome drinking water; but under the force of circumstances it has developed into an irrigation work. The area irrigated during the year was 14,185 acres, mostly on five-years' leases. The receipts were Rs. 6,635 in excess of the previous year, and the expenses Rs. 9,132 less. Colonel A. D. McArthur, R.E., the Superintending Engineer, has shown a very marked improvement in the results obtained from this small work; it is satisfactory to be able to record that irrigation has yet further advanced in the year now current.

The Madhuban Canal is a small irrigation scheme on the borders of Champaran, the head works of which have always given trouble owing to the sudden floods in the hill stream over which they are constructed. These floods are caused by embankments in Nepal giving way, and it is a matter of both difficulty and expense, out of all proportion so far to results achieved, to keep the weir in working order. The area irrigated during the year was 3,586 acres.

16. The remaining canals classed as Minor Works are for navigation, viz., the Calcutta and Eastern Canals, the Orissa Coast Canal, and the Nadia rivers.

The Calcutta Canals, the capital expenditure on which has reached 53 lakhs of rupees, form in some respects the most important means of communication between Calcutta and the Eastern districts of Bengal. The revenue for some years has been almost stationary, whilst the working expenses have largely increased. Since the construction of the new locks at Dhappa and Chitpore, there has been a tendency to endeavour to improve the rest of the canals, and there is little doubt that, but for these measures, there would, owing to the railway competition, have been a serious decrease in the gross revenue. The net revenue is now 3·4 per cent. only on the capital expenditure, and the Lieutenant-Governor, in response to petitions for alteration in the scale of tolls, has found it necessary to declare that no change involving a decrease in the net receipts is admissible. The whole matter was considered by a Committee, of which Colonel A. D. McArthur, R.E., was the President, and Mr. W. C. Boyce and Babu Sita Nath Roy, members; and in disposing of the report, the Lieutenant-Governor sanctioned a reduction in the rate of tolls on articles of general consumption, mainly firewood and lime, whilst tolls on boats returning from Calcutta, which have hitherto passed free, will be levied. It is expected that these measures will slightly add to the revenue derived from the canals, whilst the tolls imposed on boats returning are very slight. Recent enquiries show that the cost of carriage on these canals varies from 0·04 pies to 0·26 pies per maund per mile, of which from 0·012 pies to 0·017 pies represents toll.

The Orissa Coast Canal has so far not answered the expectations formed when it was sanctioned, the failure to do so being partly owing to the Hidgellee Canal, the remodelling of which is not yet quite complete, not having been kept in a condition suitable for the passage of large boats, but the low revenue is chiefly due to competition by the sea route. The feeder roads sanctioned are now approaching completion, and it is hoped that, with these and other measures which are under contemplation, a greater measure of success will be obtained in future years. This canal must be looked on rather as a famine protective than revenue earning work, but the receipts should at least cover the working expenses, which at present they are insufficient to meet. It is feared that owing to changes in the course of the river Subarnarekha it will be necessary to build a new lock some miles away from Jamcunda in place of that now in use. The changes in the river had not, however, at the close of the present flood season reached their full development, and no expenditure will be incurred until it is no longer possible to defer taking further action.

The receipts during the year from tolls imposed on boats using the Nadia rivers, amounted to Rs. 1,92,737 against Rs. 2,00,482 in 1890-91, whilst the expenditure aggregated Rs. 1,13,274 against Rs. 1,09,894. The falling off in the receipts and the increased expenditure are due to the same cause—the low level of the river Ganges—which led to the upper heads of the Nadia rivers being blocked with silt. The rivers were closed to large boats at an earlier date than usual, whilst increased expense was incurred in training works. Hitherto works in these rivers have been mostly confined to training works with the object of keeping the channels open as long as possible, but this year, to supply the want of marks to guide vessels during the flood season, a number of temporary beacons have been erected and are reported to have been useful.

17. The Lieutenant-Governor is not satisfied that the important duty of office inspection receives the attention it deserves. From the tables attached to the Chief Engineer's note, it appears that the divisional offices were not all inspected by Superintending Engineers during the year, whilst, outside the Sone Circle, but few sub-divisional offices were inspected. His Honour requires that in future Superintending Engineers shall inspect all divisional offices yearly, and all sub-divisional offices and toll offices once in two years at least. Executive Engineers must inspect all sub-divisional offices and toll

offices yearly. In the case of both Superintending and Executive Engineers, the report of the inspection must be submitted for examination by the Chief Engineer. The record of tours shows that, with scarcely an exception, canal officers have fully satisfied the requirements of Government as regards the time to be spent on tour, which His Honour considers should not be less than one-third of the year in the case of Superintending Engineers, and one-half to one-third in the case of Executive and Assistant Engineers. For Sub-divisional Officers who do not belong to the Engineer establishment, no specific rule can be laid down other than that, when holding charges analogous to those of Assistant Engineers, the same length of tours will be required, whilst, on the other hand, when posted to workshops they will be employed almost exclusively at head-quarters.

18. The qualifications of officers are dealt with in separate reports, but Sir Charles Elliott is satisfied that during the year under review the engineers and subordinates employed in the Irrigation Department have not been unmindful of the instructions contained in last year's Resolution, and that they have, sometimes under circumstances of great hardship, done everything in their power to make the most of the canals in a season when every drop of water was valuable. His Honour also notices with pleasure the advance made in the Sone Circle in promptly realizing water-rates, being convinced that the exaction of payment when due is not only beneficial from an administrative point of view, but, in the long run, to the advantage of the cultivator.

ORDER.—Ordered that a copy of this Resolution and of the Chief Engineer's note, and its accompaniments, be submitted to the Government of India, in the Public Works Department, and published in the *Calcutta Gazette*; also that it be circulated to other Governments and to all departments and officers of this Government as usual.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Joint-Secretary to the Govt. of Bengal.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

IRRIGATION BRANCH.

REVENUE REPORT.

Note by C. W. ODLING, ESQ., M.E., M. INST. C.E., *Chief Engineer, on the Canal Revenue Reports for the year* 1891-92.

THE Capital expenditure on Irrigation Works, for which Capital Accounts are kept, amounted during the year 1891-92 to Rs. 8,34,636 for direct and Rs. 20,078 for indirect charges:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Capital expenditure not charged against Revenue	8,42,225	20,141	8,62,366
Minor Works and Navigation ...	(—) 7,589	(—) 63	(—) 7,652
Total ...	8,34,636	20,078	8,54,714

2. The total Capital outlay at the end of the year 1891-92, including indirect charges, was as follows:—

	Direct charges.	Indirect charges.	Total.
	Rs.	Rs.	Rs.
Major Irrigation Works—			
Productive Public Works ...	6,08,30,176	17,05,422	6,25,35,598
Minor Works and Navigation—			
Protective grants—Imperial ...	8,66,000	...	8,66,000
Ordinary revenue { Imperial and Provincial. }	99,44,078	2,82,052	1,02,26,130
Total ...	7,16,40,254	19,87,474	7,36,27,728

A

3. The above outlay is divided under the different projects in the following statement:—

WORKS.	During 1891-92.			To end of 1891-92.

* Exclusive of lands surreptitiously irrigated for which leases were granted in subsequent years.

The year's working and its financial results will now be dealt with separately for each of the canal systems of the province, as in previous years.

ORISSA CANALS.

The figures in all statements showing totals of receipts or expenditure are those of the Examiner of Accounts In dealing with details the figures of the Commissioner or of the Superintending Engineer are used.

10. The Capital, Interest, and Revenue Accounts of these canals are given below:—

CAPITAL ACCOUNT.

I.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1891-92.	Outlay to end of 1891-92.
1	2	3
Direct Charges.	Rs.	Rs.
I.—Works	3,24,441	1,77,75,631
II.—Establishment	57,375	44,64,543

IV.—Suspense accounts	4,138	1,63,791
Loss by exchange	...	2,68,070
Total ...	3,88,809	2,46,92,766
V.—*Less*—Receipts on Capital account	69	86,100
Net total Direct Charges ...	3,88,740	2,46,06,666
Indirect Charges.		
Capitalization of abatement of land revenue	9	33,068
Leave and pension allowances	8,033	5,21,162
Total Indirect Charges ...	8,042	5,54,230

A full account of the works in progress and completed during the year has been given in the Progress and Administration Report of this province for the year under review. The more important works completed were the construction of a new weir at Barera on the Machgong Canal, the improvement of the river Gobri, and drainage cuts at Tampua and Bhimai Hâd, while the construction of the distributaries sanctioned by the Secretary of State in 1883 was so far advanced, that 125¾ miles were opened for irrigation during the year, in addition to many detached lengths nearly completed, but from which supply could not be given. The Taldundah Extension Canal was opened for traffic, being very nearly completed, and among the works with which progress was made may be mentioned the Sukendapat drainage scheme, other minor drainage cuts and channels, flood embankments on the right of the Byturni and left of Burra Kharsua, and refuge-mounds on the Sankarisahai Island.

2.—INTEREST ACCOUNT. INTEREST ACCOUNT.

			Rs.

Irrigation establishment	52,591	57,074			
Navigation ditto ...	16,119	16,506			
Total ...	68,710	73,580			
Total Direct Charges ...	4,39,383	3,96,016			
INDIRECT CHARGES.					
Capitalized abatement of land revenue.	...	...			
Leave and pension allowances.	28,220	27,070			
Total Indirect Charges	28,220	27,070	Net total receipts	3,44,936	3,70,922
			Deficit ...	1,22,667	52,164
Total Working Expenses	4,67,603	4,23,086	Total ...	4,67,603	4,23,086

The net result shows a marked improvement compared with last year, the deficit of 1890-91 having been reduced by over 57 per cent., that is, from Rs. 1,22,667 to Rs. 52,164. This has been caused by increases under all heads of the receipts, combined with economy in working expenses. The only marked increases occurred under revenue establishment caused by the payment of arrears of commission properly belonging to previous years, and tools and plant, mainly due to the provision of a new boiler for the *Garnet* having been found necessary. The economy in repairs is partly due to the small amount of damage done to the aprons of weirs and the banks of canals and distributaries owing to the absence of any high floods during the year. The expenditure under extensions and improvements was incurred on the construction of an escape at Ganpur and additions to the Deputy Revenue Superintendent's Office and an Overseer's bungalow at Jobra.

EARNINGS. 11. The net result, calculated on the earnings as opposed to collections, and actual outlay is shown below for the year under review and the preceding year:—

	1890-91.	1891-92.
Earnings.	Rs.	Rs.
Irrigation	2,69,310	2,66 587
Navigation	1,21,498	1,35,902
Miscellaneous ...	13,708	17,843
Total ...	4,04,516	4,20,332
Deduct refunds ...	76	79
Net earnings ...	4,04,440	4,20,253
Outlay	4,67,603	4,23,086
Net deficit	63,163	2,833

The figures given as earnings include the actual realizations of navigation and miscellaneous revenue with the assessed revenue from irrigation, less refunds. The increase in the earnings is entirely under the heads navigation and miscellaneous, there having been a small decrease in assessed water rates which were Rs. 2,66,587 in 1891-92 against Rs. 2,69,310 in the year preceding. These figures are somewhat misleading owing to areas being included in which water rates are not chargeable, and remission is granted yearly after a special enquiry. This system is in course of alteration

FINANCIAL RESULTS. 12. Below are shown the revenue receipts and working expenses for the last ten years:—

Total Working Expenses .	3 54,896	3,05,889	3,29,288	3,56,672	5,20,543	5,02,450	4,05,019	4,56,910	4,67,603	4,23,086
Net revenue ...	(—)35,271	(—)68,089	(—)1,85,781	(—)1,49,328	(—)3,41,024	(—)2,79,771	(—)1,61,725	(—)1,52,786	(—)1,22,667	(—)52,164

The most noticeable feature of the results tabulated above is that since the year 1886-87 the receipts have shown a steady yearly increase, accompanied by a reduction of the total working expenses, the effect on the net revenue being a reduction of the deficit from Rs. 3,41,024 to Rs. 52,164. With the extension of irrigation consequent on the completion of the new distributaries, it is hoped that the yearly deficit will be replaced by a surplus.

LENGTHS OF CANALS AND DISTRIBUTARIES.

13. The lengths of the canals and distributaries in operation at the close of the year 1891-92, compared with 1890-91, are given in the following table:—

Name of Canal.	1890-91.								1891-92.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

Twenty-seven and three-quarter miles of navigable canal and one hundred and twenty-five and three-quarter miles of distributaries have been completed during the year, resulting in an increase of the total area under command and that provided with distributaries by 60,028 and 55,993 acres, respectively, while 55,758 acres have been added to the area protected from flood owing to the completion of the left bank of the Taldundah Extension Canal, which forms a flood embankment up to the 49th mile.

RAINFALL

14. The average rainfall at thirteen stations, situated within the canal irrigated area, for the kharif and rabi seasons of the last five years, is as follows:—

		Average of thirteen stations.				
		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1		2	3	4	5	6
		Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season ...	July ...	11·67	8·91	13·10	12·59	10·34
	August ...	8·49	21·61	13·11	7·58	16·98
	September ...	6·12	8·36	5·30	14·40	19·45
	October ...	2·69	1·11	9·16	8·63	1·17
	Total ...	28·97	39·99	40·67	43·20	47·94
Rabi season ...	November ...	0·87	2·88	11·24	1·94	6·77
	December ...	......	......	0·15	0·05	......
	January ...	1·70	0·06	0·06	......	......
	February ...	1·26	0·81	0·02	0·99	0·20
	Total ...	3·83	3·75	11·47	2·98	6·97
	Whole year ...	47·79	49·07	67·95	63·17	61·03

The rainfall of the whole year was slightly less than that of last year, though 4·96 inches in excess of the average for the past 22 years. Both in the rabi and kharif seasons the fall was greater than in 1890-91, but it was unseasonably distributed. The fall was scanty up to the end of July, unusually abundant in August and September, and almost entirely failed in October, being succeeded by a cyclonic storm on the 5th November.

FLOODS.

15. The average rainfall of the year at ten stations in the Central Provinces which are drained by the Mahanadi was 56·14 inches, or 3·39 inches more than that of 1890-91.

There were heavy floods in all the rivers in the Orissa Circle during the year. The highest flood readings of the rivers Mahanadi, Brahmini-Byturni, Salindi, Katjuri, and Beropa during the year, as also those of the highest known floods, are given in the following statement:—

Name of river	Locality.	1891-92.		1890-91.		Highest recorded.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
	2	3	4	5	6	7	8

IRRIGATION.

16. The table below compares the areas of each crop irrigated during the last ten years with the yearly rainfall:—

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6.
	Acres.	Acres.	Acres.	Acres.	Inches.
1882-83 ...	128,530	4,100	398	133,028	59·03
1883-84 ...	47,035	1,381	344	48,760	57·21
1884-85 ...	54,181	2,994	197	57,372	50·40
1885-86 ...	70,563	1,605	171	72,339	52·59
1886-87 ...	75,115	2,440	154	77,709	60·07
1887-88 ...	108,867	502	137	109,506	47·84
1888-89 ...	156,319	2,779	194	159,292	49·07
1889-90 ...	180,568	5,897	162	186,627	67·95
1890-91 ...	175,829	4,250	220	180,299	63·17
1891-92 ...	173,453	3,943	289	177,685	61·03

17. The whole of the area shown above as irrigated was assessed. The figures below show the nature of assessment compared with the figures of the two preceding years:—

Crop.		Rate per acre.	1889-90. Area.	1889-90. Amount.	1890-91. Area.	1890-91. Amount.	1891-92. Area.	1891-92. Amount.
1		2	3	4	5	6	7	8
		Rs. A. P.	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.
Kharif	Flow ...	1 8 0	(a) 172,104	2,57,935	(b) 168,227	2,52,173	(c) 168,655	2,56,314
	Lift ...	1 0 0	(a) 5,065	5,065	(b) 5,596	5,596	(c) 4,787	4,790
Perennial crops ..	Flow ...	6 0 0	67	397	121	712	141	843
	Lift ...	4 0 0	95	381	88	351	148	594
Rabi	Flow	0 8 0 to 2 0 0	4,903	5,583	3,634	3,888	3,259	3,435
	Lift ...	0 5 0 to 1 8 0	994	764	615	474	632	513
Unauthorised irrigation	Kharif		3,399	12,612	2,006	6,080	11	20
	Rabi	...	...	...	12	36	52	78
Total ...		...	186,627	2,82,737	180,299	2,69,310	177,685	2,66,587

(a) All 5-year leases.
(b) 173,577 acres 5-year lease, and 246 acres annual lease.
(c) 170,816 acres 5-year lease, and 2,626 acres annual lease.

It is satisfactory to note that the area of unauthorised irrigation assessed was only 63 acres, against 2,018 and 3,399 in the two previous years. The reduction in the total area under lease is due to the exclusion from assessment, on re-measurement of old leases, of 5,605 acres, consisting mainly of unirrigated *Beali* lands and low-lying lands which derive no benefit from irrigation.

The Superintending Engineer gives the two statements reproduced below, showing the alterations which have taken place in the area of each crop upon the various canals, together with the percentages of the area provided with distributaries as well as that commanded, which had been leased in each case, at the close of the official year:—

Canal system.	1891-92. Kharif.	1891-92. Perennial.	1891-92. Rabi.	1890-91. Kharif.	1890-91. Perennial.	1890-91. Rabi.	Kharif. More.	Kharif. Less.	Perennial. More.	Perennial. Less.	Rabi. More.	Rabi. Less.

The Superintending Engineer further remarks:—

"The area provided with distributaries is also increased from 252,866 to 308,859 acres by the completion of 126 miles of new distributaries during the year, owing to which no fair comparison can be made between the percentages of the area leased during the two years. It may, however, be remarked that, as the new distributaries were completed up to certain lengths late in the year, only a small number of leases have been taken on some of them.

* * * *

"In the irrigation of the leased areas no difficulty was experienced in the Mahanadi Division in giving a full supply. In the Brahmini-Byturni Division, however, the floods at the end of July completely silted up the Jugatpur supply channel, and supply had to be partially shut off in consequence. The heavy rainfall of August made up for the limited supply, and the crops did not suffer. An estimate is now in hand for an alternative supplementary head sluice and channel for the Kendrapara Canal. Full supply was given throughout the season on the High Level Canal ranges, although some difficulty was experienced in the middle of July from the low pools in the Brahmini and Byturni rivers.

"The monsoon did not break until the end of June. There was considerable demand in July owing to the scanty rainfall. August and September were months of heavy rainfall, and there was little demand. In October there was an almost entire cessation of rainfall, and unirrigated crops suffered severely. The demand for canal water was keen, the canals running full supply, and there were but few and casual complaints of short supply. The raiyats on irrigable but unleased lands held out until late in October, when applications were received for new leases, more particularly on the Machgong Canal. On the Taldundah Canal the raiyats held off in the belief that irrigation could be effected by bunding the main drainage, being misled by designing people. On the Jajpur Canal a considerable area was irrigated, though only a small part of this was assessed, the assessment being made only on the areas declared by the villagers. The drought continued until the 4th November, when with the heavy rainfall accompanying a cyclonic storm irrigation ceased.

On the High Level Canal, Range III, the first section of the Kendrapara Canal, and on the first section, Taldundah Canal, the area leased has nearly reached its maximum. An

interesting table for Range III, High Level Canal, submitted by the Executive Engineer, Acquapada-Jajpur Division, is annexed:—"

NAME OF CANAL.	Irrigable area under command.	CULTURABLE AREA. Leased area.	Irrigable low lands.	Chaukidars' jagirs.	Area irrigable but unleased	Total.	Homestead and waste lands.	Total of columns 7 and 8.	DIFFERENCE OF COLUMNS 2 AND 9. Less.	More.

18. The figures below show the duty, stated in acres irrigated for each cubic foot per second of discharge, calculated from the gross discharge at canal heads for the last three years:— DUTY OF WATER.

PARTICULARS.		Kendrapara Canal system.	Taldundah Canal system.	High Level Canal, Range I.	High Level Canal, Range II.	High Level Canal, Range III.	Jajpur Canal.
1		2	3	4	5	6	7
91-92	Kharif ... Acres	70,686	41,570	22,394	2,451	36,189	452
	Duty on gross supply	80 05	103·99	84·75	24·95	117·69	...
	Rabi ... Acres	3,494	336	29	62	22	...
	Duty on gross supply	7·60	3·50	0·14	2·88	1·02	...
90-91	Kharif ... Acres	71,403	41,247	21,893	2,473	39,033	...
	Duty on gross supply	66·42	102·22	66·07	37·61	107·81	...
	Rabi ... Acres	3,567	559	91	30	3	...
	Duty on gross supply	9 46	13·31	1·79	2·11	0·43	...
89-90	Kharif ... Acres	73,122	39,641	26,121	2,501	39,345	...
	Duty on gross supply	80·77	78·19	102·92	44·46	83·01	...
	Rabi .. Acres	4,752	605	478	62	...	...
	Duty on gross supply	15·92	3 71	3·95	2·38	...	...

The area under irrigation in the *rabi* season is so small that the duty in that season is of no importance. There is a satisfactory increase in the duty in the *kharif* season in the case of all the canals in which the area is considerable.

The following table gives the duty attained during the month of October only, when the greatest strain on the canals occurred:—

	Kendrapara Canal system.	Taldundah Canal system.	HIGH LEVEL CANAL— Range I.	Range II.	Range III.	Jajpur Canal.	Total (omitting Jajpur Canal).
1	2	3	4	5	6	7	8
Area of kharif	70,686	41,570	22,304	2,451	36,180	452	173,290
Discharge at head	1,328	654	409	202	431	...	3,024
Duty on gross supply	53·22	63·56	54·75	12·16	83·97	...	57·34

On the Kendrapara Canal system the average discharge from the 6th October to the 4th November inclusive was 1,450 cubic foot per second, which gives a duty of 48·75 acres per cubic foot per second on the average maximum sustained discharge. The maximum average discharge for seven consecutive days occurred from 28th October to 3rd November inclusive, and amounted to 1,695 cubic feet per second. Calculated on this figure, the duty for the maximum discharge was only 41·70 acres. Regarding the Taldundah Canal system, the Superintending Engineer writes:—

"A considerably higher duty was obtained on the Taldundah Canal system during October, regarding which Mr. Butler makes the following observations:—

'The greatest demand for irrigation was during the last ten days of October, and during that time the average discharge of both Taldundah and Machgong Canal was 638 cubic feet per second, the area irrigated being 43,559 acres. The duty was 68 acres per cubic foot per second. Taking the Taldundah and Machgong Canals separately, the discharges were 188 and 450 cubic feet per second, and the areas irrigated 10,264 and 3,295 acres, and the duty 57 and 74 acres per cubic foot per second. There being no rain and hot sun all during October, the distributaries were put to as severe a test as may ever be expected. The duty obtained, viz., 68 acres per cubic foot per second, is low, but with the outlets properly sized and regulated, a duty of 80 acres per cubic foot per second could easily be obtained, and I should think with very careful regulation we might obtain a duty of 90 as on the Machgong Canal. With the outlets very imperfectly sized and regulated, and with an area of 2,500 acres irrigated from the new distributaries, which being perfectly dry absorbed a large quantity of water, a duty of 74 acres per cubic foot per second was obtained. I can account for the low duty obtained on the Taldundah Canal only by the fact that the length of the distributaries compared with the area irrigated is very long, and the outlets are too large and numerous.

'There was great demand for water between the 5th October and 5th November, and more particularly during the last week of October, until the rain came. Practically no water was escaping, and, assuming that the whole area received two waterings during the month, the gross duty of the whole canal system is fifty acres per cubic foot. If we take the water supplied from the 5th October to 5th November, and assume that it all reached the fields, it would have been sufficient to cover the area irrigated to a depth of 15¾ inches.'

"There can be little doubt that up to now there has been considerable, if not a great, waste of water, and this can only be remedied by a more economical use and retention of supply by the raiyats, and by a more carefully regulated supply from the canal based on a more exact knowledge of the irrigable lands, and on a more careful selection of the areas that should be leased. The change of procedure under the new rules will ensure this."

CROP EXPERIMENT.

19. The outturn of crops was tested during the year by 261 experiments, of which 162 were on land irrigated by canal water and 99 on unirrigated land. The results are tabulated below:—

Name of division.	Number of experiments.	Outturn per acre from irrigated land.		Number of experiments.	Outturn per acre from unirrigated land.		Value of outturn from irrigated land.		Value of outturn from unirrigated land.	
		Paddy.	Straw.		Paddy.	Straw.	Paddy at Re. 1 per maund.	Straw at 9 maunds per rupee.	Paddy at Re. 1 per maund.	Straw at 9 maunds per rupee.

20. The following figures show the balances outstanding at the commencement of the year under review:— ASSESSMENTS, COLLECTION AND BALANCES.

		Rs.
Water-rates	... ...	1,98,364
Miscellaneous Revenue	... ...	267
	Total ...	1,98,631

as against the balances outstanding on 1st April 1892, which were—

		Rs.
Water-rates	... ...	2,33,704
Miscellaneous Revenue	... ...	267
	Total ...	2,33,971

20. The balances, assessments, and recoveries of water-rates for the last five years are given in the table below:—

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realizations.	Remitted. or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88 ...	87,458	1,50,297	2,37,755	1,37,869	7,777	92,109
1888-89 ...	92,109	1,96,765	2,88,874	1,51,365	22,912	1,14,597
1889-90 ...	1,14,597	2,87,277	4,01,874	1,99,844	25,268	1,76,762
1890-91 ...	1,76,762	2,69,650	4,46,412	2,09,806	38,242	1,98,364
1891-92 ...	1,98,364	2,82,880	4,81,244	2,17,256	30,284	2,33,704

During the last five years the outstanding balance has steadily risen from Rs. 87,458 at the beginning of 1887-88 to Rs. 2,33,704 at the close of the year under review. This unsatisfactory state of affairs is in some measure attributable to the failure of the ijáradári system of collection, but this is not in itself sufficient to account for the high figure to which the unrealised balance has been allowed to rise. The Commissioner, in a marginal remark on the Special Deputy Collector's Report for the year under review, attributes the bad percentage of collections to a want of energy and bad management on the part of the officer responsible, who has been transferred to other duty. The Special Deputy Collector, who assumed charge of the collections after the close of the year under review, has since been making strenuous efforts to reduce arrears, and in the first seven months of the year now current Rs. 204,048 have been collected. The balance on the 1st of November stood at Rs. 97,820, and it is expected that the figures at the end of the year will show a marked improvement on the results of the last three years' administration.

CERTIFICATES

21. The following table shows the progress of the year in realizing arrears and current demand:—

Year in which irrigation occurred.	Demands.			Collected or remitted.	Balance on 31st March 1892.
	Arrears on 31st March 1891.	Demands for 1891-92.	Total.		
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
1888-89 and previous years.	31,897	9,074	40,971	32,621	8,350
1889-90 ...	58,043	8,339	66,382	46,000	20,381
1890-91 ...	1,08,424	87,053	1,95,477	1,13,537	81,940
1891-92 ...	...	1,78,414	1,78,414	55,382	1,23,033
Total ...	1,98,364	2,82,880	4,81,244	2,47,540	2,33,704

On 31st March 1891 the oldest arrears were Rs. 1,022, which fell due in the year 1886-87, out of which Rs. 544 were collected during the year. On this subject the Commissioner remarks:—

"The older an arrear is the greater is the difficulty of realising it and the more heart-burnings it causes to the detriment of the department."

The Special Deputy Collector adds:—

"Every endeavour is being made to work off these arrears."

ARREARS.

22. The amount realised by the Collectors on water-rates and miscellaneous revenue was Rs. 2,28,451, out of which Rs. 34,336 were recovered on certificates issued under the Public Demands Recovery Act. The amount so collected in 1890-91 was Rs. 24,964. The following statement gives details of the amounts recovered by certificate:—

By whom collected.	Water-rates.	Miscellaneous.	Total water-rates and miscellaneous.	Value of court-fee stamps affixed on the certificates realised by the Certificate Officer during 1891-92.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.

2. By being wholly satisfied ...	9,573	25,094	9,321	22,297	2,136	7,198	1,087	2,564	11,709	32,292	10,408	24,861
Total ...	10,872	27,558	9,693	22,355	2,212	7,341	1,095	2,616	13,084	34,899	10,988	24,071
Balance outstanding at the close of the year	4,382	20,090	7,560	23,604	221	1,029	1,484	3,900	4,603	21,119	9,044	27,499

Although good progress has been made during the year in disposing of certificate cases, the number pending at the close of the year was still large. It is satisfactory to be able to note that, out of the 4,603 cases pending, 3,575 had been disposed of by August 1892. The Special Deputy Collector remarks:—

"The number of cases struck off in the Cuttack district was unduly large. It is to be hoped that these cases will be reduced in future by the exercise of proper discretion in filing them. Instructions have been issued to zilladars to the effect that in pursuance of the provision of the Public Demands Recovery Act they should, as a rule, apply for such dues as may not afterwards be found irrecoverable."

23. The number of objections against assessment filed and disposed of during the year are shown in detail below :— **Complaints.**

Division.	(I)—Ordinary Remissions.				(II to IV)—Other Complaints.				Total complaints received during the year excluding those pending from previous year.	Pending.	Remarks.
	Received during the year and pending from previous year.	Disposed of.		Pending.	Received during the year and pending from last year.	Disposed of.		Pending.			
		Remission allowed.	Remission refused.			Allowed.	Rejected.

Total, 1890-91 ...	4,560	5,338	287	935	1,795	1,273	36	486	3,185	1,421	

The Special Deputy Collector writes:—

"The number of objections filed was greater than that in the previous year, but the disposal of cases was more satisfactory. The number pending at the end of the previous year was 1,421, whereas at the end of the year 1891-92 it was only 830.

"The timely issue of purchas and prompt collection are the best means of reducing the number of objections."

REMISSIONS. 24. Sums aggregating Rs. 30,485 were remitted and written off as irrecoverable during the year, against Rs. 38,688 in the year previous. The following is the Deputy Revenue Superintendent's classification of the reasons for remission:—

Revision of Assessment.

	Rs.	A.	P.
(a) Unirrigated crops	16,360	3	5
(b) Damaged ,, ...	8,034	4	11
(c) Chowkidar's jageer	2,087	0	6
Total ...	26,481	8	10

Remissions.

	Rs.	A.	P.
(a) Waste land	926	4	1
(b) Land occupied by canals	44	6	7
(c) Twice assessed	491	6	4
(d) Barred by limitation	105	15	1
(e) Excessive realizations	562	4	9
(f) Change of rates	195	11	6
(g) Erroneous assessments	591	8	6
(h) On account of death of defaulter ...	101	14	6
(i) Absconding of defaulter	322	11	9
(j) Lease cancelled	138	1	1
Total ...	3,480	4	2

Written off.

	Rs.	A.	P.
Irrecoverable demands	523	9	5
Total ...	30,485	6	5

The Superintending Engineer remarks:—

"The remissions granted under *a*, &c., amounting to four-fifths of the whole, are to a large extent fictitious, as noted in last year's report, and are the result of a pernicious system of including in the lease and demand high lands that cannot be irrigated and low lands that do not require irrigation. Under the rules recently introduced this will be done away with, and the area leased will truly show the area to which irrigation is to be given, and for which the Engineers will be responsible for giving a full supply that will ensure a full crop. In this connection I beg to refer to the correspondence ending with Bengal Government's No. 2741 of 4th March 1892.

"The undernoted table shows against what year's dues the remission of Rs. 29,760 have been granted; that they should only last year have been granted for dues since 1886-87 shows a lamentable want of energy and system in the Collecting Department:—

Year.	Amount. Rs.	A.	P.
1886-87	61	3	1
1887-88	331	4	0
1888-89	2,085	3	0
1889-90	10,169	6	7
1890-91	16,820	12	11
1891-92	292	5	6
Total ...	29,760	3	1"

25. The statement below compares the cost of the revenue establishment for the last five years:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5	6
Establishment under Collector.	Rs.	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowance	20,255	21,448	22,116	21,848	22,014
Temporary establishment	8,494	9,941	19,112	17,451	17,504
Contingencies	2,218	2,889	4,482	2,928	3,458
Headmen's fees	2,208	1,680	2,244	2,803	6,591
Establishment under Executive Engineer.					
Permanent and temporary establishment ...	2,964	3,052	3,398	3,417	3,447
Water-regulation establishment	4,161	4,151	4,150	4,144	4,127
Total ...	40,300	43,161	55,502	52,591	57,141
Collections of water-rates and miscellaneous revenue by the Canal Revenue Department	1,46,039	1,60,328	2,09,823	2,19,692	2,28,451
Percentage ...	27·6	26·9	26·4	23·9	25·0

There has been an increase in the cost of establishment to the extent of Rs. 4,550, which is mainly due to arrears of headmen's fees amounting to Rs. 3,788, due for previous years, having been paid in this year.

26. The receipts from navigation include the earnings of the transport service maintained by Government on the High Level Canal between Cuttack and Bhuddruck and Acquapada and Jajpur, a distance of 80½ miles each way, in addition to tolls on boats and rafts. The management of the canals is, in this respect, entirely in the hands of the engineering staff.

An increase of 24¾ miles has taken place in the total length of the canals owing to the opening of the Taldundah Extension Canal and of three miles of feeder channel on the Gobri Extension Canal.

27. The tollage receipts of each of the canal systems for the last five years are shown below:—

Year.	Taldundah Canal System.		Kendrapara Canal System.		High Level Canal, Range I.		High Level Canal, Range II.		High Level Canal, Range III.		Jajpur Canal.		Total.	
	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.	Number of miles open.	Tollage receipts.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
1887-88	31	6,267	75	46,659	33	8,306	12½	4,085	19	1,311		..	170½	66,628
1888-89	31	4,310	75	53,786	33	6,642	12½	3,392	19	1,601	6½	99	177	69,830
1889-90	31	4,426	75	60,245	33	8,386	12½	3,133	19	1,386	6½	163	177	78,039
1890-91	31	2,148	75	86,907	33	12,229	12½	3,185	19	2,174	6½	318	177	1,06,961
1891-92	55¾	4,357	78	98,462	33	12,854	12½	3,027	19	1,775	6½	286	204¾	1,20,761

The total Rs. 1,20,761 includes private traffic to the amount of Rs. 1,15,881, the balance, Rs. 4,880, being the toll charges on Government boats. The increase in tollage from private traffic, compared with 1890-91, is Rs. 16,638. This is due in some measure to the canals having been closed for shorter periods this year, but the principal cause is the expansion of local traffic, mainly in rice, which occurred on the Taldundah Canal and Ranges I and II of the High Level Canal. On the Kendrapara Canal there was a falling-off of 5,974 tons in the grain traffic.

The Superintending Engineer writes:—

"It is known that during the freshets in the Mahanadi last rains, the rice merchants sent their cargoes by the Taldundah Canal, owing to the Kendrapara Canal head lock being

partly silted up, and this accounts for part of the increase. The Executive Engineer reports that a part of the increase on the Taldundah Canal is undoubtedly due to an increase in local traffic, which was unfortunately checked by breaches in the Taldundah Extension Canal, caused by the cyclonic storm of November last. The local traffic chiefly consists of rice, which is carried by boats from Rahama in the 38th mile to Bhutmundi in the 50th mile, where it is stored for despatch to False Point along the Mahanadi river. Rice is also sent from near Tirtole to Cuttack by canal, and a gradual expansion of this local traffic is anticipated.

"The increases on the High Level Canal, Ranges I, II, and III, are explained by the Executive Engineer as due to a large quantity of rice having been imported into Cuttack. Less rice was exported from Jajpur than last year."

The increase in the navigation revenue, especially in the Kendrapara Canal, the tollage on which averages Rs. 1,262 per mile, is encouraging; over the whole system the tollage amounts to Rs. 584 a mile.

TRAFFIC.

28. Details regarding the traffic (excluding the transport service) of all the canals in Orissa for the last ten years are given in the following table:—

		1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

TRANSPORT SERVICE.

29. The cost of working the transport service between Bhuddruck and Cuttack and between Acquapada and Jajpur was Rs. 16,636, and the actual receipts Rs. 14,967. The loss incurred on this service is therefore Rs. 1,669, against a loss of Rs. 3,851 in the previous year.

The working charges for 1891-92 include Rs. 4,880 as tollage, while the earnings include Rs. 690, hire of boats; allowing for which the expenditure was Rs. 11,756 and the earnings Rs. 14,277, or a net profit of Rs. 2,521 against Rs. 1,626 in the previous year.

MISCELLANEOUS RECEIPTS.

30. The miscellaneous receipts for the last five years are shown in the following statement:—

DETAILS.		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1		2	3	4	5	6

Pattia	783	2,203	4,194	2,538	2·81	5·36	2·81
Byturni	1,026	6,295	3,792	1,244	6·14	3·70	6·14
Burrah	526	5,470	4,450	1,067	10·40	8·46	10·40
Total of all weirs ...	18,497	61,453	62,422	38,681	3·32	3·37	3·32

The reduction of expenditure on repairs to weirs is due to the absence of heavy floods. At the Beropa weir the rubble packing was worn out, and had to be replaced.

MAIN AND BRANCH CANALS.

33. The expenditure on each canal for the last three years is shown below:—

Canals.	1889-90.			1890-91.			1891-92.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.

Ditto, do. II ...	12½	5,793	463	12½	3,757	300	12½	4,071	326
Ditto, do. III ...	19	8,690	457	19	5,589	294	19	4,907	258
Jajpur Canal	6½	721	111	6½	1,033	158	6½	1,275	196
Total ...	239	1,09,839	460	252	99,746	395	279¾	82,741	295

The maintenance charges of main canals fell from Rs. 99,756 to Rs. 82,741. The expenditure by subheads in each canal is commented on by the Superintending Engineer with explanations of increases and decreases. The Kendrapara Canal shows a reduction of expenditure at the rate of Rs. 1,607 per mile, or Rs. 6,267 in all, in spite of increased charges for silt clearing, owing to the supply lock and channel having silted up during floods, and of damages to buildings by the cyclone. There is a small increase on the Kendrapara Extension Canal. A large amount of jaffry work for bank protection was carried out on the Gobri Canal, and silting was heavy, while the damage done to buildings by the cyclone also caused excess, the result being a raising of the mileage rate by Rs. 122·5. There were material reductions on the Gobri Extension Canal and on the Pattamundi Canal, the expenditure on the latter being Rs. 4,367 against Rs. 9,972 last year, owing to economy in repairs to banks and masonry works. Expenses have risen on the Taldundah Canal, the causes being increased silt-clearing and dredging, cyclone damages, and the cost of repairs to ferry boats which is now charged to repairs instead of to tools and plant as heretofore. The two last-mentioned causes also operated to raise the charges on the Machgong Canal, and, combined with increased cost of repairing the canal banks, brought the mileage rate up to Rs. 208·5 against Rs. 171·8 in 1890-91. On the High Level Canal there was, on the whole, a reduction, mainly on Range I, under all heads except repairs to banks, and on the Jajpur Canal a small excess of Rs. 243, due to bank repairs.

DISTRIBUTARIES.

34. The average mileage rate for the maintenance of distributaries was Rs. 20·94 as compared with Rs. 30·06 in the previous year:—

	1889-90.			1890-91.			1891-92.		
	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.	Miles.	Cost.	Per mile.
1	2	3	4	5	6	7	8	9	10
DISTRIBUTARIES.	No.	Rs.	Rs.	No.	Rs.	Rs.	No.	Rs.	Rs.
Kendrapara Canal System	333¾	9,826	29·44	357	9,975	22·34	357	6,574	18·41
Taldundah Canal	71½	3,068	42·91	71½	1,953	27·31	71½	1,166	16·30
Machgong Canal	122½	5,909	48·34	122½	4,084	33·41	122½	2,753	22·52
High Level Canal, Range I	131½	5,185	39·50	131½	3,961	30·18	131½	2,663	20·20
Ditto, do. II	......	......	......	......	......	......	......	......	......
Ditto, do. III	......	......	......	49½	2,019	4·80	49½	2,168	43·80
Total ...	658¾	23,988	36·41	731½	21,992	30·06	731½	15,324	20·94

The lengths of distributaries in the above are those which have been brought on the revenue account, and consequently differ om the lengths given in paragraph 13 which include all so far advanced as to be fit for use, whether the capital account is still open or not.

The Superintending Engineer remarks: —

"The expenditure on distributaries is Rs. 6,668 less than that of the previous year; the mileage rate being only Rs. 20·94, against 30·06 for a length of 731½ miles. This rate is abnormally low, and a considerably increased expenditure will be required for the next two years to place the distributaries in good working condition. Levels are now being taken of all distributaries and recorded, and *datum* blocks are being fixed throughout their length. When this has been completed, bed clearance will be effected in a more systematic and economical way than has hitherto been found possible, and the branch distributaries more particularly will be made fully effective."

Drainage and Protective Works.

35. The total expenditure on drainage and protective works was Rs. 10,389 against Rs. 12,696 in 1890-91. The most important items under this head are the protective embankments on the High Level and Taldundah Canals, and the drainage channels connected with the Kendrapara, Taldundah, and Machgong Canals.

Dredging and Silt-clearing.

36. The cost of silt-clearing and dredging during the year 1891-92 is given in the following table:—

	Silt-clearing.			Dredging.		
	Quantity.	Cost.	Rate per 1,000 c. ft.	Quantity.	Cost.	Rate per 1,000 c. feet.
1	2	3	4	5	6	7
	C. feet.	Rs.	Rs.	C. feet.	Rs.	Rs.
Kendrapara Canal	696,541*	2,989	4·29	1,151,704	7,797	6·77
„ Extension ..	...	...	...	18,710	128	6·84

Total	3 307,980	10,380	3·14	1,310,960	10,133	7·73

* 486,011 cubic feet of silt hand dredged are included in this item; hence the high rate.

The cost of raising and delivery of the silt has amounted to Rs. 4·34, and that of haulage and discharge to Rs. 2·43 per thousand cubic feet on the Kendrapara Canal. The rates for the Kendrapara Extension Canal are Rs. 4·59 and Rs. 2·25, respectively.

PLANTATIONS.

37. The following table shows the state of the plantations for the last two years :—

Year.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1890-91 ...	69,741	26,806	50,061	146,608
1891-92 ...	66,307	34,469	23,244	124,020

MIDNAPORE CANAL.

CAPITAL ACCOUNT.

38. The Capital, Interest, and Revenue Accounts of this Canal are given below :—

1.—CAPITAL ACCOUNT.

Heads of Account.	Outlay during 1891-92.	Outlay to the end of 1891-92.
1	2	3
Direct charges.	Rs.	Rs.
I.—Works	...	53,53,307
II.—Establishment	...	19,25,180
III.—Tools and plant	14,469	9,16,982
IV.—Suspense accounts	...	......
Loss by exchange	...	94,800
Total ...	14,469	82,90,269
V.—*Less*—Receipts on Capital Account	...	31,558
Total direct charges ...	14,469	82,58,711
Indirect charges.		
Capitalization of abatement of land revenue	...	168
Leave and pension allowances ...	...	1,83,965
Total indirect charges ...	...	1,84,133

All capital expenditure on this canal is now, agreeably to the orders of the Government of India, charged to the head 43—Minor Works and Navigation, and provided from Provincial Funds, the canal being no longer classed as a productive work. The expenditure of the year, amounting to Rs. 14,469, was incurred on the construction of a steam-tug.

2.—INTEREST ACCOUNT.

INTEREST ACCOUNT.

Total ...	2,36,991	2,84,697			

EARNINGS. 39. The receipts under "water rates," Rs. 1,32,981, shown above, are the actual cash collections during the year, and include a sum of Rs. 70,959 on account of irrigation which occurred in years previous to 1891-92. The "earnings" of the last four years, including all sums due for irrigation which occurred during each year respectively, whether leases for the irrigation were executed during or subsequent to the year in which the irrigation occurred, are given in the table below. For the year under review the earnings cannot be given exactly, as the amounts which will fall due in subsequent years are for irrigation on unleased areas, where the justice of the demand is disputed by the cultivators, and the assessment is consequently delayed. The total of such sums for 1891-92 is estimated at Rs. 3,329. For 1890-91 a further amount may have to be added next year.

Year in which the irrigation occurred.	Year in which leases were executed.	Earnings of 1888-89.	Earnings of 1889-90.	Earnings of 1890-91.	Earnings of 1891-92.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1888-89	1888-89	1,18,243	...	...	...
	1889-90	13,200	...	...	...
	1890-91	366	...	...	...
	1891-92	Nil.	...	...	...
1889-90	1889-90	...	1,03,404	...	...
	1890-91	...	7,050	...	...
	1891-92	...	102	...	...
1890-91	1890-91	...	...	1,23,043	...
	1891-92	...	...	3,800	...
1891-92	1891-92	...	...	...	1,25,916
	Subsequent years ...	...	Estimated at	...	3,329
	Total ...	1,31,809	1,10,556	1,26,843	1,29,245
Deduct refunds	... ...	285	181	205	3
	Net Total ...	1,31,524	1,10,375	1,26,638	1,29,242

The net financial results calculated on the earnings for the last four years are, therefore, as shown in the following statement, the figures in which should be substituted for those given in the revenue reports of the corresponding years. The figures for "navigation" and "miscellaneous" are the actual realizations during the year:—

Year.	1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.

41. The length of canal open for navigation during 1891-92 remained the same as that for the previous year, viz., 72 miles, and no additions were made during the year to the areas protected or commanded. The table below shows the capabilities of the canal and distributaries, and the areas protected, commanded, irrigable, and assessed:— LENGTHS OF CANALS AND DISTRIBUTARIES.

NAME OF CANAL.	1890-91.								1891-92.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from floods.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.

Total ...	283·19	125,000	1,457	1,468	76	76

RAINFALL. 43. The following statement shows the rainfall for the year 1891-92 and the four previous years at four registering stations which lie within the area irrigated by the Midnapore Canal:—

STATIONS.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	Average of former years.	
						No. of years.	Average rainfall.
1	2	3	4	5	6	7	8
	Inches.	Inches.	Inches.	Inches.	Inches.		Inches.
Midnapore ...	55·38	68·00	48·71	57·64	55·08	22	56·26
Panchkurah ...	56·21	59·47	51·78	55 84	41·60	22	56·19
Luchmapore ...	47·00	60·93	45·61	59·30	57·48	6	58·50
Mowah ...	49·76	60·14	31·80	49·93	53·07	6	54·77
Average ...	52·09	62·13	44·48	55·68	51·81	......	56·43

The total rainfall was somewhat below the average of former years, especially at the Panchkurah observing station. It was unevenly distributed, being fairly abundant in the early part of the season, and beginning to fail in September, while October and all succeeding months to the end of the year were marked by an almost complete absence of rain. The distribution over the months of the kharif season is shown below:—

	Midnapore.	Panchkurah.	Luchmapore.	Mowah.	Average, 1891-92.	Average, 1890-91.

Do. 1890-91 ...	24·56	28·26	26·68	23·97	25·87	......

FLOODS. 44. There were no heavy floods during the year. The highest gauge-readings of the river Cossye at Midnapore and Panchkurah above and below weir,

and those of the river Rupnarain at Dainan and Kantapukhur are shown in the statement below, the readings being the height in feet above mean sea level:—

River.	Locality.	1891-92.		1890-91.		Highest recorded.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8
Cossye	Midnapore above weir	14th August 1891 ...	87·80	30th July 1890 ...	86·50	1868 ...	92·30
	Ditto below weir	Ditto ...	80·00	Ditto ..	81·00	Do. ...	91·55
	Panchkurah above weir	Ditto ...	33·50	25th June 1890 ...	29·40	10th October 1876 ...	35·00
	Ditto below weir	Ditto ...	31·90	Ditto ...	29·00	Ditto ...	31·30
Rupnarain	Dainan	19th August 1891 ...	14·20	31st July 1890 ...	14·20	26th August 1865 ...	17·3[illegible]
	Kantapukhur	Ditto ...	13·80	28th September 1890 ...	14·40	Ditto ...	16·80

The discharge of the river Cossye reached its maximum, 58,453 cubic feet per second, on the 14th August 1891, and from that date diminished rapidly. the average discharge during September being 7,290, and during October 1,658 cubic feet per second, and falling to 401 cubic feet per second in November.

45. The area of each crop irrigated during 1891-92 and the nine previous years exclusive of unleased areas compared with the yearly rainfall is shown below:— IRRIGATION.

Year.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.		Acres.	Inches
1882-83 ...	101,939	...	...	101,939	58·81 *
1883-84 ...	97,919	...	...	97,919	47·99 *

1891-92 ...	83,905	68	...	83,973	51·81 †

* Mean of observations of two stations—Midnapore and Panchkurah.

† Average of four stations throughout the irrigated areas under the Midnapore and Panchkurah weirs.

The Superintending Engineer writes—

"Owing to want of rain from September 1891, it was found impossible to irrigate the full area leased, which was slightly in excess of the area actually irrigated. When water was most wanted, the discharge of the Cossye ran as low as 200 to 300 cubic feet per second, so that in the months of October and November the river pools were drained in order to meet the demands for water. As it turned out, the irrigation operations of the year may be considered very successful, considering the water available. Of the total area under irrigation during the year, quite 90 per cent. was under the Midnapore weir, and the rest under the Panchkurah weir and in the tidal reaches."

46. In the following table information is given as to the areas under lease of each kind at the beginning of the year, the progress of leasing during the year, and the leases which remained in force after its close. The figures do not include assessments for illicit irrigation for which leases were executed after 31st March 1892:—

Particulars.	Kharif.			Sugarcane and other perennial irrigation.	Rabi.	Total.
	Long leases.	Annual leases.	Surreptitious irrigation.			
1	2	3	4	5	6	7
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Leases in f(rce at the end of 1890-91	81,927	75	...	...	...	82,002
" which expired at the end of 1890-91 ...	2,468	75	...	...	...	2,543
" in force at th- beginning of 1891-92 ...	79,459	...	...	...	...	79,459
" executed during 1891-92	4,446	...	...	...	68	4,514
" in force at the end of 1891-92	83,905	...	...	...	68	83,973
" which expired at the end of 1891-92 ...	17,133	...	...	...	68	17,201
in force at the beginning of 1892-93 ...	66,772	...	...	...	...	66,772

UTY OF WATER.

47. The duty obtained from the gross discharge during the past three years is detailed in the following statement:—

Particulars.			Under Midnapore weir.	Under Panchkurah weir.
1			2	3
1889-90	Kharif ...	Acres	63,598	4,314
		Duty on gross supply ...	**134**	**77**
1890-91	Kharif ...	Acres ...	76,645	4,981
		Duty on gross supply ...	**160**	**89**
1891-92	Kharif ...	Acres	77,631	5,898
		Duty on gross supply ...	**172**	**64**

The duty calculated from the average gross supply during October 1891 is under the Midnapore weir 210, and under the Panchkurah weir 24 acres per cubic foot per second. The very high duty attained tends to throw doubt on the contention that the area actually irrigated is much in excess of that assessed with water rates. Probably at some periods during the year other than leased lands benefit by canal water, but it is improbable that any considerably increased area could be regularly supplied with water.

The areas irrigated in the Tidal Reaches, Ranges I and II, are not taken account of in the above statement. That area in the year under review was 376 acres, being the same as last year.

F EXPERIMENTS.

48. No experiments on outturn of crops were carried out during the year.

ASSESSMENTS, COLLECTIONS, AND BALANCES.

49. The following comparative statement shows the balances, assessments, and recoveries of water-rates on the Midnapore Canal during the last five years:—

Year.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88 ...	50,749	1,02,532	1,53,281	90,837	5,951	56,493
1888-89 ...	56,493	1,23,337	1,79,830	91,016	4,041	84,773
1889-90 ...	84,773	1,17,202	2,01,975	1,16,424	34,907	50,644
1890-91 ...	50,644	1,30,595	1,81,239	1,15,438	834	64,967
1891-92 ...	64,967	1,29,822	1,94,789	1,32,981	2,836	58,972

The figures in the above statement have been furnished by the Deputy Superintendent of Canal Revenue, and agree with those given in the Examiner's memorandum.

In the arrear balance of Rs. 64,967 with which the year opened, there were no demands of older standing than 1887-88. Rupees 58,960 were for dues incurred in 1890-91, and Rs. 6,007 for those of the three preceding years.

The current demand, amounting to Rs. 1,29,822, was composed of Rs. 1,25,916 earned within the year, and Rs. 3,906 earned in the four preceding years, but not recoverable till 1891-92.

ARREARS.

50. The whole amount for recovery, including arrears, was Rs. 13,550 more than that in 1890-91, while the collections were Rs. 17,543 more, the final result being a decrease of Rs. 5,995 in the balance outstanding at the end of the year. In the following table, arrear and current dues are distinguished, the sums composing the demand are distributed by the years in which they

were earned, and the proportions of each year's earnings, recovered or remitted, are separately shown:—

YEAR.	Amount previously due and unrealized.	Amount falling due within the year.	Total amount due to end of the year.	ADJUSTMENT OF THE YEAR.				Balance unrealized at end of the month of March 1891.	Percentage adjusted.
				Cash recoveries.	Remission authorized.	Written off as being irrecoverable.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Per cent.
1887-88 ...	44 6 6	4 6 9	48 13 3	18 5 6	..	30 7 9	48 13 3		100·0
1888-89 ...	1,431 0 9	0 1 6	1,261 2 3	411 8 3	224 4 9	...	635 13 0	625 5 3	50·4
1889-90 ...	−170 0 0 4,531 7 3 +170 0 0	102 1 0	4,803 8 3	3,660 4 0	1,080 12 6	62 0 0	4,803 0 6	0 7 9	100·0
1890-91 ...	58,959 12 6	3,799 13 6	62,759 10 0	57,932 3 0	385 9 3	...	58,317 12 3	4,441 13 9	92·9
1891-92 ...	...	1,25,916 7 9	1,25,916 7 9	70,958 13 6	1,052 15 6	...	72,011 13 0	53,904 10 9	57 2
Total ...	64,966 11 0	1,29,822 14 6	1,94,789 9 6	1,32,981 2 3	2,743 10 0	92 7 9	1,35,817 4 0	58,972 5 6	69·8

The percentage of the total amount due for water-rates which have been collected or otherwise adjusted during the year is 69·8 against 64·1 last year, and this improvement, so far as it goes, is satisfactory. But about 30 per cent. of the demand was still unadjusted at the close of the year, and the outstanding balance, though slightly diminished, is still unduly high.

51. The following classification of the remissions granted is given by the Deputy Revenue Superintendent:— REMISSIONS

	Rs.	A.	P.
By Collector, under rule 27 ...	2,491	8	3
Remissions granted by officers disposing of certificate objection cases ...	350	7	6
Total ...	2,841	15	9

Of this sum, Rs. 5-14 are for miscellaneous revenue. Deducting this amount from the total remissions, there remains a balance of Rs. 2,836-1-9, which is the figure shown in the foregoing statements.

52. Information regarding the number of certificates issued and disposed of during the year is given below:— CERTIFICATES

PARTICULARS.	MIDNAPORE.			
	1890-91.		1891-92.	
	No.	Amount.	No.	Amount.
1	2	3	4	5
Cases for disposal.		Rs.		Rs.
1. Cases pending at the close of the preceding year ...	3,414	16,195	1,958	6,085
2. Cases instituted during the year	7,664	32,944	3,428	17,765
Total ...	11,108	49,139	5,386	23,850
Cases disposed of.				
1. By being struck off, owing to the demand having been remitted.	3,839	26,396	1,422	6,239
2. By being wholly satisfied	5,311	16,658	3,515	14,039
Total ...	9,150	43,054	4,937	20,278
Balance outstanding at the close of the year ...	1,958	6,085	449	3,572

The decreases which occurred in the number of cases instituted and the balance outstanding at the end of the year are satisfactory.

The decrease in the number issued is attributable mainly to the raising of the process fees to 12 annas, which took effect from April 1891, and, to some extent, to greater discrimination being exercised in issuing them. Of the 5,386 certificates for disposal, 1,474 were for surreptitious irrigation, and 3,912 for the satisfaction of demands under kabuliyats.

COMPLAINTS. 53. The following table shows the number of complaints filed during the last two years, and how they have been disposed of :—

Year.	Class of complaints.	Received.			Disposed of.			Balance pending at end of the year.		
		Balance pending from previous year.	Received during the year.	Total.	Allowed.	Refused.	Total.	Received during previous years.	Received during the year.	Total.
1	2	3	4	5	6	7	8	9	10	11
1890-91 ...	Ordinary remission	93	991	1,084	238	743	981	...	...	103
	Other complaints	55	259	314	59	188	247	...	...	67
	Total ...	148	1,250	1,398	297	931	1,228	...	..	170
1891-92 ...	Ordinary remission	103	474	577	112	407	519	...	...	58
	Other complaints	67	152	219	26	156	182	..	..	37
	Total	170	626	796	138	563	701	...	...	95

On the 1st April 1891, 170 complaints were pending, 626 were received during the year as compared with 1,250 in the previous year, making a total of 796, of which 701 were disposed of during the year, 19·7 per cent. being established, and 80·3 per cent. being rejected.

REVENUE ESTABLISHMENT. 54. The following statement compares the cost of the revenue establishment during the last four years:—

Establishment under the Collector.	1888-89.	1889-90.	1890-91	1891-92.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Permanent establishment, including travelling allowances ...	20,474	18,984	19,757	17,947
Temporary establishment ...	660	604	649	682
Contingencies	1,459	1,253	1,260	1,154
Headmen's fees .. .	2,135	49	60	335
Total ...	24,728	20,890	21,726	20,118

The sums mentioned below were paid by the Executive Engineer for water-regulation in addition to the amounts specified in the foregoing table :—

	Water-regulation. Permanent.	Water-regulation. Temporary.
	Rs.	Rs.
1887-88	572	625
1888-89	546	653
1889-90	480	533
1890-91	488	595
1891-92	473	682

The cost of collection was 15·1 per cent. on the amount realized against 17·9 per cent. in 1890-91.

NAVIGATION. 55. The total navigation receipts of the year were Rs. 1,32,572, against Rs. 1,10,830 in 1890-91. This marked increase is almost entirely due to the

steamer traffic, the tolls realized from the Calcutta Steam Navigation Company having risen from Rs. 21,274 to Rs. 41,180 owing to their underbidding the native boats. The tonnage of native boats plying on the canal has, on the contrary, decreased, though there is an increase of Rs. 1,836 in the toll collections. The Superintending Engineer writes:—

"The increase in the total receipts may be attributed to the great activity in the Calcutta rice market. Large quantities of this grain were steadily exported from the Midnapore district since September 1891. The Calcutta Steam Navigation Company's vessels were largely employed in this trade, which helped to increase the toll receipts of the year."

The exports of rice from September 1891 to January 1892 were 18,776 tons, valued at Rs 12,28,229, against 12,700 tons, valued at Rs. 8,50,012 during the corresponding period of 1890-91.

The usual particulars regarding the traffic carried in vessels, including those of the Calcutta Steam Navigation Company, for the last ten years are given below:—

DESCRIPTION.		1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

Fines		...	...	...	...	...
Miscellaneous	Rent of lands	8,268	7,182	7,984	6,079	8,758
	,, of fisheries	1,440	1,084	812	736	4,447
	Cost of process	3,023	1,113	2,400	1,009	2,516
	Other items ...	3,504	1,189	748	370	2,670
Total ...		16,967	11,299	13,016	9,004	19,147

The increase in all items of miscellaneous receipts is attributable to the more systematic management of leasing, which was this year undertaken by the Canal Officers.

MAINTENANCE AND REPAIRS.

57. The following figures show the actual cost of maintenance and repairs during the last three years distributed by subheads:—

		1889-90.	1890-91.	1891-92.
		Rs.	Rs.	Rs.
Head works, including buildings	...	10,541	11,610	8,373
Main canal and branches	...	77,488	77,323	1,18,241
Distributaries ...	...	19,769	11,851	10,365
Drainage and protective works	...	2,262	1,151	1,239
Working steamers ...	...	3,447	3,103	3,044
Total	...	1,13,507	1,05,038	1,41,262

HEAD WORKS AND WEIRS.

58. The expenditure on the Midnapore and Panchkurah head works during the year was Rs. 4,582 and Rs. 3,790, respectively, against Rs. 7,120 and Rs. 4,490 in last year. On weirs the expenditure was at the rate of Rs. 0·30 per foot run at Midnapore, and Rs. 1·84 at Panchkura, against Rs. 0·86 and Rs. 0·79 respectively last year.

MAIN CANAL.

59. The outlay on repairs to the main canal, including that on head works, on working steamers, and on drainage works, was Rs. 1,30,897 against Rs. 93,187 in the previous year. The heavy cost of maintenance of the main canal and its branches, exceeding that of 1890-91 by Rs. 40,918, was caused by the extensive silt clearing operations which were carried out in the tidal reaches after a lapse of many years. The subheads affected were "earthwork" and "navigation works" (repairs to locks), the expenditure under which was Rs. 26,649 and Rs. 16,928, respectively, in excess of that incurred in the previous year. The repairs to the lock gates also involved an extraordinary expenditure of Rs. 14,513 under the head "tools and plant" on special iron caissons and pumping machinery, and Rs. 37,296 under the same head was spent on repairing dredgers, opportunity having been taken of the closure to have them thoroughly overhauled and repaired. The total expenditure on tools and plant was Rs. 51,761 against Rs. 23,929 in 1890-91.

DISTRIBUTARIES.

60. On distributaries the expenditure on repairs was Rs. 10,365, or Rs. 36 per mile, against Rs. 11,851, or Rs. 41 per mile, in the previous year. The saving was effected mainly under masonry works and was in a great measure due to the non-occurrence of floods.

61. In the following table, mileage rates for the last ten years, both for main canals and distributaries, are shown:—

Year.		Main Canal and Head Works, &c.			Distributaries.		
		Length of canal open.	Total cost of work.	Rate per mile.	Length of distributary channels.	Total cost of work.	Rate per mile.
1		2	3	4	5	6	7
		Miles.	Rs.	Rs.	Miles.	Rs.	Rs.
1882-83	...	48	1,01,821	2,121	277	20,407	73
1883-84	...	48	1,06,425	2,216	277	21,195	76
1884-85	...	48	1,15,171	2,399	277	18,865	68
1885-86	...	48	1,10,360	2,299	277	14,424	52
1886-87	...	48	1,20,135	2,503	283	17,617	63
1887-88	..	48	1,10,494	2,301	283	20,687	74
1888-89	...	48	83,675	1,743	283	22,464	79
1889-90	...	48	93,728	1,953	283	19,769	69
1890-91	...	48	93,187	1,941	283	11,851	41
1891-92	...	48	1,30,897	2,727	283	10,365	36

DREDGING AND SILT CLEARING

62. The quantity of silt dredged during the year was 4,030,769 cubic feet, at an average rate of Rs. 4·76 per 1,000 cubic feet, whereas the quantity during the previous year was 5,159,375 cubic feet, and the rate Rs. 5·43. The smaller outturn of work was due to the closure of the canal, during which the work could not be carried on.

The work done by the steam-dredgers during the year under review and the cost of working them is shown below:—

Name of dredger.	Quantity of earth dredged.	Actual cost of lifting.	Cost of removing		Total.	Lifting rate per 1,000 cubic feet.	Removing rate per 1,000 cubic feet.	Total rate per 1,000 cubic feet.
			Steam hopper-barges.	Ordinary hopper-barges.				
1	2	3	4	5	6	7	8	9
	C. ft.	Rs.	Rs.	Rs.	Rs.			
Hector dredger ...	373,830	1,637	835	...	2,472	4·37	2·23	6 61
Ajax ditto	886,395	3.102	1,579	...	4,681	3·49	1·78	5·28
Atlas ditto	1,964,860	5,622	2,862	...	8,484	2·86	1·45	4·31

Marchants ditto	...	52	...	...	52	...	...	...
Cadmus steam excavator ...	516,660	2,277	...	...	2,277	4·40	...	4·40
Total for 1891-92	4,030,769	13,913	5,276	...	19,219	3·45	1·30	4·76
Total for 1890-91	5,159,375	20,400	7,582	34	28,016	3·95	1·47	5·43

63. The state of the plantations for the last two years is shown in the following statement:— PLANTATIONS.

Year.	Trees upwards of 12 feet high.	Saplings between 4 and 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1890-91 ...	9,706	10,705	3,141	23,552
1891-92 ...	10,082	10,351	2,452	22,885

64. From a financial point of view, the results of the year were disappointing. The receipts under all items were greater than last year, but the increase was more than swallowed up by the heavy expenditure incurred in repairs, the net profit being only Rs. 18,371 against Rs. 28,131 in 1890-91. The failure of the rainfall in September and October caused a heavy demand for canal water for kharif irrigation, which was met with great difficulty, owing to the small supply in the river. The increase in the rice traffic, owing to the scarcity in other parts of the country, is noticeable, and in this connection it may be remarked that a yearly increasing proportion of the carrying trade is being diverted from country boats to the Steamer Companies. GENERAL RESULTS.

HIDGELLEE TIDAL CANAL.

65. The Capital, Interest, and Revenue Accounts of this Canal are given below:— CAPITAL ACCOUNT.

Total indirect charges ...	6,908	56,508

An extensive remodelling scheme has, for rather more than a year, been in progress on the Hidgellee Tidal Canal, having for its object the facilitation of navigation by increasing the depth of the canal and the exclusion of silt, the removal of which entailed very heavy annual expenditure and long closures of the canal. The scheme involves the lowering of the canal bed in Ranges I and II; the provision of two new supply sluices, by means of which the silty water will be led to the canal through long feeder channels, in which the silt will be deposited instead of in the canal itself; a cast-iron supply pipe laid on the bed of the Russulpore river, through which the supply for Range II will be drawn from Range III of the Orissa Coast canal, instead of being taken from the silt-laden water of the Russulpore; the construction of a new lock at Kalinagar to replace the old one, which is too small and in a badly chosen situation; and other works of a minor character, designed to assist in scouring and clearing silt from the lock entrances and navigation channels. The construction of the new lock at Kalinagar and of the iron supply pipe across the Russulpore has been postponed, pending the settlement of the difficulties regarding the deterioration of the Russulpore river, which has of late years been rapidly silting up. The deterioration now appears to have ceased, and during the year under review the depth of the river has even slightly increased, owing to the scour caused by the daily flow of the tide into and out of the lately constructed drainage cut at Balliaghye, which is also used as a navigation canal. The other works comprised in the remodelling scheme have been completed, the time occupied in carrying them out having been, on Range I, 12 months and 21 days, and on Range II, 6 months and 18 days.

INTEREST ACCOUNT.

The cost of maintenance, though slightly less than last year, still exceeds the average cost, which for the last eleven years amounts to Rs. 46,189, by Rs. 4,494. This is due to extensive repairs which had to be carried out on the lock gates, and to some alterations in the lock valves consequent on the remodelling scheme above alluded to. The Superintending Engineer writes:—

"The very high maintenance rate on this canal is due to the heavy influx of silt owing to the primitive feeding arrangements originally adopted, and to the mistake of having iron gates for the locks, which in the salt water have given trouble from the first and give increasing trouble as they get older."

It is hoped that, on the completion of the remodelling scheme, the working expenses will begin to decrease, but until the pipe across the Russulpore river is fixed, or some other equally effective method of supplying a comparatively pure supply, heavy expenditure on silt clearing on Range II will from time to time be necessary.

RAINFALL.

67. The rainfall at Contai station was 49·97 inches against 75·32 inches in 1890-91.

FLOODS.

68. During the year there were no floods of any consequence in any of the rivers crossed by the Hidgellee Tidal Canal. The highest gauge readings of the rivers Hooghly, Haldi, and Russulpore are shown in the following statement:—

NAME OF RIVER.	Locality.	1890-91.		1891-92.		Highest recorded reading.		REMARKS.
		Date.	Reading.	Date.	Reading.	Date.	Reading.	
1	2	3	4	5	6	7	8	9
Hooghly ...	Gewankhali ..	29th Sept. 1890	115·90	19th Sept. 1891	115·90	Date of record not obtainable from records.	116·90	Height recorded on plans of maximum floods, but dates not given.
Haldi	Etamagra ...	20th " "	116·40	19th " "	116·40	Ditto ...	120·22	
Russulpore ...	Kalinagar ...	29th " "	114·90	18th " "	114·70	Ditto ...	118·50	

NAVIGATION.

69. The usual particulars regarding the traffic on the Hidgellee Tidal Canal carried in vessels during the last ten years are given in the following

statement. The figures include those relating to the steamers belonging to the Calcutta Steam Navigation Company:—

PARTICULARS.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90	1890-91.	1891-92.

Rate of toll per mile ,,	1,510	2,148	1,427	1,798	1,734	1,338	1,700	1,200	821	1,128
Number of boats, including empty boats No.	17,445	22,728	17,660	19,316	17,542	13,503	16,481	13,785	10,215	15,332
Tonnage of boats ... Tons.	132,884	196,764	145,124	163,335	149,747	124,903	165,635	124,605	91,114	133,575
Passengers carried ... No.	3,310	...	...	...	8,569	11,951	34,032	(b)30,222	(b)22,420	(b)21,209
Estimated value of cargo, including rafts ... . Rs.	23,83,244	36,42,029	30,06,852	32,74,961	31,48,826	26,13,351	33,01,123	27,29,720	20,78,972	34,97,725

(a) Inclusive of tolls, Rs. 1,603, Rs. 1,592, Rs. 4,590, Rs. 5,523, Rs. 3,346, Rs. 3,634, paid by the Calcutta Steam Navigation Company.
(b) Inclusive of passengers, 23,243, 17,554, and 21,209, carried by the Company's steamers.

The toll collections, which in 1890-91 were low owing to a seven months' closure of the canal, have recovered somewhat during the year under review, when the closure only lasted for four months. It may be remarked that the tollage receipts on this canal have not increased in proportion with those on the Orissa Coast canal. This may be due to the frequent closures of the last few years, but it is also largely owing to the use of a very superior class of decked boat which has lately been introduced, and which can take the route *viâ* the Russulpore and Hooghly Rivers in calm weather.

MISCELLANEOUS RECEIPTS.

70. The miscellaneous receipts for the last five years are shown in the following statement:—

DETAILS.		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1		2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.	Rs.
Sales of water		...	...	...	...	...
Plantations		70	64	62	68	27
Other canal produce		1,085	...	...	5	...
Water-power		...	...	...	...	...
Rent of buildings		245	226	181	244	266
Fines		...	...	...	...	...
Miscellaneous	Rent of lands ...	...	...	18	56	39
	,, of fisheries ...	52	955	1,198	5 14	202
	Cost of process ...	...	...	...	..	...
	Sales of old materials ...	...	4	144	4	5
	Other items ...	...	...	11	8	28
Total ..		1,452	1,249	1,614	899	567

The receipts during the year show a decline of Rs. 332, mainly in item fisheries, which is due to the closures of the canal during the last two years.

DREDGING.

71. There was no dredging work, as the silt was removed by hand-labour during the closure of the canal.

PLANTATIONS.

72. The state of the plantations for the last two years is shown in the following statement:—

YEAR.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	TOTAL.
1	2	3	4	5
	No.	No.	No.	No.
1890-91	1,883	2,845	1,776	6,504
1891-92	2,000	3,116	1,041	6,157

The falling off in the number of trees during the last two years has been caused by the silt clearing operations during the closures, necessitating the deposition of earth on the banks and encampments of coolies. The expenditure during the year was Rs. 273 against Rs. 383, and the revenue was Rs. 27 against Rs. 68.

SONE CANALS.

The figures in all statements showing totals of receipts or expenditure are those of the Examiner of Accounts. In dealing with details the figures of the Commissioner or of the Superintending Engineer are used. CAPITAL ACCOUNT.

73. The Capital Interest, and Revenue Accounts of these canals are given below:—

1.—CAPITAL ACCOUNT.

HEADS OF ACCOUNT.	Outlay during 1891-92.	Outlay to end of 1891-92.
1	2	3
DIRECT CHARGES.	Rs.	Rs.
I.—Works	1,70,412	1,85,88,237
II.—Establishment	37,083	51,67,039
III.—Tools and plant	(—) 1,352	21,27,215
IV.—Suspense accounts	(—) 1,715	1,69,649
Loss by exchange	......	52,240
Total ...	2,04,428	2,61,04,380
V.—*Less*—Receipts on capital account	330	3,72,286
Net total direct charges	2,04,098	2,57,32,094
INDIRECT CHARGES.		
Capitalization of abatement of land revenue	......	37,911
Leave and pension allowances	5,191	8,72,640
Total indirect charges	5,191	9,10,551

The Sone Canals are practically complete and in full work, and the outlay on capital is now only on subsidiary works, such as outlets and culverts for village channels where they cross district roads. A report on the canals as constructed, compared with the estimate the currency of which has expired, has been sent to the Government of India, and the capital account will shortly be closed, the expenditure being meanwhile confined to the completion of works sanctioned before 31st March 1891. The outlay charged to the capital account of the Sone canals during the year 1891-92, compared with that of the previous year, is shown in detail in the following statement:—

	1891-92.	1890-91.
I.—Works—		
(1) Head-works	2,035	5,249
(2) Main canal and branches ...	31,337	23,475
(3) Distributaries	79,312	38,947
(4) Drainage and protective works ...	57,728	65,028
Total works ...	1,70,412	1,32,699
II.—Establishment	37,083	19,850
III.—Tools and plant	(—) 1,352	6,411
IV.—Suspense accounts	(—) 1,715	14,716
GRAND TOTAL ...	2,04,428	1,73,676
V.—*Less*—Receipts on capital account ...	330	2,315
Net total	2,04,098	1,71,361

The work done during the year under review is as follows:—

Head works.—The plantations established on the spare lands belonging to Government at Dehri were proceeded with, and will probably be completed during 1892-93.

Eastern Main Canal.—The escape for the Manora distributary was completed. The protective embankment to save Kharati village from the flood of

the Poonpoon was proceeded with, as were permanent outlets and road crossings for village channels on the Manora distributary.

Patna Canal.—The addition to the second weir on this canal was completed before the rains. Three drainage culverts and one hundred and thirty-three permanent outlets were completed during the year, and a rest-house, on the Khojhassa distributary and the Bharatpur distributary escape, were proceeded with.

Main western canal series.—Permanent outlets, cattle bridges, crossings for village channels, and syphon culverts for drainage and drainage cuts were under construction in most of the canals, branch canals, and distributaries under the main western canal series. On the Arrah Canal eight small regulators in distributaries, and on the Buxar Canal some inlets for drainage were built. The alteration of three bridges on the Behea branch canal, and quay walls at Nokha and Buxar were in progress. Escapes from the Rajpur and Nagpur distributaries were in progress, as also were a rest-house on the Sianwank distributary, a toll office at Nokha, and zilladar's quarters at Sikraol. The Kujee drainage cut, which is an important work, the estimated cost being Rs. 37,947, was proceeded with, and was nearly completed at the end of the year. The extension of the Basudhar distributary was nearly completed, as were some additional lengths of parallel channels.

Deduct refunds of revenue	7,305		4,020
Net earnings	6,77,299		10,76,356
Outlay	7,02,099		6,97,840
Loss ...	24,800	Profit ...	3,78,516

The figures given as net earnings include the actual realizations of navigation and miscellaneous revenue with the assessed revenue on the area actually irrigated during the year, less refunds.

The irrigation earnings are given in greater detail in the following table, which includes the assessments on the area irrigated during the year, whether forwarded for collection before or after the 31st March. The figures therefore differ from the assessments of the year which are referred to further on :—

Year in which the irrigation occurred.	Year in which the assessments were received by Deputy Collector.	Year in which the amount fell due.	Total demand for 1891-92.	Current demand for 1891-92.	Total assessments submitted during 1891-92.	Total earnings of 1891-92, less refunds of revenue.

* NOTE.—The method of charging the cost of establishment was altered from 1887-88.

Compared with 1890-91 the receipts (less refunds) have increased from Rs. 7,29,170 to Rs. 9,06,074, that is, by Rs. 1,76,904. The working expenses (direct charges) have been reduced from Rs. 6,53,286 to Rs. 6,48,060, or by Rs. 5,226. Including indirect charges, the net revenue has increased from Rs. 27,071 to Rs. 2,08,234.

This favourable result was due mainly to extensive recoveries of arrears in the Patna district, and in a lesser degree to the abnormal area of rabi irrigated in the Buxar Division, the collections on account of which will mostly be made in 1892-93. A reduction of Rs. 16,203 on the charges for maintenance and repairs was effected in the Arrah Division.

The principal works carried out were a drainage sluice in the Kao river embankment at Dumraon, the alteration of the bridges on the Gurra Chowbey branch canal from wooden tops to arches, and the construction of a few small culverts. The eastern main series of canals were closed for repairs from 6th April to 29th May 1891, and from 28th March 1892 to the end of the year. There was no closure of the western main series in 1891-92. These canals were closed in March 1891, and not again till May 1892

LENGTHS OF CANALS AND DISTRIBUTARIES.

76. The lengths of canals and distributaries in operation, and the areas commanded, provided with distributaries, and irrigated at the close of the last two years are shown below:—

Name of Canal.	1891-92. Navigable canals.	Canals for irrigation only.	Distributaries.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated. The figures in column 4 include 1,192½ miles of distributaries and 14¾ miles of Government village channels in the Buxar Division.

VILLAGE CHANNELS AND OUTLETS.

77. The length of village channels and the number of outlets constructed are given in the following table:—

Division.	Total length of village channels completed.	Total number of temporary and permanent outlets.	Number of permanent outlets.
1	2	3	4
	Miles.	No.	No.
Eastern Sone	361¼	1,878	468
Arrah	823¼	2,114	1,188
Buxar	802½	1,951	700
Total, 1891-92 ..	1,987	5,943	2,356
Total, 1890-91 ...	1,623¾	4,580	1,728

During the year $1\frac{1}{4}$ miles in the Arrah and 3 miles in the Buxar Division were added, while $7\frac{3}{4}$ miles were abandoned in the Eastern Sone Division, the net result being a decrease of $3\frac{1}{2}$ miles.

One thousand three hundred and sixty-three outlets, of which 628 are permanent, and $363\frac{3}{4}$ miles of village channel have been added during the year. The Superintending Engineer remarks:—

"There is a satisfactory increase in the number of the permanent outlets, and the greater part of the kharif irrigation is now effected through such outlets, the size of which have been made to suit the areas to be irrigated. The increase in the number of temporary outlets is due to the large rabi irrigation. Many of these will be removed, as it is not likely that they will be required again for some time."

Many of the channels also were only temporarily constructed for rabi irrigation, and will probably disappear again.

AINFALL.

78. The table following shows the rainfall during the last five years over 22 rainfall stations on, or in the neighbourhood of, the Sone Canals:—

		Average of 22 Stations.				
		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1		2	3	4	5	6
		Inches.	Inches.	Inches.	Inches.	Inches.
Kharif season	August ...	9·48	18·49	12·01	14·47	9·11
	September...	5·24	7·35	5·90	6·58	4·09
	October ...	4·18	0·18	0·79	0·99	1·17
	Total ...	18·90	26·02	18·70	22·04	14·37

	Whole year ...	40·31	47·34	39·27	52·86	29·12

The average rainfall for twenty years is 40·47 inches.

The rainfall of the year was very scanty, being much below the normal and scarcely more than half that of the previous year.

FLOODS.

79. There were no floods in the rivers Sone and Ganges during the year. The figures below show the highest gauge readings compared with the highest

recorded flood levels. The reduced level of the crest of the Sone Weir is 334 00:—

RIVER SONE.

Locality.	1891-92—9th August 1891.		1890-91—16th August 1890.		Highest known, 1876-77—7th July 1876.

1885-86 ...	217,072	87,936	27,562	332,570	44·52
1886-87 ...	177,510	60,639	30,055	268,204	58·84
1887-88 ...	220,428	69,945	25,007	315,380	40·18
1888-89 ...	238,895	100,142	16,872	355,909	45·43
1889-90 ...	230,741	55,613	18,928	305,282	49·65
1890-91 ...	211,726	51,318	17,970	281,014	52·23
1891-92 ...	248,819	210,907	14,997	474,723	26·82

The rainfall in the autumn of 1891 was very scanty, and this led to a great demand for water both for kharif and rabi. As regards the latter, the increased demand is most noticeable in the Buxar Division, where the area irrigated under this head has risen from 17,034 acres in 1890-91 to 127,390 acres in 1891-92. The largest area of rabi irrigated in any previous year was in the whole Circle 124,812 acres in 1877-78. In no other year has the area risen above 90,304, of which 48,961 acres were in the Buxar Division. This occurred in 1883-84.

The Superintending Engineer remarks on the irrigation of the year as follows:—

"Compared with the previous year, there is an increase of 193,709 acres, and the total is greater by more than 100,000 acres than that of any year since these canals have been at work. The main increase was in the rabi irrigation, and chiefly in the Buxar Division, where there are large areas of land cultivated with rabi crops, but which very seldom require irrigation. There is a satisfactory increase in the area under long leases of 11,351 acres, and it is probable that there will be a further increase in this class. We cannot expect to have a rabi irrigation like that of 1891-92 often, and it will probably be many years before the total of this year is exceeded."

During the year under review water was for the first time sold by volume during the kharif season in cases where leases had not been taken before the 1st September. The area thus irrigated was approximately 3,622 acres. This area, as well as 3,369 acres irrigated without permit, is, in the table in the following paragraph, included in the figures for "annual leases."

81. The statement below gives details of the areas of each crop irrigated during the last four years, distinguishing between annual and five-year leases.

Crop.		1888-89.	1889-90.	1890-91.	1891-92.
1		2	3	4	5
		Acres.	Acres.	Acres.	Acres.
Kharif ...	Five-year leases...	154,825	174,780	189,227	200,716
	Annual leases ...	69,628	41,917	22,499	48,103
	Total ...	224,453	216,697	211,726	248,819
Rabi ...	Five-year leases...	27,408	31,128	20,761	20,274
	Annual leases ...	69,817	20,336	20,632	177,308
	Total ...	97,225	51,464	41,393	197,582
Sugarcane	Five-year leases...	17,869	18,360	13,568	13,801
	Annual leases ...	4,600	5,004	4,402	1,196
	Total ...	22,469	23,364	17,970	14,997
Hot-weather ...	...	11,762	13,757	9,925	13,325
	Grand Total ...	355,909	305,282	281,014	474,723
Total five-year leases ...		200,102	224,268	223,556	234,791
" annual leases ...		155,807	81,014	57,458	239,932

The proportionate areas of the various crops in the areas under long lease in 1891-92 are based on actual measurements of the crops cultivated when the leases were executed. In some subdivisions this information is wanting for years before 1890-91, and the percentages obtained for that and the succeeding year have been adopted for previous years.

The proportionate areas thus determined are given below:—

Division.	Rice.	Sugarcane.	Rabi.	Total.
1	2	3	4	5
Arrah	85·2	7·2	7·6	100·0
Buxar	79·7	5·9	14·4	100·0
Eastern Sone ...	93·7	2·9	3·4	100·0

Using the percentages obtained above for the area under five-year leases in the year 1891-92, the area of each crop included in those leases compared with that of the two previous years was as under:—

1891-92.			1890-91.			1889-90.		
Kharif.	Rabi.	Sugarcane.	Kharif.	Rabi.	Sugarcane.	Kharif.	Rabi.	Sugarcane.
1	2	3	4	5	6	7	8	9
200,716	20,274	13,801	189,227	20,761	13,568	188.824	21,620	13,924

82. The areas irrigated in each division during the last five years are shown by crops below:—

Year.	Eastern Sone Division.				Arrah Division.				Buxar Division.				Total for all Divisions			
	Annual leases.		Five-year leases.	Total.	Annual leases.		Five-year leases.	Total.	Annual leases.		Five-year leases.	Total.	Annual leases.		Five-year leases.	Total.
	Kharif and rabi.	Sugarcane and hot-weather.			Kharif and rabi.	Sugarcane and hot-weather.			Kharif and rabi.	Sugarcane and hot-weather.			Kharif and rabi.	Sugarcane and hot-weather.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1887-88	20,390	679	40,123	61,201	25,982	13,079	102,423	141.484	38,715	6,362	67,618	112,695	85,096	20,120	210,164	315,380
1888-89	29,470	408	37,117	66,995	52,260	11,59[illegible]	101,489	165,349	57,706	4,363	61,496	123.565	139,445	16,362	200.102	355,909
1889-90	18,829	295	40,917	60,041	24,265	13,416	108,057	145,738	19,159	5,050	75,294	99,503	62,253	18,761	224.268	305,28[illegible]
1890-91	14,682	504	46,116	61,302	20,423	10,385	108,[illegible]	139,807	8,026	3,438	68,441	79,905	43,131	14,327	223,556	281,01[illegible]
1891-92	40,622	205	53,263	94,090	60,692	11,227	109,204	181,123	124,097	3,089	72,324	199,510	225,411	14,521	234,791	474,72[illegible]

The area measured during 1891-92 was 112·08 per cent. of the area for which permits were issued. For kharif and long leases the figure sare practically identical, but the applications for leases in the rabi season show only the approximate area to be irrigated, the assessment being based on the area irrigated, as found by measurement when the irrigation season is over. The proportion of flow to lift irrigation was 93·6 to 6·4.

83. The following statement shows the duty obtained in the year under review and in the years 1890-91 and 1889-90:— Duty of water.

Particulars.				Eastern Main Canal Series.	Arrah Canal System.	Buxar Canal System.	Western Main Canal Series.	Total Sone Canals.
1				2	3	4	5	6
1889-90 ...	Kharif ...	Acres ...		54,875	115,888	78,906	194.794	249,669
		Duty on gross supply ...		48·34	79·81	86·04	81·94	71·09
	Rabi ...	Acres		6,801	30,867	23,116	53,983	60,784
		Duty on discharge utilized		21·33	45·52	52·77	48·37	42·36
1890-91 ...	Kharif ...	Acres		56,600	112,584	60,512	173,096	229,696
		Duty on gross supply ...		55·22	86·87	79·20	83·66	74·24
	Rabi ...	Acres		6,735	30,492	22,186	52,628	59,363
		Duty on discharge utilized		20·72	57·75	55·48	56·77	47·41
1891-92 ...	Kharif ...	Acres		75,037	119,304	69,465	188,779	263.816
		Duty on gross supply ...		57·59	61·25	55·13	57·94	57·84
	Rabi ...	Acres		20,851	60·115	131,613	191,728	212,579
		Duty on discharge utilized		48·60	70·39	130·82	103·02	92·83

The duties shown in the foregoing table are calculated from the average discharges for the whole kharif and rabi seasons respectively. During the kharif season, however, the supply varies greatly, scarcely any water being, at times, used, so that these results afford no reliable indication as to the area

which can be irrigated from the canals when there is a pressure of irrigation. More reliable results are obtained by using as a basis of calculation the average discharge during the time of greatest demand only, which in the kharif season of the year under review was for about 12 days in October 1891. The results are, for the Eastern Main Series, an average discharge of 1,556 c. feet per second from 11th to 23rd October, giving a duty of 48·2 acres per c. foot per second, and for the Western Main Series an average discharge of 3,750 c. feet per second from 8th to 20th October, with a duty of 50·3 acres per c. foot per second.

The Superintending Engineer remarks:—

"The duty obtained from the Eastern Main Series is considerably better than in previous years: that of the Western Main Series is much the same, and it may be taken as established that we cannot expect a much higher duty than 50 acres per cubic foot per second on the maximum discharge we can maintain at the head of the canals"

"The result of most importance is the duty on the Buxar Canal system during the rabi season, which was 130 acres per cubic foot per second utilised. This is the first year in which there has been a demand for rabi irrigation from which any useful information as to the duty which could be realised was obtainable."

CROP EXPERIMENTS.

84. The results of experiments made during the year to determine the yield of rice crops irrigated from the canals were, for crops of average outturn, a yield of 23 maunds 10 seers of grain and 56 maunds 24 seers of straw on the mean of 71 experiments, and for specially selected crops a yield of 36 maunds 14 seers of grain and 87 maunds 15 seers of straw on the mean of 161 experiments.

The results, classified according to the soils on which the crops were grown, are remarkably uniform, even for the more barren classes of land. The Superintending Engineer remarks:—

"With thorough irrigation, and in the absence of too much rain at times, when it is not wanted, a good crop of rice can be grown on almost any soil."

The results of a number of experiments made in the rabi season on the yield of canal-irrigated wheat are tabulated below:—

Division.	Staple.	Irrigated with canal water. Number of experiments.	Average yield per acre. Grain. Maunds.	Grain. Seers.	Straw. Maunds.	Straw. Seers.
1	2	3	4	5	6	7
Eastern Sone ..	Wheat ...	24	23	21	37	12
Arrah	„ ...	41	17	20	28	21
Buxar	„ ...	41	19	12	33	19
Sone Circle average ...	„ ...	106	19	22	32	17
Eastern Sone ...	Gram ...	8	10	33	13	17

DEMANDS, COLLECTIONS, AND BALANCES.

85. The demands, collections, and balances of water-rates for the last five years are shown below:—

Year.	Amount outstanding at commencement of year.	Amount falling due for recovery during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs
1887-88 ...	2,31,682	7,25,810	9,57,392	5,19,586	26,525	4,11,281
1888-89 ...	4,11,281	7,53,217	11,64,498	7,59,556	24,329	3,80,613
1889-90 ...	3,80,613	7,52,788	11,33,401	8,16,394	35,225	2,81,782
1890-91 ...	2,81,782	6,29,178	9,10,960	6,44,718	21,460	2,08,782
1891-92 ...	2,08,782	7,29,631	9,38,413	8,11,750	15,220	1,11,443

The balance outstanding at the end of the year 1890-91 was shown in the revenue report for that year as Rs. 2,44,728. It now appears, however, that this figure included a moiety of Rs. 35,946 on account of rabi irrigated during 1890-91, which, as noted by Superintending Engineer in paragraph 7 of his report for 1890-91, was made due on 1st April instead of 31st March.

Details of the figures are given in the table in paragraph 74 above.

The amounts included in the current demand for the last three years as assessments for the unauthorised use of water or for wastage of water are reported by the Superintending Engineer to be—

	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.
For unauthorized use of water ...	913	4,240	11,168
For wastage of water ...	224	256	234

86. In the following statement the Deputy Collector shows the extent to which the arrears as well as current demand have been worked off:— ARREARS.

	Demand of 1891-92 consisting of	Collected or remitted in 1891-92.	Percentage of demand adjusted.	Unadjusted balance at close of year.
1	2	3	4	5
	Rs.	Rs.		Rs.
Arrears previous to 1889-90	27,827	19,190	68·9	8,637
Arrears of 1889-90	30,838	27,850	90·3	2,988
" " 1890-91	1,50,116	1,45,635	97·0	4,481
Total arrears outstanding on 1st April 1891 ...	2,08,781	1,92,675	92·5	16,106
Current demand for 1891-92	7,24,438	6,29,101	86·8	95,337
Total ...	9,33,219	8,21,776	88·0	1,11,443

There is on the whole a reduction on the outstanding balance of Rs. 1,33,285, but the rabi assessments which formerly became due on the 31st March, and are now due on the 1st April, no longer form a part of the balance.

The following statement gives the collections in each district:—

District.	Demand.			Adjustments.				Balance on 31st March 1892.	Percentage, column 8 on column 4.
	Arrears on 31st March 1891.	Current demand for 1891-92.	Total.	Collection.	Remission made by canal officers.	Written off as irrecoverable.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Shahabad	83,076	5,47,965	6,31,041	5,65,707	1,913	6,743	5,74,363	56,678	91·0
Patna	93,744	92,441	1,86,185	1,51,651	1,104	4,277	1,57,032	29,153	84·3
Gaya	31,961	84,032	1,15,993	89,197	693	491	90,381	25,612	77·9
Total ...	2,08,781	7,24,438	9,33,219	8,06,555	3,710	11,511	8,21,776	1,11,443	88·0

As regards the progress made in the Patna district the Commissioner remarks:—

"The total demand for the year 1891-92 up to the end of February last amounted to Rs. 1,62,521, against Rs. 1,49,690 and Rs. 1,54,680 respectively in the corresponding period of the two preceding years. The total collections for the same period amounted to Rs. 1,31,187 against Rs. 48,782 and Rs. 53,759. The percentage of collection on demand was therefore 80 7 against 32·5 and 34·7 respectively. The balance outstanding at the close of February last was Rs. 26,119, which includes a sum of about Rs. 10,500 embezzled by the tahsildars against whom proceedings have been taken. So the actual balance on that date, excluding the amount embezzled, was only approximately Rs. 15,619 against Rs. 95,565 and Rs. 96,341 of the previous two years. This outturn of work is very satisfactory, and reflects credit on the Deputy Collector, Babu Shiva Sankar Singh, who was temporarily deputed to the work."

87. The percentage of the total demand collected in each district is given in the table below:—

District.	Arrears due for irrigation effected in previous years.				Demands for irrigation effected in 1891-92.			
	Percentage of total demand.				Percentage of total demand.			
	Demand.	Collections.	Remissions.	Outstanding at end of year.	Demand.	Collections.	Remissions.	Outstanding at end of year.
1	2	3	4	5	6	7	8	9
Shahabad—								
1890-91 ...	100·0	79·8	8·8	11·2	100·0	85·1	0·2	14·5
1891-92 ...	100·0	87·6	9·9	2·5	100·0	90·0	0·1	9·9

1891-92 ...	100·0	81·9	5·4	12·7	100·0	81·0	0·3	18·7
Gaya—								
1890-91 ...	100·0	91·3	0·2	8·4	100·0	58·6	1·1	40·1
1891-92 ...	100·0	91·7	1·6	6·7	100·0	71·2	0·8	28·0
Average—								
1890-91 ...	100·0	72·3	6·8	20·8	100·0	74·0	0·3	25·6
1891-92 ...	100·0	85·7	6·6	7·7	100·0	86·7	0·2	13·1

Besides the collections shown above, a further sum of Rs. 9,336 was credited to water-rate accounts as follows:—

Particulars.	Shahabad.	Patna.	Gaya.	Total.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Process fees in certificate cases ...	2,462	1,303	4	3,769
Surplus and excess recoveries ...	3,922	226	1,074	5,222
Miscellaneous	326	137	—118	345
Total ...	6,710	1,666	960	9,336

Remissions.

88. In the return submitted by the Examiner of Accounts the sums remitted during the year under review and the preceding year are shown as below:—

	1890-91.	1891-92.
	Rs.	Rs.
By canal officers ...	5,324	2,555
By civil „ ...	16,136	12,665
	21,460	15,220

According to the figures supplied by the Superintending Engineer the remissions are—

	Rs.
Written off by civil officers as irrecoverable ...	11,510
Remissions granted by Executive Engineers	3,304
Extraordinary remissions by Superintending Engineer ...	1,248
Remitted on revised and cancelled khatianies	1,365
	17,427

As regards the remissions by Executive Engineers, the difference between Rs. 3,304 shown by the Superintending Engineer, and Rs. 2,555 shown by the Examiner, viz. Rs. 749, was paid as a refund.

The ordinary remissions by the Executive Engineer are classified in the following table:—

Class.	Causes.	Eastern Sone Division.	Arrah Division	Buxar Division.	Total, 1891-92.	Total, 1890-91.
1	2	3	4	5	6	7
		Rs.	Rs.	Rs.	Rs.	Rs.
a	Charged by mistake for land cultivated by others	...	...	23	23	...
b	Excess measurement or errors in calculation	130	269	18	417	...
c	Lift charged as flow	39	14	8	61	...
d	Irrigation not denied, but remitted as not chargeable under the Act ...	563	4	140	707	...
e	Land not having been irrigated at all	488	146	57	691	...
f	Injury to crop due to insufficient supply	472	103	119	694	...
g	Land thrown temporarily out of cultivation	...	...	...	...	...
h	(Applicable to long leases only) Failure of crop originally sown, rule 82	...	279	27	306	...
i	Land appropriated for other purposes than cultivation	...	38	4	42	...
j	Double assessment, as when land assessed or a season lease is subsequently included in a long lease in the same year	...	271	92	363	..
	Total ...	1,692	1,124	488	3,304	6,555

Extraordinary remissions to the amount of Rs. 1,248 were granted by the Superintending Engineer for damage done to crops by unseasonable weather, and the sum of Rs. 1,365 remitted on revised and cancelled demand statements was in reality a modification of the demand, and cannot properly be classed as a remission.

The remissions implying errors in assessments, excluding revised and cancelled demand statements, for the last seven years were as follows:—

1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
67,554	21,055	13,036	11,284	9,886	6,579	3,304

There has been a steady improvement in the accuracy of the assessments, which is satisfactory.

The Superintending Engineer writes:—

"The most serious items are those classed as *d*, *e*, and *f*. The Eastern Sone Division shows the worst record, especially when the small area assessed in that Division is considered."

The amount written off by civil officers as irrecoverable (Rs. 11,510) compares favourably with Rs. 16,128 in 1890-91 and Rs. 17,324 in 1889-90, though it is still rather high. The large sum written off in the Patna district was due to the arrears which had been allowed to accumulate there, and which were taken in hand and recovered in the year under review.

The following table compiled from the detailed statement given by the Deputy Collector shows the amounts written off in each district from the assessments of the several years :—

Written off from assessments of	Patna district.	Gaya district.	Shahabad district.	Total.
1	2	3	4	5
	Rs.	Rs.	Rs	Rs.
1883-84 ...	1,748	5	...	1,753
1884-85 ...	950	16	...	966
1885-86 ...	522	88	...	610
1886-87 ...	491	93	...	584
1887-88 ...	407	151	...	558
1888-89 ...	131	68	661	860
1889-90 ...	27	45	4,310	4,382
1890-91 ...	...	25	1,555	1,580
1891-92 ...	...	...	217	217
Total ...	4,276	491	6,743	11,510

The percentage on the gross demand of remissions by canal officers is as follows :—

	Percentage of remissions to gross demand.	
	1890-91.	1891-92.
Eastern Sone Division ...	0·88	0·63
Arrah " ...	0·43	0·31
Buxar " ...	0·99	0·22

REVENUE ESTABLISHMENT.

89. The expenditure on the revenue establishments employed during the year under review and the four previous years is shown below :—

PARTICULARS.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

Collections of water-rates and miscellaneous revenue by the Canal Revenue Department.	5,22,79	7,63,376	8,19,762	6,47,839	8,15,858
Percentage	25·8	20·7	18·6	22·3	18·66

During the year the three revenue circles of Shahabad, Patna, and Gaya were amalgamated and formed from the 1st of March 1892 into the Sone Canals Revenue Division, in charge of the Special Deputy Collector, who had previously supervised the collections in the Shahabad district only. The new Division is under the administrative control of the Superintending Engineer, Sone Circle.

An alteration has also been made in the establishment. Until the 1st of October the field establishment was charged to an allowance of half an anna in the rupee allowed under rule 53 for tahsildars or establishment employed in lieu thereof. From the date mentioned a salaried collecting establishment, partly permanent and partly temporary, on a scale sanctioned by Government, was employed. The system was further developed from the 1st of March, when the establishment was revised. The item "tahsildar's fees" will disappear from the accounts of future years, but a part of the headmen's fees now entirely disbursed by the Executive Engineers will be paid by the Deputy Collector for assistance rendered in collections.

COST OF MEASUREMENT &C., PER ACRE.

90. In the table below the approximate cost of measuring lands brought under assessment during the year under review and of preparing demand statements are shown:—

NAME OF DIVISION.	Areas measured.	COST OF MEASURING CROPS.		Areas assessed.	COST OF PREPARING DEMAND STATEMENTS.	
		Total.	Per acre.		Total.	Per acre.
1	2	3	4	5	6	7
	Acres.	Rs.	Pies.	Acres.	Rs.	Pies.
Eastern Sone	60,410	1,474	4·68	57,749	1,697	5·64
Arrah	101,156	3,852	7·31	94,253	2,114	4·30

Arrah	2,265	479	1,592	194	149	105	44	2,333	238
Buxar	666	243	293	130	73	66	7	737	137
Total, 1891-92 ...	4,725	1,274	2,974	477	243	191	52	4,855	629
Total, 1890-91 ..	3,703	1,598	1,996	109	194	190	4	3,151	113

The Superintending Engineer writes:—

"The number of complaints has increased considerably in all three divisions over the previous year. This is due to the largely extended irrigation, and does not indicate any falling off in the administration of the canals. The largest number of complaints had reference to alleged excess measurement, non-irrigation, deficient supply of water, and mistakes in entering the name of the person liable for the rate.

The complaint was admitted in the cases dealt with as under:—

Excess measurement ...	37	per cent. admitted.
Non-irrigation ...	14	" " "
Deficient supply of water...	17	" " "
Mistake in name ...	43	" " "

Taking all the complaints asking for remission, 30 per cent. were admitted and 70 per cent. rejected.

Of the 2,974 complaints which were rejected, it is probable that a very considerable number were of such a frivolous nature that they need not have been entertained at all. It is no doubt safer to continue the existing practice, by which all petitions are accepted and registered, whatever their nature may be, but it is necessary to bear this in mind as explaining to some extent the large numbers of complaints shown in the returns."

Details by divisions are given below of the "applications"—in which term are included petitions for leases and outlets, for change of names in five-year leases, or for the post of headman—received during the year in addition to the complaints noted above, of which 1,867 were granted and 2,412 refused out of 5,025 received, the number pending at the close of the year being 746:—

Division.	Received during the year and pending from last year.	Granted.	Refused.	Pending at the close of the year.
1	2	3	4	5
	No.	No.	No.	No.
Eastern Sone ...	1,511	730	495	286
Arrah ...	2,625	648	1,592	385
Buxar ...	889	489	325	75
Total ...	5,025	1,867	2,412	746
Total, 1890-91	4,335	2,312	1,557	466

The following remarks on the subject are quoted from the Superintending Engineer's report :—

"Four thousand two hundred and seventy-nine cases were disposed of in the year as compared with 3,869 in 1890-91. The balance pending on 31st March was large, but has been considerably reduced since. The most important cases which are dealt with are those relating to the ownership and rights of use of village channels. Altogether 1,052 cases in this class were disposed of during the year."

93. Thirty-two appeals were preferred to Collectors against the orders passed by canal officers on complaints, of which 18 were dismissed, and 2 were allowed and 12 were still pending at the close of the year. APPEALS.

Ten cases were decided by engineers vested with magisterial powers under the Bengal Irrigation Act. Twenty-one persons accused of offences under the Act were convicted, and two discharged. The amount of fines imposed was Rs. 235.

94. The certificates required in realising water-rates continue to be dealt with by the Special Deputy Collector in charge of the collections, as was the case last year. CERTIFICATE PROCEDURE.

The amount of certificate work done in each district during the year under review, as compared with that of the previous year, is shown in the following statement:—

	SHAHABAD.				PATNA.				GAYA.				TOTAL.

Balance outstanding at the close of the year.	245	6,202	156	2,028	1,312	16,325	67	6,888	29	2,757	11	277	1,586	25,234	234	9,193

The number for disposal was 4,764, inclusive of the outstanding balance from last year, covering a sum of Rs. 56,460 as compared with Rs. 6,897 and Rs. 76,049 in the previous year. The demand adjusted was Rs. 47,267 as against Rs. 50,765, the remissions being Rs. 15,882 compared with Rs. 16,129.

The Commissioner remarks that the decrease in the number of certificates filed during the year, which is specially noticeably in the districts of Gaya and Patna, is satisfactory as proving that the collecting establishment is now more mindful of its duties, instead of throwing a large share of the work upon the Certificate Department, as was formerly the practice. He adds:—

"On the whole the Deputy Collector in charge of the Sone Canal and his staff have worked creditably in reducing the arrears and in making good collections with the least possible recourse to the certificate procedure."

95. The sum for which demand statements were submitted during the year, including five-year leases, unauthorised irrigation, and wastage of water was Rs. 7,76,059. The degree of punctuality observed in submission is shown in the following statement, the figures in which include Rs. 4,484 on account of irrigation which occurred in 1890-91, and exclude the sum of Rs. 2,01,244 for

which assessments were not submitted until after 31st March 1892, and which did not fall due during 1891-92:—

	Down ... „	264	864	740	2,107

On the Arrah and Buxar Canals the steamers make two trips each way in every week. On the Patna Canal the steamer makes only one trip each way in a week.

There are in addition to the steamers four cargo boats, the property of Government, for the hire of which Rs. 1,442 was received during the year, besides which Rs. 535 was recovered by way of fees for the use of the accommodation boat.

98. The following table shows the details of the miscellaneous receipts for the last five years:— MISCELLANEOUS RECEIPTS.

99. The expenditure on works and maintenance will now be briefly reviewed. MAINTENANCE CHARGES.

The principal works executed under "extensions and improvements," on which Rs. 3,812 were spent, were the substitution of brick arches for wooden tops on bridges on the Gurrah Chowbey branch canal, in addition to which the road along the Koelwar distributary was improved, and other minor works carried out. EXTENSIONS AND IMPROVEMENTS.

100. The expenditure on repairs, which was last year reduced by Rs. 20,161, shows a still further reduction of Rs. 13,027, due to economies REPAIRS.

effected in the Arrah Division on silt clearing and repairs to masonry works. The distribution by subheads is as follows:—

Total ...	1,25,430	1,20,465	1,07,603	56,509	57,324	52,258	74,371	72,893	78,918	2,56,310	2,50,682	2,38,779

The charge for maintaining the Telegraph line from Arrah to Dehri, which has been included in paragraph 100 under head "Main Canal with Branches," is excluded from the figures given above.

A reduction of Rs. 11,903 has been effected in the total expenditure during the year, as compared with 1890-91.

The charges for silt clearing are higher than last year in the Eastern Sone Division and lower in the Arrah and Buxar Divisions, while on the Main Western Canal the cost of this item remained the same as in 1890-91, and cannot be expected to fall much below Rs. 50,000 in any year. The total charges under the head "Earthwork" in the first five miles of the Western Main Canal rose from Rs. 43,430 last year to Rs. 46,179 in 1891-92, out of which Rs. 42,026 was for silt clearing, against Rs. 40,942 in 1890-91. It may be remarked that this year all the silt clearing in this reach was done by dredging, the sum of Rs. 921 shown as expenditure on silt clearing by hand representing payments made in April 1891 for work done during March.

103. The following table shows the quantity of silt dredged from the Eastern and Western Main and Buxar Canals, and the rate at which the work was done during the last three years:— SILT-CLEARING AND DREDGING.

Canals.	1889-90.			1890-91.			1891-92.

The rates shown in the above table include the cost of lifting the silt into barges and of carrying it either over the spoil banks or into the river. The rates necessarily vary much under the latter head owing to different heights of spoil-bank and of different lengths of lead to the river.

The cost of lifting the silt on to the barges or dredging proper was as shown below:—

	1889-90.			1890-91.			1891-92.		
	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.	Quantity dredged.	Cost of dredging.	Rate per 1,000 cubic feet.
1	2	3	4	5	6	7	8	9	10
	C. ft.	Rs.	Rs. A. P.	C. ft.	Rs	Rs. A. P.	C. ft.	Rs.	Rs. A. P.
Eastern Main and Patna ...	2,369,143	3,750	1 9 3	2,235,724	3,674	1 10 3	1,706,541	3,186	1 13 10
Western Main	6,410,767	12,707	1 15 8	7,833,182	15,276	1 15 2	6,749,057	12,734	1 14 2
Buxar	...	...	...	720.117	1,385	1 14 9	187,000	874	2 0 0
River Sone	1,563,222	2,835	1 13 0	1,502 555	1,928	1 4 6	1,921,530	3,571	1 13 7
Head Lock	35,620	135	3 12 7	66,224	208	3 2 3	64,124	177	2 12 1
Total ...	10,378,752	19,427	1 13 11	12,357,802	22,471	1 13 1	10,628,252	20,042	1 14 2

The rate in the Eastern Sone Division, which in 1889-90 was reduced from Rs. 2-2-4 to Rs. 1-9-3, has risen to Rs. 1-13-10, due mainly to the economy in rope and belting, which was effected in 1889-90, not having been maintained.

The rate per 1,000 cubic feet in the river Sone has risen to the figure at which it stood in 1889-90.

104. The statement below compares the expenditure on repairs to dredgers during the year under review with that of the two previous years:—

	1889-90.	1890-91.	1891-92.
1	2	3	4
	Rs.	Rs.	Rs.
12 Fouracres' dredgers	6,675	6,857	7,004
2 Bruce's ditto	374	436	750
2 English ditto	3,439	3,552	3,170
Mud punts ...	3,178	4,790	3,009
Total ...	13,666	15,635	13,933

105. The cost of lifting the silt on to barges, for each class of dredger used, including interest on capital cost and expenditure on repairs, is compared by the Superintending Engineer as follows:—

	Average cost in 1891-92 of lifting per 1,000 cubic feet.	Interest on capital cost per 1,000 cubic feet lifted.	Cost of repairs per 1,000 cubic feet lifted.	Total.
1	2	3	4	5
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs A. P.
Fouracres' dredgers ...	1 14 1	0 8 0	0 14 3	3 4 4
Bruce's dredger ...	1 11 8	0 13 6	0 7 8	3 0 10
English ladder dredgers	2 0 10	3 1 0	2 0 0	7 1 10

The charges for interest and repairs of mud punts amounting to Re. 1-1-9 for each class of dredger, are not included in the above figures. The results show that the Bruce's dredgers are the most economical.

106. The table below shows the quantity of silt cleared by hand from main canals in the Eastern Sone Division and the cost, compared with the figures for the two previous years:—

	1889-90.			1890-91.			1891-92.		
	Quantity cleared by hand.	Cost.	Rate.	Quantity cleared by hand.	Cost.	Rate.	Quantity cleared by hand.	Cost.	Rate.
1	2	3	4	5	6	7	8	9	10
	C. feet.	Rs.	Rs. A. P.	C. feet.	Rs.	Rs. A. P.	C. feet.	Rs.	Rs. A. P.
Eastern Main and Patna Canals...	2,491,847	13,067	5 3 10	4,282,127	19,021	4 7 0	6,283,004	24,798	3 15 2

The Western Main Canal was not closed during the year, and there was therefore no silt clearance by hand.

WEED CLEARING.

107. The following figures give the cost of weed-clearing for the last five years:—

Division.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Eastern Sone ...	558	217	9	396	277
Arrah	2,691	1,053	715	1,299	2,470
Dehri Workshops ...	782	899	911	1,350	1,060
Buxar	884	869	726	1,505	2,206
Total ...	4,915	3,038	2,361	4,550	6,013

The Superintending Engineer remarks:—

"There has again been an increase in the cost of this item in the Arrah and Buxar Divisions. In Arrah Canal the worst place is the reach between Lock V (Danwar) and Lock VI (Hurpur), where owing to the reduction in velocity there is a considerable deposit of silt which encourages the growth of weeds. This reach has been cleared of silt in the past hot weather, which should cause temporary relief. On the Buxar Canal it was necessary to clear weeds to a greater extent than usual on account of the large supply of water required for rabi irrigation in November, December, and January, when the weeds are at their worst."

108. The cost per mile of repairs to main canals and distributaries are shown below:— **MILEAGE RATES OF REPAIRS OF CANALS AND DISTRIBUTARIES.**

Canal.	Division.	1889-90. Number of miles.	1889-90. Cost per mile.	1890-91. Number of miles.	1890-91. Cost per mile.	1891-92. Number of miles	1891-92. Cost per mile.

	Eastern Sone	358	39	358	46	350½	47

109. The charge for establishment not specially shown under the head "Revenue establishment" was Rs. 1,89,196 in 1891-92, against Rs. 1,88,895 in 1890-91. The Superintending Engineer gives the following explanation showing the total expenditure on construction establishment in the canal divisions and the manner in which it is debited. The difference between the sum debited to the canals and the amount, Rs 1,89,196, mentioned above is the charge for direction and accounts.

"There is a slight increase in the charges for establishment (Construction, Direction, and Accounts). As the charges for construction establishment will become a heavier item in the working expenses when expenditure on the capital account ceases, I think it is of some interest to see what the the total charges are and how they are distributed.

The following table compiled from figures by the Executive Engineer will show this:—"

	Rs.
Total charge for Construction establishment	2,09,312
Charged to capital Outlay, Sone Canals	37,083
Charged to Civil Buildings—	
Imperial	3,252
Provincial	26,205
Charged to Agricultural Work	680
Charged to Takavi	110
Charged to Contribution (village channels)	167
Total ...	67,897
Balance charged to Working Expenses, Sone Canal ...	1,41,415

110. Below is a statement showing the number of trees, classified according to size, in the plantations in each division:— **PLANTATIONS.**

Division.	1891-92. Trees over 12 feet in height.	1891-92. Saplings between 4 and 12 feet.	1891-92. Seedlings under 4 feet.	1891-92. Total.	1890-91. Trees over 12 feet in height.	1890-91. Saplings between 4 and 12 feet.	1890-91. Seedlings under 4 feet.	1890-91. Total.	Increase.	Decrease.

The profits in the working of the canals were Rs. 1,81,820, or 3·4 per cent. on the capital outlay. Results for ten years are given below:—

YEAR.	CAPITAL OUTLAY (DIRECT AND INDIRECT)—		RECEIPTS AND WORKING EXPENSES.			Percentage of net revenue to capital outlay to end of year.
	During the year.	To end of the year.	Gross revenue.	Charges (direct or indirect).	Net revenue.	
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	
1882-83	3,21,351	50,96,000	5,64,194	3,56,897	2,37,297	4·6
1883-84	1,55,534	52,51,534	5,64,101	2,32,031	3,32,070	6·3
1884-85	9,013	52,60,547	(*a*) 5,69,726	2,91,214	2,78,512	5·2
1885-86	(—)42,566	52,17,981	(*b*) 4,79,484	1,96,209	2,83,275	5·4
1886-87	5,293	52,23.274	4,83,654	1,92,264	2,91,390	5·5
1887-88	15,842	52,39,116	5,79,934	2,24,656	3,55.278	6·7
1888-89	49,369	52,88,485	5,75,125	2,93,801	2,81,324	5·3
1889-90	(—)281	52,88,204	4.95,543	2,79,133	2,16,410	4·1
1890-91	5,693	52,93,897	5,25,085	3,23,957	2,01,128	3·8
1891-92	(—)10,327	52,83,570	5,25,219	3,43,399	1,81,820	3·4

(*a*) Is Rs. 35,185 larger than it should be by reason of error of account.
(*b*) Is Rs. 35,185 smaller than ditto ditto ditto.

These figures show that the percentage of net revenue to capital outlay, which in the year 1887-88 was 6·7 per cent., has since then decreased steadily to 3·4 per cent. in the year under review.

The receipts from navigation during the ten years previous to 1891-92 have averaged Rs. 5,23,059. The yearly fluctuations are considerable, but the falling off since 1889-90 is marked, and is due mainly to the competition of the Central Bengal Railway from Khulna to Calcutta, and of the Steam Navigation Companies. The Superintending Engineer writes:—

"The aggregate collections of the year from boats, steamers, and rafts, including demurrage, was Rs. 5,09,182, against Rs. 5,14,745 of the previous year, thus showing a decrease of

Rs. 5,618 for the year under review. Taking into consideration railway traffic from Khulna, and that the greater portion of the jute from Sirajganj is now brought by rail and flats, instead of by country-boats as before, the above result is satisfactory. The closure of the Dhappa locks for one month and six days, from 15th April 1891, also partially accounts for the short collections. The jute crop was bad, especially at Madáripur, consequently the traffic under this head fell off considerably. The loss by the traffic in jute was made up to a considerable extent by that in rice, which in the previous year was very short. The increase under this head for 1891-92 amounted to 17,89,678 maunds and Rs. 35 076 in collections. A portion of the rice traffic from Magura has been diverted to the railway. There was an increase in other items, such as spices, salt, kerosine oil, and empty boats, while there was a decrease (besides jute) in firewood, passenger boats, fish, lime and coal. The Supervisor of the Calcutta Canals reports—'Our canal traffic will, I think, suffer considerably at Chitpur, as the Oriental Gas Company have connected their works at Sealdah with the Eastern Bengal State Railway, which will enable them to bring in all their coal direct by train; previously it was all brought by boats, averaging about five or six a day. The kerosine oil traffic is also being diverted to the new railway from Budge-Budge.'

"There was an increase in the item salt, although a very large quantity was, and is being, sent by train from Chitpur ghát. The India General Steam Navigation Company and River Steam Navigation Company carry large quantities of cargo which formerly was carried by country boats. The number of steamers and flats is increasing every year. One thousand and ninety-one steamers and flats paid tolls during the year, as compared with 1,058 steamers and flats, from which Rs. 5,425 was realized during the previous year. When it is considered what an immense quantity of cargo these flats carry, and that railways have extended and tap the canal traffic at many places, the results appear very satisfactory."

But the principal cause of the diminution of the net revenue is to be found in the working expenses and maintenance of the Canals, which were higher in 1891-92 than in any of the ten preceding years. The reason for this is the yearly increasing cost of silt clearance, and it will be found that in years such as 1889-90, when the working expenses were abnormally low, the expenditure on this item was considerably below the average. The fact is that the canals independently of, and possibly partly in consequence of, the construction of the locks at Chitpur and Dhappa, are now maintained in a far more efficient state than they were formerly. The construction of these locks, enabling what was the worst part of the journey to be performed with ease and rapidity, has rendered it necessary to keep up the remainder of the canals to a higher level of efficiency. The items of expenditure are dealt with in paragraph 120 below.

NAVIGATION. 113. The amounts received during the last two years by the Collector of the canals and by the Executive Engineer are shown in the following statement:—

CANALS.	Number of boats and rafts.	COLLECTIONS BY COLLECTOR AND SUPERVISOR.						COLLECTIONS BY EXECUTIVE ENGINEER.	GRAND TOTAL, GROSS REVENUE.
		Tolls from boats and rafts.	Demurrage.	Ferry tolls.	Tolls from steamers and flats.	Rents of buildings, lands, and other miscellaneous receipts.	Total.	Rents of buildings, lands, and other miscellaneous receipts.

Total 1891-92 ...	149,748	4,96,980	6,747	5,090	5,455	7,986	5,22,258	3,085	5,25,343
Total 1890-91 ...	157,575	5,02,628	6,692	4,320	5,425	3,909	5,22,974	2,172	5,25,146

The tolls collected from boats and rafts, which are the chief source of revenue, amounted to Rs. 4,96,980 compared with Rs. 5,02,628 in the previous year, showing a decrease of Rs. 5,648.

In Resolution No. 1027I., Public Works Department, dated 23rd August 1892, certain modifications, to have effect from 1st April 1893, were introduced into the system of measurement and rates of tolls in force. With the object

of causing the tonnage on which toll is levied to approximate more nearly to the weight of cargo actually carried, the maundage of the boat, as calculated by the rules now in force, will be reduced by one-half, all the rates of toll being at the same time doubled, to avoid loss of revenue; reductions of toll will be made on rice, lime, and firewood, which will be compensated for by the imposition of tolls on boats making return trips. It is not expected that these orders will materially affect the financial position of the canals.

114. The particulars regarding the boats which used the canals during the last two years are given below:— BOATS.

Canal.	Year.	Number and Class of Boats.					
		Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.
1	2	3	4	5	6	7	8
Calcutta and Eastern Canals.	1890-91	38,753	24,643	18,102	2,375	166	84,038
Tolly's Nala	1890-91	17,076	21,109	6,491	70	...	44,736
Total ...	1890-91	55,829	45,751	24,583	2,445	166	128,774
Calcutta and Eastern Canals.	1891-92	36,117	24,552	20,178	2,802	98	83,747
Tolly's Nala	1891-92	17.331	19,100	6,104	73	...	42,608
Total ...	1891-92	53,448	43,652	26,282	2,875	98	126,355

The falling off in the number of boats below 1,000 maunds was due to a decrease in the jute traffic, and the greater number of boats from 1,000 to 5,000 maunds to the increased traffic in rice.

Besides the boats enumerated above, a number of small boats and *dinghies* enter Tolly's Nala from the Kourapukhur khal, paying toll at Russa. These boats are not classified. Their number was 23,244 against 28,680 in 1890-91.

115. The figures showing the tonnage of the boats by canal measurement and the estimated weight and value of the cargoes are shown below separately for the Calcutta Canals and Tolly's Nala, and compared with the returns of the preceding year:— TRAFFIC.

	Number of boats.	Tonnage of boats by canal measurement.	Weight of cargo carried.	Value of cargo carried.	Tollage including demurrage.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7
	No.	Tons.	Tons.	Rs.	Rs.	
1890-91 ... Calcutta Canals	84.038	1,818,350	635,796	4,57.67,347	3,94.474	
1890-91 ... Tolly's Nala ...	73,416	792,550	258,639	1,61,59,157	1,20,271	
Total ...	157,454	2.610,900	894,435	6,19,26,504	5,14,745	0·83
1891-92 ... Calcutta Canals	83.717	1,872,508	639,822	5,57,69,888	3,96,613	
1891-92 ... Tolly's Nala ...	65,852	692,744	212,011	1,56,91,127	1,12,240	
Total ...	149,599	2,565,252	851,833	7,14,61,015	5,08,853	0·71

It may be remarked that although the total weight of cargo carried is less by 42,602 tons than during 1890-91, the higher rates prevailing, especially in rice and jute, have swelled the total value by Rs. 95,34,511. The average value per ton was Rs. 83, against Rs. 69 in the previous year.

116. The improvement in the toll system, shown by the reduction of the number of missing tickets, was maintained during the year under review. The following are the figures for the last ten years:— MISSING TICKETS.

Year.	No.	Year.	No.
1882-83	5,459	1887-88	677
1883-84	3,086	1888-89	329
1884-85	1,404	1889-90	238
1885-86	653	1890-91	212
1886-87	542	1891-92	210

REVENUE ESTABLISHMENT.

117. The cost of the revenue establishment employed on toll collections for the last five years is shown below:—

PARTICULARS.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Supervisor ...	12.651	12,972	11,053	11,475	11,863
Salary of Canal Inspector	5,435	4,034	3,900	5.172	5,016
Supervisor's office establishment ...	5,414	5,183	5.142	5,155	5,424
Canal police	2,022	2,060	2,050	2,061	2,049
Supervisor's steam-launch establishment ...	942	944	735	98	...
Inspector's and chálán boat establishment ...	1,123	1,112	1,138	1,049	1,036
Dhappa water establishment	180	180	173	168	168
Dafadar	40*	...	...	271	480
Travelling allowance	65	11	39	22	71
Contingencies	1,338	1,401	1,627	1,261	3,125
Toll-station es ablishment	9,710†	9,787†	10,424†	11,478†	12,127†
Total cost of establishment ...	38,920	37,684	36,281	38,210	41,359

* Canal dues.
† Includes salary of daroghas, clerks, cashiers, kootnavises, koyals, toll peons, and dinghies with crew.

The cost of the establishment exceeded that of 1890-91 by Rs. 3,149. The greatest increase was under contingencies, owing to the payment of law charges in the Balliaghatta godown case, and smaller increases occurred in office and toll station establishments on account of increments of salary falling due within the year, and in dafadars, owing to these men having been employed for the whole year, instead of only half, as in 1890-91.

MISCELLANEOUS RECEIPTS.

118. The following is a detailed statement of miscellaneous receipts realized by the Executive Engineer and the Supervisor of the Calcutta Canals during the year as compared with those of the previous year:—

	1890-91.	1891-92.
	Rs.	Rs.
Plantations	35	...
Other canal produce	202	155
Rents of buildings	1,597	5,618
,, of land	711	843
Miscellaneous other receipts* ...	3,338	3,602
Total ...	5,883	10,218

* Includes fishery rent and sale proceeds of canal silt.

The increase of Rs. 4,335 was due to arrears of rent having been realized from Mr. Cohen for the Balliaghatta godowns.

EXTENSIONS AND IMPROVEMENTS.

119. Under extensions and improvements Rs. 35,386 was spent on the erection of the new iron girder bridge over Tolly's Nala, which was completed during the year under review. As stated in last year's report, the total estimated cost of this work was Rs. 85,560, of which Rs. 30,000 has been contributed by the Corporation of Calcutta.

MAINTENANCE AND REPAIRS.

120. The cost of maintenance of the canal by sub-heads as compared with that of the previous year is given below:—

CANALS.	Locks.	Masonry bridge.	Roads.	Buildings.	Plantations.	Dredging.	Channel and banks.	Towpath.	Rustic bridges.	Steam-launches.	Miscellaneous.	Drainage.	TOTAL.

Total 1890-91 ...	11,562	7,724	16,251	3,540	5,058	12,260	25,530	22,748	21,094	5,999	17,822	284	1,49,872

The expenditure exceeded that of the previous year by Rs. 22,585, which is accounted for by the increased cost of dredging incurred in the Calcutta Canal and the Eastern Canal, and of repairs to "Channel and banks" due to the removal of a char at Russa on Tolly's Nala, and to the clearing of silt from the Assasuni khal and levelling the spoil bank of the Bhangor khal on the Eastern Canal. A more detailed explanation is given below:—

Calcutta Canals.—Extraordinary expenditure was incurred under "locks" on the work, begun last year, of dewatering, examining, and repairing the lock gates at Chitpur and Dhappa and clearing the lock basins of silt. More work was done on "roads" than in the previous year, and the large increase on "buildings" was caused by the raising of municipal taxes, owing to the amalgamation of the Suburbs with the Calcutta Municipality.

The increased cost of dredging was caused by working the dredgers for a longer period than in the preceding year. Under "miscellaneous" and "drainage" expenditure was augmented by the construction of a latrine for use of the floating population of the canals, and special repairs to the inlet sluice at Chitpur.

Tolly's Nala.—Petty repairs to bridges, over and above those customary, and the removal of a char at Russa, account for the increased expenditure on this portion of the canals.

Eastern Canal.—The expenditure on plantations was, in 1890-91, abnormal, owing to the institution of a new plantation, whereas this year only maintenance charges were incurred. The work done in dredging the Eastern Canal route was this year shown separately in the accounts, instead of, as heretofore, being charged against the Calcutta Canals. The increase under this head is, therefore, so far as the Eastern Canal is concerned, only apparent. Clearing silt from the Assasuni khal and levelling the spoil bank on the Bhangor khal raised the charges under "channel and banks." The Superintending Engineer remarks:—

"The necessity for the removal of the silt taken from the bed in the Eastern channels and deposited on the banks is a yearly increasing charge which cannot be avoided, on account of the large accumulation, and will be further increased by the cost of land which it will be necessary to acquire for its deposit."

121. The following statement shows the quantity of silt dredged, and the expenditure incurred, and the rate per 1,000 cubic feet during the year, including the cost of delivering the mud:— DREDGING AND SILT CLEARANCE.

	Quantity dredged.	Cost.	Rate per 1,000 cubic feet.
1	2	3	4
	C. feet.	Rs.	Rs. A. P.
Steam dredger *Victoria* ...	1,514,700	13,659	9 0 3
Fouracres' dredger ...	269,900	2,691	9 15 6
Marchant's dredger ...	330,600	3,235	9 12 6
Hydraulic dredger *Clinker* ...	588,000	2,854	4 13 7

Omitting the cost of delivering the mud, the rates of dredging proper, exclusive of the cost of repairs and of interest on original cost, were per 1,000 cubic feet—

	Rs. A. P.
Steam dredger *Victoria*	3 9 6
Fouracres' dredger	4 6 5
Marchant's dredger	0 9 9
Hydraulic dredger *Clinker*	1 15 2

The rates of working were in every case lower than last year.

The Superintending Engineer remarks:—

"The necessity for dredging operations is more marked every year, and constant clearance of bars is required as well as silt clearance by hand of such channels as the Bhangor khal."

PLANTATIONS.

122. The state of the plantations for the last two years is shown below:—

YEAR.	Trees over 12 feet.	Saplings from 4 to 12 feet.	Seedlings below 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1890-91 ...	2,208	1,382	1,314	4,904
1891-92 ...	2,307	1,381	1,308	4,996

The cost incurred during the year was Rs. 1,249 against Rs. 5,058 in 1889-90.

FLOODS.

123. *Floods.*—There were no floods during the year in any of the rivers crossed by the Calcutta and Eastern Canals. The highest gauge readings of the river Hooghly at Chitpur, Salt-Water Lake at Dhappa, and river Echamutty at Teetulia are shown in the following statement:—

River.	Locality.	1891-92.		1890-91.		HIGHEST RECORDED.

Total indirect charges ...	(—)65	1,02,953

The following extract is taken from the Administration Report for the current year:—

"The canal was opened throughout its entire length of 97½ miles. The tank ghâts at the locks were finished, and Mr. Bond's house at Balasore, which was purchased last year for the Executive Engineer's office and residence, was thoroughly repaired. Additional accommodation has also been provided in a detached building, which, together with the cost of land and special repairs and alterations sanctioned in Bengal Government No. 534I., dated 26th March 1891, amounts to Rs. 9,426. The project for a new lock at Jamcunda, necessitated by changes in the Subarnarekha river, is under consideration."

REVENUE ACCOUNT.

2.—REVENUE ACCOUNT—(Actuals).

Particulars.	Expenditure—		Particulars.	Receipts—

Total ...	65,586	62,057	Net total receipts	65,586	62,057

The receipts from this canal were injuriously affected by the long closure of the Hidgellee Tidal Canal and also by the opening of the Balliaghye drainage cut, which is in fact a navigable canal leading to the Russulpur river, enabling boats to pass into the river Hooghly without using the canal. The revenue was also possibly unfavourably affected by the grant of free return passes on ranges IVA, IVB, and V of the canal, which was adopted as an experimental measure to popularise the canal route.

FINANCIAL RESULTS.

125. The receipts on Revenue account and working expenses of the canal for the last six years are shown in the following statement :—

	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

Total indirect charges ..	831	1,722	2,639	2,450	975	3,032	3,253
Total working expenses	30,712	61,426	83,507	77,018	68,986	76,798	78,549
Net revenue ...	(—) 16,994	(—) 31,938	(—) 29,670	(—) 10,844	(—) 3,653	(—) 11,212	(—)16,492

The total direct charges were Rs. 1,536 higher than last year, and Rs. 7,285 in excess of those for 1889-90. The charges in 1889-90 were, however, abnormally low, owing to a very large share of the cost of establishment having been charged to the capital account of remodelling the Hidgellee Tidal Canal.

The cost of repairs is Rs. 6,286 higher than in 1890-91.

The Superintending Engineer writes :—

"The expenditure on works includes the employment of a dredger constantly at Bhaitghur and a gang of coolies working daily between tides at Jamounda buoying the channel, and in order to keep open a channel to the lock, &c."

126. The traffic on this canal has been prejudicially affected by the frequent closures that have lately occurred on the Hidgellee Tidal Canal, with which it is continuous, and no material increase can be expected until uninterrupted communication is afforded. NAVIGATION.

The receipts on each range of the canal are compared with those of the three previous years below:—

Ranges.	Miles of canal open.	Tollage receipts.			
		1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
Range III	36	45,575	37,743	37,731	38,231
Do. IVA	17	4,110	3,654	4,121	3,067
Do. IVB	6½	5,729	8,468	7,748	7,441
Do. V	38	9,596	13,859	14,620	11,312
Total ...	97½	65,010	63,724	64,220	60,051

The decrease in receipts has been explained in paragraph 124 above.

127. The traffic on the canal during the year 1891-92, compared with that of the previous year, is shown in the following statement :— TRAFFIC.

	Number of boats.		Tonnage of boats.		Value of cargo.		Tolls.	
	1890-91.	1891-92.	1890-91.	1891-92.	1890-91.	1891-92.	1890-91.	1891-92.
1	2	3	4	5	6	7	8	9
	No.	No.	Tons.	Tons.	Rs.	Rs.	Rs.	Rs.
Orissa Coast Canal	13,645		120,527	110,687	27,05,654	22,27,281	64,220	60,051

The construction of feeder roads by the District Boards is in progress, and on their completion an increased amount of traffic will, it is expected, be brought to the southern portions of the canal.

MISCELLANEOUS RECEIPTS.

128. The miscellaneous receipts during the last three years are shown below:—

	1889-90.	1890-91.	1891-92.
	Rs.	Rs.	Rs.
Plantations	...	8	...
Rents of buildings	161	285	337
Rents of land	220	340	175
Miscellaneous	1,182	777	1,560
Total ...	1,563	1,410	2,072

Under "miscellaneous" Rs. 520 was realised from hire of the steam launch *Falcon*, while sales of fisheries and grass show an increase of Rs. 449 from last year.

DREDGING AND SILT CLEARANCE

129. Only one dredger, the *Comus*, was employed during the year under review, the work done being, as in 1890-91, the removal of silt accumulated above the Bhaitghar Lock. The quantity dredged, and the cost and rate per 1,000 cubic feet, compared with the year 1890-91, are shown in the following table:—

Year.	Names of dredgers.	Quantity dredged.	Cost of—			Rate.		
			Lifting by dredger.	Removing by mud-punts.	Total.	Lifting.	Removing.	Total.
1	2	3	4	5	6	7	8	9
1890-91 ...	*Clinker* and *Comus*.	295,399	2,346	746	3,072	7·87	2·52	10·39
1891-92 ...	*Comus* ...	395,950	2,138	1,406	3,544	5·4	3·5	8·9

Owing to the long distances which dredgers have to be taken for even petty repairs, and to the impossibility of taking them to Calcutta for two-thirds of the year, breakdowns and stoppages are of frequent occurrence, and the work goes on expensively and slowly.

PLANTATIONS.

130. The state of the plantations for the last two years is shown in the following statement:—

Year.	Trees over 12 feet in height.	Saplings between 4 and 12 feet.	Seedlings under 4 feet.	Total.
1	2	3	4	5
	No.	No.	No.	No.
1890-91 ...	326	905	2,255	3,486
1891-92 ...	495	1,110	2,357	3,962

131. There were no heavy floods in any of the rivers crossed by the Orissa Coast Canal and no appreciable damage done. The highest gauge-readings of the rivers are shown in the following statement:— FLOODS

NAME OF RIVER.	Locality.	1890-91.		1891-92.		HIGHEST RECORDED READING.		REMARKS.
		Date.	Reading.	Date.	Reading.	Date.	Reading.

LENGTH OF CANALS OPEN AND AREAS COMMANDED AND IRRIGATED.

134. The lengths of canal and distributaries in operation at the close of the year 1891-92, compared with 1890-91, are given in the following table:—

NAME OF CANAL.	1891-92.								1890-91.							
	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.	Navigable canals.	Canals for irrigation only.	Distributaries and village channels.	Area protected from flood.	Area under command.	Area provided with distributaries.	Area irrigated.	Percentage of area irrigated to area provided with distributaries.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Saran Canals.		Miles.			Acres.		Acres.			Miles.			Acres.		Acres.	
Main canal or head cut		6·34								6·34						
Branch Canals.																
I.—Daha feeder ...		3·34	...	...	64,000		5,965	...	...	3·34	...	...	64·000	...	2,226	...
II.—Gandaki ...		1·57								1·57						
III.—Dhanai		1·00								1·00						
IV.—Gangri		6·57								6·57						
In addition to the above, the following are maintained:—																
I.—Thakraha Sota ...		1·50	...	...	...	...	...	..	...	1 50	...	...	...	...	...	...
II.—Roopan Chap Sota		27·00	...	...	...	...	...	...	...	27·00	...	...	...	...	...	...

The lengths are the same as last year. There are no distributaries or village channels maintained by Government, but an aggregate length of about 33 miles of cuts and channels have been constructed and maintained by the Manager of the Moniára estate.

Fifteen permanent dams and regulators exist in the branch canals, and seven bunds were constructed during the year to regulate the supply of water to the several canals.

RAINFALL.

135 The average rainfall on the area under command is shown by seasons in the table below for the last three years:—

	1889-90.	1890-91.	1891-92.
	Inches.	Inches.	Inches.
Kharif season*	19 47	24·60	11·52
Rabi	1·20	1·43	0·61
Year	45·09	58·63	35 05

* August, September, and October.

The Superintending Engineer writes:—

"In the early portion of the year the rainfall was excessive, but towards the latter end of the rains was very scanty. There was consequently a large demand for water for irrigation all over the district."

136. There were no high floods in the river Gandak during the year under review, but the river remained from June to August at a higher level than usual. FLOODS.

137. The areas irrigated, as obtained from the Canal Manager's reports during the past ten years, together with the rainfall, are given in the table below:—

YEAR.	Kharif.	Rabi.	Perennial.	Total.	Rainfall.
1	2	3	4	5	6
	Acres.	Acres.	Acres.	Acres.	Inches.
1881-82 ...	Not known	Not known	...	666	43·50
1882-83 ..	Not known	Not known	...	1,747	40·89
1883-84 ...	Not known	Not known	...	21,122	26 32
1884-85 ...	1,917	5,306	...	7,223	35·42

1886-87 ...	566	1,580	...	2,146	60·96
1887-88 ...	1,699	2,519	...	4,218	39·63
1888-89 ...	3,897	3,316	...	7,213	42·39
1889-90 ...	2,684	1,531	...	4,215	45·09
1890-91 ...	990	1,236	...	2,226	58·63
1891-92 ...	3,425	2,540	...	5,965	35·05

138. The duty of water cannot be calculated, as there is no regular irrigation, and the canals are drainage as well as irrigation channels. DUTY OF WATER.

These canals were originally constructed for the purpose of supplying water for indigo manufacture on a guarantee given by the indigo concerns interested of a revenue amounting to Rs. 21,500 per annum. The guarantee was for ten years, and expired on the 1st of April 1891. The working expenses materially exceeding the revenue, and the proprietors interested being unable to come to an agreement to increase the guarantee, it was proposed as the only practical alternative to close the canals. The proprietors of the Moniára and Suddowa concerns, who had expended large amounts on village channels and other works, represented the hardship this course would cause to them, and offered to maintain the inner channels themselves and to pay the cost of maintaining the head works up to a limit of Rs. 11,000 year, Government as their share of keeping up the canals, which would be of use in case of famine, paying establishment charges. The offer was accepted as a year-to-year agreement, and it is on this basis the canals are now being worked.

139. The following comparative statement shows the balances, assessments, and recoveries of water-rates for the last ten years:— ASSESSMENTS, COLLECTIONS AND BALANCE.

YEAR.	Amount outstanding at commencement of year.	Amount falling due during the year.	Total for recovery.	Cash realization.	Remitted or written off.	Balance at the end of the year.
1	2	3	4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
1881-82	330 6 9	23,000 0 0	22,669 9 3	5,874 12 0	...	16,794 13 3
1882-83	16,794 13 3	21,750 0 0	38,514 13 3	16,506 0 6	...	22,038 12 9
1883-84	22,038 12 9	21,750 0 0	43,788 12 9	22,959 10 3	...	20,829 2 6
1884-85	20,829 2 6	21,750 0 0	42,579 2 6	8,976 11 3	...	33,602 7 3
1885-86	33,602 7 3	21,750 0 0	55,352 7 3	39,718 9 3	2,770 13 4	12,863 0 8
1886-87	12,863 0 8	21,750 0 0	34,613 0 8	11,072 10 5	...	23,540 6 3
1887-88	23,540 6 3	21,850 0 0	45,390 6 3	21,069 9 0	...	24,320 13 3
1888-89	24,320 13 3	21,850 0 0	46,170 13 3	20,415 0 0	...	25,755 13 3
1889-90	25,755 13 3	21,850 0 0	47,605 13 3	22,990 0 3	1,250 0 0	23,365 13 0
1890-91	23,365 13 0	21,850 0 0	45,215 13 0	37,036 2 9	...	8,179 10 3
1891-92	8,179 10 3	11,000 0 0	19,179 10 3	15,785 8 4	231 4 6	3,162 13 5
Total ...	...	2,39,900 0 0	4,50,860 5 8	2,32,485 0 9	4,252 1 10	3,162 13 5

The outstanding balance has considerably decreased, and there now only remains a sum of Rs. 3,163 to be recovered.

MAINTENANCE AND REPAIRS.

140. The following table shows the expenditure on maintenance during the past three years:—

	Miles.	1889-90.	1890-91.	1891-92.
1	2	3	4	5
		Rs.	Rs.	Rs.
Repairs to head cut and river protective works	6·34	10,026	7,445	4,304
Repairs to Daha feeder ...	3·34	909	1,290	357
" to Gandaki feeder ...	1·57	1,118	1,735	221
" to Dhanai feeder ...	1·00	722	592	65
" to Gangri feeder ...	6·57	768	2,777	129
" to dams and channels for irrigation purposes	...	11,357	12,615	3,945
Total ...	...	24,900	26,454	9,021
Establishment	...	12,422	10,560	3,710
Tools and plant (actual) ...	...	991	389	(—)193
GRAND TOTAL ...	...	38,313	37,403	12,538

The marked reduction in the cost of maintenance is mainly due to the fact that under the new agreement with Mr. Reid of the Moniára concern, Government only maintains the head cut and Daha feeder and that portion of the Rupan Chap Sota above Siswa. Economies were also effected by not repairing many spurs not now required, by reducing the width of bunds, and by reducing excessive rates for work.

DREDGING AND SILT CLEARANCE.

141. There are no dredgers on the canals, and the silt is removed by hand only.

The following statement shows the total quantity of silt removed from the canals and the cost during the year as compared with those in the two previous years:—

	1889-90.		1890-91.		1891-92.	
1	2	3	4	5	6	7
	C. ft.	Rs.	C. ft.	Rs.	C. ft.	Rs.

Total working expenses ...	2,74,773	1,21,281	1,30,922	1,00,643	82,087	64,314	97,892	1,40,769	92,989	1,09,894	1,13,274
Net revenue ...	(—)63,554	61,686	71,912	94,814	1,01,694	1,38,936	1,00,783	51,119	92,834	90,588	79,463

The decrease in receipts amounting to Rs. 7,745 was a consequence mainly of the low level of the river Ganges, which caused the heads of the rivers to silt up. The Bhagirathi was impassable in the upper reaches, steamers were unable to ply on the Matabhanga, and the other rivers were also affected. Not only were the receipts thus affected, but the expenditure incurred on training works was increased, the net result for the year being a decrease of Rs. 11,125 in the net profit. The traffic was also, to some extent, prejudicially affected by the general dulness of trade and bad harvests.

The expenditure on the Nadia Rivers is mainly on training works, to keep open the navigation channels and entrances of the rivers, so that the cost of maintenance depends to a large extent on the condition of the channels. For instance, the expenditure was abnormally low in 1889-90, because it was found impracticable to keep open the lower intake of the Bhagirathi, and hence no training works were constructed in the upper portions of that river.

RAINFALL AND FLOODS.

145. No rainfall register is kept up for these rivers. There were no floods during the year, and the river Ganges was exceptionally low even in the flood season. The gauge readings at Gheria and Berhampore for the last three years are given below:—

		GHERIA.		BERHAMPORE.
1889	...	34′00″	...	30′4½″
1890	...	34′70″	...	30′11¾″
1891	...	29′30″	...	26′7″

A statement showing the highest gauge readings of the Nadia rivers is given below as compared with those of the previous year:—

River.	Locality.	1891-92.		1890-91.		Highest known.	
		Date.	Reading.	Date.	Reading.	Date.	Reading.
1	2	3	4	5	6	7	8
Bhagirathi ...	Berhampore	29th Aug. 1891	60·33	15th Aug. 1890	61·73	15th Aug. 1890	64 73
Jellinghee ...	Surupganj	25th „ „	29·38	29th „ „	34·88	29th „ „	34·88
Matabhanga ...	Hanskhali	30th „ „	31·85	3rd Sept. „	39·93	3rd Sept. „	39·93

146. The number of boats of each class and toll collections by the Collectors are shown below:— NAVIGATION.

NAME OF RIVER.	NUMBER AND CLASS OF BOATS.						COLLECTIONS BY TOLL COLLECTORS.					
	Up to 100 maunds.	Between 100 and 1,000 maunds.	Between 1,000 and 2,500 maunds.	Between 2,500 and 5,000 maunds.	Over 5,000 maunds.	Total.	Tolls from boats.	Tolls from rafts.	Tolls from steamers and flats.	Total tolls.	Miscellaneous receipts.	Total collections.
1	2	3	4	5	6	7	8	9	10	11	12	13
	No.	No.	No.	No.	No.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

147. The following statement shows the number of boats, tonnage, weight, and value of cargo and toll collections:— TRAFFIC.

NADIA RIVERS.	Number of boats, inclusive of steamers, flats and rafts.	Tonnage of boats.	Weight of cargo.	Value of cargo.	Toll collection.	Percentage of toll on value of cargo.
1	2	3	4	5	6	7
	No.	Tons.	Tons.	Rs.	Rs.	
Bhagirathi	12,269	193,471	93,087	65,67,755	38,983	...
Ditto and Bhyrub-Jellinghee	35,140	491,472	209,941	2,67,68,405	1,23,910	...
Matabhanga	12,758	119,680	49,716	42,69,061	29,825	...
Total, 1891-92 ...	60,167	804,623	352,744	3,76,05,221	1,92,718	0·53
Total, 1890-91 ...	64,888	899,210	380,033	3,99,33,210	2,00,508	0·50

148. The cost of the revenue establishment for the last five years is shown below:— REVENUE ESTABLISHMENT.

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.
Salary and commission of Collectors	12,217	12,671	11,943	13,224	13,210
Accounts and office establishment	9,030	9,397	8,986	9,223	8,942
Travelling allowance ...	479	463	390	711	530
Contingencies	450	475	441	472	452
Total ...	22,176	23,006	21,760	23,630	23,134

The slight decrease compared with the previous year results from the smaller commission earned by toll-collectors, owing to diminished revenue.

MAINTENANCE AND REPAIRS. 149. The charges for maintenance and repairs for the last two years are detailed below:—

PARTICULARS.	1890-91.	1891-92.
1	2	3
	Rs.	Rs.
Re-opening lower entrance channel, Bhagirathi river	1,422	1,290
Inspection shed, upper entrance... ...	...	496
Training works in river Bhagirathi ...	31,438	40,413
" " Bhyrub ...	2,313	2,593
" " Jellinghee ...	1,695	1,960
" " Matabhanga ...	1,641	1,415
Sounding Nadia Rivers	5,921	6,015
Maintaining and working divisional boats ...	2,862	3,102
Petty and other charges	5,190	5,420
Total ...	52,482	62,704

The total expenditure during the year shows an increase of Rs. 10,222 caused by extra expenditure on training works to keep open the river entrances and channels, as explained in paragraph 144 above.

MISCELLANEOUS RECEIPTS. 150. The miscellaneous receipts during the year amounted to Rs. 247, against Rs. 136 in the previous year.

DREDGING AND SILT CLEARANCE. 151. There was no expenditure under this head during the year.

PLANTATIONS. 152. There are no plantations on the banks of the rivers. Bamboos were planted on the berm of the Bhagirathi embankment in 1890-91, but the result was not very successful. Another trial will be made in 1892-93. The number of trees existing during the year was 17,004.

EDEN CANAL.

REVENUE ACCOUNT. 153. The purpose for which this canal was originally constructed was, as stated in the last year's report, mainly to supply drinking-water. The receipts and expenditure for the last two years are given below:—

RECEIPTS.	1890-91.	1891-92.	EXPENDITURE.	1890-91.	1891-92.
1	2	3	4	5	6
	Rs.	Rs.		Rs.	Rs.
Water-rates ...	2,795	9,430	Works	584	4
Miscellaneous ...	802	728	Maintenance and repairs	24,612	18,623
			Establishment ...	8,915	6,541
Total ...	3,597	10,158	Tools and plant .	684	495
Less—Refunds of revenue	...	39	Total expenditure ...	34,795	25,663
Net total receipts ...	3,597	10,119	Balance, deficit ...	31,198	15,544

The receipts from water-rates were Rs. 6,635 greater than last year, and Rs. 927 in excess of those of 1889-90, owing to the extensive irrigation resulting from the failure of the rainfall in October, while the expenditure was Rs. 9,132 less than that of the previous year, the decrease taking place in all items. The net result of the year was a reduction in the deficit balance from Rs. 31,198 to Rs. 15,544.

The works carried out consisted of the construction of a sand dam across the Damodar at Júgúti, to keep up the cold weather supply of the canal, and the excavation of silt from the various channels connected with the canal.

The supply of water to the Burdwan water-works was efficiently maintained.

154. The canal was not originally intended for irrigation purposes, but it has through the force of circumstances been used to supply water to save crops, and, the benefits received being appreciated, water is now regularly supplied. Under the system in force payment is made in advance at the rate of four annas a bigha for the approximate area of rice in a village. At the end of the season the area actually irrigated is measured, and any excess payment returned to the villagers or left to their credit for the next year. For areas irrigated in excess of payments, demand notices are issued. The area irrigated during the past three years has been as follows:— IRRIGATION.

Nature of leases.	1889-90.	1890-91.	1891-92.
1	2	3	4
	Acres.	Acres.	Acres.
Annual	9,693	1,330	1,478
Five year ...	...	...	12,707
Total ...	9,693	1,330	14,185

This increase in five-year leases will be noticed with satisfaction.

The Superintending Engineer writes:—

"The bulk of the irrigation was carried out from October to the middle of November 1891, when there was no rainfall. Had the cultivators come forward a little earlier, the result of the year's operations would have been much more satisfactory and the irrigated area larger. A large number of applications for water had to be refused for want of sufficient supply in the canal."

The Superintending Engineer reports that the total demand for water-rates in the year under review was Rs. 10,738, of which Rs. 9,256 were actually realized during the year.

The outturn of crops on the irrigated area was exceedingly good, whereas the crops on the unirrigated lands failed.

155. The cost of establishment employed on irrigation was Rs. 967, against Rs. 147 in 1890-91, the increase being due to the larger area under irrigation. REVENUE ESTABLISHMENT.

MADHUBAN CANAL.

156. The expenditure on works and maintenance of this canal during the last three years is given below:— EXPENDITURE

PARTICULARS.	1889-90.	1890-91.	1891-92.
1	2	3	4
	Rs.	Rs.	Rs.
Works	2,957	6,236	...
Maintenance ...	3,257	2,011	7,300
Establishment ...	3,100	3,293	3,003
Tools and plant ...	23	287	203
Total ...	9,337	11,827	10,506

The floods of 1891 caused fresh damage to the apron of the Teur weir, necessitating another large estimate for its repair. This work has been a source of trouble ever since it was constructed, the floor being incapable of withstanding the sudden floods which are occasioned by the bursting of the irrigation embankments across the river in Nepal. The extra cost of repairs was due to repairs to the floor of the Teur weir.

157. No revenue is derived at present from irrigation in this canal, the raiyats being allowed to irrigate their lands free of cost.

The miscellaneous receipts during the year were Rs. 92, against Rs. 42 in 1891-92.

IRRIGATION. 158. At the latter end of the rains there were many demands for water for rice irrigation, and 2,539 acres of rice land were irrigated. The area irrigated for the last three years is shown by crops below:—

Nature of crop.	1889-90.	1890-91.	1891-92.
1	2	3	4
	Acres.	Acres.	Acres.
Bhadoi	640	...	...
Kharif	5,308	...	2,539
Rabi	240	2	495
Poppy	1,946	852	552
Total ...	9,134	854	3,586

GENERAL RESULTS.

NET REVENUE. 159. The net results of the year 1891-92, compared with those of the previous year, are shown below. The figures are exclusive of refunds of revenue:—

PARTICULARS.	Receipts from all sources (less refunds).	Working expenses (direct and indirect).	Profit or loss.
1	2	3	4
MAJOR IRRIGATION WORKS.	Rs.	Rs.	Rs.
1890-91	13,39,141	14,32,136	−92,995
1891-92	15,98,608	14,37,935	+1,60,673
MINOR WORKS AND NAVIGATION.			
For which Capital and Revenue accounts are kept.			
1890-91	6,27,654	4,39,636	+1,88,018
1891-92	6,03,107	4,35,005	+1,68,102
For which only Revenue accounts are kept.			
1890-91	2,00,482	1,09,894	+90,588
1891-92	1,92,737	1,13,274	+79,463
For which neither Capital nor Revenue accounts are kept.			
1890-91	3,639	46,622	−42,983
1891-92	10,211	36,169	−25,958
Total { 1890-91 ...	21,70,916	20,28,288	+1,42,628
Total { 1891-92 ...	24,04,663	20,22,383	+3,82,280

Compared with the figures accepted in the revised Budget Estimates, the actual receipts were more by Rs. 1,36,663 and the expenses less by Rs. 59,778.

160. The net result of the Major Irrigation Works reckoned on earnings, that is on the revenue calculated on the water rates due on the area actually irrigated during the year instead of on actual receipts, was, compared with 1890-91:— EARNINGS

	Earnings.	Working expenses.	Profit or loss.
	Rs.	Rs.	Rs.
1890-91 ...	13,54,379	14,32,136	— 77,757
1891-92 ...	18,14,485	14,37,935	+ 3,76,550

The expenditure was normal.

The revenue from Minor Works and Navigation is derived mainly from tollage receipts.

161. The progress in the recovery of water-rates during the year is summarised below:— ARREARS

CANALS	Outstanding on 1st April 1891.	Demand of 1891-92.	Collected or adjusted.	Outstanding on 1st April 1892.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
Orissa Canals ...	1,98,364	2,82,880	2,47,540	2,33,704
Midnapore Canal	64,967	1,29,822	1,35.817	58,972
Sone Canals	2,08,782	7,29,631	8,26,969	1,11,444
Total ..	4,72,113	11,42,333	12,10,326	4,04,120

162. The approximate value of crops irrigated by Major Irrigation Works during the last two years is shown in the following table:— VALUE OF CROPS.

CANALS.	1890-91.		1891-92.	
	Area irrigated.	Value of crops.	Area irrigated.	Value of crops.
1	2	3	4	5
	Acres.	Rs.	Acres.	Rs.
Orissa Canals	180,299	39,10,595	177,685	47,87,546
Midnapore Canal	82,002	18,86,046	83,973	20,99,325
Sone Canals	281,014	1,08,08,203	474,723	1,44,85,957
Total ...	543,315	1,66,04,844	736,381	2,13,72,828

The average value per acre of the various crops irrigated has decreased from Rs. 30·5 to Rs. 29·0.

Two tables are attached as appendices to this note, (I)—showing the number of days spent on tour by each officer of the Irrigation Department, (II) the dates of inspections of the divisional and subdivisional offices by each Superintending Engineer during he year 1891-92.

163. The date fixed for the submission of revenue reports to the office of the Chief Engineer is the 15th September. The dates when the different reports were received are shown below:—

		In 1891.	In 1892.
Orissa Circle ...	Commissioner's report ...	3rd September	27th September.
	Superintending Engineer's report	5th October ..	23rd ditto.
South-Western Circle ...	Commissioner's report ...	24th September	24th ditto.
	Superintending Engineer's report	17th ditto	17th ditto.
Sone Circle ...	Commissioner's report ...	7th October ...	26th ditto.
	Superintending Engineer's report	14th September	15th ditto.

The report from the Superintending Engineer, Sone Circle, was received on the date fixed, and the other reports were practically punctual. The finance and administrative accounts of the year 1891-92, due in the Chief Engineer's office on the 1st August, were received from the Examiner, Public Works Accounts, Bengal, on the 6th and 14th September 1892, respectively, and this is to a large extent the cause of delay in the preparation and submission of the report to the Government of India within the prescribed time, 15th November.

164. The results of the year's working of the canals in Bengal may, I think, be considered satisfactory. Taking major and minor works together there has been a profit of Rs. 3,82,280, against Rs. 1,42,628 in 1890-91, caused entirely by extra receipts, the expenditure continuing stationary, the canals having been kept up in a thoroughly efficient state. If the major works alone are considered and earnings be taken in place of actual receipts, by which the effect of arrear balances is eliminated, the profit for the year is Rs. 3,76,550, against a loss of Rs. 77,757 in that previous. The outstanding balance has been reduced by Rs. 67,993. The improvements indicated by these figures are the more gratifying from the fact that the accounts of the year now current promise even better results. The province has benefitted by crops covering 736,381 acres, the value of which is estimated at 213¾ lakhs of rupees, having in a year of scant rainfall been brought to maturity, when in the absence of the canals they would, for the most part, have failed or not have been sown.

165. The circumstances of the year entailed great pressure on the staff, which the facts and figures contained in this note show to have been adequately met. Allusion has been made to specially satisfactory features in the work carried out by Colonel A. D. McArthur, R.E., Superintending Engineer, in the South-Western Circle, by Mr. D. B. Horn, Executive Engineer, in the Brahmini-Baitarni Division, and by Mr. K. H. Stephen, Executive Engineer, in the Buxar Division, as also to the collections made by Babu Siva Sunker Singh in the Patna district, but the work of the Divisional and Subdivisional Canal Officers throughout Bengal and the collecting establishment in the Sone Circle was of a character to merit the commendation of Government.

C. W. ODLING,
Chief Engineer.

The 31*st December* 1892.

Appendix I.

Statement showing the number of days spent on duty and on tour by Superintending, Executive and Assistant Engineers and Upper Subordinates of the Irrigation Branch during the year 1891-92.

Name.	Circle or Division.	Number of days—		Remarks.
		On duty.	On tour.	
Superintending Engineers.				
Mr. C. W. Odling ...	Sone ...	206	100*	*Does not include 6 days spent in proceeding to Calcutta on duty and back. Officiated as Chief Engineer and Joint-Secretary for one month in April 1891. On deputation for May and June 1891. On special duty from 6th to 29th February 1892. Appointed Chief Engineer and Joint Secretary from 5th March 1892.
Lieut.-Col. A. D. McArthur, R.E.	South-Western ...	366	116	
„ W. A. Inglis ...	Arrah ...	160	73	Officiated as Superintending Engineer for 29 days in addition to his own duties, and tour of this period is shown under that head.
	Do. ...	56	13	On privilege leave from 6th August to 19th October 1891, after which joined Public Works Department Secretariat as Under-Secretary from 21st October 1892 to 29th January 1892. Rejoined Sone Circle on 1st February 1892.
„ W. Connan ...	Orissa ...	341	147	In charge from 24th April 1891.
Executive Engineers.				
Mr. J. P. Scotland ...	Cossye ...	366	160	
„ T. M. L. Thompson ...	Northern Drainage and Embankment	366	172	
„ C. E. Livesay ...	Nadia Rivers ...	305	182	Was on privilege leave for 61 days.
„ T H. Clowes ...	Buxar ...	6	...	In charge of subdivision. Privilege leave for 3 months from 7th April 1891.
	Nadia Rivers ..	73	45	Joined the Division on 25th July 1891.
	Balasore ...	177	92	Joined the Division on 20th October 1891.
„ G. J. R. Leeson ...	Circular and Eastern Canals.	366	212	
„ A. Hayes	Balasore ...	86	39	Was on furlough for 280 days.
„ A. Monies	Ditto ...	287	123	On leave for 9 days. On special duty from 13th January to 25th February 1892. Transferred to Madras.
„ M. J. J. P. Norman ...	Buxar ...	52	28	Returned from furlough and joined Division in December 1891. In charge of subdivision.
	Do. ...	61	26	In charge from 10th February 1892.
„ O. C. Lees	Gandak ...	366	159	
„ K. H. Stephen ...	Buxar ...	315	128	On privilege leave from 10th February 1892. Joined the Public Works Department Secretariat from 29th February 1892.
„ A. S. Thomson ...	Eastern Sone ...	366	178	
„ L. R. Fraser ..	Dehri Workshop ...	366	71	The greater part of the work of this division is at head-quarters.
„ M. H. Arnott ...	Buxar ...	13	10	Proceeded on 7 months' furlough on 14th April 1891.
	Brahmin-Byturni ...	119	84	Joined Division, 4th December 1891.
„ D. B Horn ...	Ditto ...	366	162	
„ J. R. Swinden ...	Puri ...	366	144	
„ T. Butler ...	Mahanuddy ...	366	142	
„ J. P. Coy ...	Acquapadda-Jajpur.	339	173	Died, 5th March 1892.
„ C. A. White ...	Brahmini-Byturni ...	366	276	In charge of subdivision.
Assistant Engineers.				
Mr. W. S. Bremner ...	South-Western ..	115	2	Attached to Superintending Engineer's office from 1st to 13th April and from 7th August to 30th November 1891.
	Cossye ..	116	46	Joined the Division on 7th December 1891, and employed at head-quarters till 6th January 1892.
	Nadia Rivers ...	111	24	
„ C. H. DeMello ...	Cossye ...	282	135	
	South-Western ...	13	10	Includes time spent during joining from Panchpara to Calcutta.
	Buxar ...	62	35	Joined subdivision on 30th January 1892.
Rai Bama Churn Paramanic Bahadur.	Northern Drainage and Embankment.	366	230	
Mr. J. W. Fox	Circular and Eastern Canals.	359	237	On leave for 7 days.

Appendix I.

Name.	Circle or Division.	Number of days— On duty.	On tour.	Remarks.
Rai Kirth Chunder Chowdry Sahib.	Balasore ...	132	67	Transferred from Balasore Division, and left on the afternoon of 10th August 1891. Joined 1st Calcutta Division, 8th February 1892.
Mr. H. E. Pellereau ...	Ditto ...	241	117	Transferred to the Punjab, and left on the afternoon of the 27th November 1891.
" J. S. L. Long ...	Gandak ...	366	199‡	‡ Including 16 days on which he attended the Divisional office.
" J. C. Hewitt ...	Buxar ...	328	202	On privilege leave for 23 days in April 1891.
" P. G. Jacobs ...	Eastern Sone ...	275	205	On leave for 91 days.
" A. H. C. MacCarthy ...	Arrah ..	366	207	
Rai Sahib Bani Madhub Mitra.	Buxar ...	355	249	Was in charge of subdivision from 1st April 1891 to 20th March 1892. Transferred to Arrah Division.
Mr. H. Barlow ...	Mahanuddy ...	366	296	In charge of subdivision.
Rai Sahib Cally Podo Sen ...	Acquapadda-Jajpur.	366	161	In charge of subdivision, and in charge of division from 6th March 1892.
" Annoda Prosad Sircar.	Brahmini-Byturni and Acquapadda-Jajpur Division.	366	185	In charge of subdivision.

* The area (5,000 acres) commanded by the Sasaram distributary has been added.

(*a*) The currency of the estimates for the Orissa and Sone projects has expired, and the present outlay on these projects is held as irregular pending orders of the Government of India.
(*b*) and (*c*) The estimates for the Midnapore and Hidgellee Tidal canals, respectively, having been withdrawn and closed, the figures shown are the totals of the old and fresh sanctions.
(*d*) There is no general sanctioned estimate for this project.
(*e*) Includes Rs. 8,66,000 expended from famine relief funds.
(*f*) Includes 3 miles of the Gobri extension canal which form the feeder channel from Alba to Pattamundi fall and 24½ miles of Taldunda extension canal.
(*g*) Includes 20 miles of Kaorapukhur Khal.
(*h*) Includes village channels.
(*i*) The decrease of 7½ miles is due to the Futtehpur distributary having been abandoned beyond the 12th mile.
(*j*) The increase of 4½ miles is due to the Baroon distributary having been added. It includes 14½ miles of Government village channels.
(*k*) Includes 4½ miles of river crossings.

III.—Sale by Volume.

Kharif season.—For water supplied between the 1st of September and the 31st of October, four rupees for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less than twelve hours, a proportionate charge is made, but a fraction of less than one-sixteenth is charged as one-sixteenth.

Rabi season.—For water supplied between the 1st of November and the 25th of March, one rupee for a calculated discharge of one cubic foot per second for twelve hours. For less than a cubic foot per second or less than 12 hours, a proportionate charge is made, but a fraction of less than one-sixteenth is charged as one-sixteenth.

Saran Canals.

Rates authorized for year 1891-92.

	Maximum rate charged.
	Rs. a. p.
For water supplied on application between 1st April and 15th June ...	2 8 0 per acre.
For water supplied in the *kharif* season	1 8 0 „
For water supplied in the *rabi* season	1 0 0 „

For water taken without previous application and permission, a further rate of 1 rupee per acre is charged, in addition to the several rates entered above.

For water supplied on application for the manufacture of indigo, Rs. 4 per maund on the outturn of indigo manufactured.

List of Officers in charge of Irrigation Circles and Divisions during the year 1891-92.

Circle or Division.	Name of Officer.	Period of charge.

SECRETARIAT.

Secretary, Irrigation Branch	Colonel J. M. McNeile, R.E.	From 1st April 1891 to 4th March 1892. [On privilege leave from 1st April to 30th April 1891.]
Offg. Joint-Secretary, Irrigation Branch.	Mr. C. W. Odling ...	„ 1st April to 30th April 1891.
Superintending Engineer on special duty.	Ditto ...	„ 1st May to 9th July 1891.
	Ditto ...	„ 1st February to 4th March 1892.
Joint-Secretary, Irrigation Branch.	Ditto ...	„ 5th to 31st March 1892.
Under-Secretary ...	Mr. G. A. G. Shawe ...	„ 1st April to 19th October 1891.
Ditto	„ W. A. Inglis ...	„ 20th October 1891 to 28th January 1892.
Ditto	„ G. C. Maconchy ...	From 29th January to 31st March 1892.

SUPERINTENDING ENGINEERS IN CHARGE OF CIRCLES.

South-Western Circle ...	Lieutenant-Colonel A. D. McArthur, R.E.	From 1st April 1891 to 31st March 1892.
Ditto Personal Assistant.	Mr. W. S. Bremner ...	„ 1st to 13th April 1891.
	Ditto ...	„ 6th August to 30th November 1891.
	Mr. C. H. DeMello ...	„ 8th to 20th January 1892.
Orissa Circle	„ R. H. Rhind ...	„ 1st to 25th April 1891.
	„ W. Connan ...	„ 26th April 1891 to 31st March 1892.
Sone Circle	„ C. W. Odling ...	„ 10th July 1891 to 1st February 1892.
	„ W. A. Inglis ...	„ 1st April to 9th July 1891.
	Ditto ...	„ 2nd February to 31st March 1892.

EXECUTIVE ENGINEERS IN CHARGE OF DIVISIONS.

SOUTH-WESTERN CIRCLE.

Nadia Rivers Division ...	Mr. C. E. Livesay ...	From 1st April 1891 to 31st March 1892.
Cossye Division	„ J. P. Scotland ...	Ditto ditto.
Northern Drainage and Embankment Division.	„ T. M. L. Thompson ...	Ditto ditto.
Circular and Eastern Canals Division.	„ G. J. R. Leeson ...	Ditto ditto.
Balasore Division ...	„ A. Hayes	From 1st to 3rd April 1891.
	Ditto	„ 31st December 1891 to 31st March 1892.
	Mr. A. Monies	„ 4th April to 30th December 1891.

ORISSA CIRCLE.

Aequapada-Jajpur Division	Mr. J. P. Coy ...	From 1st April 1891 to 5th March 1892.
	Rai Kally Podo Sen Sahib ...	„ 6th to 31st March 1892.
Brahmini-Byturni Division ...	Mr. D. B. Horn ...	„ 1st April 1891 to 31st March 1892.
Puri Division ...	„ J. R. Swinden ...	Ditto ditto.
Mahanuddy Division ...	„ T. Butler ...	Ditto ditto.

SONE CIRCLE.

Arrah Division	Mr. W. A. Inglis	From 1st to 29th April 1891.
	Ditto ...	„ 10th July to 5th August 1891. [On privilege leave from 6th August to 19th October 1891.]
	„ R. E. Carter ...	„ 30th April to 9th July 1891.
		„ 6th August 1891 to 31st March 1892.
Gunduck Division ...	„ O. C. Lees	„ 1st April 1891 to 31st March 1892.
Dehree Workshop Division ...	„ L. R. Fraser ...	Ditto ditto.
Eastern Sone Division ...	„ A. S. Thomson ...	Ditto ditto.
Buxar Division	„ K. H. Stephen ...	From 1st April 1891 to 9th February 1892.
	„ M. J. J. P. Norman ...	„ 10th February to 31st March 1892.

CANAL REVENUE OFFICERS.

Circle or Division.	Name of Officer.	Period of charge.
Deputy Collector, Sone Canals.	Babu Saroda Prosad Chatterjee.	From 1st April 1891 to 31st March 1892.
Sub-Deputy Collector, Sone Canals.	Babu Jugdum Sahai ...	Ditto ditto.
Ditto	" Siva Sankar Singh ...	Ditto ditto.
Ditto	" Jogesh Chunder Ghose	From 24th April 1891 to 29th February 1892.
Circle Officer, Sone Canals ...	" Moti Lal	" 1st April 1891 to 31st March 1892.
Deputy Revenue Superintendent, Orissa.	" S. C. Roberts ...	Ditto. ditto.
Deputy Revenue Superintendent, Midnapur.	" Koylash Chunder Ghose	Ditto ditto.
Supervisor, Calcutta Canals	Mr. W. R. Cooksey ...	Ditto ditto.

THE MONSOON OF 1892.

THE following report is published for general information

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

The 9th January 1893. *Secretary to the Govt. of Bengal.*

METEOROLOGICAL SUMMARY FOR THE MONSOON PERIOD OF 1892.

THE following statement is intended to give a brief history of the more important features which have characterized the south-west monsoon period and the preceding months of 1892.

The most noticeable feature of the weather in January was the almost entire absence of rainfall in all districts, for the whole rainfall of the month consisted of a few local showers in some of the districts of South Bihar and North Bengal. This was caused by the unusual absence of anything like influential barometric depressions existing in or travelling from North-Western India, but the province was nevertheless affected by two feeble barometric depressions. Up to the morning of the 8th of January ordinary cold weather conditions obtained, but on the 9th a disturbance existing in North-Western India began to affect the pressure and temperature in Bengal. The depression moved in an easterly direction and reached Bengal about the 11th, the centre apparently passing near Berhampore. The depression continued to influence Bengal up to the 15th, when it filled up, and ordinary cold weather conditions again set in. On the 20th another depression appeared in North-Western India, and advanced towards Bengal, filling up in its advance, and it thus did not actually reach the province, though on the 23rd and 24th it influenced Bihar, giving clouded skies and light rainfall. Weather continued slightly disturbed up to the 27th, and then normal cold weather conditions set in up to the close of the month. In January barometric pressure was generally in excess by about a hundredth of an inch, the excess being largest in East Bengal, while temperature was also in excess of the normal in different districts by from 1° to 3°, the excess being largest in South Bihar and Chota Nagpur. Owing to the comparative absence of disturbed weather, cloud proportion was in defect in all districts except Bihar, but on the other hand humidity was in slight excess of the normal.

In February only one important barometric depression affected Bengal. This depression appeared over the Western Desert on the 10th, and advanced slowly in an east, south-easterly direction, and on the 13th its centre was near Agra and Delhi, and it was still a considerable storm. On the 14th it was near Cawnpur and Sutna, but on the 15th and subsequent days it filled up and disappeared. It gave disturbed weather and fairly general rain to Bengal, the greatest disturbance being from the 11th to the 16th instant. Several other but much more feeble barometric depressions appeared in North-Western India during this month, and advanced south-eastwards, but they caused little disturbance to the weather in Bengal, beyond giving high temperature and humidity, with low pressure and a few local rain showers. On the whole, therefore, the month of February was more free from disturbance than usual. The rainfall in this month varied from a little more than a quarter of an inch in Orissa, South-West and North Bengal, to about three-quarters of an inch in North Bihar, East Bengal, and South Bihar, while Chota Nagpur received 1·30 inches. The falls were in excess of the normal in Bihar and Chota Nagpur, and in defect elsewhere. In February pressure was in defect of the normal by about a twentieth of an inch, the defect being largest in South-West and North Bengal, where it equalled 0·07", and the variations from day to day were also decidedly large. Temperature on the other hand was in excess by from two to four degrees, the largest excess temperature being reported in North Bengal and South Bihar, while the variations of cloud proportion and humidity from the normal were small.

In March the weather was again decidedly more free from disturbance than usual. A very shallow barometric depression passed over the province in the early part of the month, reaching North Bengal on the 4th, and passing away

in an easterly direction, and giving light rain in East Bengal and also a few showers in Orissa. Fine settled weather, with steadily and rather rapidly increasing temperature, then set in up till the 25th, when a shallow low pressure area formed in Bihar and West Bengal, which gave rise to disturbed conditions, and then travelled in an easterly direction, so that local storms, with rain, occurred in East and North Bengal and North Bihar for two or three days and particularly on the 28th, after which again fine settled weather set in. A fall of an inch and a half of rain occurred in North Bengal, and an inch in East Bengal, while only a fifth of an inch was reported in North Bihar, and in all other districts rainfall was practically absent. Hence the rainfall of March was in defect of the normal in all districts except North Bengal, the defect equalling from an inch and a half to two inches in South-West and East Bengal, and being about an inch in Orissa and Chota Nagpur, while the defects were unimportant in Bihar.

In March, again, pressure was rather largely in defect of the normal, the defect averaging more than 0·08″ and equalling nearly a tenth of an inch in South Bihar. The temperature was low in the early part of March, but it increased more rapidly than usual, and for the last three weeks was generally in excess of the normal, the mean temperature of the month showing 1° in excess. Also owing to the absence of disturbed weather cloud proportion was only about half the usual amount, and humidity was about 10 per cent. in defect of the normal.

At the commencement of April ordinary hot season conditions obtained, but the pressure distribution was a little anomalous, as there was a considerable excess of pressure in the north-east of the province, while the pressure decreased rapidly in amount towards the west. Hence winds were more easterly than usual. This distribution of pressure, however, rapidly changed, and from about the middle of the month two or three feeble low pressure areas formed in succession over the western part of the province, which afterwards extended to North Bengal and North Bihar, where at one time pressure was a quarter of an inch in defect. With this distribution of pressure, the southerly winds blowing from the Bay over Bengal became exceptionally strong, and these southerly winds brought up large amounts of moisture to the province, and gave rise to very numerous local storms, or nor'westers, with rain, which occurred during the second half of the month in East and North Bengal, and to a certain extent in South-West Bengal, Bihar, and Chota Nagpur. An average amount of from six to seven inches of rain fell in East Bengal, more than five inches in North Bengal, and about an inch in North Bihar, and in these three divisions the falls were in distinct excess of the normal. The fall in South-West Bengal averaged two inches and was slightly less than the normal, but in all other districts rainfall was very small in amount and largely below the normal.

Again, in April, the mean pressure for the month was in decided defect, the defect ranging from about a twentieth of an inch in South Bihar and Chota Nagpur to 0·02″ in East and North Bengal. The mean temperature for the greater part of the month was in decided excess, and was 1·8° higher than the normal for April. Owing to the rather numerous local storms, cloud proportion was rather considerably in excess, but humidity was lower than usual in South-West and East Bengal, and above it in some other districts. On the whole, perhaps also, winds were rather more easterly than is usual in April.

In May after a week of ordinary hot weather conditions a feeble low pressure area formed over the western parts of the province, which filled up about the 14th, while again from the 20th to the 24th a second feeble low pressure area developed over part of Chota Nagpur and West Bengal. During these periods, and specially during and after the second one, conditions were very disturbed in Bengal, and very numerous nor'westers, with rain, occurred, particularly in South-West, East, and North Bengal. These local storms brought up about twelve inches of rain to both East and North Bengal, or amounts very considerably larger than the normal, while in South-West Bengal the fall averaged nearly five inches, or almost a normal amount. The fall in North Bihar was about two inches, or nearly an inch in defect, and Orissa also received nearly two inches, or about two inches less than usual. South Bihar and Chota Nagpur during May received only small amounts of rain.

In the south of the Bay winds began to strengthen at the Ceylon stations, owing to the advance of the south-west monsoon, from about the 10th of May,

and they blew fairly steadily and rather strongly almost to the close of the month. By about the 24th these winds had apparently reached well into the middle of the Bay, and two feeble barometric depressions were formed in front of this advance, one of which passed into the Gulf of Martaban and over Burma, where it gave heavy rain, while the second low pressure area which formed off the South Orissa and Ganjam coasts filled up without passing inland. At the close of May the monsoon current had advanced well into the north of the Bay, and there was every prospect of the early break of the monsoon in Bengal.

In May, again, the mean pressure was moderately in defect of the normal, the usual variation equalling about 0·03″ to 0·05″, and being fairly uniform over the whole province. Temperature in Bengal at the commencement of May was about 4·2° in excess of the normal, and it continued rather largely in excess in the second week, when Chota Nagpur registered the very large excess temperature of 9·2°. Towards the close of the month, however, temperature fell considerably, and became even below the normal, so that the mean temperature for the month was only about 2° in excess of the normal. It was also noticeable in May that both cloud proportion and humidity were higher than usual, and also that the easterly component in the wind direction was very strongly developed, while the southerly winds blowing from the Bay over Bengal were also exceptionally strong.

During the first five months of the year therefore, or in what may be called the pre-monsoon months, it will be seen that rainfall over the whole province was generally in defect of the normal, except perhaps in the eastern and northern districts, where in April and May rather heavy falls were received. Rainfall was thus practically entirely absent from the province in January, and only a few unimportant showers fell in February. In March light rain fell in East and North Bengal, and practically none in any other division, and in April and May moderate to large amounts of rain fell in East, North, and South-west Bengal, and very little elsewhere. Thus, in Orissa, for the whole of the pre-monsoon months rainfall was in large defect; in South-west Bengal there was also moderate to large defect for every month; in East Bengal rainfall was in defect in January, February, and March, and in considerable excess in April and May; in North Bengal there was excess in March, April, and May, and defect in January and February; and in Bihar and Chota Nagpur there was slight excess rainfall in February and defect for the remainder of the pre-monsoon period. This lightness of the rainfall over the province generally was brought about by the comparatively absence of disturbed or stormy weather in Bengal, and from the comparative absence and general lightness of the cold weather storms forming in North Western India. For practically the whole of the pre-monsoon period pressure was in defect of the normal, the general defect equalling nearly a twentieth of an inch, and this defect continued almost up to the close of May. The mean temperature was also in excess of the normal in each of these five months, the usual excess averaging nearly two degrees, while, on the other hand, humidity and cloud proportion were generally smaller than usual during the five months, January to May.

As stated previously, the meteorlogical conditions in Bengal at the end of May pointed to the early commencement of the south-west monsoon rains, as the current had reached well into the north of the Bay, and pressure in Bengal was below the normal, and hence favourable for its further advance over the land. Early in June, however, pressure increased moderately in Bengal, and became in excess of the normal, and hence conditions were less favourable for the further advance of the monsoon current over Bengal, though the monsoon winds continued to blow strongly in the centre and south of the Bay. At this time, that is about the 6th or 7th of June, a very severe cyclone commenced to form in the north-west angle of the Bay, which, after remaining nearly stationary, and intensifying rapidly for two or three days, began to move in a northerly or north-north-westerly direction, until it struck the coast near the mouth of the Hooghly at about 6-30 A.M. of the 10th of June, the centre passing about 30 or 40 miles to the west of Saugor Island. After striking the coast it recurved, and moved in a west-north-westerly direction, and finally filled up near Sutna on the 14th instant. The storm was an exceedingly violent one, and is described as one of the most severe of recent years, but it was exceedingly small, and the area of hurricane winds was

probably not more than 70 or 80 miles across. It did, however, comparatively little damage either at sea or on land, though it gave a small storm-wave over part of the Balasore district, and in passing over the land it very rapidly decreased in force and became of little importance. A small inrush of monsoon winds accompanied the advance of the storm, and rainfall become general over the province from the 8th to the 12th instant, but it then fell off in amount, and when the storm filled up and disappeared, there was a rapid rebound of pressure in Bengal, and it became in excess of the normal, and conditions become so unfavourable for the further general advance of the monsoon current over Bengal, that from the 18th to the 25th there was practically no rain in the province, except in the eastern and northern districts. From the latter date, however, which may be taken practically as the date of the commencement of the true monsoon season, rain became fairly general, though light, in all districts of the province. This date of the commencement of the rains is about ten to twelve days later than usual.

Rainfall during June was hence generally below the normal amount, except in the western districts, which were directly influenced by the cyclone, and in parts of the northern districts. The falls varied from about thirteen and fourteen inches in East and North Bengal, and eleven inches in Orissa, to only about five inches in South Bihar. For the whole province the falls may be said to have equalled about 95 per cent. of the normal. The falls, indeed, in North Bihar, Chota Nagpur, and Orissa were from ten to thirty per cent. in excess of the usual amounts, while North and East Bengal, South Bihar, and South-West Bengal showed defects varying from twenty-five to sixteen per cent. In certain smaller districts, indeed, the falls were less than two-thirds of the normal amount, and this was the case in Hooghly, Khulna, Chittagong, Dacca, Malda, Dinajpur, Jalpaiguri, Bhagalpur, and the Sonthal Parganas.

Notwithstanding the very low pressures which were recorded during the cyclone in the early part of the month, the mean pressure for June was in slight excess of the normal. Temperature for the whole province was about three-tenths of a degree in defect, though there were slight excess temperatures recorded in North and East Bengal, and South Bihar. The humidity recorded was generally above the normal by moderate amounts, but cloud proportion was practically normal.

In July the conditions in Bengal were for the greater part of the month very favourable for good and heavy rainfall. One very pronounced barometric depression, which indeed might be classed as a feeble cyclonic storm, formed in the Bay in the early part of the month, and crossed the coast near Balasore on the 10th, after which it moved in a westerly direction, and in its rear a heavy wave of monsoon winds swept over the province. Two feeble land-formed depressions passed through the province in the middle of the month, and also gave very heavy rain, while another very feeble depression was formed in the last week of the month in the north-west angle of the Bay, which passed across Orissa, but brought up little rain in its rear. A fairly steady and strong monsoon was blowing in the Bay for practically the whole month, and the monsoon current was also rather strong in Bengal. Hence, the general rainfall of the province was about four per cent. in excess of the normal. The heaviest rainfall was, however, deflected towards the north and north-east of the province, and North Bengal received the exceptionally heavy fall of 23·61 inches, which is nearly ten inches more than usual, or 68 per cent. in excess of the normal fall. The falls in Bihar and Chota Nagpur averaged about twelve inches and were practically normal, the fall in East Bengal equalled about fourteen inches, or two inches less than usual, and was 14 per cent. in defect, while in Orissa and South-west Bengal about ten inches of rain fell, and the amounts were about 10 to 17 per cent. in defect. Again, in some of the smaller districts the falls were much more deficient than indicated in the above general figures, and thus the defects in Howrah, Bankura, Chittagong, and Saran equalled nearly 30 per cent. of the normal, while in Balasore, Midnapore, and Dacca the defects equalled about 40 per cent.

In July the variations of barometric pressure in different parts of the month were unusually large, but the mean for the month was in defect by from 0·02″ to 0·04″, the defect being largest in South Bihar, Chota Nagpur, and Orissa, through which the depressions of the month generally passed, and being smallest in East and North Bengal. Temperature variations during the month were

unimportant, and the mean for the month was practically normal, but in the case of humidity and cloud proportion excess amounts were registered.

In August the monsoon current blowing in the Bay and over Bengal appears to have been about its normal strength, and it gave good general rain, and taking the rainfall of all the divisions, of the province into consideration, the amounts registered equalled 99 per cent. of the fall in normal years. The tendency of the heavy rainfall to localize itself in the north and north-east of the province, which was well marked in June and July, was still more strongly pronounced in August, and thus, while Bihar and North Bengal received falls of about 50 per cent. more than usual, the falls over the southern half of the province were from 30 to 40 per cent. in defect. At the commencement of August a fairly strong monsoon current was blowing from the Bay over Bengal, the inrush being caused by the indraught towards a depression which had passed inland over Orissa at the end of July. This indraught ceased with the filling up of the depression, and from about the 7th of August a slight and partial break in the rains set in over Orissa, South-West Bengal, and Chota Nagpur, and also over parts of East Bengal and South Bihar, which lasted up till about the 20th, but it was only from the 23rd or 24th that fairly general and heavy rain again set in. During this period there were no barometric depressions or storms forming either over the Bay or inland, and hence conditions were not very favourable for heavy rainfall, but from the 28th a depression began to form off the Gangam and Circars coasts, which developed slowly up till the 30th, when it had also advanced in a north-westerly direction and the centre was probably near Puri. During the evening of the 30th the feeble depression passed inland over Orissa, and on the 31st its centre was near Sambalpur. During the formation of this depression the rainfall-bearing current was again deflected towards it, and hence not allowed to sweep over Bengal, and thus towards the close of the month there was another slight and partial break in the rains, but after the depression had passed inland the monsoon current again began to sweep over Bengal, and heavy general rain recommenced, particularly in the south-western districts and Orissa. Thus, during August the number of barometric depressions formed either over the Bay or over the land area was remarkably small, and the month was on the whole a very quiet one, and, as indicated before, conditions were not very favourable for rainfall in the western, south-western, southern, and central districts of Bengal. though in the north of the province exceptionally heavy falls were received. Thus an average amount of more than twenty inches was recorded in North Bengal, or between six or seven inches more than usual. North Bihar also received nearly twenty inches, or more than eight inches in excess. South Bihar received fourteen inches, or two and a half inches more than usual, but all other districts were in defect. East Bengal only received ten inches, or five inches less than usual, while South-West Bengal, Orissa, and Chota Nagpur received from seven to nine inches, or from three to five inches in defect. In some of the smaller districts the defects were exceedingly large. Thus, defects of more than 60 per cent. of the normal rainfall were recorded in Howrah, Hooghly, Burdwan, Bankura, Singhbhum, and Manbhum, and of more than 50 per cent. in Midnapore, Chittagong, and Tippera, while falls of less than two-thirds of the normal were reported in Balasore, 24-Parganas, Birbhum, Nadia, Jessore, Faridpur, Dacca, and Hazaribagh. On the other hand, Purnea received a fall 113 per cent. in excess of the normal, Rangpur and Saran 96 per cent. in excess, and several other northern districts more than 50 or 60 per cent. in excess.

The pressure conditions in August were for the greater part of the time unfavourable for the free advance of the monsoon current over Bengal, for the general pressure of the province for the month was more than a twentieth of an inch in excess of the normal, and this excess was very strongly marked in such districts as Orissa, South-West Bengal, and East Bengal, where the rainfall was very deficient almost throughout the month. The variations of temperature for the month were again of little importance, and the mean temperature almost agreed with the normal. The humidity registered was also almost normal, while cloud proportion was distinctly below it.

The meteorology of September was characterized by the occurrence of three very distinct barometric depressions, or cyclonic storms, in the Bay, and by the formation of a very feeble low pressure area over South east Bengal

at the close of the month. This is perhaps quite as large a number of depressions as is usual, and three of them were also of moderate intensity. These small storms, however, brought up, on the whole, less rainfall than usual in such cases. The monsoon current blowing in the Bay of Bengal was also somewhat weak, and showed very unmistakable signs of weakness towards the close of the month, when it commenced to withdraw from the province at a decidedly earlier date than the normal, for the monsoon rains had practically closed in Bihar and Chota Nagpur on the 28th of September. Again, a very distinct break in the rains, which was fairly well established in all divisions of the province, commenced on the 13th instant, and lasted up to the 22nd. Hence the general rainfall of the province was very considerably in defect of the normal, and it only equalled about 73 per cent of the usual amount.

The principal condition determining the distribution of the rainfall in the province in September was the line of advance of the depressions from the Bay. The first formed on September 1st in the north-west angle of the Bay, and passed inland near Balasore on the evening of the 2nd. The second formed in the north of the Bay on the 7th, and passed inland on the 9th between False Point and Puri. The third depression formed near the centre of the Bay on the 18th, and crossed the coast on the evening of the 21st between Coconada and Masulipatam. These depressions, all of which were fairly influential, it will be seen, mainly affected the western and south-western parts of the province, or the districts of Orissa, South-West Bengal, and Chota Nagpur, and they gave moderate to heavy rain over this area. The fourth depression was a feeble one, which existed in South-East Bengal at the close of the month, but it, nevertheless, gave heavy rain to the whole of East Bengal.

The heaviest rainfalls in September occurred in Orissa and East Bengal, which received between nine and ten inches, and while the fall in Orissa was practically normal, that in East Bengal was nearly three inches below it. Chota Nagpur received rather more than eight inches, which was also almost the normal fall. South-West and North Bengal received about seven inches, or falls rather largely in defect, while in Bihar only about five inches fell, which was also largely in defect.

In the following districts the rainfall was practically 50 per cent. and upwards in defect of the normal:—Pabna, Rajshahi, Malda, Dinajpur, Rangpur, Kuch Bihar, Purnea, Bhagalpur, Darbhanga, Shahabad, Monghyr, and Lohardaga, while the falls were less than two-thirds of the normal in the following districts:—Howrah, Jessore, Dacca, Muzaffarpur, Champaran, and Saran.

The general barometric pressure for September was slightly in defect of the normal, the defect ranging from about 0·03″ in the west and south-west of the province to 0·015″ in East and North Bengal. The general temperature for the month was nearly normal in all districts, except Bihar and North Bengal, where excess temperatures of a degree to a degree and-a-half were registered. Cloud proportion and humidity were also practically normal in amount during the month.

At the beginning of October an area of low pressure existed over South-East Bengal. This feeble depression apparently marked the retreat of the south-west monsoon current southwards, and when on the 2nd of October the depression filled up, or passed away in an easterly direction, the south-west monsoon current rapidly retreated from the province altogether, and from the 4th of October it had ceased to affect Bengal, and the true monsoom rains may be said to have ceased from this date. During the slow retreat of the south-west monsoon current down the Bay the weather was rather disturbed, and no less than three barometric depressions and one cyclonic storm formed in the Bay, and moved across it in a westerly direction. These depressions, as usual, rather largely affected the weather in Bengal, but the rainfall brought up to the province by them was rather smaller than usual.

After the withdrawal of the monsoon current from Bengal on about the 4th of October a period of fine settled weather set in, which lasted for about a week, when a feeble depression formed to the east of the centre of the Bay, and moving in a westerly direction crossed the Madras coast on the 12th, but it was not well-defined, and was decidedly feeble. A second more influential depression also formed to the east of the Bay a few days after this,

and moved towards the Madras coast, crossing it near Nellore on the 17th. A small but severe cyclone then formed in the rear of the second depression, and, following in nearly the same path, crossed the Madras coast a little to the south of Coconada on the 20th. This was a very influential storm, and caused a wave of moisture-laden winds to advance northwards up the Bay and over Bengal, and this wave gave fairly general rain from about the 21st to the 27th, but about this latter date the moist wind current was again driven back to the Bay. The fourth depression also originated to the east of the centre of the Bay on the 27th, and advanced towards the west coast, and on the 29th an influential barometric depression crossed the coast between Nellore and Masulipatam. This depression in breaking up again caused a wave of moisture-laden winds to advance northwards up the Bay and over Bengal, but the miost winds did not penetrate as far as in the previous case, and it gave general rain to only the southern half of Bengal. This advance of humid winds spread over the southern districts on the 30th and 31st, when good general rain was again received on those days.

By these actions heavy rain was received in East Bengal, Orissa, Chota Nagpur, and South-West Bengal, and moderate rain in North Bengal and South Bihar, but practically little or no rain fell in North Bihar. The actual falls varied from between six and seven inches in Orissa and East Bengal, and from three to four inches in South-West Bengal and Chota Nagpur, to an inch in South Bihar and North Bengal, and a quarter of an inch in North Bihar. The falls in East Bengal, Chota Nagpur, and Orissa were in decided excess of the normal, but elsewhere they were in defect, the deficiency being large in North Bengal and Bihar. In the districts of Darbhanga, Muzaffarpur, Champaran, Saran, Shahabad, and Patna practically no rain at all fell, while in the following the falls only equalled a third or less than a third of the normal amounts:—Pabna, Bogra, Rajshahi, Dinajpur, Kuch Bihar, Jalpaiguri, Darjeeling, Purnea, Bhagalpur, Gaya, and Palamau Falls of less than two-thirds the normal amount were also registered in Midnapore, Howrah, Nadia, Murshidabad, Mymensingh, Malda, Rangpur, Monghyr, and Sonthal Parganas.

In October the variations of pressure from the normal were very small, and did not average as much as a hundredth of an inch below the normal for the whole province; indeed the defect was only a few thousandths of an inch in all divisions except South Bihar and Chota Nagpur, where it slightly exceeded a hundredth of an inch The changes of temperature during the month were unusually large, but the variations in different parts of the month to a great extent neutralized each other, and hence the mean temperature for the month for the whole province was only in excess of the normal by three-tenths of a degree. Cloud proportion in October, owing to the early withdrawal of the monsoon current, was much lower than usual, but humidity was about the ordinary amount.

In most years the meteorological summary of the monsoon season ends with the review of October's weather, but as the meteorology of the early part of November was decidedly important, the tables appended to this summary have been made up to include the first half of November. As stated previously, quite at the close of October a wave of humid winds, forced up by the action of a barometric depression which had formed in the Bay and had crossed towards the Madras coast, had advanced over the southern half of the province, and was giving heavy rain over this area. In connection with this advance of moist winds and disturbed weather, pressure fell so rapidly over Bengal, that at the beginning of November a feeble low pressure area existed over the south-western districts of the province, with a centre near Chaibassa and Balasore, on the 1st of the month, but which on the 2nd was near Calcutta and Jessore, and round which an irregular cyclonic circulation of winds existed. From the 3rd, however, the depression began to fill up, and by the 5th it had practically disappeared, and the pressure distribution rapidly became that which characterizes the beginning of the cold weather or north-east monsoon season in Bengal. During the existence of this depression exceedingly heavy rain fell in the southern districts of the province, and for the first four or five days of November an average rainfall of three and a half inches was reported in East Bengal, a fall of two and a half inches in South-West Bengal, a fall of about an inch in Orissa, and half an inch in Chota Nagpur, while North Bengal and Bihar were almost absolutely rainless. These figures, of course, in the case of South-West and East Bengal

represent many times the normal rainfall for the period. From the 5th of November, however, the moist current from the Bay finally withdrew from Bengal. and ordinary cold weather conditions were established from that date.

The principal features of the monsoon season of 1892 and of the previous months of the year have therefore been as follows:—

1. Except in January, when there was slight excess, the pressure of the pre-monsoon months up to and including May was rather considerably in defect of the normal, the usual defect equalling from 0·04″ to 0·08″.

2. Temperature was in distinct excess in each of the first five months of the year, the usual excess equalling from 1° to 3°.

3. The number of cold weather storms which occurred in the early part of the year was decidedly small, and those which did occur were of comparatively little importance.

4. The hot weather storms of the type called nor'westers were also not numerous in March or April, but fairly numerous in May.

5. Rainfall in the pre-monsoon period was very decidedly in defect of the normal in all divisions except East and North Bengal, in which districts rather heavy rain fell in April and May.

6. The first small, or preliminary burst, of the monsoon rains in Bengal was brought up by the action of a severe, but small, cyclone, which formed in the early part of June in the north-west angle of the Bay, and passed inland between Saugor Island and Balasore, but the effect of this inrush rapidly died away.

7. The monsoon current did not permanently establish itself in Bengal until the the 24th or 25th of June, or about 10 or 12 days later than usual.

8. The strength of the monsoon current from the date of its establishment up to its withdrawal appeared to be fairly normal. The rainfall brought up by this current, however, was mainly deflected towards the north and north-east of the province.

9. The number of barometric depressions and feeble cyclonic storms formed during the south-west monsoon season was rather smaller than usual, and they, in the majority of cases, passed from the north-west angle of the Bay over Orissa and through Chota Nagpur, but the rainfall brought up by them was decidedly lighter than usual.

10. Hence, during the monsoon season, though the rainfall of the province taken as a whole was nearly normal, North Bengal and North Bihar received falls very largely in excess of the usual quantities, while all other divisions received defective falls, the defects being very large in some parts of South-West Bengal, Orissa, and Chota Nagpur. Parts of East Bengal also showed very deficient rainfall.

11. The monsoon current commenced to retreat from Bengal about a week earlier than usual, as general rainfall practically ceased in Bihar from the 27th or 28th of September, and in lower Bengal from about the 4th of October, and all rainfall in the province after this date practically was brought up by the action of cyclonic storms or barometric depressions in the Bay, which formed in front of the retreating south-west monsoon current, and which depressions afterwards advanced towards the west coast of the Bay.

12. As the monsoon current finally established itself in Bengal about ten days later than usual, and withdrew about a week before the normal period, the south-west monsoon season was a decidedly short one.

13. During October more barometric depressions and small cyclonic storms were formed in the Bay than usually occur, but the majority of them were of little importance. Only one fierce, but small storm formed, which crossed the west coast of the Bay near Coconada. Two of these disturbances, one in the middle of October, and one quite at the close of that month, caused a wave of humid winds to advance northward, and hence gave moderate to heavy rain in Bengal, and the rainfall in the second half of October and early in November was very important.

14. The rainfall brought up in this way was particularly heavy in Orissa, Chota Nagpur, South-West and East Bengal; smaller amounts extended to South Bihar and North Bengal, but North Bihar was practically rainless.

15. The following tables give briefly the amount and variation of the rainfall in each of the seven meteorological divisions, month by month, for the period from the 1st of May to 15th November inclusive.

Actual Rainfall in inches.

Meteorological Divisions.	May.	June.	July.	August.	September.	October.	1st—15th November.	Monsoon Season, 1892.
Orissa ...	1·93	11·64	10·40	7·98	9·88	6·26	0·98	49·07

Chota Nagpur ...	— 1·25	+ 0·85	— 0·58	— 4·55	— 0·39	+ 0·63	+ 0·28	— 5·01

Variation expressed in a percentage of the normal fall.

Orissa ...	— 50	+ 32	— 17	— 30	— 4	+ 2	+ 8	— 9
South-West Bengal ...	— 11	— 16	— 12	— 42	— 23	— 9	+ 771	— 17
East Bengal ...	+ 49	— 25	+ 68	+ 46	— 49	— 72	— 79	+ 8
North Bengal ...	+ 21	— 21	— 14	— 34	— 23	+ 18	+ 347	— 11
North Bihar ...	— 32	+ 4	+ 6	+ 71	— 54	— 93	— 100	— 1
South Bihar ...	— 64	— 18	— 1	+ 21	— 35	— 70	— 58	— 13
Chota Nagpur ...	— 48	+ 11	— 4	— 34	— 4	+ 21	+ 133	— 10

16. Finally, the rainfall of the whole province from May to the middle of November inclusive has averaged 53·17 inches, while the normal fall for the period is 57·13 inches. So that the actual fall has shown a defect of 3·96 inches. Expressed as a percentage, the actual rainfall of Bengal for the monsoon season of 1892 has equalled 93 per cent. of the normal amount.

METEOROLOGICAL OFFICE, BENGAL,
The 10*th December* 1892.

A. PEDLER,
Meteorological Reporter to the Govt. of Bengal.

TABLE I.

Actual Monthly Rainfall of districts in Bengal for the months of May to 15th November 1892.

[*N. B.*—The figures in this table are the arithmetical averages of the corresponding figures in the returns for the subdivisional stations.]

Meteorological Report of the Province of

STATION OBSERVATIONS.

Meteorological Division.	District.	Representative stations.	Air Pressure.					Wind.		Temperature.						Humidity.	
			Highest, 8 A.M. barometer reading.	Lowest, 8 A.M. barometer reading.	Mean, 8 A.M. reduced to 32°.	Mean reduced to sea level and constant gravity, Lat. 45°.	Variation from normal mean.	Mean direction at 8 A.M.	Mean velocity in miles daily.	Highest of month.	Lowest of month.	Mean daily maximum temperature.	Mean daily minimum temperature.	Mean daily temperature.	Variation from normal mean.	Mean, 8 A.M., humidity.	Variation from normal mean.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1892.

THE most important features in the meteorology of December have been—

1. There has been an almost complete absence of cold-weather storms of any importance originating in or coming from North-West India, which in most years pass through Bengal in December, particularly in the second half of the month Only one feeble disturbance indeed began to approach Bengal from North-Western India at the close of December. Fine weather with lightly clouded or almost cloudless skies has therefore prevailed over the greater part of Bengal practically throughout the month.

2. The retreat of the south-west monsoon current in the south of the Bay in December has also been unattended with the formation of any cyclonic storms, such as frequently occur, and only one or two small barometric depressions of comparatively little importance have formed in the south of the Bay and have drifted in a westerly direction towards the Madras coast. One of these depressions had formed at the end of November, and on the 1st and 2nd of December it was approaching the Madras coast, but it filled up before passing over the land, and only gave squally weather and in some cases a gale of wind with moderate rain to parts of that coast. A second feeble depression or area of disturbance probably formed on the 14th or 15th, in the centre of the south of the Bay, and drifting in a westerly direction affected the South Madras coast on the 17th. Another period of disturbance commenced in the extreme south of the Bay on the 20th, but scarcely affected the Madras coast at all, and the disturbed conditions probably passed away in a westerly direction over Ceylon. These disturbances were, however, of so feeble a nature and so far south in the Bay, that they had absolutely no effect on the weather conditions in Bengal.

3. Owing, therefore, to the almost entire absence of disturbed weather during December, the rainfall occurring in Bengal has been confined to a few showers in the districts in and near the Darjeeling Hills. Indeed, rainfall has been absent from the entire province except for falls averaging about half an inch in the Darjeeling and Jalpaiguri districts. Rainfall has thus been in defect of the normal in all Divisions

4. The mean pressure for the month has been unusually high, and there has been a general excess of from 0·03" to 0·05". This excess on the whole has been largest at the eastern and southern stations; and in such cases as Cuttack, Barisal, Faridpur, Bogra, and Dinajpur, the excess has been larger than a twentieth of an inch.

5. Temperature, on the other hand, has been in defect of the normal at almost all stations, the defect being very small in the west and north of the province, and comparatively large in the southern districts, where defects of from 2° to 2·5° have occurred at Calcutta, Jessore, and Krishnagar. This defect has, however, been almost entirely confined to the night or minimum temperatures, which in several cases have ranged from 3° to 4° below the normal. Indeed, over the western half of the province the mean day or maximum temperature for the month has been in distinct excess of the normal.

6. Owing to the absence of disturbed weather, the mean cloud proportion for the month has been in rather large defect of the normal, while, on the other hand, humidity has been fully equal to, and in a good many cases in distinct excess of, the normal.

The meteorological changes for the month of December do not call for any detailed account. Throughout the last twenty-five days of November fine settled weather had obtained in Bengal, and the cold weather conditions were indeed throughout this time unusually strongly developed, and these conditions again obtained at the beginning of December, when temperature was generally from 1° to 2° in defect, pressure was in excess of the normal, and a very steady north-westerly wind current prevailed over the province. Early in December, however, there was very squally weather in the centre and south-west of the Bay, due to the passage of a feeble barometric depression in a westerly direction from the centre of the Bay to the Madras coast, but this did not in any way affect the weather in Bengal. This fine, settled and unusually cool weather continued over the whole province up to the 6th, when slightly unsettled weather commenced in the Darjeeling Hills, which gave a few showers of rain in this and the Jalpaiguri districts. From the 9th, however, again a period of absolutely fine and very cool weather set in over Bengal, which lasted up till the 23rd, when two or three showers fell in the Darjeeling and Jalpaiguri districts, but from the 25th again weather became fine. Throughout almost the whole of the month indeed, and up till about the 29th or 30th, except for the two slight disturbances in the hills, weather in Bengal was absolutely settled. Conditions, however, began to change slightly from the 29th, for on the morning of the 30th a very distinct and rather influential barometric depression had appeared over Rajputana and North-Western India generally, which was travelling so rapidly in an easterly direction that on the 30th it had reached the neighbourhood of Bahraich in the North-West Provinces, but it was also rapidly filling up, and on the 1st of January it had practically entirely disappeared. In front of the advancing depression, however, as is usual in such cases, temperature and humidity rose very rapidly, and thus at the close of the month at some of the western stations of Bihar, the mean temperature had

become no less than from 4° to 6° in excess of the normal. The conditions at the close of the month in this respect were thus in rather marked contrast to those of the greater part of December.

Pressure—At the beginning of the month was in distinct excess of the normal. For the week ending the 10th instant, the excess equalled about two-hundredths of an inch. In the following week the excess had increased to about a twentieth of an inch, but in the week ending the 24th instant it had fallen to about 0·03." For the last week, notwithstanding the advancing depression from the North-West Provinces, the excess had again increased and equalled about 0·06." For the whole month, therefore, pressure has been in excess of the normal, the excess averaging about 0·04", and ranging generally from 0·03" to 0·05." The smallest excess pressures have been shown in the west and north of the province and in Assam. Excess pressures of only about 0·02" have been recorded at Hazaribagh, Patna, Darbhanga, Jalpaiguri, and Dhubri, and at Sibsagar an almost normal pressure has been registered. On the other hand, the excess has been larger than 0·05" at Dinajpur, Bogra, Faridpur, Barisal, Cuttack, Arrah, and Chapra.

Temperature.—The mean temperature of the province was 1·7° in defect of the normal at the beginning of the month. In the week ending the 10th, the defect equalled about a degree, but at the end of this period some unusually low night temperatures were recorded, and defects of 7° to 9° were reported on the 9th and 10th at such stations as Barisal, Jessore, Krishnagar, Calcutta, Bankura, Chittagong, and Dehri. In the following week the defect had increased to 2·3°. In the week ending the 24th the defects had become small except in East and South-West Bengal, but even in these districts they were only about a degree; and finally, in the last week of the month the temperature had risen to the normal value. The mean temperature for the whole month has been in defect of the normal, the defects ranging from a few tenths of a degree at the western stations of Bihar to about 2° to 2·5° in South-West Bengal at such stations as Calcutta, Jessore, and Krishnagar. The average day temperatures of the month have been in excess over the western half of the province by about a degree, and in defect over the eastern half by a few tenths of a degree. The minimum temperatures, on the other hand, have been in defect in all districts, the defects averaging from 1° to nearly 4°. In Assam the mean temperature has been in defect by 0·7°.

The general variation of temperature from the normal of the month is best shown by the following table, which gives the variation of the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province, week by week, throughout the month :—

STATIONS.	Week ending 3rd December 1892.			Week ending 10th December 1892.			Week ending 17th December 1892.			Week ending 24th December 1892.			Week ending 31st December 1892.

Rainfall.—Except for a fall of 0·72 inch in the Darjeeling district and one of 0·36 inch in the Jalpaiguri district, the whole province of Bengal has been rainless throughout the month. In Assam the only rainfall reported has been 1·07 inches at Sibsagar.

The following table gives in a condensed form the summary of the rainfall information in Bengal for the whole year. It gives a comparison between the actual monthly and total rainfall of the year with the normal values in each of the seven meteorological divisions of Bengal, the actual falls being expressed as percentages of the normal amounts. From these figures it will be seen that all the districts, except North Bihar and North Bengal, have

received largely defective falls during the year, and that in South-West Bengal the defects exceed 20 per cent :—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Actual rainfall of the year 1892 expressed as a percentage of the normal fall for the period.

Meteorological Office, Bengal ;
The 10th January 1893.

A. Pedler,
Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of December 1892.

	Inches.	Date.	Hour.
The mean pressure of the month	30·049		
The average pressure of December from 24 years' registers ...	30·027		
The highest pressure in the month	30·189	28th	10
The lowest pressure in the month	29·901	5th	16
The range of pressure	0·288		
	Hours.		
The total number of hours of bright sunshine during the month	273·7		
The maximum possible number of hours of sunshine ...	332·8		
	°		
The mean temperature of the month	63·2		
The average temperature of December from 24 years' registers	68·0		
The highest temperature in the month	79·5	31st.	
The lowest temperature in the month	49·0	10th & 26th.	
The range of temperature during the month	30·5		
The mean daily range of temperature	23·4		
The greatest range of temperature in one day	26·5	29th.	
	Per cent.		
The mean humidity of the month	71		
The average humidity of December from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·400		
The average vapour tension of December from 9 years' registers	0·476		
The mean cloud proportion of the month	0·54		
The average cloud proportion of December from 15 years' registers	1·57		
The total rainfall of the month	Nil.		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	Nil.		
The average fall of December from 48 years' registers ...	0·23		
The greatest fall in 24 hours	Nil.		
	Days.		
The number of rainy days in the month	Nil.		
The average number of rainy days in December from 24 years' registers	1		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	128·7		
The mean difference of sun and air temperatures	52·8		
The greatest sun temperature	132·5	22nd.	
The greatest excess of sun over air temperature	57·3	22nd.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	43·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	9·1		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	11·2	12th.	
	Miles.		
The mean movement of the wind per day	43·8		
The greatest movement of the wind in one day	76·0	1st.	
The greatest movement of the wind in one hour	10·0	7th, 1 to 2 P.M.	

The number of hours with winds from each of the 8 points—

N. 284, N.E. 19, E. 2, S.E. 1, S. 0, S.W. 5, W. 76, N.W. 162, Calm 195.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

* Mean of 4 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one of

for the week ending Saturday, the 7th of January 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 10*th January* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY THE 7TH OF JANUARY 1893.

At the close of the previous week a very considerable barometric depression had crossed the Indus Valley and had moved eastward over Rajputana, where it existed on the 30th instant. The depression had continued to travel eastward very rapidly, and on the morning of the 31st, or the last day of the previous week, it had reached the neighbourhood of Bahraich in the North-West Provinces, but in its advance it had filled up so rapidly that on the 31st it was of comparatively little importance. In front of this depression, however, the usual very rapid increase of temperature and humidity took place, and thus at the close of the previous week temperature and humidity were unusually high in Bengal. On the 1st of January the feebly unsettled conditions left after the depression had filled up continued to give high temperature and rather high humidity with lightly to moderately clouded skies to Bengal, but the only rainfall reported was 0·02 inch at Gnatong, and pressure also continued to fall very slowly over the province on this day. On the 2nd, pressure began to rise moderately over the greater part of the province, the effects of the depression to a great extent disappeared, and temperature and humidity generally fell. The sky began to clear, and again the only rainfall reported was a slight amount at Gnatong. On the 3rd pressure had risen in and near the hills, but it was steady elsewhere, and a further decrease of temperature, humidity and cloud proportions took place, while the whole province on this day was rainless. On the 4th pressure increased at the majority of stations, and became in excess of the normal by about 0·04″ to 0·07″. Temperature, however, began to rise rapidly at the Bihar stations on this day. This was again in connection with the advance of a considerable barometric depression which had appeared over Rajputana on the 3rd, and which advanced in an easterly direction, so that on the 4th it was near Saugor, but it had also rapidly filled up and had almost disappeared. Nevertheless, it gave rather heavily clouded skies at some of the western stations, and two or three light showers were reported in South Bihar. On the 5th the depression had practically ceased to exist, though pressure was falling moderately to rather rapidly over the whole of the province. A further rather rapid increase of temperature had also occurred, while humidity had become exceedingly high, and both were in large excess of the normal. The sky also clouded over rather heavily over a large part of the province, and rainfall was again reported in parts of Bihar. A further rapid fall of pressure, amounting at many stations to nearly a tenth of an inch, took place on the 6th instant, and pressure became rather largely below the normal, while, on the other hand, temperature continued high, the excess equalling from 2° to 4°. Rainfall on this day was, however, absent. On the 7th the pressure changes were generally small but exceedingly irregular, and the distribution of pressure became decidedly abnormal, as the highest pressures were recorded in North-East Bengal, comparatively low readings being reported in the west of the province. Accompanying these disturbed conditions, the mean temperature had become about 4° in excess of the normal, humidity was very high, the sky had clouded over rapidly, and fairly general rain was reported in Bihar and North Bengal, while showers also occurred in parts of South-West Bengal and Chota Nagpur.

Pressure.—The variations of pressure from the normal have been very large during the week, but the mean pressure has averaged about 0·01″ to 0·02″ in excess of the normal. In a few cases, however, slight defects have been registered, and this is the case at Gaya, Dehri, Jalpaiguri, and Rangpur.

Temperature.—The mean temperature of the province for the week has been 2·1° in excess of the normal. This excess has, however, been largest in Bihar and Chota Nagpur, where it has averaged about 3°.

The distribution of temperature for the week in the province generally and its variations from the normal value are clearly seen in the table below, where the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are compared with their normal values for the period. In this week the excess has been generally most largely developed in the night or minimum temperatures, which at such stations as Gaya and Patna have been from 4° to 6° above the normal:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 7th January 1893.

	Normal mean maximum temperature for the week ending 7th January.	Actual mean maximum temperature for the week ending 7th January 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 7th January.	Actual mean minimum temperature for the week ending 7th January 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 7th January.	Actual mean daily temperature for the week ending 7th January.	Variation of actual mean from the normal.

Rainfall.—The average fall in the Darbhanga district has equalled 0·51 inch; the falls in Bhagalpur, Mazaffarpur, Saran, and Shahabad have been about a third of an inch; those in Rangpur, Dinajpur, Purnea, and Patna from a sixth to a quarter of an inch; and those in Rajshahi, Champaran, and Southal Parganas about a tenth of an inch. In other cases the falls have been less than a tenth of an inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 7th of January 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.

The average fall of the corresponding period for 24 years, S.-G.'s Office ..	0·04

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

* Includes 523 tons and 552 tons of coal during 1892 and 1891 respectively carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock 51 tons and 79 tons for the years 1892 and 1891, respectively, for which no "Up" and "Down register maintained.

Statement of principal commodities carried on the Bengal Central Railway during the month of September 1892.

DECREASES.

Betel-nuts ... ... 417 tons.

The decrease was principally in despatches from Khulna and the Flotilla stations, other modes of carriage being availed of.
The increases and decreases in all other commodities are due to ordinary fluctuations of traffic and call for no special remarks.

JAMES SHAW,
Joint Auditor and Examiner of Accounts.

CALCUTTA, *the* 22*nd December* 1892.

Weekly Return of Traffic Receipts on Indian Railways.

Road Cess.

Dated Calcutta, the 12th January 1893.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 771L.F., dated 31st December 1892, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th September 1892.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the second quarter of the year 1892-93 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette.*

Ordered also that a copy of this Resolution and of the abstract referred to be forwarded to the Commissioners of the Rajshahi, Bhagalpur, Chittagong, and Chota Nagpur Divisions; to the Superintending Engineers of the Northern and Western Circles; to the Inspector of Works, Eastern Circle; and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Secretary to the Government of Bengal.

O. T. BARROW,

Accountant-General, Bengal.

MALPRACTICES IN CONNECTION WITH EXAMINATIONS.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 17th January 1893.

RESOLUTION No. 149.

As it has come to the notice of Government that forged certificates have sometimes been used for the purpose of gaining admission to an examination, or of being admitted as a student at a Government place of education, the Lieutenant-Governor deems it expedient, for the purpose of preventing this and other serious malpractices, to lay down the following rule, which will come into force from the date of its publication:—

Persons detected in the use of forged certificates or in other serious malpractices at examinations held under the authority of Government or of a Municipal or local body, or in order to obtain admission to an Educational Institution, or to gain any improper advantage in the examination, will be considered disqualified for entering the service of Government or of any Municipal or local body.

ORDER.—Ordered that the Resolution be pulished in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

LIBERALITY OF CERTAIN ZAMINDARS IN THE GIRIDIH SUB-DIVISION.

No. 194Med., dated Calcutta, the 16th January 1893.

From—H. H. RISLEY, ESQ., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 147T.J., dated the 5th January 1893, in which you report the liberality of Babu Sarada Narain Singh of Serampur, Babu Toral Narain Singh of Gawan, and Babu Poresh Nath Singh of Palganj, in contributing Rs. 2,000, Rs. 1,500, and Rs. 500, respectively, towards the cost of establishing the dispensary at Giridih, which was opened by His Honour the Lieutenant-Governor on the occasion of his visit to that place on the 2nd November 1892. You also report that Babu Sarada Narain Singh has liberally undertaken to bear the cost of maintenance of the dispensary until such time as some public body may come forward to take over the charge of its maintenance.

2. In reply, I am directed to say that the Lieutenant-Governor has much pleasure in acknowledging the liberality of the donors, especially of Babu Sarada Narain Singh, and to request that an expression of His Honour's thanks may be conveyed to them for their generosity and public spirit. Sir Charles Elliott is also pleased to note your commendations of Mr. W. Rattray, the Sub-divisional Officer by whose exertions the institution was founded.

3. This letter will be published in the *Calcutta Gazette*.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 14th January, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Jan. 14, '93 Kalna ... Katwa ... Raniganj ...	Nil Nil Nil Nil	Weather—cool and clear. State and prospects of crops good, except in the Sadar subdivision. Prices of common rice:— Srs. Burdwan ... ... 10 to 13 } Kalna ... ... 11 to 13 } per rupee. Katwa ... ... 13½ } Raniganj ... ... 13 }
	2	Bankura „ 14, '93 Vishnupur ...	0·02 Nil	Weather—seasonable. Threshing of *aman* paddy going on. *Rabi* crops doing well. Fodder and water sufficient. Prices of common rice:— Srs. Sadar ... ... 12½ } per rupee. Vishnupur ... ... 11½ }
	3	Birbhum „ 14, '93 Rampur Hát ...	0·04 0·03	Weather—seasonable. Prices of rice still 12 to 14 seers per rupee. Fodder and water plentiful.
	4	Midnapore „ 14, '93	Nil	Weather—cool and dry. Rice harvest finished some time ago. Prices of common rice:— Srs. Sadar ... ... 11 } Contai ... ... 10 to 14 } per rupee. Tamluk ... ... 13 } Garhbeta ... ... 12 to 13 }
	5	Hooghly „ 14, '93 Serampore ... Jahanabad ...	Nil Nil Nil	Weather—very cold. *Aman* harvest in progress; outturn in Sadar and north of the Tarakeswar Railway in Serampore not much over 3 annas; south of the Tarakeswar Railway it is about 12 annas. *Rabi* doing pretty well, but in the Sadar subdivision, although extensively planted, it is, except the *biri kalai*, a light crop. Difficulty of obtaining drinking water increasing in Pandua and Dwarbasini. Prices of common rice:— Srs. Sadar ... ... 9 to 10 } Serampore ... ... 10½ } per rupee. Jahanabad ... ... 11 }
	6	Howrah „ 14, '93 Ulubaria ...	Nil Nil	Weather—seasonable. Harvesting of *aman* crop nearly completed. Spring crops doing well. Condition of cattle good. Fodder and water-supply sufficient, except that tanks are drying up too quickly in Howrah Municipality. Price of rice 10 to 11 seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 14, '93	Nil	Weather—seasonable. Foggy mornings; somewhat warmer. Harvesting of *aman* completed in nearly all parts of the district. The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

△, dew ; ≡ , fog.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10 rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one on

for the week ending Saturday, the 14th of January 1893.

					DISTRICT OBSERVATIONS.										
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1892.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.	District.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 14th of January 1893.

Meteorological Division.	District.	Station.	Rainfall. Sunday, 8th.	Monday, 9th.	Tuesday, 10th.	Wednesday, 11th.	Thursday, 12th.	Friday, 13th.	Saturday, 14th.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th October 1892.	Average rainfall from 16th October to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0'1 inch of rain has fallen.

CALCUTTA, *the* 17*th January* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 14TH OF JANUARY 1893.

At the close of the previous week the weather conditions in Bengal had become slightly disturbed, and on the 7th the distribution of barometric pressure over Bengal was distinctly abnormal, the sky had clouded over rather rapidly in the north and west of the province, and fairly general rain was reported in Bihar and North Bengal, while showers had also occurred in parts of South-West Bengal and Chota Nagur. On the 8th, or the first day of the present week, pressure rose at almost all stations, the increase being rapid in the western districts and small in East and North Bengal, and though pressure was still below the normal, the distribution was much less irregular than it had been on the previous day. Skies also began to clear, and the only general rainfall reported was in and near the hills of North Bengal, while also a few isolated showers of little or no importance fell in other districts. Temperature over the greater part of the province, however, except at the north-eastern stations, continued rather largely in excess of the normal. Winds also generally on this day had become of the normal north-westerly character. On the 9th the barometric changes were small, and pressure had become in slight excess in South Bengal, while it was in moderate excess over the north and centre of the province. A wave of low temperature following after the disappearance of the low pressure area, however, commenced to make itself felt on the 9th in the west of the province, where at some stations the mean temperature became from 3° to 5° below the normal, though over the remainder of the province the defects were small. On the 10th the pressure changes were unimportant, but the wave of low temperature had spread over the whole province, and the general temperature became about 4° to 6° below the normal of the day. The general changes on the 11th were rather unimportant, but on the 12th a rapid fall of pressure occurred which ranged from a twentieth to nearly a tenth of an inch, and pressure became in defect of the normal by nearly 0 01″ over a large part of the province. With the falling pressure temperature commenced to rise, and the defect from the normal on the 12th only equalled from 2° to 4°. On the 13th a further fall of pressure and slow increase in temperature occurred, and on this day pressure was about 0·013″ below the normal, and temperature was still 2° to 3° in defect. On the 14th, or the last day of the week, a further slight decrease of pressure had occurred, and temperature had again risen and was only 1° to 2° in defect of the normal.

It will therefore be seen that the strongly pronounced cold weather conditions, which established themselves after the disappearance of the barometric depression and the consequent disturbed weather which had existed at the close of the previous week, have been slowly but steadily changing. Temperature rose steadily during the second half of the week, and pressure fell moderately to rapidly, and with the unusually low pressure which existed at the close of the week, conditions were again becoming abnormal and pointed to the probable commencement of slightly disturbed weather, while the unusually low temperature had also to a great extent disappeared, and conditions were favourable for increasing temperature.

Pressure.—The mean pressure for the week has been in very considerable defect of the normal. This defect has generally equalled from 0·05″ to 0·07″, and has been tolerably equally distributed except at some of the northern stations such as Rangpur, Jalpaiguri, and Darjeeling, where defects exceeding 0·08″ have been recorded.

Temperature.—The general features of the temperature changes have been already described, and the mean temperature of the province for the week has been in defect of the normal by 2·2°. This defect has been spread very evenly over the province, and in all divisions the defect has slightly exceeded 2° except in East Bengal, where it has only equalled 1·4°.

The distribution of temperature for the week in the province generally and its variation from the normal value are clearly seen in the table below, where the average maximum, minimum and mean temperatures at nine typical stations in different districts of the province are compared with their normal values for the period. Both day and night temperatures, it will be seen, have been very decidedly in defect of the normal:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 14th January 1893.

	Normal mean maximum temperature for the week ending 14th January.	Actual mean maximum temperature for the week ending 14th January 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 14th January.	Actual mean minimum temperature for the week ending 14th January 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 14th January.	Actual mean daily temperature for the week ending 14th January 1893.	Variation of actual mean from the normal.

Rainfall.—The amounts of rain which have fallen during the week have been exceedingly small, and in no division does the fall average as much as a tenth of an inch. The largest fall indeed has only averaged 0·08 inch in North Bengal, and the falls in Chota Nagpur, Orissa, and South-West Bengal have only equalled one or two-hundredths of an inch. In the case of the smaller districts a few have received as much as a tenth of an inch and upwards, and this has been the case in Bankura, Dinajpur, Rangpur, Kuch Bihar, and Darjeeling.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 14th of January 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

* Includes 5,646 tons and 7,164 tons of coal during 1892 and 1891, respectively, carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock, 7,239 tons and 7,389 tons for the years 1892 and 1891, respectively, for which no "Up" and "Down" register maintained.

Comparative Statement of principal commodities carried on the Eastern Bengal State Railway during the month of October 1892.

INCREASES.

	Tons.
Rice	2,072
The traffic in 1891 was abnormally low.	
Jute, screwed	5,968
Forbesganj, Saidpur, Nilphamari, Haldibari, Kaoraid, Postgollah and Shamnagar show increases under this head.	
Jute, unscrewed	7,644
The principal increase is in despatches from Pangsa, Kushtia, Atrai, Rauinagore, Darwani, and Domar, due to good crop and favourable market.	
Kerosine oil	3,154
Due to the prohibition of carriage by boat within certain limits of the port of Calcutta.	

DECREASES.

	Tons.
Coal	1,492
Ordinary fluctuation.	
Salt	1,756
The decrease was in upward despatche from Chitpur, said to be due to less demand at up-country stations and to Calcutta prices having been high.	

JAMES SHAW,
Examiner of Accounts.

CALCUTTA, *the* 22*nd December* 1892.

Weekly Return of Traffic Receipts on Indian Railways.

EAST INDIAN RAILWAY.

Approximate Return of Traffic for week ended 7th January 1893, on 1,610½ miles open.

	Coaching Traffic. Number of passengers.	Coaching Traffic. Receipts.	Merchandise and Mineral Traffic. Weight carried.	Merchandise and Mineral Traffic. Receipts.	Other earnings (estimated). * Mean of 6 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being represented by 100. A clear sky is denoted by 0 and an overcast sky by 10
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one on

for the week ending Saturday, the 21st of January 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1892. Mean for district.	Normal mean.	Variation.	District.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 21st of January 1893.

Meteorological Division.	District.	Station.	Rainfall. Sunday, 15th.	Monday, 16th.	Tuesday, 17th.	Wednesday, 18th.	Thursday, 19th.	Friday, 20th.	Saturday, 21st.	Total number of rainy days.	Rainfall of week.	Average rainfall of week.	Total rainfall since 1st of month.	Average total rainfall from 1st of month.	Total rainfall since 16th October 1892.	Average rainfall from 16th October to date.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 24*th January* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 21ST OF JANUARY 1893.

AT the close of the previous week pressure had fallen continuously and by rather considerable amounts, and had become in defect of the normal by almost a seventh of an inch. So low had the pressure become, therefore, that what almost amounted to a feeble barometric depression existed over Bengal, and with this low pressure unusually high temperature and high humidity with rather clouded skies obtained. On the 15th, or the first day of the present week, a further rather rapid fall of pressure took place over the west of the province, and a moderate fall elsewhere, and the defect increased to nearly a fifth of an inch in the west of Bihár, while over Northern India generally no less than three feeble low pressure areas existed. A fall of temperature had also occurred in Bengal, and it had become below the normal. Pressure again fell by small amounts on the 16th, and it became very uniform over the whole province, while winds became very irregular, and at the eastern stations there was a distinct tendency for moist southerly winds to set in. A wave of comparatively high temperature also began to advance on the 16th over the western half of the province, where a moderate excess was shown, though defects were registered elsewhere. On the 17th, a slight increase of pressure began in Bengal, but a distinct low pressure area still existed over parts of South-West and Central Bengal, while a large low pressure area also was shown over the Central and North-West Provinces; southerly winds were also reported in Orissa, South Bengal, and part of East Bengal, and these brought up considerable amounts of moisture. Temperature also rose rapidly over the remainder of the province and became largely above the normal, the excess equalling about 5° at many stations, so that on this day conditions generally were very abnormal. With these disturbed conditions rather numerous but light rain showers were reported on the 17th from North and South Bihar and parts of Chota Nagpur. On the 18th, pressure had again commenced to fall at all stations, and a distinct low pressure area existed over South and South-East Bengal. Winds, however, were rather less strongly southerly than they were on the previous day and had become decidedly irregular. Rainfall on the 18th had extended and was reported from a considerable part of South-West Bengal, and East Bengal while it continued in parts of Bihar and Chota Nagpur, but the amounts were again small. On the 19th pressure commenced to rise rather rapidly, but it was still nearly a tenth of an inch below the normal, and winds slowly began to resume their north-westerly direction; the excessive temperature also commenced to decrease, and the excess on this day was only equal to about 1° to 3°. The rainfall reported on the 19th was confined to a few showers in South, West, North, and East Bengal. On the 20th a further rapid increase of pressure took place, in some cases exceeding a tenth of an inch, and the distribution of pressure became almost normal, though there was still a defect of about 0·01" or 0·02" over a considerable part of the province. Winds had, however, again become rather irregular in direction, and cloud proportion was rather high, but the rainfall was confined to a few showers in Orissa and Chota Nagpur. On the 21st, or the last day of the week, pressure again rose, the increase being largest at the central stations, and pressure became comparatively low in South Bengal, and particularly at Saugor Island and in the north-west angle of the Bay, while winds in South Bengal and Orissa began to shift round to north-easterly and easterly. Rather heavily clouded skies continued to be reported, but practically no rain fell except in Orissa, where at some stations it was rather heavy. A rather rapid fall of temperature had taken place at all except the southern stations, and it was below the normal by 2° to 4° in all districts, except South Bengal and Orissa. Conditions therefore were again disturbed and unsettled at the close of the week.

Practically, therefore, almost throughout the week conditions have been unusual and weather has been distinctly unsettled almost throughout this period. The disturbance has resulted in rainfall in all divisions, but except in Orissa and East Bengal, where moderate amounts of a quarter to half an inch are reported, the falls have been generally light and do not average more than about a tenth of an inch.

Pressure—Has been unusually low almost throughout the week, and the mean pressure for the week has been about a tenth of an inch in defect of the normal; the average defect equalling from 0·09" to 0·12", and the defect being generally largest in the west of the province.

Temperature.—The changes of temperature during the week have been unusually large, and the mean of the week for the whole province has been in excess of the normal by 0·7°. The excess has been largest in North Bihar and in East and South-West Bengal, and, on the other hand, slight defects have been registered in Chota Nagpur and North Bengal.

The distribution of temperature for the week in the province generally and its variation from the normal value are clearly seen in the table below, where the average maximum minimum and mean temperatures at nine typical stations in different districts of the province are compared with their normal values for the period :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 21st January 1893.

	Normal mean maximum temperature for the week ending 21st January.	Actual mean maximum temperature for the week ending 21st January 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 21st January.	Actual mean minimum temperature for the week ending 21st January 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 21st January.	Actual mean daily temperature for the week ending 21st January 1893.	Variation of actual mean rom the normal.

Darjeeling	44·4	39·5	—4·9	34·8	31·7	—3·1	39·7	35·6	—4·1

Rainfall.—The heaviest falls have occurred in Orissa, where an average amount of 0·40 inch has been received and where the falls have been largest in the Puri and Cuttack districts. East Bengal has received an average fall of 0·25 inch, and in this division the districts of Chittagong Hill Tracts and Backergunge have received the largest amounts. In Chota Nagpur the falls have averaged 0·15 inch, the Singhbhum district having received the heaviest falls; but in all other divisions the falls have been about a tenth of an inch and less, and the only districts where moderate falls have been received have been Bankura, Pabna, Darjeeling, and Gaya. Compared with the normal, the falls in Orissa and East Bengal have been in distinct excess, but elsewhere they have been in defect.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 21st of January 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	0·17

* The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

[dew symbol], dew; ≡, fog; o, overcast; d, drizzling rain.

C. LITTLE,

For Meteorological Reporter to the Govt. of Bengal.

H. H. RISLEY,
Secretary to the Government of Bengal.

CALCUTTA;
FINANCIAL DEPT.—*Finance,*
The 31*st January* 1893.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 28th January, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
Burdwan Divn.	1	Burdwan Jan. 28, '93 Kalna ... Katwa ... Raniganj ...	0·73 0·38 0·33 0·43	Weather—cool and clear. Prospects of *rabi* crops fair, except in parts of Sadar subdivision. Condition of cattle good. Prices of common rice:— Srs. Burdwan ... ... 11 to 14 per rupee. Kalna ... ... 10 to 13 per rupee. Katwa ... ... 13¼ per rupee. Raniganj ... ... 13 per rupee.
	2	Bankura „ 28, '93 Vishnupur ...	0·51 0 93	Weather—some days cloudy and others fine; cold throughout the week. *Rabi* crops thriving. Supply of fodder and water plentiful. No cattle-disease reported. Prices of common rice:— Srs. Sadar ... ... 12½ per rupee. Vishnupur ... ... 11½ per rupee.
	3	Birbhum „ 28, '93 Rampur Hát ...	0·72 0·55	Prospects of spring crops everywhere reported to be good. Common rice sells at 13 to 14 seers per rupee.
	4	Midnapore „ 28, '93	0·36	Weather—cold. The rain will benefit the *rabi* crops. Harvesting of paddy crop is over, and that of *rabi* has begun. Prices of common rice:— Srs. Sadar ... ... 11½ per rupee. Contai ... ... 12 to 15 per rupee. Tamluk ... ... 12 to 14 per rupee. Garhbeta ... ... 12 to 13 per rupee.
	5	Hooghly „ 28, '93 Serampore ... Jahanabad ...	0·52 0·16 0·2	Weather—clear and exceedingly cold after the rain. *Rabi* crops doing well. Potato crop in Sadar said to be rather short. The difficulties about water continues in Dwarbasini. Rather a sharp outbreak of cattle-disease in the Sadar subdivision spreading over three thanas. Prices of common rice:— Srs. Sadar ... ... 9 to 10 per rupee. Serampore ... ... 10 per rupee. Jahanabad ... ... 11 to 13 per rupee.
	6	Howrah „ 28, '93 Ulubaria ...	0·29 0·30	Weather—cold. About $\frac{1}{16}$th of *aman* crop left to be harvested. Spring crops doing well. Condition of cattle good. Fodder and water-supply sufficient except that tanks in Howrah Municipality are drying up too quickly. Price of rice 11 to 11½ seers per rupee.
Presidency Divn.	7	24-Parganas „ 28, '93	0·70	Weather—seasonable. Pressing of sugarcane continues. Prospects of *rabi* crops continue fair. No cattle-disease reported. Fodder and water sufficient. Prices of common rice:— Srs. Srs. c. Sadar ... ... 9 to 14 8 per rupee. Barasat ... ... 11 0 per rupee. Basirhat ... ... 12 13 per rupee. Diamond Harbour ... ... 13 0 per rupee. Barrackpore ... ... 12 0 per rupee. Dum-Dum ... ... 11 8 per rupee.
	8	Nadia „ 28, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	0·30 0·45 0 30 Nil 0·29	Weather—cloudy with light showers early in the week; bright and very cold since. Prospects of *rabi* crops good. Common rice selling at 12 seers 12 chitaks to 13 seers 5 chitaks per rupee. Health of cattle good. Fodder and water-supply sufficient.
	9	Khulna „ 28, '93 Bagerhat ... Satkhira ...	0·14 Nil 0·30	Weather—seasonable. Sowing of *boro* paddy going on. Harvesting of *aman* not yet over; outturn expected to be good except in Paikgacha. Prospects of *rabi* fair. Common rice sells at 12 to 14 seers per rupee. Fodder and water sufficient.
	10	Jessore „ 28, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·26 0·18 0·22 0·17 0·29	Weather—very cold and occasionally cloudy. *Rabi* crops prospering. Mustard being reaped. Harvesting of *aman* nearly over; outturn good. Supply of fodder and water for cattle sufficient.
	11	Murshidabad „ 28, '93	0·51	Weather—seasonable; at times cloudy. State of *rabi* crops favourable. *Kalai* doing well. No cattle-disease reported. Fodder and water sufficient. Coarse rice selling at 14 seers per rupee.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Jan. 28, '93	0·02	Weather—seasonable. Prospects of crops good. Prices stationary. Condition of cattle good. Supply of fodder sufficient.
	13	Noakhali	" 28, '93	Nil	Weather—cold and cloudy at times. Condition of *rabi* crops favourable. Cattle-disease reported from Companiganj and Sundip. Fodder and water sufficient. Price of common rice stationary.
	14	Tippera	" 28, '93	0·29	Weather—very cold. There was rain on two days of the week, which has done immense good to the standing crops and also to cultivation. The *aman* paddy has been harvested, and there is now a tendency to the fall of price of eatable articles.
	15	Chittagong Hill Tracts.	" 27, '93	1·92	Weather—cloudy. Recent rain has rendered prospects of vegetables good. No cattle-disease reported. Prices of common rice:— Srs. Rangamati ... ... 12 } Bandarban ... ... 11 } per rupee. Manicksury ... ... 18 }
DACCA DIVN.	16	Dacca	" 28, '93	0·31	Weather—very cold and cloudy at times. *Rabi* crops thriving. Prospects good. *Boro* paddy being sown. Fodder available. No cattle-disease. Common rice selling at from 11 to 14 seers per rupee.
	17	Faridpur	" 28, '93	0·19	Weather—cool and occasionally cloudy. Prospects of standing crops fair. Mustard is being gathered. *Boro* paddy is still being sown. Cutting and pressing of sugarcane in progress. Common rice selling at 13 seers per rupee at Sadar, Goalundo, and Madaripur. Condition of cattle good. Fodder and water available.
	18	Backergunge Patuakhali Pirojpur	" 28, '93	Nil 0·09 0·13	Weather—seasonable. State of crops good. Harvesting of *aman* rice finished; outturn 14 annas. Common rice sells at about 12 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	" 28, '93	0·51	Weather continues very cold. Prospects of standing crops good. Outturn of *aman* 14 annas. Rice sells at 11 to 14 seers per rupee. Fodder and water available.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	" 28 '93 ...	0·16 0·35	Weather—very cool. The rain has done good to *rabi* crops. Standing crops doing well. Sugarcane still being pressed. Lands being ploughed for *bhadoi* and jute. Prices of rice:— Srs. Sadar ... ... 15 } Thakurgaon ... ... 12 to 14 } per rupee. Condition of cattle good except in some parts of Thakurgaon where cattle-disease is reported to have appeared. Supply of fodder and drinking water sufficient.
	21	Rajshahi Nator Naugaon	" 28, '93	0·23 0·22 0·25	Weather—very cold. State and prospects of standing crops good. The recent rain has been favourable to agricultural operations. No cattle-disease reported. Fodder and water generally sufficient. Price of common rice ranges from 12 to 16 seers per rupee.
	22	Rangpur Gaibanda Nilphamari Kurigaon Ulipur	" 28, '93	0·31 Nil 0·29 0·23 0·10	Weather—very cold. Mustard has been harvested. Wheat doing well. Lands being prepared for *bhadoi* crop. Common rice 14 seers per rupee.
	23	Bogra Sherpur Naukhila	" 28, '93	0·24 0·31 0·27	Weather—cold and cloudy at intervals. Lands being ploughed for jute, sugarcane, *kaon*, &c. Prospects of *rabi* crops good. Common rice selling at 15 seers per rupee. Fodder and water sufficient.
	24	Pabna	" 28, '93	0·47	Weather—very cool. The recent rain will improve the prospects of the *rabi* crops. Price of common rice at Pabna 13½ seers per rupee and at Sirajganj Rs. 3-6 to Rs. 4 per maund. Water-supply and fodder sufficient.
	25	Darjeeling Siliguri	" 28, '93 ...	0·55 0·68	Weather—very cold. Snow fell on 25th, 3 inches, which melted in two days except at and above Jellapahar. *In the hills:*—Wheat, barley, and *tori* progressing favourably. In some places harvesting of potatoes, *tori* and *phafur* going on. *In the terai:*—Harvesting of paddy finished. Potatoes, mustard and tobacco progressing favourably. Prospects good. Prices of coarse rice:— Srs. Hills ... ... 11 } Terai ... ... 13 } per rupee.
	26	Jalpaiguri	" 28, '93	0·46	Weather—very cold and cloudy at times. Harvesting of *haimanti* paddy nearly completed. Prospects of tobacco and potato good. No cattle-disease reported. Water-supply and fodder sufficient. Price of common rice stationary.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.	27	Monghyr Jan. 28, '93 Begusarai ... Jamui ...	0·24 0·55 0·31	Weather—cold and cloudy. The late rain has done good to the *rabi* crops on the ground. Indigo and poppy doing well. Plenty of fodder. No cattle-disease. Prices of common rice :— Srs. Sadar ... ... 13 to 16 } per rupee. Begusarai ... ... 16 } Jamui ... ... 15 }
	28	Bhagalpur „ 28, '93 Banka ... Madhipura ... Supaul ..	0·22 0·41 0·60 0·80	Weather—generally cloudy and cold. Reaping of winter rice nearly over. Indigo doing well. The rain, though slight, has done much good. Price of common rice a little over 15 seers per rupee.
	29	Purnea „ 28, '93 Kissenganj ... Araria ...	0·54 0·48 0·43	Weather—cloudy with slight showers at the beginning and middle of the week. The weather has been considerably colder since the rain. Strong winds. Harvesting of *aghani* finished in many places. The recent rain, though little, has done much good to the standing *rabi* crops. Cutting of *tori* (mustard) almost over; outturn good. Harvesting of tobacco continues. Ploughing of *bhadoi* lands in progress. No cattle-disease. Fodder and water plentiful. Prices of common rice stationary.
	30	Malda „ 28, '93 Shibganj ... Gajole ...	0·07 0·61 0·7	Weather—first part of the week cool and bright; latter part chilly and cloudy. Harvesting of winter rice finished. *Kalai* and mustard still being reaped. Rain has done good to the standing *rabi* crops. Common rice sells at from 14 to 17 seers per rupee. Fodder and water-supply sufficient.
	31	Sonthal Parganas „ 28, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	0·41 0·44 0·25 1·12 0·99 0·07	Weather—very cold. Harvesting of paddy almost finished. Standing *rabi* crops much benefited by the recent rain. Fodder and water-supply sufficient.
PATNA DIVISION.	32	Patna „ 28, '93 Bihar ... Dinapore ... Barh ...	0·56 0·11 0·50 0·30	Weather—severely cold and occasionally cloudy. Prospects of the *rabi* and poppy crops continue to be good. The rain is expected to do some good to the standing crops. Prices of common rice are :— Srs. Sadar ... ... 17 } per rupee. Bihar ... ... 17 } Dinapore ... ... 14 to 15 } Barh .. .. 13 }
	33	Gaya „ 28, 93 Nawada ... Aurangabad ... Jahanabad ...	0 26 0·33 0·38 0·09	Weather—very cold and cloudy. Harvesting of paddy over; threshing continues. Standing *rabi* crops doing well. The rainfall has done good to *rabi* and poppy. Common rice sells at 14 seers per rupee at Gaya. Prices stationary. Supply of fodder and water for cattle sufficient.
	34	Shahabad „ 28, '93 Buxar ... Sasseram ... Bhabhua ...	0·27 0·34 0·20 0·17	Weather—very cold and cloudy with west wind. Prospects of *rabi* crops favourable. Sugarcane pressing in progress. A hailstorm reported from the western part of the Sasaram subdivision, but no damage done. Poppy flowering. Prices stationary. Fodder and water sufficient.
	35	Darbhanga . 28 '93 Madhubani ... Samastipur ...	1·19 1 04 0·17	Weather—chilly with west winds towards the latter part of the week. Prospects of all crops improved by rain which will also facilitate indigo sowing. *Rahar* slightly damaged by high wind and rain. Cattle healthy. Common rice sells at 15 to 16 seers per rupee at Darbhanga.
	36	Muzaffarpur „ 28, '93 Sitamarhi ...	1·12 1·26	Weather—very cold; occasionally cloudy. *Rahar* and peas, &c., in blossom damaged to some extent by the late rain. Fodder and water for cattle sufficient.
	37	Saran „ 28, '93 Siwan ... Gopalganj ...	1·00 0·58 0·48	Weather—very chilly during the last three days. There was a fall of small hail-stones within a few miles of Chapra on the 25th which has not caused harm to crops. The rain has done good to all standing crops. Mustard is almost ripe. Sugarcane pressing is going on. Fodder and water abundant. Prices of common rice :— Srs. C. Chapra ... ... 14 8 } per rupee. Siwan ... ... 10 10 } Gopalganj ... . 14 8 }
	38	Champaran „ 28, '93	0·53	Weather—cloudy and cool with west wind. Hailstorms on the night of the 24th have done some injury to the *rabi*, poppy and other standing crops. Prices steady. Cattle are in good condition. Fodder and water sufficient.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 28, '93	Nil	Weather—cold. *Sarad* harvest completed; outturn generally good. Recent rain has been of much benefit to cold-weather crops though injurious to mango prospects. Prices of rice :— Srs. C. Srs. C. Sadar ... ... 10 8 to 18 12 } per rupee. Jajpur ... ... 17 0 to 21 0 } Kendrapara ... ... 14 0 to 21 0 } Banki ... ... 17 0 }
	40	Puri „ 26, '93 Khurda ... Banpur ...	Nil Nil Nil	Weather—seasonable but cloudy. Harvesting of *sarad* still going on. *Dalua* paddy growing well. Miscellaneous crops thriving. Rice sells at from 15 seers 12 chitaks to 17 seers 1 chitak per rupee.
	41	Balasore „ 28, '93	0·82	Weather—rainy. There are hardly any crops on the ground. Rice sells at 17 seers per rupee at Balasore and 18 seers at Bhadrak.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
CHOTA NAGPUR.			
South-West Frontier Agency.			
42	Hazaribagh Jan. 28, '93 Giridi ...	0·90 0·41	Weather—very cold and fine. *Rabi* progressing favourably. Sugarcane being cut. Common rice selling at from 12 to 16 seers per rupee.
43	Lohardaga „ 28, '93	0·51	Weather—cold. The rainfall has done much good to the *rabi* crops. Common rice selling at 14 seers per rupee. Fodder and water sufficient.
44	Palamau „ 27, '93	0·88	There has been good rain and the weather is cold. The rain has greatly benefited the *rabi*, and prospects are generally good. Slight damage has been caused in two outposts by hail. Rice selling at 11½ to 18 seers per rupee. A little cattle-disease in some parts.
45	Singhbhum „ 28, '93	0·23	Rain on the 25th. Weather clear and cold to-day (28th). *Rabi* crops and sugarcane being harvested with good outturn. Common rice selling at from 12 to 16 seers per rupee.
46	Manbhum „ 28, '93 Gobindpur ...	1·00 1·11	Weather—cloudy with a good shower of rain on Thursday (26th); now very cold. Harvesting of *rabi* crops going on. Rice selling at 10 to 14 seers per rupee. Fodder and water-supply sufficient.

* Mean of 6 days.

Explanation.— *Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, i.e. from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one on

for the week ending Saturday, the 28th of January 1893.

					DISTRICT OBSERVATIONS.										DISTRICT.
					Of week.				Rainfall.						
									Since 1st of month.			Since 16th October 1892.			
Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	Mean for district.	Normal mean.	Average number of rainy days.	Normal number of rainy days.	Mean for district.	Normal mean.	Variation.	Mean for district.	Normal mean.	Variation.

Explanation.— .. indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 31st *January* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 28TH OF JANUARY 1893.

At the close of the previous week weather was fairly fine and settled in all districts except Orissa, where a local disturbance existed. On the 22nd, or the first day of the week under review, pressure began to fall slowly in all districts, except Orissa and part of South-West Bengal. Disturbed conditions over Orissa, however, still existed, and moderate general rain was reported on this day in this division, and in the neghbouring districts of South-West Bengal. On the 23rd again a rapid fall of pressure occurred in Bengal, except at the eastern stations, but the weather in Orissa had cleared up and practically rainfall was wholly absent from the province. On the 24th a slight to rather rapid increase of pressure took place, the increase being largest in North-East Bengal, while in the west of Bihar and Chota Nagpur pressure was even falling. This was succeeded on the 25th by a very rapid fall, the fall in the west and north of the province exceeding a tenth of an inch. These changes were due to the fact that on the 23rd a severe barometric depression or storm had entered North-Western India and was on that day near Jacobabad. On the 24th it had advanced rather rapidly in an easterly direction and was over Rajputana, while a deep secondary depression had appeared near Rawalpindi. On the 25th these depressions had again advanced eastward. and the original depression was shown as a shallow storm over part of the North-West and Central Provinces and the west of Bengal, while the second depression had either advanced along the line of the hills, or perhaps may have merged itself into the primary depression. Hence very rough weather was reported in the hills to the north of Bengal, and at Darjeeling there was almost a gale of wind with snow, while over the greater part of Bengal the sky became almost overcast, and rain was reported on the 25th in Bihar and Chota Nagpur, and over parts of North Bengal. On the 26th a further rapid fall of pressure took place over Bengal, the fall over a large part of the province exceeding a tenth of an inch, and the barometric depression had passed over South Bengal and the north and north-west of the Bay, and at such stations as Calcutta, Saugor Island, and False Point there was a defect of almost a fifth of an inch. Hence general, and in many cases rather heavy, rain was reported on the 26th in South-West Bengal, North Bengal, and Chota Nagpur, over a large part of East Bengal and parts of Bihar, but Orissa was to a great extent rainless. On the 27th the barometric depression had again advanced rather rapidly in an easterly direction and was probably over Upper Burma, and pressure had risen quickly over Bengal, the increase ranging up to nearly 0·17" at Cuttack. With the disappearance of the depression the sky cleared rapidly, rainfall ceased except for a few showers in and near the hills, and weather became again fine and settled, while a steady dry westerly and north-westerly current flowed over the province. On the 28th a further rapid increase of pressure occurred, equalling about a sixth of an inch at the northern stations, and pressure became moderately in excess of the normal, while again a strong north-westerly wind current prevailed over the province.

The principal feature of the weather during the week has therefore been the passage of the barometric depression from North-Western India through the province, which gave general rain on the 25th or 26th instant. In front of this depression the usual large increase of temperature and humidity took place, and in the middle of the week temperature was rather high and above the normal, while the air was exceedingly moist. Immediately, however, the depression had passed away, it was followed by an exceedingly cool wave of air produced to a considerable extent probably by the heavy fall of snow which had occurred in the hills, and thus at the close of the week temperature was largely below the normal, the defect in the mean temperature on the 28th exceeding 10° at such stations as Calcutta, Jessore, Saugor Island, Dacca, Gaya, Hazaribagh, Ranchi, and Cuttack. Hence both the temperature and pressure changes were unusually large during the week.

Pressure.—The mean pressure for the week has been in defect of the normal in all districts, the defect ranging from about 0·02" in parts of North Bengal to about 0·06" to 0·07" in the west of the province, the general defect equalling about 0·04".

Temperature.—The mean temperature for the week has been from 3° to 4° below the normal, the defect being largest in Chota Nagpur, where it has equalled nearly five degrees.

The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal values for the same period. It will be seen that the largest variations have taken place in the day or maximum temperatures, which in some cases have been 8° and 9° below the normal :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 28th January 1893.

	Normal mean maximum temperature for the week ending 28th January.	Actual mean maximum temperature for the week ending 28th January 1893.	Variation of actual mean from the normal. Darjeeling	43·8	35·0	—8·8	33·4	28·1	—5·3	38·6	31·5	—7·1

Rainfall.—The falls in Orissa have averaged nearly an inch, those in Chota Nagpur and North Bihar about two-thirds of an inch, in South-West Bengal about half an inch, in South Bihar a third of an inch, while in East and North Bengal the falls have only been about a quarter of an inch. The fall over the whole province has hence been rather considerably in excess of the normal. In the case of the smaller districts average falls exceeding an inch have occurred in Puri, Cuttack, Darjeeling, and Manbhum, and falls of half to one inch in Balasore, 24-Parganas, Hooghly, Bankura, Birbhum, Murshidabad, Bhagalpur, Darbhanga, Muzaffarpur, Champaran, Saran, Sonthal Parganas, Lohardaga, and Palamau., On the other hand, practically no rain has fallen in Chittagong, Chittagong Hill Tracts, Noakhali, and Backergunge.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 28th of January 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.

The total fall from 1st to 28th January 1893	0·70
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	0·28

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary shows; ⌓, dew; ≡, fog.

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament, 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 4th February, 1893.

Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The HON'BLE J. T. WOODROFFE, *Offg. Advocate-General.*
The HON'BLE T. T. ALLEN.
The HON'BLE H. J. S. COTTON, C.S.I.
The HON'BLE H. H. RISLEY, C.I.E.
The HON'BLE J. LAMBERT, C.I.E.
The HON'BLE H. LEE.
The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.

The HON'BLE GONESH CHUNDER CHUNDER.
The HON'BLE P. PLAYFAIR.
The HON'BLE MAULVI SYED FAZL IMAM, KHAN BAHADUR.

LICENSED WAREHOUSE AND FIRE-BRIGADE BILL.

The HON'BLE MR. COTTON in presenting the Report of the Select Committee on the Bill for the regulation of Warehouses and the maintenance of a Fire-brigade said:—

"It will be within the recollection of hon'ble members that this Bill was introduced into Council by the late Sir Henry Harrison, who, as President of the Fire-brigade Committee appointed by the Government, and as Chairman of the Corporation and Commissioner of Police in Calcutta for many years, was peculiarly qualified to advise and guide the Council in its deliberations on this Bill. On his death the charge of this measure devolved on me under the Lieutenant-Governor's orders. I cannot mention the name of my dear and lamented friend without expressing my sense of the extreme loss which the Council has sustained by his death. In all departments of Government administration his loss is deeply felt, but nowhere more than in this Council, where his sound and mature judgment, his persuasive eloquence and distinguished ability in argument and debate were for many years the pride and admiration of his colleagues. I am sure that I echo the sentiments of every member of this Council in paying this tribute of respect to his memory.

"Hon'ble members will observe that the Report of the Select Committee on this Bill is not unanimous. The difference of opinion relates to a question of principle, and I feel it right in presenting the Report of the Committee to detain you for a few moments by explaining the character of the difference between the majority of the Committee and its dissentient members. The dissent is signed by the hon'ble member who represents the Chamber of Commerce in this Council and by the Advocate-General. The ground taken up is that the cost of the fire-brigade, which is maintained for the public good and public convenience, should be borne by the community at large, and not by any particular section of it. This principle so broadly stated has much to commend it. But when more closely pressed, I think the Council will agree with me in recognising that it is a principle which can only be accepted subject to very considerable limitations. It is a fact that in other large cities where a fire-brigade is maintained, it is invariably or nearly invariably the rule to impose the whole burden of taxation for supporting the fire-brigade on the general community. This is the case certainly in the metropolis of England, where the duty of maintaining a fire-brigade rests on the London County Council, who are empowered to impose taxation to support the fire-brigade. No limit is imposed on the rate which may be levied for this purpose. And so in India in large cities like Bombay, there is a three-fourth per cent. rate levied on the population of the city, and in Rangoon also there is a general rate levied on the rate-payers as a body, and this undoubtedly is the course which it would be most easy to adopt in Calcutta. The Select Committee would have saved itself an immense amount of trouble if it had accepted this principle unreservedly and ruled that the whole cost of the fire-brigade should be borne by the rate-payers, and that it should rest on the Municipality to levy a special rate, the proceeds of which would be sufficient to maintain the fire-brigade. This would have been the simplest form of legislation that we could have adopted. But to the majority of the Select Committee this course did not seem to be a fair one. It appeared to us that, in imposing a tax for the maintenance of a particular object, the fair and reasonable principle would be to apportion that tax on different members of the community in proportion to the advantages which it is estimated they will gain from that object. If this principle could have been followed in other cities, I have no doubt it would have been adopted, but it seems that in other cities the difficulty of doing so has been found insuperable. In London, for instance, fires occur more often in residential dwelling-houses and in lodging-houses than they do anywhere else, and the fire-brigade is more largely employed in extinguishing fires which break out in residential dwelling-houses than in extinguishing fires in large warehouses. The chief object of the brigade is to extinguish the numerous fires which break out every day in various parts of that large metropolis. Similarly, in Bombay and especially in Rangoon, residential dwelling-houses are constructed of inflammable materials, and the risk of fire in them is considerable. It has therefore been found impossible to make any fair apportion-

ment in those cities of the amount of rate which should be levied from ordinary citizens and from those engaged in trade or in commercial enterprizes which involve the construction of large warehouses. But in Calcutta the circumstances are very different. It was only twenty years ago since there were no fire-engines in this city. There were merely a few hand engines in use, and the whole establishment maintained did not cost more than Rs. 478 per mensem. About that time the jute business extended rapidly; and as jute is an exceedingly inflammable material, large fires were found to occur in jute warehouses where jute was stored, and the Chamber of Commerce and other public bodies addressed the Government, pointing out the risk run, the great losses sustained, and the necessity of maintaining an efficient fire-brigade to extinguish fires. After due deliberation a law was passed, which established a fire-brigade more or less on its present footing, and imposed the whole burden of maintaining the brigade on the jute industry. This law, subject to minor variations, has remained in force up to the present time, and it is still the case that the fire-brigade in Calcutta is entirely maintained by rates levied from jute warehouses. The Chamber of Commerce have for several years been representing that this is unfair. A Special Committee was appointed to enquire into the whole question, and the result is the preparation of this Bill, which is intended to meet the grievance from which the jute industry undoubtedly suffers.

"In the Report which I now have the honour to lay on the table, we have stated that we think that it is unfair to levy the whole rate on any one industry. At the same time I must distinctly affirm that the fire-brigade was established in Calcutta in order to meet the requirements of the jute trade, and that the great majority of important fires occur, and always have occurred, in jute warehouses. If it were not for these jute warehouses I do not hesitate to say that the maintenance of the fire-brigade on anything like its present scale would be unnecessary. I do not know whether I am justified in saying that this city would be in a position to go back to the state of things which existed twenty years ago, but certain it is that the brigade, in its present state of efficiency and completeness, would not be required. It is on account of the jute warehouses that the brigade is maintained in its present organisation. For these reasons the majority of the Committee considered that the jute industry should still continue to pay a large proportion of the funds required for the maintenance of the fire-brigade. We have added to jute various other commodities which may be described as of a highly inflammable character, and have laid down in the Bill that these commodities shall be kept in warehouses for which a special fee shall be levied and paid to the Municipality. The scale of these fees is indicated in the Bill, and we have imposed as a limit to the total amount to be levied from warehouses the condition that they shall not exceed one-half of the total sum required for maintaining the fire-brigade in any particular year. The most important items added to jute are hay, straw, wood and other things which, under the present municipal law, are liable to special taxation by the Municipality. We have repealed the provision of the Municipal Act, which enables a special tax to be levied on those goods for general purposes. They will now be liable to taxation for a special purpose, namely, the maintenance of the fire-brigade. The reason why they are included is that they are such inflammable materials as in our opinion justify their being placed in the same category as loose jute. The fees from these warehouses will form the bulk of the assets of the Fire-brigade Fund; but the aggregate of them will not be allowed to exceed half of the expenditure required for maintaining the fire-brigade. The remaining half of the assets will be supplied by rates imposed on the general community. We thought it fair that a special rate should be imposed on bustee owners. It is well known to all of you that the number of fires which occur in the clumps of huts in this city, known as bustees, are numerous and a source of great danger to the community. If they spread, no doubt the risk becomes very great indeed, and it is one of the duties of the fire-brigade to prevent these small fires which occur in these huts from spreading over a larger area. The existence of these bustees in a large city like Calcutta is a source of danger, and we consider it fair and reasonable that the owners of these bustees should pay a special rate, which we have limited in the Bill to eight annas per cent. of their assessable value, for the maintenance of the brigade. The

remaining sum which may be required for supporting the brigade, will be borne by a general tax imposed on the rate-payers of the town, excluding those who are already called upon to pay either on account of their warehouses or as owners of bustees. This general rate will be a very low cne. We have proposed that the maximum shall not exceed one-eighth per cent. on all lands and houses assessed under the Municipal Act. The fairness of this rate lies in this, that the general community are undoubtedly protected by the existence of a fire-brigade. The individual risk which any individual house-owner may run in this city may be infinitesimal. Residential house-owners in Calcutta do not insure their houses, either in the north of the town, where the permanent residents of Calcutta mostly dwell, or in the south, where European residents live, and I believe I am well within the truth in saying that the insurance of houses and furniture in this city is practically unknown. This in itself marks the radical difference between Calcutta and cities elsewhere. Everyone among you who has a house in London knows very well that he insures the value of the house and of the furniture and fixtures and other things in it. This is the invariable rule in London, and it is the invariable rule in Calcutta not to insure. This is the main reason why a general rate is not unfair in London, and why it would be harsh and oppressive in Calcutta. But the circumstances are amply sufficient to justify the Legislature in imposing a very low rate on the rate-payers at large to assist in meeting any deficit which the other means of taxation placed in the hands of the Municipality may fail to supply. The protection which ordinary householders derive from fires not being allowed to spread may be inappreciable in any particular case, but it is obvious that such a general risk exists, and that it is at all times within possibility that fires may break out in residential houses. In order to meet such risk and in recognition of the immunity which the fire-brigade affords to the general public, we have considered it fair that a low rate should be levied.

"These are the main reasons which have actuated the Select Committee in apportioning the taxation, from which the funds for the maintenance of the brigade shall be met, on different classes of the community. We have imposed on the owners of warehouses and places where inflammable goods are stored a heavier burden than we have laid on other persons, but we have largely reduced that burden from what it is under the existing law. It is estimated that the amount to be paid by jute warehouses under the Bill will perhaps be less than one-third of what they now pay, and this will be a very great gain to the jute industry which has, I certainly do think, been unjustly charged with the whole cost for so long a period. Next the owners of bustees will pay their share, and finally a small proportion, which is very small in comparison to the large number of persons interested, will be contributed by the general rate-payer.

"Now, Sir, in making this apportionment we have attempted an extremely difficult task—so difficult that I believe no other city under the British Empire has been able successfully to cope with it. We are making an initial attempt to be fair and just in the imposition of this special taxation for the maintenance of a special department. It is a very easy thing to impose a rate on the general community sufficient to bear the whole cost; it is very easy to single out a particular industry and make it bear the whole burden. But it is very difficult to apportion the cost among different sections of the community in proportion to the benefit which it is estimated they derive. It is this task we have attempted, and I trust that the assistance we shall receive from the members of this Council in considering the detailed clauses of this Bill will enable us to remedy and perfect any defects which may be detected in the measure as it now stands.

"I have prepared, for the information of the Council, two statements which have been circulated and laid before hon'ble members this morning. The first of them shows the estimate of receipts for the current year for the maintenance of the fire-brigade, the whole of which is paid by jute warehouses, and which has been sanctioned by Government under the existing law: the second statement shows the amounts which it is estimated will be borne by fees from warehouses and by special and general rates under the Bill as now framed. Both estimates are calculated to meet an expenditure of abont Rs. 60,000 a year for the maintenance of the brigade. The estimate assumes that the jute industry of Calcutta, which now contributes a grand total of Rs. 28,000 for the

maintenance of the fire-brigade, will henceforward pay Rs. 8,000 towards that object; that the sum of Rs. 8,000 will be levied from other warehouses in Calcutta; and that the total sum of Rs. 16,500 will be levied from Calcutta on account of warehouses as they are defined in the Bill. It is estimated that a sum of Rs. 25,000 will be levied from Calcutta by means of a special rate on bustees and a general rate. The total contribution from the town of Calcutta would amount then to Rs. 41,600 as against Rs. 28,000 now levied, the increase being entirely from bustee owners and warehouses other than jute warehouses and from the general rate-payers who, we consider, should pay some share of the cost. As regards other municipalities, the amounts they pay would be largely reduced. The sum paid by the Cossipore-Chitpore Municipality, which is entirely from jute at present, is Rs. 33,000, but it would be reduced to Rs. 10,500, that is to say Rs. 10,000 from jute warehouse and Rs. 500 from other warehouses; the Manicktollah Municipality, which pays Rs. 15,000 at present entirely from jute, would pay Rs. 6,000, of which Rs. 500 will be from other warehouses; and Howrah, which pays Rs. 6,250 from jute alone, would be reduced to Rs. 3,000, of which Rs. 200 will be from other warehouses. These estimates, which are put forward on my own authority and by way of illustration only, cannot of course bind the Government or Municipalities concerned, but they will assist hon'ble members in judging of the changed incidence of taxation which is likely to arise if the Bill, as now drafted, is passed.

"I do not wish to detain the Council in regard to any of the minor points contained in the present Bill. The most important is, I suppose, that which lays down that warehouses shall be open to the inspection of an officer appointed by the Commissioner of Police, provided that such officer shall be a member of the fire-brigade, and not a member of any police force. The effect of this provision is that the Inspector of Warehouses will, in future, not be a Municipal Officer, but will be an officer who will work under the orders of the Commissioner of Police. The executive control of the fire-brigade will be left, as it is now, entirely in the hands of the Commissioner of Police, and the funds will, as they are now, be collected by the Municipal Commissioners; only their powers for this purpose will be greatly enlarged and changed. The apportionment of the taxation among the several municipalities interested—Calcutta and the municipalities in its immediate vicinity—is not laid down in the Bill itself, but is left to the Government to decide.

"For the rest the changes are described in the Report of the Select Committee. The intricacies of the Bill are considerable, and I have no doubt that hon'ble members would wish for some time to consider it for themselves, and also to consult their constituents as to how they are affected by the changes proposed. Today, therefore, I intend to merely lay the Report of the Committee on the table. At the next meeting of the Council we shall proceed to consider the Report and to discuss the Bill in its several clauses. It will remain for the President to decide the date on which we shall meet again for this purpose."

The Council adjourned to Saturday, the 11th February, 1893.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 7th February, 1893.

By subsequent order of the President the Council was postponed to Saturday, the 18th February, 1893.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

CALCUTTA;
The 7th February, 1893.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 4th February, 1893.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIVN.			
1	Burdwan Feb. 4, '93 Kalna ... Katwa ... Raniganj ...	Nil Nil Nil Nil	Weather—fair and cool. Prospects of *rabi* crops and sugarcane fair, except in parts of Sadar subdivision. Condition of cattle good. Supply of fodder sufficient except in parts of Sadar subdivision. Prices of common rice :— Srs. Burdwan ... ... 11 to 13 } Kalna ... ... 11 to 13 } per rupee. Katwa ... ... 13½ } Raniganj ... ... 13 }
2	Bankura „ 4, '93	Nil	Weather—seasonable. Prospects of *rabi* continue fair. Supply of fodder and water plentiful. Prices of common rice :— Srs. Sadar ... ... 12 } per rupee. Vishnupur ... ... 12 }
3	Birbhum „ 4, '93 Rampur Hát ...	Nil Nil	Weather—cold. Prospects of *rabi* crops continue good. Common rice sells at from 13 to 15 seers per rupee.
4	Midnapore „ 4, '93	Nil	Weather—cool. In some parts of the district there has been rain. Harvesting is ended. Prices of common rice :— Srs. Sadar ... ... 11½ } Contai ... ... 13 to 16 } per rupee. Tamluk ... ... 12 to 14 } Garhbeta ... ... 12 to 13 }
5	Hooghly „ 4, '93 Jahanabad ...	Nil Nil	Weather—exceptionally cold for time of year. *Rabi* doing well. Potatoes and sugarcane being gathered. Cattle-disease increasing in severity. The prices of rice given below do not indicate any great fall on previous prices, but merely that the police have been at last induced to report the price of rice eaten by the poorest working labourers :— Srs. Sadar ... ... 10 to 11½ } Serampore ... ... 10 to 11½ } per rupee. Jahanabad ... ... 11 to 13 }
6	Howrah „ 4, '93 Ulubaria ...	Nil Nil	Weather—seasonable and cold. Harvesting of *aman* paddy nearly finished. Spring crops doing well. Condition of cattle good. Fodder and water-supply sufficient except that tanks in Howrah Municipality are drying up too quickly. Price of rice 11 to 11½ seers per rupee.
PRESIDENCY DIVN.			
7	24-Parganas „ 6, '93	Nil	Weather—cold and seasonable, but latterly cloudy. Harvesting of *aman* completed. Prospects of *rabi* crops good. Sugarcane still being pressed. No complaints of lack of fodder or water. No cattle-disease prevalent. Common rice sells at from 11 seers 14 chitaks to 14 seers 8 chitaks per rupee.
8	Nadia „ 4, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	Nil 0·05 Nil Nil Nil	Weather—bright and very cold. Prospects of *rabi* crops good. Price of rice stationary. Health of cattle good except in two or three villages of thanas Chapra and Krishnaganj where there is cow-pox. Fodder and water-supply sufficient.
9	Khulna „ 4, '93 Bagerhat ... Satkhira ...	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* continues. Sowing of *boro* commenced. Prospects of *rabi* good. Outturn of *aman* expected to be good except in Paikgachha. Common rice sells at from 11 to 16 seers per rupee. Fodder and water sufficient.
10	Jessore „ 4, '93 Jhenida ... Magura ... Narail ... Bangaon ...	Nil Nil Nil Nil Nil	Weather—very cold. Harvesting of *aman* in low beels still going on in the Magura and Narail subdivisions. State and prospects of *rabi* crops fair. Supply of fodder and water for cattle plentiful. Prices of rice stationary.
11	Murshidabad „ 4, '93	Nil	Wether—seasonable. *Rabi* crops doing well except wheat. Recent rain will prove beneficial to some species, but is also likely to injure some. Fodder for cattle sufficient. Coarse rice sells at 14 seers per rupee.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Feb. 4, '93	Nil	Weather—seasonable. Prospects of crops good. Cultivation of winter crops in progress. Prices stationary. Condition of cattle good. Supply of fodder sufficient.
	13	Noakhali	„ 4, '93	Nil	Weather—seasonable. Condition of *rabi* crops good. Cattle-disease reported from Sundip and Companyganj. Price of common rice stationary.
	14	Tippera	„ 4, '93	Nil	Weather—cold; seasonable. Standing crops doing well. *Boro* paddy being transplanted. Prospects good.
	15	Chittagong Hill Tracts.	„ 3, '93	Nil	Weather—cold and foggy in the mornings. Condition of chillies and tobacco tolerable. Sugarcane being pressed. Condition of cattle generally good. Prices of common rice:— Srs. Rangamati ... ... 10 } per rupee. Bandarban ... ... 10 } Manicksury ... ... 20 }
DACCA DIVN.	16	Dacca	„ 4, '93	Nil	Weather—very cold. Slight rain fell in Manickganj and Munshiganj. Prospects of *rabi* crops good. Harvesting of *mug* and *maskalai* continues. Ploughing for *aus* and *aman* paddy going on. Fodder available. No cattle-disease. Common rice selling at from 11 to 14 seers per rupee.
	17	Faridpur	„ 4, '93	Nil	Weather—unusually cold. Standing crops fair. Sugarcane being cut, with a good outturn. Common rice selling at 13 seers per rupee at Sadar, Goalundo, and Madaripur. Cattle in good condition and get fodder.
	18	Backergunge	„ 4, '93	Nil	Weather—cool. *Rabi* crops thriving. Prospects good. Fodder and water sufficient. Common rice selling at from 11 to 15 seers per rupee.
	19	Mymensingh	„ 4, '93	Nil	Weather—continues very cold. Prospects of standing *rabi* crops good. Rice sells at from 11½ to 14 seers per rupee. Supply of water and fodder sufficient.
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	„ 4, '93 ...	Nil Nil	Weather—very cool. Harvesting of winter rice over. Outturn of mustard expected to be 14 annas. Sugarcane still being pressed. Land being prepared for *bhadoi* and jute. Prices of rice unchanged. Condition of cattle good, except in parts of Thakurgaon, where cattle-disease, which broke out last week, has not yet completely disappeared. Supply of fodder and drinking water continues sufficient.
	21	Rajshahi Nator Naugaon	„ 4, '93	Nil Nil Nil	Weather—very cold and seasonable. *Aman* has given a capital outturn. Cold-weather crops also giving a good outturn. Supply of water and fodder plentiful save in the Barind, where tanks have nearly all run dry. No cattle-disease anywhere. Price of rice varies from 13 to 16½ seers per rupee.
	22	Rangpur Nilphamari Gaibanda Kurigaon Ulipur	„ 4, '93	Nil Nil Nil Nil Nil	Weather—very cold. Mustard being harvested. Lands being prepared for *bhadoi* and jute crops. Tobacco plants thriving well. Price of common rice varies from 11 to 14 seers per rupee.
	23	Bogra	„ 4, '93	Nil	Weather—cold and cloudy at intervals. Lands being ploughed for jute, sugarcane, *kaon*, &c. Prospects of *rabi* crops good. Common rice is selling at 14½ seers per rupee. Fodder and water sufficient.
	24	Pabna	„ 4, '93	Nil	Weather—very cool. Prospects of *rabi* crops continue good. Price of common rice at Pabna 12 seers per rupee and at Sirajganj Rs. 3-6 to Rs. 4 per maund. Condition of cattle good. Water-supply and fodder sufficient.
	25	Darjeeling Siliguri	„ 4, '93 ...	Nil 0·04	Weather—hoarfrost at night; very foggy and chilly by day. *In the hills:*—Wheat, barley and potatoes progressing favourably. *Tori* and *phafur* harvested. *In the terai:*—Harvesting of mustard and potatoes going on. Ploughing for *bhadoi* crop going on. Prices of coarse rice:— Srs. Hills ... ... 11 } per rupee. Terai ... ... 13 }
	26	Jalpaiguri	„ 4, '93	Nil	Weather—very cold. Harvesting of *haimanti* paddy completed. Prospects of standing crops good. Common rice sells at 14 seers per rupee. Supply of fodder and water sufficient. No cattle-disease reported.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
Bhagalpur Divn.			
27	Monghyr Feb. 4, '93 Begusarai ... Jamui ...	Nil Nil Nil	Weather—very cold. *Rabi*, indigo and poppy doing well. Condition of cattle good, except in a portion of Jamui subdivision where small-pox has appeared among cattle. Plenty of fodder. Water-supply sufficient. Prices of common rice :— Srs. Sadar ... ... 13 to 16 } per rupee. Begusarai ... ... 16 } Jamui ... ... 15 }
28	Bhagalpur " 4 '93 Banka ... Madhipura ... Supaul ...	Nil Nil Nil Nil	Weather—seasonable. Reaping of paddy completed. Linseed and mustard in good condition. Indigo getting on well. Price of common rice stationary.
29	Purnea " 4, '93 Kishanganj ... Araria ...	Nil Nil Nil	Weather—cold with strong west wind. Harvesting of *aghani* finished. *Rabi* doing well. *Tori* being gathered in. Tobacco doing well and being cut in Araria. Sugarcane being pressed in Kishanganj. Fodder and water plentiful. No cattle-disease. Prices of common rice :— Srs. Sadar ... ... 14 to 18 } per rupee. Kishanganj ... ... 15 } Araria ... . 18 }
30	Malda " 4, '93	Nil	Weather—very cold and dusty with westerly winds. Transplantation of *boro* paddy not yet finished. *Kalai* being threshed. Prospects of wheat and other standing *rabi* crops continue favourable. Price of coarse rice 13 to 17 seers per rupee. No want of fodder or drinking water.
31	Sonthal Parganas " 4, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	Nil Nil Nil Nil Nil Nil	Weather—cold and clear. Outturn of rice crop fairly good. *Rabi* prospects fair. Sugarcane being pressed. Prices stationary. Fodder and water-supply sufficient.
Patna Division.			
32	Patna " 4, '93	Nil	Weather—clear and very cool. Prospects of *rabi* and poppy continue fair. Opium extraction has commenced in some places. Prices of common rice :— Srs. Sadar ... . 17 } per rupee. Bihar ... ... 17 } Dinapore ... ... 14 to 15 } Barh .. .. 13 }
33	Gaya " 4, 93 Nawada .. Jahanabad ... Aurangabad ...	Nil Nil Nil Nil	Weather—clear and very cold with high west wind. Prospects of *rabi* crops good. Prospects of poppy reported favourable; lancing commenced on a small scale. Common cleaned rice sells at Gaya from 13 to 14½ seers and coarse and husked rice from 16 to 16½ seers per rupee. Supply of fodder and water for cattle sufficient.
34	Shahabad .. 4, '93 Buxar ... Sasaram ... Bhabhua ..	Nil Nil Nil 0·03	Weather—cold with strong westerly wind. *Rabi* crops and poppy doing well. Sugarcane pressing in progress. Harvesting of pea commenced in parts of Sasaram. Prices stationary. Fodder and water sufficient.
35	Darbhanga " 4, '93	0·02	Weather—very cold with west wind. Prospects of *rabi* and poppy continue very favourable. Mustard almost ripe. Fields being prepared for indigo sowing. Prices almost stationary. Fodder and water for cattle sufficient.
36	Muzaffarpur " 4, '93 Hajipur .. Sitamarhi ..	Nil Nil Nil	Weather—very cool and seasonable. *Rahar* and peas in blossom damaged to some extent by the late rain. Other crops doing well. Fodder and water abundant.
37	Saran " 4, '93 Siwan ..	Nil 0·06	Weather—very cold with strong west winds. *Rabi* and poppy crops doing well. Sugarcane pressing progressing. Paddy fields are being prepared. Fodder and water abundant. Prices of common rice :— Srs. c. Chapra ... ... 14 0 } per rupee. Siwan (old rice) ... ... 10 10 } Gopalganj ... . 14 8 }
38	Champaran " 4, '93	Nil	Weather—cool with high west wind. *Rabi* crops in blossom. Prospects of standing crops continue good except in the tracts where hailstones damaged the crops. Prices steady. Cattle in good condition. Fodder and water sufficient.
ORISSA.			
Orissa Divn.			
39	Cuttack " 4, '93	Nil	Weather—cool; cloudy at times. Harvesting of *rabi* crops going on. *Dalua* paddy being transplanted. Supply of fodder and water sufficient. Prices of common rice :— Srs. c. Srs. c. Sadar ... ... 10 8 to 15 12 } per rupee. Jajpur ... ... 14 0 to 21 0 } Kendrapara ... ... 17 1 to 21 0 } Banki ... ... 17 0 }
40	Puri " 2, '93 Khurda .. Banpur ...	Nil Nil Nil	Weather—seasonable. Harvesting of *sarad* almost over. Land being ploughed in some places for next *sarad* crop. *Dalua* paddy growing well. Miscellaneous crops thriving. Rice sells at from 15 seers 12 chitaks to 18 seers 6 chitaks per rupee.
41	Balasore " 4, '93	Nil	Weather—still very cold. Outturn of winter rice estimated at full 16 annas in Bhadrak and 13 annas in Sadar subdivision; sugarcane 15 annas; *birhi*, *mug* and mustard 14 annas.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
CHOTA NAGPUR.					
South-West Frontier Agency.					
CHOTA NAGPUR DIVN.	42	Hazaribagh	Feb. 4, '93	Nil	Weather—clear and cold. *Rabi* crops progressing; some being harvested. Common rice 12 to 16 seers per rupee.
	43	Lohardaga	„ 4, '93	Nil	Weather—seasonable. Prospects of *rabi* crops good. Common rice selling at 14 seers per rupee. Fodder and water sufficient.
	44	Palamau	„ 3, '93	N.	Weather—cold; seasonable. Some rain in some parts. Rice selling as high as 12 pucca seers per rupee at Daltonganj.
	45	Singhbhum	„ 4, '93	Nil	Weather—cold and fine. Condition of crops good. A good outturn expected from mustard, *rahar* and sugarcane. Common rice selling at from 12 to 16 seers per rupee. Cattle-pox in a small scale reported from Ghatsilla and Bahragura.
	46	Manbhum Gobindpur	„ 4, '93 ...	Nil Nil	Weather—cold. Harvesting of *rabi* crops going on. Rice selling at 10 to 14 seers per rupee. Fodder and water sufficient.

Published for general information.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01

rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station

district, i.e. from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one on

for the week ending Saturday, the 4th of February 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1892. Mean for district.	Since 16th October 1892. Normal mean.	Since 16th October 1892. Variation.	DISTRICT.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 7th February* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 4TH OF FEBRUARY 1893.

DURING second half of the previous week a low pressure area had passed over the province and had given moderate general rain on the 25th or 26th, and on the 28th of January, or the last day of that week, a rapid increase of pressure, in some cases amounting to 0·18″, had occurred, the rise being largest in the north of the province, and hence the effects of the low pressure area had to a great extent passed away. Indeed on the 28th, pressure had become in excess of the normal by small amounts over a large part of the province. The cold wave of air following in the rear of the depression had also flowed over the province, and on the 28th temperature at many stations was 10° below the normal. Two depressions, however, still existed in North-Western India on the 28th, and one of them had apparently travelled rapidly in an eastward direction, and on the 29th a feeble low pressure area existed over Chota Nagpur and the neighbouring parts of West Bengal. The appearance of this low pressure area was marked by a rapid fall of pressure, the fall exceeding a tenth of an inch at the western stations, and in front of this depression also the usual rapid increase of temperature had taken place, and temperature had risen at many stations by from 3° to 5°, though the day and night temperatures were still largely in defect of the normal, the defects in the maximum or day temperature still ranging up to more than 10° at such stations as Jessore, Cuttack, Burdwan, and Berhampore. The sky on the 29th clouded over slightly, but practically no rain fell. Winds were partly influenced by the depression and were rather irregular in direction. On the 30th the feeble depression had passed away, pressure was rising slowly, and temperature also increased rather rapidly. Winds remained a little irregular, and sky was moderately clouded, but except for one or two very light showers, there was no rain. On the 31st pressure again rose moderately to rapidly, and a cold wave of air following the previous shallow depression commenced to flow over the west of the province, and there was a fall of about 5° in Chota Nagpur and at some of the Bihar stations, while over the remainder of the province temperature was still rising. Winds also became more steady on this day, and they were westerly and north-westerly at the majority of stations. On February 1st weather in Bengal was again fine and settled, and the wave of low temperature had spread over the greater part of the province. There had also been an extremely rapid fall of humidity, equalling about 20 per cent., at some stations, and the air became particularly dry. On the 2nd temperature had again fallen rather rapidly, while humidity had somewhat increased, and on both the 1st and 2nd pressure had risen fairly steadily over the greater part of the province, though the changes were very small, and on the 2nd pressure was in excess of the normal by about 0·03″. A rather rapid fall of pressure again commenced on the 3rd, which continued more slowly on the 4th, and at the end of the week pressure was about 0·03″ to 0·05″ below the normal. On the last two days of the week, on the other hand, temperature was rising slowly, but nevertheless on the 4th, the mean temperature was still in defect of the normal by from 2° to 5°. Winds, however, remained very steady and were westerly and north-westerly at almost all stations.

Pressure.—The pressure changes for the week have been particularly large, but have been of opposite character at different parts of the week. Hence the mean pressure for the week has been very nearly normal, and except in the west of the province, where defects of about 0·01″ to 0·02″ are registered in some cases, the variations as a rule only amount to a few thousandths of an inch. Indeed about two-thirds of the stations register slight defects and one-third slight excess pressure.

Temperature.—Has been unusually low almost throughout the week, and the mean temperature for the province has been 3·3° below the normal. The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. It will be seen that both day and night temperatures have been largely in defect of the normal :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 4th February 1893.

	Normal mean maximum temperature for the week ending 4th February.	Actual mean maximum temperature for the week ending 4th February 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 4th February.	Actual mean minimum temperature for the week ending 4th February 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 4th February.	Actual mean daily temperature for the week ending 4th February 1893.	Variation of actual mean from the normal.

Rainfall.—Has been practically entirely absent from the province throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 4th of February 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week	Variation.	Average.	Normal average.	Average.	Normal average.

Meteorological Office, Bengal,
The 7th February 1893.

A. Pedler,
Meteorological Reporter to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of January 1893.

	Inches.	Date.	Hour.
The mean pressure of the month	29·978		
The average pressure of January from 24 years' registers	30·014		
The highest pressure in the month	30·166	4th	10
The lowest pressure in the month	29·822	26th	6
The range of pressure	0·344		
	Hours.		
The total number of hours of bright sunshine during the month	242 8		
The maximum possible number of hours of sunshine ...	337·3		
	⊖		
The mean temperature of the month	63·9		
The average temperature of January from 24 years' registers...	67·7		
The highest temperature in the month	79·9	16th, 17th & 18th.	
The lowest temperature in the month	45·9	28th.	
The range of temperature during the month	34·0		
The mean daily range of temperature	20·6		
The greatest range of temperature in one day	27·2	29th.	
	Per cent.		
The mean humidity of the month	72		
The average humidity of January from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·419		
The average vapour tension of January from 9 years' registers	0·467		
The mean cloud proportion of the month	1·75		
The average cloud proportion of January from 16 years' registers	1·37		
The total rainfall of the month	0·70		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·67		
The average fall of January from 48 years' registers ...	0·43		
The greatest fall in 24 hours	0·50	26th.	
	Days.		
The number of rainy days in the month	3		
The average number of rainy days in January from 24 years' registers	2		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	127·4		
The mean difference of sun and air temperatures	52·8		
The greatest sun temperature	133·6	21st.	
The greatest excess of sun over air temperature	58·4	21st.	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	46·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	7·8		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	11·3	11th.	
	Miles.		
The mean movement of the wind per day	50·7		
The greatest movement of the wind in one day	120·0	17th.	
The greatest movement of the wind in one hour	16·0	18th, 10 to 11 A.M.	

The number of hours with winds from each of the 8 points—

N. 198, N.E. 74, E. 35, S.E. 18, S. 27, S.W. 40, W. 58, N.W. 106, Calm 188.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·5° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ⌓, dew.

* Includes 677 tons and 309 tons of coal during 1892 and 1891 respectively carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock 98 tons and 494 tons for the years 1892 and 1891, respectively, for which no "Up" and "Down" register maintained.

Statement of principal commodities carried on the Bengal Central Railway during the month of November 1892.

INCREASES.

	Tons.
Coal	614
For Railway and Flotilla consumption.	
Cotton twist and yarn and cotton piece-goods	233
Ordinary fluctuation.	
Jute, unscrewed	2,222
Jhikergachee, Nawapara, and Khulna show the principal increases. The crop is a far larger one than in 1891.	
Sugar	193
Of this increase Jhikergachee contributed about one-half.	

CALCUTTA, *the 24th January 1893.*

CONTENTS.

CONDUCT OF MAULVI KABIRUDDIN AHMED AT THE EXTRAORDINARY MEETING OF THE CALCUTTA MADRASA DEBATING CLUB HELD ON THE 16TH OCTOBER 1892.

No. 621, dated Calcutta, the 11th February 1893.

From—C. E. BUCKLAND, Esq., Secy. to the Govt. of Bengal, Genl. & Rev. Depts.,
To—The Officiating Director of Public Instruction.

IN continuation of this office endorsement No. 3620, dated the 14th December 1892, I am directed to forward for your information a copy of a memorandum, No. 5072, dated the 10th February 1893, received from the Principal of the Calcutta Madrasa, submitting for favourable consideration a memorial addressed to His Honour the Lieutenant-Governor by Maulvi Kabiruddin Ahmed, late additional teacher in the Anglo-Persian School Department of the Madrasa, in which the latter expresses his most unqualified regret for his conduct on the occasion of the extraordinary meeting of the Madrasa Debating Club held on the 16th October 1892, and asks for pardon.

2. The Lieutenant-Governor observes that the memorialist fully admits the justice of the punishment dealt out to him and all others concerned in this case, and that he solemnly promises in future to be more careful not to offend against the duties of his position. His Honour is glad to see that Maulvi Kabiruddin

Ahmed has recognized the impropriety of his conduct, and he is willing to accept the explanation that the memorialist was led away by excitement on the occasion in question, though this cannot be regarded as a sufficient excuse. It has been ascertained that, apart from this incident, the Maulvi bore a good character, and that he appears to be really penitent for his behaviour. In consideration of these circumstances, and the recommendation of the Principal of the Madrasa, Sir Charles Elliott is pleased to reduce the period of suspension imposed upon Maulvi Kabiruddin Ahmed by the Resolution of this Government, No. 3619, dated the 14th December 1892, from one year to six months.

3. At the same time the Lieutenant-Governor desires it to be known that he will not tolerate any breach of discipline or good conduct on the part of the officers of the Education Department, or the pupils, and he is anxious that the warning conveyed by the action of Government in this case may be borne in mind, and prevent any similar occurrences. The papers will therefore be published *in extenso* in the *Calcutta Gazette.*

No. 5072, dated Calcutta Madrasa, the 10th February 1893.

Memo. by—Dr. A. F. R. Hœrnle, Principal, Calcutta Madrassa.

The enclosed petition of Maulvi Kabiruddin Ahmed is submitted to the Secretary to the Government of Bengal, in the General Department (in the absence of the Director of Public Instruction, on tour), for favourable consideration, with reference to the orders of the Government of Bengal, in the General Department, Education, No. 3619, dated the 14th December 1892.

To—His Honour the Lieutenant-Governor of Bengal, Calcutta.

May it please your Honour—

Your Honour's most obedient and humble servant begs most respectfully to submit that he has deeply felt the sentence of punishment passed upon him and has already undergone suspension for nearly two months.

That the excitement of the occasion had led your Honour's most humble servant to a course of conduct which he now on more mature consideration feels bound to admit was detrimental to good discipline and unjustified in him as a teacher of the Madrasa, and for which he now begs to submit his most unqualified regret.

That your Honour's most obedient servant fully admits the justice of the punishment dealt out to him and all others concerned, including the members of the Madrasa Debating Club, and that it will undoubtedly serve to provide for them a sound lesson for their future conduct and behaviour, and that your Honour's most obedient servant now faithfully and solemnly promises in future to be more careful not to offend against the duties of his position.

That mercy and forgiveness are the two divine attributes of the rulers of a country, and that, as your Honour's most obedient servant's conduct has been justly found blameable, he therefore most humbly hopes that the noble maxim, "To err is human, to forgive divine," be his only source of comfort and consolation.

Your Honour's most obedient servant now begs to tender this most humble apology in the hope that he will be pardoned by the most just and merciful ruler, and as he is in duty bound shall ever fervently pray.

Your Honour's most obedient and humble servant,

Kabiruddin Ahmed,
Teacher, Madrasa.

Calcutta, *8th February* 1893.

No. 3010, dated Calcutta, the 31st October 1892.

From—C. E. Buckland, Esq., Secy. to the Govt. of Bengal, General Dept.,
To—The Offg. Director of Public Instruction.

I am desired by the Lieutenant-Governor to invite your attention to the correspondence printed in column 4 of page 5 of the *Hindu Patriot* of Thursday, the 27th October, which purports to give an account of an extraordinary meeting of the Madrasa Debating Club, said to have been held on Sunday, the 23rd idem, at No. 7, Waliullah's Lane. If the report of the proceedings as published is correct, it would appear (1) that the use of the Madrasa Debating Club was improperly diverted into a religious and proselytising channel, and (2) that certain members of the Educational Service—viz., a teacher of the Calcutta Madrasa and an Assistant Inspector of Schools—behaved in an improper manner by being concerned with the proceedings reported. I am to request that you will institute an enquiry into the occurrence, and, after obtaining such explanations as you may deem necessary, submit a full report for the information and orders of Government.

No. 8746, dated Calcutta, the 18th November 1892.

From—C. H. TAWNEY, Esq., Offg. Director of Public Instruction, Bengal,
To—The Secretary to the Government of Bengal, General Department.

IN reply to your No. 3010, dated the 31st October 1892, I have the honour to submit copy of a letter No. 4954, dated the 12th November 1892, from Mr. F. Rowe, Officiating Principal of the Calcutta Madrasa, which gives a full report of what took place at the extraordinary meeting of the Madrasa Debating Club held on the 23rd October, so far as the facts can be ascertained. It appears to me that Mr. Rowe's conclusions are so entirely just as to need no comment from me. I myself questioned the Assistant Inspector of Muhammadan Education, Maulvi Abdul Karim, and he gave me substantially the same answer as he appears to have given to Mr. Rowe. If this account is correct, his conduct does not seem deserving of blame. But Maulvi Kabiruddin Ahmed appears to have been guilty of grave indiscretion.

2. The enclosure of your letter under reply is herewith returned.

No. 4954, dated Calcutta Madrasa, the 12th November 1892.

From—F. J. ROWE, Esq., M.A., Offg. Principal, Calcutta Madrasa,
To—The Offg. Director of Public Instruction, Bengal.

IN reply to your No. 8497, dated the 8th November 1892, and received on the 11th idem, asking me for a report on the proceedings of an extraordinary meeting of the Madrasa Debating Society held on the 23rd October, and the conduct of certain members of the Educational Department at that meeting, I have the honour to state as follows.

2. So far as I have been able to ascertain from careful inquiry among several of those who were present at the meeting, the account of the meeting given in the *Hindu Patriot* of October 27th, upon the strength of which this report is called for, is in some important particulars over-coloured and untrustworthy. The signature of the correspondent is, I believe, a false one. There is but one member of the club called "Abdullah," and he is a boy in the second-year class of the college, and could not, I believe, have composed the letter.

3. The facts regarding the preliminaries of the meeting seem to be briefly the following—

Mr. Lorimer, head-master of the school department, who during the holidays of the College Department was in temporary charge of the office of Principal, was on the 15th October asked by Maulvi Kabiruddin Ahmed, President of the Madrasa Debating Society, and Wahiduddin Ahmed, both teachers of the Anglo-Persian School Department of the Madrasa, if he would grant the use of the Madrasa hall for an extraordinary meeting of the Society, to be convened to meet a Mr. Webb, a recent convert to Muhammadanism. Mr. Lorimer wrote on the application: "*Very well; but please ask the head maulvi if there is any objection.*" The two applicants then referred to the head maulvi, who answered them: "*I have no authority; therefore I cannot say anything regarding any objection,*" thus declining all responsibility in the matter. Maulvis Kabiruddin Ahmed and Wahiduddin Ahmed appear to have considered this colourless reply of the head maulvi's as sufficient sanction for the use of the hall, and accordingly notices were issued that the meeting would be held there.

4. Mr. Lorimer subsequently learnt that a large number of Muhammadans, not members of the Debating Society, had been asked to attend the meeting, that Mr. Webb was going to give a lecture on the "Principles of Islam," and that several of the leading Muhammadans had refused to preside at the meeting. Mr. Lorimer then very properly, as it seems to me, told Maulvi Kabiruddin that he could not grant the use of the hall, giving as his grounds for refusal—

(1) that the meeting was not strictly one of the Debating Society;
(2) that the reference to the head maulvi had not been properly made;
(3) that the object of the meeting was more or less of a religious character, while questions of a religious or political complexion are expressly excluded from the subjects which the Society may constitutionally discuss.

Mr. Lorimer further expressed his willingness to grant the use of the hall for the meeting if the promoters could procure the written assurance of four or five of the leading members of the Muhammadan community that neither religion nor politics would form a part of the business of the meeting.

5. This assurance was not procured, but a notice was posted on the Madrasa notice board to the effect that as the Madrasa hall could not be conveniently had for the meeting, it would be held at a house in Waliullah's Lane.

6. The meeting was held at that place, and was attended by a large number of students and teachers of the Madrasa, and by others unconnected with the College. Mr. Webb, the convert, gave an address, taking as his subject "Why I became a Mussulman." As might have been expected, there was a good deal in his speech of a polemic character, quite justifying Mr. Lorimer's belief that the subject was not one suited to a meeting of a school debating club, and his consequent refusal of the hall as a meeting place.

7. On the conclusion of the address, Maulvi Kabiruddin Ahmed, as President of the Debating Society, proposed a vote of thanks to the speaker, and then proceeded to apologise to the audience for the inconvenience they had been put to owing to the change of place of the meeting. The accounts of what he actually said are conflicting. His own report to me states: "The exact wordings of my expression were: *I believe the head-master is mistaken in supposing that Mr. Webb being an American would very likely speak something against the Government, and for this and other reasons he withdrew his permission at the eleventh hour to use the*

Madrasa hall." Other accounts state that he further said that he understood that Mr. Lorimer acted under the instructions of some of the leaders of the Muhammadan community, and that these so-called leaders were doing nothing for the community, but only hankering after titles, medals, &c., and their conduct was shameful. Cries of "Shame! Shame!!" were raised during some parts of his speech, but it is difficult to decide whether these cries were meant to apply to Mr. Lorimer's refusal of the hall, or to the apathy attributed to the "so-called leaders," probably to both.

The vote of thanks to Mr. Webb was seconded by Maulvi Abdul Karim, Assistant Inspector of Muhammadan Education, who according to his own account, when he "*heard Kabiruddin speaking so harshly of the head-master and some of the leaders of the Muhammadan community,*" thought it his duty to contradict him, and did so, attributing Kabiruddin's "*severe remarks*" to the confusion of his mind under the difficulty in which he had been placed.

8. The above is, I believe, a fairly accurate account of what took place. I may be allowed to add my own impression of the conduct of those principally concerned. I think—

(1) that Mr. Lorimer was quite right in refusing the use of the hall for a meeting of the kind; and that he acted with commendable prudence in the whole affair;

(2) that Maulví Kabiruddin was wrong, as President of the Debating Society, to have got up or sanctioned a meeting of the Society in which such a subject as conversion from Christianity to Muhammadanism was to be the subject of the main discourse;

(3) that Maulvi Kabiruddin was wrong in taking the head maulvi's refusal to commit himself to an objection as equivalent to a sanction of the use of the hall;

(4) that Maulvi Kabiruddin was wrong in holding a meeting of the Madrasa Debating Society at all outside the college, especially after Mr. Lorimer had pointed out the objectionable character of the subject for a meeting of the Society;

(5) that Maulvi Kabiruddin was wrong in bringing in the name of Mr. Lorimer, his immediate superior, at all in a connexion which could hardly avoid the imputation of blame, before an audience largely composed of Mr. Lorimer's pupils;

(6) that Maulvi Kabiruddin was wrong in using at a meeting of the Debating Society expressions regarding the leaders of the Muhammadan community which, to say the least of them, were certain to give just offence.

9. At the same time I believe that the maulvi, who is of a rather excitable temperament, was temporarily carried away by his feelings, and said more than in cooler moments he would approve. There is no want of subordination shown in his general behaviour as a teacher, and Mr. Lorimer has no fault to find with him in his work or demeanour.

10. The newspaper enclosed with your letter is herewith returned.

No. 3619, dated Calcutta, the 14th December 1892.

RESOLUTION—By the Government of Bengal, General Department.

READ—

The letters published in the *Hindu Patriot*, dated the 27th October and 7th November 1892, purporting to give accounts of the meeting of the Calcutta Madrasa Debating Club, held on Sunday, the 16th October 1892.

Read also—

A letter from the Offg. Director of Public Instruction, No. 8746, dated the 18th November 1892, and its enclosure, from the Officiating Principal of the Madrasa, giving a full report of what occurred at the meeting.

IT appears from the information available to Government that Mr. Lorimer, head-master of the School Department, who, during the holidays of the College Department, was in temporary charge of the office of Principal of the Calcutta Madrasa, was on the 15th October asked by Maulvi Kabiruddin Ahmed, President of the Madrasa Debating Club, and Wahiduddin Ahmed, both teachers of the Anglo-Persian School Department of the Madrasa, whether he would grant the use of the Madrasa hall for an extraordinary meeting of the Club to be convened to meet a Mr. Webb, a recent convert to Muhammadanism. Mr. Lorimer agreed to the application, provided the Head Maulvi had no objection; but the Head Maulvi said he had no authority, and therefore could not say anything regarding any objection Maulvis Kabiruddin Ahmed and Wahiduddin Ahmed considered the Head Maulvi's reply as sufficient sanction for the use of the hall, and issued notices that the meeting would be held there. Subsequently, Mr. Lorimer received information that Mr. Webb was going to give a lecture on the Principles of Islam, and therefore declined, for reasons assigned, to grant the use of the hall, but expressed his willingness to do so, provided the promoters of the meeting could procure the written assurance of four or five of the leading members of the Muhammadan community that neither religion nor politics would form a part of the business of the meeting. As this assurance was not given, a notice was posted on the Madrasa notice board to the effect that the Madrasa hall could not conveniently be had for the meeting, so that it would be held at a house in Waliullah's Lane.

2. This meeting was attended by a large number of students and teachers of the Madrasa and by others unconnected with the College. Mr. Webb, the convert, gave an address, taking as his subject "Why I became a Mussalman."

3. On the conclusion of the address, Maulvi Kabiruddin Ahmed, as President of the Debating Club, proposed a vote of thanks to the speaker, and then proceeded to apologise to the audience for the inconvenience they had been put to owing to the change of place of the meeting. The accounts furnished to Government of what took place at the meeting show that the Maulvi made a somewhat inflammatory speech containing reflections both on Mr. Lorimer and the leading Muhammadans. These reflections incited the boys present at the meeting to cries of fie, fie, shame, shame, &c., against both Mr. Lorimer and the leading Muhammadans.

The vote of thanks to Mr. Webb was seconded by Maulvi Abdul Karim, Assistant Inspector of Muhammadan Education, who, when he heard Kabiruddin speaking so harshly of the head-master and some of the leaders of the Muhammadan community, thought it his duty to contradict him, and did so, attributing Kabiruddin's severe remarks to the confusion of his mind under the difficulty in which he had been placed.

4. Mr. Rowe, Officiating Principal of the Calcutta Madrasa, observes—

(1) that Maulvi Kabiruddin was wrong, as President of the Debating Club, in having got up or sanctioned a meeting of the Club in which such a subject as conversion from Christianity to Muhammadanism was to be the subject of the main discourse;

(2) that Maulvi Kabiruddin was wrong in taking the Head Maulvi's refusal to commit himself to an objection as equivalent to a sanction of the use of the hall;

(3) that Maulvi Kabiruddin was wrong in holding a meeting of the Madrasa Debating Club at all outside the College, especially after Mr. Lorimer had pointed out the objectionable character of the subject for a meeting of the Club;

(4) that Maulvi Kabiruddin was wrong in bringing in the name of Mr. Lorimer, his immediate superior, at all in a connexion which could hardly avoid the imputation of blame, before an audience largely composed of Mr. Lorimer's pupils;

(5) that Maulvi Kabiruddin was wrong in using, at a meeting of the Debating Club, expressions regarding the leaders of the Muhammadan community which, to say the least of them, were certain to give just offence.

5. Taking all the circumstances into consideration, the Lieutenant-Governor agrees with Mr. Rowe that Maulvi Kabiruddin is highly to blame in the affair, and directs that he shall be suspended for one year from his temporary appointment as additional master of the Anglo-Persian Department of the Madrasa and from the service of Government in any capacity during that time. His Honour also directs that the censure of Government shall be conveyed to Maulvi Abdul Karim, Assistant Inspector of Muhammadan Education, for assisting at the meeting and countenancing the proceedings by his presence. He should have interfered as soon as the subject of the lecture was known to him, and should have stopped, and not merely contradicted, Maulvi Kabiruddin's improper speech.

The conduct of the members of the Madrasa Debating Club is shown also to have been reprehensible, and the Lieutenant-Governor has had serious doubts whether it should be allowed to continue. He has assured himself by enquiry that the rules of the Club were disregarded when a subject of a religious character was allowed to be introduced, and for this disregard of the rules all the members are to blame. His Honour is therefore pleased to direct that the Madrasa Debating Club be closed during the year 1893, and that, before it is re-opened, its rules are to be submitted to the Director of Public Instruction for approval.

6. Sir Charles Elliott also considers that Mr. Lorimer was greatly to blame for his weakness in agreeing at first to the application for the use of the hall, if the Head Maulvi saw no objection. Mr. Lorimer should have seen at once the impropriety of the whole of the proposal made to him, and should have stopped the delivery of the lecture in any place in connection with the Madrasa Debating Club, and not contented himself with subsequently refusing the use of the hall. An expression of the Lieutenant-Governor's displeasure will be conveyed to Mr. Lorimer for his neglect to take proper responsibility on himself on the occasion under consideration.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Officiating Director of Public Instruction for information and guidance.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

No. 3620.

COPY forwarded to the Director of Public Instruction, with reference to his letter No. 8746, dated the 18th November 1892, for information and guidance.

By order of the Lieutenant-Governor of Bengal,

T. W RICHARDSON,

Under-Secretary to the Govt. of Bengal.

CALCUTTA,

The 14th December 1892.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 11th February, 1893.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIVN.			
1	Burdwan Feb. 11, '93 Kalna ... Katwa ... Raniganj ...	0·14 0·30 Nil 0·23	Weather—fair and very cold. Prospects of *rabi* crops and sugarcane fair except in parts of Sadar subdivision. Condition of cattle good. Prices of common rice :— Srs. Burdwan ... ... 11 to 13 Kalna ... ... 10 to 13 Katwa ... ... 13¾ Raniganj ... ... 13 per rupee.
2	Bankura „ 11, '93 Vishnupur ...	0·08 0·21	Weather—some days cloudy, others fine. Prospects of *rabi* continue fair. Pressing of sugarcane commenced in places. Fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 11¾ Vishnupur ... ... 12 per rupee.
3	Birbhum „ 11, '93 Rampur Hât ...	1·75 0·48	The rain has done some good to the *rabi* crops. Cattle-pox reported from some villages. Price of rice 13 to 15 seers per rupee.
4	Midnapore „ 11, '93	0·22	Weather—cold with occasional showers. *Rabi* doing well. Sugarcane and *rabi* being cut in places. Prices of common rice :— Srs. Sadar ... ... 12 Contai ... ... 13 to 16 Tamluk ... ... 12 to 14 Garhbeta ... ... 11 to 13 per rupee.
5	Hooghly „ 11, '93 Serampore ... Jahanabad ...	1·05 0·86 0·32	Weather—exceptionally cold since the rain. The rain has done some injury to such of the *rabi* as was already ripe and to such of the mango blossom as was out. The Subdivisional Officer, Serampore, reports that but for it there would have been a 16-anna *rabi* crop. In the Sadar subdivision it is less good. Ploughing has been much facilitated and is now general. Cattle-pox has fallen off though still general in Sadar. Want of water very badly felt in Dwarbasini in Pandua, the rain having hardly affected the tanks. Prices of common rice :— Srs. Sadar ... ... 10 to 11½ Serampore ... ... 10 to 11½ Jahanabad ... ... 11 to 12 per rupee.
6	Howrah „ 11, '93 Ulubaria ...	0·48 0·28	Weather—cloudy for some time, but now clear and cool. Harvesting of winter rice is finished. Pressing of sugarcane and gathering of *kalai* going on. Condition of cattle good. Fodder and water-supply ample. Common rice 11 to 11½ seers per rupee.
PRESIDENCY DIVN.			
7	24-Parganas „ 11, '93	0·47	Weather—cold and seasonable. Sugarcane being pressed. Prospect of *rabi* crop good. Ploughing for *aus* and jute going on. Fodder and water sufficient. Prices of common rice :— Srs. Srs. c. Sadar ... ... 10 to 14 0 Barasat ... ... 11 14 Basirhat ... ... 12 5 Diamond Harbour ... 13 0 Barrackpore ... ... 12 0 Dum-Dum ... ... 12 0 per rupee.
8	Nadia „ 11, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	0·80 1·45 2·75 Nil 0·82	Weather—very cool. Prospects of *rabi* crops good. Harvesting of some of them going on. Price of rice almost stationary. Health of cattle good. Fodder and water-supply sufficient.
9	Khulna „ 11, '93 Bagerhat ... Satkhira ...	0·73 0·69 0·44	Weather—cold with rain on one day. Harvesting of *aman* completed; outturn good except in Assasuni and Paickgacha. The recent rain has done much good to *boro* paddy and *rabi* crops on the ground. Common rice selling at 11 to 14 seers per rupee. Supply of fodder and water sufficient.
10	Jessore „ 11, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·72 1·02 1·26 0·61 1·40	Weather—very cold and occasionally cloudy with light showers on the 7th. The recent rain has been beneficial to the standing crops as well as to ploughing. Harvesting of *aman* in Narail is now over. Supply of fodder and water for cattle sufficient.
11	Murshidabad „ 11, '93	0·66	Weather—cool; cloudy at times. Prospects of *rabi* crops favourable. Common rice selling at 14 seers per rupee. Fodder and water sufficient.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
BENGAL—*concld.*				
CHITTAGONG DIVN.	12	Chittagong Feb. 11, '93	Nil	Weather—seasonable. Prospects of crops good. Prices stationary. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhali „ 11, '93	Nil	Weather—seasonable. Prospects of *rabi* crops good. Fodder and water sufficient. No cattle-disease except in Sundip and Companiganj. Price of rice stationary.
	14	Tippera „ 11, '93	0·10	Weather—cool. Winter crops are now being harvested; outturn generally reported to be good. Prices of rice and other articles of food are stationary.
	15	Chittagong Hill Tracts. „ 10, '93	Nil	Weather—cloudy in the latter part of the week. Chillies and tobacco doing well. Sugarcane being pressed. No cattle-disease reported. Common rice selling at 10 seers per rupee.
DACCA DIVN.	16	Dacca „ 11, '93	Not reported.	Weather—very cold. Heavy rain in the Manikganj subdivision. *Boro* paddy being sown. Recent rain has done much good to the *rabi* crops. Harvesting of mustard and *maskalai* continues. Cultivation and sowing of *aus* going on. Fodder available. No cattle-disease. Common rice selling at from 11 to 14 seers per rupee.
	17	Faridpur „ 11, '93	1·40	Weather—still very cold. Standing crops doing well. Oil-seeds being gathered; outturn fair. *Boro* paddy is being sown. Common rice selling at 13 seers per rupee at Faridpur, Goalundo, and Madaripur. Condition of cattle good and fodder available.
	18	Backergunge „ 11, '93	Nil	Weather—seasonable. Prospect of crops good. Fodder and water sufficient. Common rice selling at from 10 to 15 seers per rupee.
	19	Mymensingh „ 11, '93	Nil	Weather—seasonably cold. Prospects of standing crops good. Transplantation of *boro* completed. Rice sells at from 11 to 14 seers per rupee. Fodder and water available.
RAJSHAHI DIVN.	20	Dinajpur „ 11, '93 Thakurgaon ...	Nil Nil	Weather—cool and cloudy at times. Cultivation of lands for *bhadoi* and jute in progress. Sugarcane still being pressed. Prices of rice:— Srs. Sadar ... ... 15 } per rupee. Thakurgaon ... ... 15 to 16 } per rupee. Condition of cattle good. Cattle disease, which broke out in Thakurgaon subdivision, is reported to be disappearing. Supply of fodder and drinking water sufficient.
	21	Rajshahi „ 11, '93 Nator ... Naugaon ...	0·38 0·55 0·10	Weather—cold and seasonable. Condition of standing crops good. A few cases of small-pox among cattle reported from the Manda thana. Supply of fodder and water sufficient everywhere except in the Barind, where some difficulty has been felt from the want of good drinking water. Price of rice stationary.
	22	Rangpur „ 11, '93 Gaibanda ... Kurigaon ... Nilphamari ... Ulipur ...	Nil Nil Nil Nil Nil	Weather—cold. Ploughing of land for *aus* and jute going on. Mustard is being gathered. Tobacco doing well. Price of common rice varying from 12 to 14 seers per rupee.
	23	Bogra „ 11, '93 Sherpur ... Naukhila ...	0·07 0·21 0·09	Weather—cold and cloudy at intervals. Lands are being ploughed for jute, sugarcane, *kaon*, &c. Prospects of *rabi* crops good. Common rice selling at 14½ seers per rupee. Fodder and water sufficient.
	24	Pabna „ 11, '93	1·98	Weather—7th and 8th cloudy; remaining days fine and cool. The recent rainfall will do good to the standing *rabi* crops and facilitate cultivation of land. Sugarcane is being reaped and yielding an outturn of 12 annas. Rice selling at 13 seers per rupee at Pabna. Condition of cattle good. Fodder and water-supply sufficient.
	25	Darjeeling „ 11, '93 Siligori ...	0·08 Nil	Weather—very cloudy and cold for the first half, and clear and fine during the latter half of the week. *In the hills:*—Wheat and barley progressing favourably. *Tori* and potatoes being harvested. *In the terai:*—State and prospects of crops good. Ploughing for *bhadoi* crops continues. Potatoes and mustard being harvested. Prices of coarse rice:— Srs. Hills ... ... 11 } per rupee. Terai ... ... 13 } per rupee.
	26	Jalpaiguri „ 11, '93	Nil	Weather—cold and cloudy at times. *Rabi* crops, tobacco and potato doing well. Harvesting of potato has commenced in places. Common rice sells at 13 seers 5 chitaks per rupee. Condition of cattle good. Fodder and water-supply sufficient.

	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
BHAGALPUR DIVN.	27	Monghyr Feb. 11, '93 Begusarai ... Jamui ...	0·20 0·23 0·06	Weather—very cold and occasionally cloudy. Crops doing well. Some of the earlier *rabi* being harvested. Indigo land being prepared and a little irrigation going on where the moisture is bad. Prices of common rice :— Srs. Sadar ... ... 13 to 15½ } Begusarai ... ... 16 } per rupee. Jamui ... ... 15 }
	28	Bhagalpur „ 11, '93 Banka ... Madhipura ... Supaul ...	0·25 0·07 Nil 0·18	Weather—cloudy and cold. Prospects of crops good. Linseed and mustard in good condition. Price of rice stationary.
	29	Purnea „ 11, '93 Kishanganj ... Araria ...	0·02 0·15 Nil	Weather—cold with west wind. Standing *rabi* crops doing well. *Tori* being gathered. Land being prepared for *bhadoi*. Fodder and water plentiful. No cattle-disease. Prices of common rice :— Srs. Sadar ... ... 13 to 16 } Kishanganj ... ... 15 } per rupee. Araria ... ... 18 }
	30	Malda „ 11, '93 Chanchal ... Shibganj .. Gajole ...	0·17 0·09 0·20 0·04	Weather—cold and clear but occasionally cloudy. *Boro* rice still being transplanted. *Rabi* crops coming into maturity and their prospects favourable. Common rice sells at from 13 to 17 seers per rupee. Fodder and drinking water enough.
	31	Sonthal Parganas „ 11, 93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	0·36 0·49 0·14 0·57 0·06 0 30	Weather—cold and occasionally cloudy. Standing *rabi* crops much benefited by the recent rain. Fodder and water-supply sufficient.
PATNA DIVISION.	32	Patna „ 11, '93 Barh ... Bihar ... Dinapore ...	0·17 0·36 0·36 0·16	Weather—cold and occasionally cloudy. Prospects of *rabi* continue fair. The weather during the week was not favourable to poppy. Mustard being harvested. Extraction of opium going on. Prices of common rice :— Srs. Sadar ... ... 17 } Barh ... ... 13 } Bihar ... ... 17 } per rupee. Dinapore ... ... 14 to 15 }
	33	Gaya „ 11, '93 Nawada ... Aurangabad ... Jahanabad ...	0·02 0 14 Nil 0·24	Weather—cloudy and very cold. Prospects of *rabi* good. Harvesting of *masur*, *kerao*, and linseed commenced on a small scale in the Aurangabad subdivision. The little rainfall has become favourable to the late *rabi* crops. Prospects of poppy reported favourable. Common rice sells from 13 to 14½ and coarse husked rice from 16 to 16½ seers per rupee at Gaya. Supply of fodder and water for cattle sufficient.
	34	Shahabad „ 11, '93 Buxar ... Sasaram ... Bhabhua ...	Drizzling 0·12 Nil Nil	Weather—cold; cloudy with west wind prevailing. Prospects of *rabi* crops favourable. Sugarcane being pressed in some places and sown in other places. Peas being reaped. Prices stationary.
	35	Darbhanga „ 11, '93 Madhubani ...	0·03 0·81	Weather—cloudy with west winds. Prospects of *rabi* continue favourable. Mustard is about to be reaped. Fields being prepared for indigo and *mung* sowings. Common rice selling at 15 to 16 seers per rupee. Supply of fodder for cattle sufficient.
	36	Muzaffarpur „ 11, '93 Hajipur ... Sitamarhi ...	Nil 0·54 0·32	Weather—seasonable, but cloudy occasionally. *Rabi* crops doing well. Prospects of wheat good. Fodder and water-supply ample.
	37	Saran „ 11, '93 Siwan ... Gopalganj ...	0·36 0·09 0·14	Weather—yet very cold for the season. The rain has done some good to *rabi* and slight harm to poppy. Fodder and water abundant. Prices of common rice are :— Srs. C. Chapra ... ... 14 0 } Siwan ... ... 14 5 } per rupee. Gopalganj ... ... 14 3 }
	38	Champaran „ 11, '93	0·12	Weather—very cold and cloudy at times. Standing crops in full flower. The rain of the week has damaged to some extent some of the *rabi* crops, but benefited the poppy crop. Prospects generally continue favourable. Cattle in good condition with sufficient fodder and water.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 11, '93	0·41	Weather—cold. Outturn of *mung* estimated at 12 to 13 annas. Recent rain has been of benefit. Supply of fodder and water sufficient. Average prices of common rice :— Srs. C. Srs. C. Sadar .. ... 10 8 to 15 1 } Jajpur ... ... 17 4 to 21 0 } Kendrapara ... ... 15 0 to 20 0 } per rupee. Banki ... ... 17 0 }
	40	Puri „ 9, '93 Khurda ...	0·29 1·0	Weather—cloudy. Harvesting of *sarad* almost over. Land being ploughed in places for next *sarad* crop. *Dalua* paddy thriving. *Rabi* crops doing well. Rice sells at from 15 to 17 seers per rupee.
	41	Balasore „ 11, '93	1·45	Weather—very cold. No change in the prospect of winter crops. Common rice sells at 16 seers per rupee at Sadar and 18 seers in Bhadrak subdivision.

	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
CHOTA NAGPUR.					
South-West Frontier Agency.					
Chota Nagpur Divn.	42	Hazaribagh Giridi	Feb. 11, '93 ...	1·01 0·35	Weather—cold and windy. Prospects favourable. Ploughing going on. Common rice 11 to 14 seers per rupee.
	43	Lohardaga	„ 11, '93	0·28	Weather—seasonable. Prospects of *rabi* continue favourable. The rainfall has done much good to this crop. Common rice selling at 14 seers per rupee. Fodder and water sufficient.
	44	Palamau	„ 10, '93	Nil	Weather—cold and cloudy. A little rain in some parts. Prospects of *rabi* crops favourable. Cattle-disease reported from two or three stations. Prices stationary.
	45	Singhbhum	„ 11, '93	0·38	Weather—cold and fine. Rain on the 6th and 7th instant. Condition of crops good. Cotton, sugarcane, *rahar* and other crops being harvested with good outturn. Price of rice stationary between 12 and 16 seers per rupee.
	46	Manbhum Gobindpur	„ 11, '93 ...	0·33 0·62	Weather—cloudy on 6th and 7th with rain on night of 7th. Now cold. Harvesting of *rabi* crops nearly complete. Rice selling at 10 to 14 seers per rupee. Fodder and water-supply sufficient.

Published for general information.

CALCUTTA; REVENUE DEPT.,
The 14*th February*, 1893.

C. E. BUCKLAND,
Secy. to the Govt. of Bengal.

The following Statement shows the Quantities of the Principal Staples of Traffic imported into Calcutta from the Interior during the month of September, 1892.

The total fall from 1st January to 11th February 1893	1·17
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	0·91

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog; o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JANUARY 1893.

The following have been the principal features in the meteorology of January 1893 :—

1. The changes of pressure from day to day have been unusually large, and on two or three periods large defects have been recorded owing to the passage of depressions, so that the mean pressure for the month has been in defect of the normal in all districts, the defect ranging from 0·05″ to 0·06″ at the western stations to 0·03″ to 0·04″ at the south-eastern stations, the general defect of the whole province equalling about 0·045″.

2. The mean temperature has been below the normal by from 1° to 2°, the defects being usually largest in Central, Southern, and Northern Bengal.

3. Humidity has been very decidedly in excess of the normal, the usual excess averaging from 5 to 10 per cent.

4. Cloud proportion has also been in very distinct excess of the normal in all districts.

5. No less than five periods of disturbed weather, connected with the passage of barometric depressions advancing from North-Western India, existed during the month. The first depression advanced from North-Western India at the close of December, the second on the 3rd of January, the third, which consisted of no less than three low pressure areas, advanced on the 15th, the fourth a severe depression on the 23rd, and the fifth a feeble depression on the 28th. All these advanced in an easterly direction and rather largely affected the weather in Bengal, giving a wave of high temperature and humidity in front of the disturbance, low pressure with clouded skies, and in some cases rain during the disturbance and a rapid increase of pressure followed by a wave of cold dry air in the rear of the disturbance.

6. Owing to these numerous disturbances rainfall has been in excess of the normal in all districts except East Bengal, the excess being fairly large in Orissa, Chota Nagpur, and North Bihar, and small in all other districts.

The following is a brief summary of the principal meteorological changes during the month :—

At the close of December a very considerable barometric depression crossed the Indus Valley and moved eastward over Rajputana. It continued to travel eastward very rapidly, but also filled up quickly in its advance, and did not reach Bengal as a definite depression, but the wave of high temperature and humidity and the feebly unsettled conditions left after the filling up of the depression with the moderately clouded skies advanced over Bengal from about the 1st of January, and thus very early in the month one or two very light showers were reported in the hills to the north of Bengal. From about the 3rd instant the effects of this depression had passed away, and fine settled weather again obtained in Bengal, but another considerable barometric depression had appeared in North-Western India over Rajputana on this date, and this again advanced rapidly in an easterly direction, gradually filling up in its advance. On the 4th it was near Saugor, and was comparatively slight, but it nevertheless gave rather heavily clouded skies over the western half of the province, and on the 4th and 5th a number of rain showers were reported in Bihar. On the 5th the depression had ceased to have any well-defined existence, but pressure continued to fall over Bengal up to the 7th, on which date a feeble form of low pressure area existed over the west of the province, while readings were comparatively high in North-East Bengal. Accompanying these disturbed conditions, temperature had become about 4° in excess of the normal. The sky had clouded over rapidly, and fairly general rain was reported in Bihar, Chota Nagpur, and North Bengal, while showers also occurred in South-West Bengal. The disturbed conditions were confined on the 8th to North Bengal, and pressure was generally rising rapidly. On the 9th pressure had become in excess of the normal, the disturbed conditions had quite disappeared, and a wave of very low temperature following after the low pressure area began to sweep over the province, and by the 10th the general temperature of the province was from 4° to 6° below the normal of the day. These very strongly pronounced cold weather conditions then commenced steadily to disappear; the high pressure slowly gave way until by the 14th it had become about an eighth of an inch below the normal, while the temperature had steadily risen, and it was only about 1° below the normal of the day. A further fall of pressure took place on the 15th, and it became about a fifth of an inch in defect in the western districts, while on the same date no less than three feeble low pressure areas existed over Northern India. On the 16th pressure again fell in Bengal, and owing to the very low pressure, moist southerly winds began to set in at a few stations, while a wave of comparatively high temperature began to advance over the western half of the province. On the 17th a distinct low pressure area still existed over parts of South-West and Central Bengal, while a large low pressure area was shown over the Central and North-West Province; southerly winds were blowing over Orissa, South Bengal, and part of East Bengal, giving very high humidity, while temperature also rose rapidly, and became largely in excess of the normal, the excess equalling about 5° at many stations. With these very abnormal and disturbed conditions, numerous but rather light showers were reported in North and South Bihar and parts of Chota Nagpur. On the 18th the low pressure area existed over South and South-East Bengal, and rainfall had extended to South-West, North and East Bengal, while on the 20th and

21st it had extended to Orissa, and the remainder of the province had become almost rainless. During the 20th and 21st also pressure rose, and the low pressure area wa on the 21st instant apparently in the north-west angle of the Bay, where it continued to give disturbed weather and rain to Orissa on the 22nd, but from the 23rd it had quite disappeared. Fine weather of normal south-east monsoon conditions set in from the 21st and 22nd over the greater part of the province, but it only lasted a short time, for on the 23rd instant a severe barometric depression or storm had entered North-Western India, and was near Jacobabad. On the 24th it had advanced rather rapidly in an easterly direction, and was over Rajputana, while a deep secondary barometric depression had appeared near Rawalpindi. On the 25th these depressions had advanced eastwards, and the original depression existed as a shallow storm over part of the North-West and Central Provinces and the west of Bengal, while the secondary depression had perhaps moved along the line of the hills, for at Darjeeling very rough weather with almost a gale of wind and snow were reported, and on the 25th rain was recorded at almost all stations in North Bengal, and also in North Bihar, South Bihar, and Chota Nagpur, and which extended on the 26th to almost the whole of the province. On the 26th the primary barometric depression had passed over South Bengal and the north and north-west of the Bay, while on the 27th it had again advanced rather rapidly in an easterly direction and was probably over Upper Burma. With the disappearance of the depression pressure rose very rapidly, the sky cleared quickly, rainfall ceased, except for a few showers in and near the hills, and weather became fine and settled, while a steady dry north-westerly and westerly wind commenced to blow again over the province. Immediately the depression had passed away, it was followed by an exceedingly cool wave of air produced to a considerable extent probably by the heavy fall of snow which had occurred in the hills, and on the 28th instant the defect in the mean temperature exceeded 10° at such stations as Calcutta, Jessore, Saugor Island, Dacca, Gaya, Hazaribagh, Ranchi, and Cuttack, while some unusually low minimum temperatures were recorded, the night temperature at Calcutta registering 45·7°, or within seven-tenths of a degree of the lowest temperature ever registered at the Alipore Observatory. On the 28th instant, however, two more barometric depressions had appeared in North-Western India, and by the 29th one of these had apparently travelled rapidly in an easterly direction, and was over Chota Nagpur and the western parts of Bengal, and in front of this depression again the usual rather rapid increase of temperature took place. The depression was, however, very feeble, and only slightly influenced the province on the 29th, and on the 30th and 31st again fine settled weather of unusually strongly pronounced cold season type existed over Bengal, and temperature was still rather largely below the normal, pressure was considerably in excess, and a fairly strong dry westerly and north-westerly wind was blowing over the whole province. Thus there have been no less than five periods of disturbance in Bengal in January due to the passage of depressions from North-Western India, and for a certain part of the month conditions were very disturbed, but on the whole the after-effects of these depressions have been to intensify the ordinary cold season conditions to a considerable extent.

Pressure.—For the first week the pressure variations from day to day were large, but the mean pressure was only 0·01" to 0·02" in excess of the normal. In the second week there was a considerable defect registered, amounting to 0·05" to 0·07"; in the third week the defect had increased, and it averaged about a tenth of an inch, and varied between 0·09" to 0·12", the defect being generally largest in the west of the province. In the fourth week this defect had been to a great extent neutralized, and the general defect only equalled 0·04", and ranged from 0·02" in North Bengal to 0·06" to 0·07" in the west of the province. Hence the mean pressure of the month has been in defect of the normal by from 0·04" to 0·05", and the defect has been largest in Bihar and Chota Nagpur, where at several stations it has equalled from 0·05" to 0·06", while on the other hand in South-East Bengal it has been from 0·03" to 0·04".

Temperature.—The changes of temperature have also been unusually large during the month, but the principal variations have been already discussed. General defects for the month of from 1° to 2° have been reported in Orissa, South-West and North Bengal, Chota Nagpur and Assam, and of nearly 1° in the remaining divisions. The defects on the whole have been largest in the maximum or day temperatures which average nearly 2°, while on the other hand the defects of the night or minimum temperatures only equal about half to one degree.

The actual oscillations and variations of the maximum, minimum, and mean temperature from the normal week by week for the month at nine typical stations in different districts of the province are given in the following table:—

Stations.	Week ending 7th January 1893.			Week ending 14th January 1893.			Week ending 21st January 1893.			Week ending 28th January 1893.

Rainfall.—A fall of 1·56 inches has been recorded in Orissa, which is about four times the usual fall; and in North Bihar the fall has slightly exceeded an inch, and is about twice as much as usual. In Chota Nagpur the fall is slightly less than an inch, and is about fifty per cent. more than the normal. Falls of about half an inch have been recorded in South-West Bengal, North Bengal, East Bengal and South Bihar, and are in all cases slightly exceeding the normal amounts.

In the case of the smaller districts Puri has received 2·03 inches; Cuttack, Darjeeling, and Chittagong Hill Tracts nearly two inches; Balasore, Darbhanga, Muzaffarpur, Sarun, Palamau and Manbhum from an inch to an inch and a half; 24-Parganas, Bankura, Birbhum, Purnea, Bhagalpur, Sonthal Parganas, Hazaribagh, and Lohardaga from three quarters to an inch; and Hooghly, Burdwan, Murshidabad, Pabna, Rangpur, Jalpaiguri, Kuch Bihar, Tippera, Mymensingh, Champaran, Shahabad, Gaya, Patna, and Singhbhum falls of half to three quarters of an inch. The smallest falls have been received in Khulna, Chittagong, and Faridpur, where they have been a fifth of an inch and less.

In Assam Sibsagar has received 3·28 inches, Silchar 1·78 inches, and Dhubri 0·53 inch of rain.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of January 1893:—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th Oct. 1892.

The mean 10 A.M. pressure of the seven days	30·071
	°
The mean temperature of the seven days	65·8
The extreme variation of temperature	31·1
The maximum temperature	80·4
	%
The mean 10 A.M. relative humidity of the seven days	63
The total fall of rain from 5th to 11th February 1893	0·68 inch.

The daily mean temperatures are the crude means of maximum and minimum temperatures.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA,
The 13th February 1893.

Meteorological Report of the Province of Bengal

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period

The *humidity* of the atmosphere is expressed at percentage, saturation being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01

rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station

district, *i.e.*, from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one or

for the week ending Saturday, the 11th of February 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Of week. Mean for district.	Of week. Normal mean.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1892. Mean for district.	Since 16th October 1892. Normal mean.	Since 16th October 1892. Variation.	DISTRICT.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 11th of February 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the* 14*th February* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 11TH OF FEBRUARY 1893.

DURING the previous week a barometric depression had passed across the province, but it was of feeble nature and had given practically no rainfall. In the rear of the depression, however, the usual wave of cold air had swept over the province, and on the 5th instant, or the first day of the week under review, the mean temperature was in defect of the normal by from about 2° to 4°, pressure was rising moderately to rapidly, and was generally in slight excess of the normal over the northern half of the province and about normal over the southern half, while a steady north-westerly wind prevailed at all except a few stations in the north and north-east of the province. Hence fine settled weather, with generally lightly clouded skies prevailed in all districts and rainfall was quite absent. In North-West India, however, on this date weather was very distinctly disturbed from the existence of two depressions, the primary depression which had entered North-West India on the 4th having advanced over South-West Rajputana and Sind, while a secondary depression existed over the North-West Himalayas, and these depressions were as usual advancing in an easterly direction. On the 6th these depressions had advanced rather slowly and pressure was falling slowly in Bengal, while temperature was rising, particularly at the western stations, where also winds were beginning to show the influence of the depressions and had become southerly in a few cases. On the 7th the depressions had again advanced in an easterly direction and had apparently joined together, and a large shallow barometric depression covered Bengal and the neighbouring parts of the Central Provinces. Hence pressure was again falling moderately, the fall being largest in South-West Bengal and Orissa; temperature had risen very rapidly and had become from 1° to 4° in excess of the normal at all except a few of the eastern and northern stations, while winds generally over Bengal were easterly and south-easterly, forming part of an irregular cyclonic circulation round the depression. At the same time the sky clouded over very rapidly and rain was reported in South-West Bengal, Bihar, Chota Nagpur, and parts of North Bengal. On the 8th the depression had passed over the Bay, and its centre was some little distance to the south of the Sundarbans. With the advance of the depression pressure began to rise in Bengal, especially at the western stations, where in some cases the rise was 0·15″ and 0·16″; temperature, on the other hand, was falling in the rear of the depression, and it had become generally slightly below the normal. Very unsettled weather had therefore prevailed over the whole of Bengal from the 7th to the 8th, and general rain was reported on the 8th over almost the whole province. On the 9th the depression had either passed over Burma or perhaps filled up; pressure continued to rise in Bengal and became nearly a tenth of an inch in excess of the normal, while temperature was in defect by from about 3° to 6,° and a steady northerly and north-westerly wind prevailed over the whole province. Hence again the sky became almost cloudless and rainfall ceased. On the 10th pressure continued generally to rise slowly, and the cold wave of air following in the rear of the previous depression had swept over the whole of Bengal and the mean temperature had become below the normal by amounts ranging up to from 8° to 10° at some of the western stations. On the 11th the pressure changes were small and variable, and temperature was increasing, but the mean temperature was still in defect by about 5° to 7°. Hence at the close of the week the cold weather conditions were still strongly developed, fine weather with lightly clouded skies obtained and there was no rainfall reported.

Pressure.—The pressure variations during the week have been large, but on the whole the mean pressure has not been very far removed from the normal. The variations have indeed been a little irregular, and at the majority of stations there has been a slight excess, but defects are reported at two or three stations in the south of the province, while on the other hand excess pressures of 0 03″ and 0·04″ are recorded at some of the stations in North Bihar.

Temperature—Has been unusually low during the week in all districts, and defects of about 4° are reported in Chutia Nagpur and South-West Bengal. For the whole province the defect in the mean temperature for the week has been 2·8°.

The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the week. The defect, it will be seen, has been largest in the day or maximum temperatures which have generally been from 5° to 6° below the normal:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 11th February 1893.

	Normal mean maximum temperature for the week ending 11th February.	Actual mean maximum temperature for the week ending 11th February 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 11th February.	Actual mean minimum temperature for the week ending 11th February 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 11th February.	Actual mean daily temperature for the week ending 11th February 1893.	Variation of actual mean from the normal.

Rainfall —The rainfall during the week has been light, and the heaviest falls have been in South-West Bengal, where they have averaged 0·70 inch. The falls in Orissa, East Bengal, and Chota Nagpur have averaged about four-tenths of an inch, and those in North Bengal and in Bihar about a fifth of an inch. The falls have been in distinct excess of the normal in South-West Bengal, Chota Nagpur, Orissa, and South Bihar, and in slight defect in the other Divisions.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 11th of February 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week	Variation.	Average.	Normal average.	Average.	Normal average.

* Includes 7,884 tons and 11,895 tons of coal during 1892 and 1891, respectively, carried for Revenue, for which no "Up" and "Down" register maintained.

† Railway plant and rolling-stock, 9,694 tons and 9,045 tons for the years 1892 and 1891, respectively, for which no "Up" and "Down" register maintained.

Comparative Statement of principal commodities carried on the Eastern Bengal State Railway during the month of November 1892.

INCREASES.

	Tons.
Cotton twist and yarn and cotton piece-goods ..	1,153

Ordinary fluctuation

Jute, screwed	13,244

Principal increases from Belakoba, Rangpur, Mymensing, Goalundo and Sirajganj. The crop of 1891 was a short one.

Jute, unscrewed	21,406

Domar, Atrai, Dawani, Nilphamari and Baninagore how large increases. The crop of 1891 was a short one.

	Tons.
Kerosine oil	6,328

Due to the prohibition of carriage by boat within certain limits of the port of Calcutta.

Tea	2,200

Of this increase Jalpaiguri contributed about one-half. Much of the crop could not be brought earlier into the market on account of the cart roads having been washed away by heavy rains.

Tobacco	802

Kaunea, Rangpur and Domar contributed about one-half to this increase, said to be due to markets at Rangoon and Moulmein being favourable.

DECREASES.

	Tons.
Coal	8,607

Sufficiency in stock for Railway and Flotilla consumption.

JAMES SHAW,
Examiner of Accounts.

REPORT ON THE STATE OF THE SALT MARKET FOR THE THIRD QUARTER OF 1892-93.

No. 150B., dated Calcutta, the 13th February 1893.

From—T. INGLIS, ESQ., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

D. R. LYALL, ESQ., C.S.I.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the 3rd quarter of 1892-93, comprising the months of October, November, and December 1892.

2. The quantity of salt of every description on which duty was paid during the quarter under report amounted to 26,48,867 maunds, against 26,38,321 maunds in the previous quarter, and 24,29,086 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 62,46,890, against Rs. 61,91,983 in the previous quarter, and Rs. 56,68,109 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of excise salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I:—

TABLE I.

	Cuttack.	Puri.	Balasore.
		Mds. s.	Mds. s.
Balance at close of the last quarter	......	57,435 10	1,544 0
Manufactured or added during the quarter	......	......	......
Total ...	......	57,435 10	1,544 0
Sales during the quarter	......	32,491 0	1,130 0
Wastage	......	995 0	130 0
Total ...	......	33,486 0	1,260 0
Balance at close of the quarter	......	23,949 10	284 0

4. The total sale of excise salt during the quarter under review amounted to 33,621 maunds, against 27,734 maunds in the previous quarter, and 3,439 maunds in the corresponding quarter of the previous year. The total amount of excise salt on which duty was paid during the quarter was 30,920 maunds.

5. The subjoined table shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review compared with the figures of the corresponding quarters of the previous two years:—

No transactions in sea-imported salt have been reported for the quarter from the ports of Cuttack, Puri and Balasore.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 18th February, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Feb. 18, '93 Kalna ... Katwa ... Raniganj ..	1·77 0·78 0·84 0·89	Weather—cloudy and cold. Ploughing of lands has commenced. No more rain is wanted. Prospects of *rabi* and sugarcane fair. Condition of cattle good. Fodder sufficient. Prices of common rice:— Srs. Burdwan ... ... 11 to 13 per rupee. Kalna ... ... 10 to 13 per rupee. Katwa ... ... 13½ per rupee. Raniganj ... ... 13 per rupee.
	2	Bankura „ 18, '93 Vishnupur ..	1·22 1·16	Weather—cloudy, but to-day (18th) fair. Ploughing has been much facilitated by the recent rain, though it has done some injury to such of the mango blossom as was out. Pressing of sugarcane going on. Fodder and water sufficient. Common rice sells at 12 seers per rupee both at Sadar and Vishnupur.
	3	Birbhum .. 18, '93 Rampur Hát ...	1·57 0·59	Weather—rainy but at last clear. There were good showers of rain in the week which facilitated ploughing. Sugarcane is being pressed. Wheat is flourishing. Common rice sells at 13 to 15 seers per rupee. Fodder and water sufficient.
	4	Midnapore „ 18, '93	1·35	Weather—unusually cold for the time of year. Prospects of crops favourable. Prices of common rice:— Srs. Sadar ... ... 12 per rupee. Contai ... ... 13 to 15 per rupee. Tamluk ... ... 12 to 14 per rupee.
	5	Hooghly .. 18, '93 Serampore ... Jahanabad ...	2·35 3·45 1·09	Weather—cloudy and rainy. This week's rain is to some extent damaging the *rabi* which is in flower or fruit, but greatly benefiting the water-supply and facilitating cultivation of next *aman* crop. It will also greatly benefit hot weather vegetables and the sugarcane crop. Prices of common rice:— Srs. Sadar ... ... 11 per rupee. Serampore ... ... 10 to 11½ per rupee. Jahanabad ... ... 11 to 12½ per rupee.
	6	Howrah „ 18, '93 Ulubaria ...	1·23 1·12	Weather—cold and cloudy. Reaping of *rabi* crops and pressing of sugarcane continue. Condition of cattle good. Fodder and water-supply ample. Price of rice 11 to 12½ seers per rupee.
PRESIDENCY DIVN.	7	24-Parganas „ 20, '93	1·31	Weather—cold and rainy. Sugarcane being pressed. General prospect of crops fair. Sufficient water and fodder. Prices of rice:— Srs. Srs. c. Sadar ... ... 10 to 14 0 per rupee. Barasat ... ... 14 4 per rupee. Basirhat ... ... 12 5 per rupee. Diamond Harbour ... 13 0 per rupee. Barrackpore ... ... 12 4 per rupee. Dum-Dum ... ... 12 0 per rupee.
	8	Nadia „ 18, '93 Kushtia ... Meherpur ... Ranaghat ...	1·96 0·69 0·72 0·47	Heavy rain yesterday (17th). Prospects of *rabi* crops good, but the rain is likely to cause some damage to linseed, gram, and mango blossoms; it will however, facilitate ploughing. Price of rice stationary. Health of cattle good. Fodder and water-supply sufficient.
	9	Khulna „ 18, '93 Bagerhat ... Satkhira ...	3·45 1·80 3·38	Weather—cloudy with pretty heavy rain on two days. Transplanting of *boro* going on. The rain which has fallen in the week will do much good to this crop as well as to the standing *rabi* crops. Common rice selling at from 11 to 14 seers per rupee. Supply of fodder and water sufficient.
	10	Jessore „ 18, '93 Jhenida ... Magura .. Narail ... Bangaon ...	1·00 0·22 0·10 0·42 0·80	Weather—cold and cloudy at times with light showers. The rain has done much good to the standing *rabi* crops, as also to the ploughing of lands for paddy, indigo, &c. Condition of cattle good except in some parts of Bangaon, where cattle-disease is reported to have appeared. Supply of fodder and water sufficient. Prices of rice stationary.
	11	Murshidabad „ 18, '93	0·76	Weather—seasonably cold and cloudy at intervals with rain on the 13th and 14th. The recent rain has done much good to *rabi* crops. Prospects seem to be favourable. Price of rice almost stationary. Fodder and water sufficient.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Feb. 18, '93	0·30	Weather—seasonable. Prospects of crops good. Prices stationary. Condition of cattle good. Supply of fodder sufficient.
	13	Noakhali	" 18, '93	1·18	Weather—seasonable. Occasional rain during the week. The rain has done much good to the *rabi* crops. Fodder and water sufficient. *Damka* disease and cow-pox reported from Sundip and Companiganj. Price of rice stationary.
	14	Tippera	" 18, '93	0·34	Weather—cool and healthy. Lands being ploughed. *Rabi* doing well. Prospects good. Prices stationary.
	15	Chittagong Hill Tracts.	" 17, '93	0·22	Weather—cloudy with occasional showers of rain. The recent rain rendered prospects of vegetables good. Condition of cattle generally good. Prices of common rice:— Srs. Rangamati ... ... 10 } Bandarban ... ... 9½ } per rupee. Manicksury ... ... 20 }
DACCA DIVN.	16	Dacca	" 18, '93	Not reported.	Weather—very cold and cloudy. *Boro* paddy being sown. Cultivation for *aus* and *aman* paddy going on. *Rabi* crops being gathered. Fodder available. No cattle-disease. Common rice selling at from 11 to 14 seers per rupee.
	17	Faridpur	" 18 '93	0·50	Weather—uncertain and cold for the season. Harvesting of mustard nearly completed with fairly good outturn. State of other *rabi* crops favourable. Rain has enabled progress to be made in preparing ground for *aus*. Jute and *boro* paddy being sown. Common rice sells at 13 seers per rupee at Goalundo and Madaripur and at 12 seers at Sadar. Cattle get fodder.
	18	Backergunge	" 18, '93	1·03	Weather—cloudy in the latter part of the week. Prospects of crops good. Common rice sells at about 12 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	" 18, '93	0·93	Weather—seasonably cold. Prospects of crops good. Fodder and water available. No cattle-disease. Prices of common rice:— Srs. Sadar ... ... 11 to 14½ } Kishorganj ... ... 12½ } Netrakona ... ... 13 } per rupee. Jamalpur ... ... 12½ } Tangail ... ... 13 }
RAJSHAHI DIVN.	20	Dinajpur Thakurgaon	" 18 '93 ...	0·38 0·35	Weather—cool and cloudy. The rain will facilitate the cultivation of lands for *bhadoi* and jute. Pressing of sugarcane still going on. Prices of rice:— Srs. c. Sadar ... ... 14 10 } Thakurgaon ... . 15 to 16 0 } per rupee. Condition of cattle good at Sadar, that at Thakurgaon reported to be fair. Fodder and drinking water plentiful.
	21	Rajshahi Nator Naugaon	" 18, '93	0·92 0·52 0·80	Weather—cold and cloudy. The rain and wet weather will facilitate ploughing of lands for the next crops. Pressing of sugarcane still going on. Some cases of small-pox among cattle reported from the Tanore thana. Fodder and water plentiful generally. Price of rice varying from 12 to 15 seers per rupee.
	22	Rangpur Kurigaon Nilphamari Gaibanda Ulipur	" 18, '93	0·42 0·08 0·38 0·22 0·23	Weather—cold and rainy. Prospects of standing crops good. Harvesting of mustard nearly finished. Ploughing for *aus* and jute vigorously going on. Common rice from 12 to 14 seers per rupee.
	23	Bogra Sherpur Naukhila	" 18, '93	0·73 0·70 0·78	Weather—cold and often wet. Most of the *rabi* has been harvested. Land is being prepared for *aus* paddy and jute with good prospects owing to the damp weather. Common rice sells at 13½ seers per rupee. Fodder and water sufficient.
	24	Pabna	" 18, '93	0·81	Weather—cloudy with occasional rain. Rainfall so far has done good, but more may cause injury. Hemp is being harvested and steeped. Price of common rice 12½ seers per rupee at Pabna and Rs. 3-6 to Rs. 4-12 per maund at Sirajganj. Condition of cattle good. Fodder and water-supply sufficient.
	25	Darjeeling Siliguri	" 18, '93 ...	0·08 0·44	Weather—clearer and more sun. Hoarfrost at night. *In the hills*:—Wheat, barley and *tori* progressing favourably. *Bhutta* and potatoes being harvested. *In the terai*:—State and prospects of crops favourable. Mustard and potatoes being harvested. Fodder improved by late rain. No cattle-disease. Prices of coarse rice:— Srs. Hills ... ... 11 } Terai ... ... 12 } per rupee.
	26	Jalpaiguri	" 18, '93	0·50	Weather—cloudy and cold. Prospects of *rabi* crops favourable. Mustard is being gathered; a 16-anna crop expected. Fodder and water sufficient. No cattle-disease reported. Common rice selling at from 13 to 14 seers per rupee.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr Feb. 18, '93 Begusarai ... Jamui ...	2·14 0·46 0·38	Weather—cold and cloudy. The rainfall of the week has done some injury to the poppy plants. Other crops doing well. Indigo lands being prepared. Prices of common rice :— Srs. Sadar ... ... 13 to 16 } Begusarai ... ... 16 } per rupee. Jamui ... ... 15 }
	28	Bhagalpur „ 18, '93 Banka ... Madhipura ... Supaul ...	1·56 0·33 0·28 0·27	Weather—cold. Outturn of mustard 14 to 15 annas. Yesterday's (17th) hail-storm and the late rain likely to injure the standing crops slightly. Common rice selling at 15 seers per rupee.
	29	Purnea „ 18, '93 Kishanganj ... Araria ...	0·55 0·49 0·39	Weather—cloudy with slight rain; becoming warmer. The rain has done good to the standing *rabi*. *Tori* and tobacco still being cut. Lands being cultivated for the next *bhadoi*. Fodder and water sufficient. No cattle-disease. Prices of common rice almost the same as before.
	30	Malda „ 18, '93 Shibganj ... Gajole ...	1·58 1·25 0·61	Weather—cloudy with rain on almost every day. *Boro* paddy still being transplanted. *Rabi* crops maturing and their prospects good. Price of coarse rice varies from 13 to 17 seers per rupee. Supply of fodder and water abundant.
	31	Sonthal Parganas „ 18, '93 Deoghur ... Godda ... Jamtara ... Pakur ... Rajmahal ...	0·85 0·50 0·47 0·62 1·04 0 69	Weather—very cold and cloudy. Prospects of all standing winter crops good. Rain has done a little injury to mango and *mahua* blossoms. Fodder and water-supply sufficient.
Patna Division.	32	Patna „ 18, '93 Barh ... Bihar ... Dinapore ...	0·52 0·42 0·43 0·28	Weather—cold and cloudy. The rain will do some damage to the matured mustard, gram, and peas, but will benefit sugarcane, *china* and the late sowing of barley and *khesari*. No damage has been done to poppy, and both *rabi* and poppy crops doing well, and general prospects good. Harvesting of *rabi* and extraction of opium going on. Prices of common rice :— Srs. Sadar ... ... 17 } Barh ... ... 12½ } Bihar ... ... 17 } per rupee. Dinapore ... ... 14 to 15 }
	33	Gaya „ 18, '93 Nawada ... Jahanabad ...	0·44 0·47 0·58	Weather—cloudy and very cold in the beginning and clear at the end of the week. Harvesting of peas and mustard commenced. Other standing crops doing well. Prospect of poppy good. Opium extraction and collection commenced. Common rice sells at 14½ seers per rupee at Sadar. Supply of fodder and water for cattle sufficient.
	34	Shahabad „ 18, '93 Buxar ... Sasaram ... Bhabhua ...	1·37 0·38 0·23 0·19	Weather—at present clear and bright; very variable in early part of week. Prospect of *rabi* still favourable, though probably damage has been done by the rain and hailstorm of the night before last. Poppy in flower and thriving. Sugarcane pressing in progress. Harvesting of pea begun in parts of Sasaram. No cattle-disease. Fodder and water sufficient. Prices stationary.
	35	Darbhanga „ 18, '93 Madhubani .. Samastipur ...	0 38 0·41 0·32	Weather—cloudy at intervals. Prospects of *rabi* continue favourable, but slight damage is reported to have been done to *rahar* and peas by the rain. Oil-seeds being gathered. Poppy doing well. *Mung* being sown. Prices remain stationary. Condition of cattle good.
	36	Muzaffarpur „ 18, '93 Sitamarhi ... Hajipur ...	0·92 0·79 0·49	Weather—cold and cloudy with occasional showers. *Rabi* crops, specially *rahar*, peas and *masur* in blossom, and tobacco injured by the rainfall to a certain extent. Fodder and water-supply ample. No cattle-disease.
	37	Saran „ 18, '93 Siwan ... Gopalganj ...	0·47 0·55 0·76	Weather—cloudy and rainy throughout the week. Fine to-day (18th) only. The rain has done some harm to peas, wheat, *arhar*, and poppy in Sadar and Siwan subdivisions. Other crops doing well. Fodder and water abundant. Agricultural operations stopped owing to rain and damp weather. Prices of common rice :— Srs. c. Chapra ... ... 14 0 } Siwan ... ... 13 2 } per rupee. Gopalganj ... ... 14 3 }
	38	Champaran „ 18, '93	0·95	Weather—very cold. Standing crops in full flower. The rain of the week has damaged to a great extent the *rabi* crops. At Sadar the poppy crop is in a very good condition; at Bettiah plants damaged by recent hail are looking up, and the rain has been favourable to plants, which are looking healthy and strong. Fields being prepared for indigo. Cattle in good condition with sufficient fodder and water.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
ORISSA.				
Orissa Divn.	39	Cuttack Feb. 18, '93	Not reported.	Weather—cloudy. Harvesting of *biri* and *mug* and other *rabi* crops nearly over; outturn fair from 12 and 13 annas to 16 annas at places. *Dalua* rice progressing well. Supply of fodder and water sufficient. Average prices of common rice:— Srs. c. Srs. c. Sadar ... ... 10 8 to 15 1 per rupee. Jajpur ... ... 18 6 to 21 0 per rupee. Kendrapara ... ... 15 0 to 20 0 per rupee. Banki ... ... 17 0 per rupee.
Orissa Divn.	40	Puri „ 16, '93 Khurda ...	2·29 1·03	Weather—cloudy. Harvesting of *sarad* over. Lands being ploughed for next *sarad* crop. *Dalua* paddy growing well. Miscellaneous crops thriving. Prices of common rice stationary.
Orissa Divn.	41	Balasore „ 18, '93	1·09	Weather—cool and stormy. Ploughing is going on in all parts of the district. Prices stationary. Fodder and water sufficient.
CHOTA NAGPUR.				
South-West Frontier Agency.				
Chota Nagpur Divn.	42	Hazaribagh Feb. 18, '93 Giridi ...	0·87 0·46	Weather—cloudy and damp, now clearing. Prospects good, but fine weather required now. Lands being ploughed. Common rice 13 to 15 seers per rupee.
Chota Nagpur Divn.	43	Lohardaga „ 18, '93	1·80	Weather—seasonable. Prospects of *rabi* continue good. Harvesting of *rahar* commenced. Common rice selling at 14 seers per rupee. Fodder and water sufficient.
Chota Nagpur Divn.	44	Palamau „ 17, '93	0·27	Weather—cold and cloudy. There has been rain in good many parts of the district. The rainfall is not favourable to the *rabi* crops. Prices stationary. Fodder sufficient. Cattle-disease in some parts.
Chota Nagpur Divn.	45	Singhbhum „ 18, '93	2·25	Weather—rainy and cloudy during the week, clear to-day (18th). Condition of crops good. Price of rice stationary.
Chota Nagpur Divn.	46	Manbhum „ 18, '93 Gobindpur ...	1·65 1·05	Weather—cloudy with rain at intervals. Harvesting of *rabi* crops almost over. Rice selling at from 10 to 14 seers per rupee. Fodder and water-supply sufficient.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, *i.e.* from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one or

for the week ending Saturday, the 18th of February 1893.

Variation from normal mean.	Mean 8 A.M. temperature.	Average humidity at 8 A.M.	Average cloud amount at 8 A.M.	Rainfall of week at observing station.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 18th of February 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 21st February* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 18TH OF FEBRUARY 1893.

IN the middle and close of the previous week a barometric depression had passed through the province and had given general rain, while following in the rear of the depression a wave of cold air had swept over the province, and hence the cold weather conditions had again became rather strongly developed, and the mean temperature on the 11th was in defect of the normal by from 5° to 7°. On the 12th a moderate to rather rapid decrease of pressure took place, while temperature was increasing rapidly, the increase varying from about 2° to 4°. Winds also became a little unsteady and were more or less southerly in many cases, so that there was a rather rapid increase in humidity, but weather still remained fine in Bengal with lightly clouded skies. On the other hand, on this day a barometric depression had appeared over North-Western and Western India, and this was travelling rather rapidly in an easterly direction, and on the 13th a shallow low pressure area existed over the Central Provinces and the west of Bengal, while a secondary depression had appeared in the Punjab. The depression which was affecting Bengal gave a moderate to rather rapid fall of pressure over the province, while the usual rapid increase of temperature took place, the increase equalling about 3° to 4°. Moist south-easterly winds set in over practically the whole province, the sky had clouded over, and a few rain showers were reported in the west and south of the province. On the 14th the depression had reached Orissa and the north-west of the Bay, where there was a distinct tendency to cyclonic circulation of winds, pressure had become below the normal by amounts ranging up to 0·08" at Gopalpur, while temperature began to fall at many stations owing to the fairly general rain which was reported in all districts except Orissa. On the 15th the depression had apparently filled up or passed away in an easterly direction, pressure was rising moderately rapidly, and temperature was falling, while fairly dry westerly and north-westerly winds were generally setting in. Weather therefore commenced to clear, and on this day the showers were comparatively few in number. On the 16th weather had become fine over practically the whole of Bengal, pressure was increasing moderately to rapidly, while the temperature changes were irregular and winds were a little less steady than on the 15th. Over the central parts of India, however, another shallow depression had formed on the 16th, and was passing in an easterly or south-easterly direction and it affected Bengal from the 17th, when an extremely rapid fall of pressure took place, the fall at some of the western stations exceeding a fifth of an inch, and pressure again became moderately in defect of the normal, while the mean temperature also remained from one to two degrees lower than usual. Winds had, however, again become south-easterly in connection with the depression at almost all stations, and fairly general rain was reported on this date from Bihar and parts of North Bengal. On the 18th, or the last day of the week, the fall of pressure continued over the eastern half of Bengal and over Orissa, while an increase had set in over the western districts, and hence the depression had again moved in an easterly and south-easterly direction, temperature had generally slowly risen and was in excess of the normal in the southern and south-western districts, while westerly winds were blowing over the western half of the province and south-easterly winds over the eastern half. The area of rainfall had also advanced in an easterly direction, and fairly general rain was received in South-West Bengal and parts of North and East Bengal and Chota Nagpur. Hence conditions at the close of the week were decidedly unsettled, and good general rain has again been received in nearly all divisions of the province.

Pressure.—The variations of pressure during the week have again been very large, but of more or less opposite character, so that the variation of the mean is small. The mean pressure for the week has been in excess of the normal in all except some of the western and south-western districts. Slightly defective pressures are thus shown in Orissa and in parts of Chota Nagpur, but elsewhere slight excess pressures are recorded, but the general excess is not larger than about 0·02", the largest excess being shown at the north-eastern stations.

Temperature.—The mean temperature for the whole province for the week has been in defect of the normal by 1·8°, but the defect has been mainly confined to South-West Bengal, South Bihar and Chota Nagpur, where it has averaged nearly three degrees. This defect has, however, been almost entirely in the day or maximum temperature, which at many stations have been from 5° to 7° below the normal, while the night or minimum temperatures have been nearly normal.

The distribution of temperature for the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the week:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 18th February 1893.

	Normal mean maximum temperature for the week ending 18th February.	Actual mean maximum temperature for the week ending 18th February 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 18th February.	Actual mean minimum temperature for the week ending 18th February 1893.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 18th February.	Actual mean daily temperature for the week ending 18th February 1893.	Variation of actual mean from the normal.

Rainfall.—Rather heavy falls have again occurred in all divisions: the falls have averaged an inch and-a-half in South-West Bengal, one inch in Chota Nagpur, and about three-quarters of an inch over the remainder of the province, and these falls have hence been in all cases rather largely in excess of the normal.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 18th of February 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; t, thunder; p, passing temporary showers; ⌓, dew; <, lightning.

C. Little,

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament, 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 18th February, 1893.

Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The HON'BLE J. T. WOODROFFE, *Offg. Advocate-General.*
The HON'BLE T. T. ALLEN.

LICENSED WAREHOUSE AND FIRE-BRIGADE BILL.

THE HON'BLE MR. COTTON said:—"At the last meeting of the Council I presented the report of the Select Committee on the Bill for the regulation of Warehouses and the maintenance of a Fire-brigade, and explained at some length, for the information of this Council and of the public, the principles which had guided the majority of the Select Committee in the preparation of the Bill which had been laid on the table. I have now the honour to move that, the report of the Committee be taken into consideration in order to the settlement of the clauses of the Bill."

THE HON'BLE MR. WOODROFFE said:—"Sir, the motion which I have the honour to move embodies the general principle enunciated in the dissent to the report of the Select Committee signed by the minority of that Committee. In presenting the report of the Committee to the Council at its last meeting, the hon'ble member in charge of the Bill, although there was before the Council no motion for the consideration of that report, took occasion to explain the principles upon which the majority of the Committee had proceeded, and upon which the view taken by the majority of the Committee would be maintained. I listened with considerable attention and great interest to the speech of the hon'ble member. I was naturally anxious to hear what might be said in support of the view of the majority, and as the hon'ble member's speech proceeded, I felt myself growing more and more interested, because, though it may be that I was in error in so thinking, I arrived at the conclusion that most of the observations which fell from the hon'ble member, tended rather to weaken than to support his contention.

"The principle, Sir, which is involved in the Resolution which I now move is, that the taxation of commercial interests for matters affecting the public good and the public convenience is opposed to all sound principles of political economy, and of those rules which govern the incidence of taxation in civilised countries. 'The general community are undoubtedly protected by the existence of a fire-brigade.' Those are words which I take from the HON'BLE MR. COTTON's speech; and the hon'ble gentleman in defending the principle of imposing a tax on the general community, which should be of light incidence, went on to say that, 'in recognition of the immunity which the fire-brigade affords to the general public, we have considered it fair that a low rate should be levied.' There can be no question, it seems to me, Sir, but that the community generally, and as such, is protected by the existence of a fire-brigade, and that it does afford such immunity to the community as the hon'ble member maintained. The hon'ble member's words are but an echo of a statement made on this subject by the then Lieutenent-Governor of Bengal in a letter dated the 15th of February, 1878, in which His Honour stated:—'The maintenance of the fire-brigade is an object in which all classes of the community are interested, and to which all ought to contribute.' This position is so clear that, it seems unnecessary to adduce arguments in support of it. It is a fact admitted by the hon'ble member in the speech to which I have referred. It is admitted in the Bill even as now framed that, there is immunity provided to the general public as such by the existence of the fire-brigade. It is sought, however, to distinguish and to show that that general rule is not to be applied to Calcutta. In other words, that to Calcutta the principle of taxation of commercial interests for the public benefit, for the public safety and for the public convenience is to be applied.

"I know of but two instances in which this principle has been accepted. One of them was in Egypt, but, under the administration of the noble Lord who is now at the head of affairs in Egypt, it no longer exists; the other is still in force in Calcutta. Some years ago, I read that when in Egypt it was desired for some reason to throw a bridge over a canal, the persons who were made to pay for that work were the boat-owners who passed under it. They did not particularly want the bridge, but the bridge compelled the boats to lower their masts and take down their sails; and it was accordingly considered but fair and natural they should be made to pay the tax. Calcutta

still retains, in the present system of taxation for the maintenance of the fire-brigade, this truly Egyptian policy. It taxes the commercial interest for the benefit of the public, and it is sought to maintain this untenable position upon the ground that, the commercial interest to a greater or a less extent shares in the benefit.

"The principle, Sir, for which I am contending has been recognised by the Legislature with growing distinctness both in England and in this country. In England, under the Act of 14 Geo. 3 C., 78, S. 75, it was provided that, fire-engines shall be kept up by the several parishes in and around the metropolis, and so until 1865 the law continued, when there was established the Metropolitan Fire-brigade Act, 28 and 29 Vic., C. 90. Between the Act of Geo. 3 and the Act of Her present Majesty, to which I have referred, it was found that the parishes were remiss in the discharge of the public duty which had been laid on them. Accordingly in or about the year 1833, the Fire Insurance Offices in London banded themselves together for the purpose of making proper and better provision for the extinction of fires than was then in existence. The Association was a purely voluntary one, and was, in the first instance, established for the purpose of extinguishing and preventing the spread of fires in or to buildings which were covered by insurances. The establishment was maintained at a large cost by the Insurance Companies, and shortly before the passing of the Metropolitan Fire-brigade Act in 1865, an arrangement was made with the Metropolitan Board of Works, by which the establishment which had been provided and maintained by the Fire-brigade Association was handed over to the Metropolitan Board of Works, and the value of the material so handed over was then estimated at about £30,000.

"On the passing of the Act, the funds necessary to be raised for the purposes of the Metropolitan Fire-brigade Act were obtained by a contribution, I think, of £35 per million from Insurance Companies, by the grant of £10,000 a year from the Government, in consideration of the services rendered or likely to be rendered by the fire-brigade for preventing fires in and the spread of fires to public offices, and by a general tax of a half-penny in the pound. Here there is a clear recognition of the general liability of the public to maintain a fire-brigade. Intermediately there had been passed an Act known as the Police Clauses Act of 1847, and many other public general Acts which authorised the maintenance out of rates to be levied thereunder, of the cost of firemen, fire-engines and other requisites for the extinction of fires and for preventing the spread of fires. And I may say that at the present moment, with, I believe, the exception of the boroughs of Salford and Liverpool, where under two local Acts the costs attending the extinction of fires are chargeable in the case of insured property upon the Insurance Companies, all the large cities in Great Britain and Ireland maintain their fire-brigades out of public rates. It is so in two cities in which there is a great deal of work carried on involving the use of inflammable materials. I allude particularly to the case of Belfast, in which there is a large ship-building industry, and to the case of Dundee, where there is a very large jute industry. So far as I have been able to ascertain, there is no city on the continent of Europe in which the inhabitants do not pay for the cost and maintenance of the fire-brigade. In many of these cities there are not the same strict rules, so far as I have been able to ascertain, as prevail in London and the large cities of Great Britain and Ireland in respect of the building of houses—rules which minimise to the utmost extent the risk of fires in those cities, yet in almost every instance in which I have been able to inquire into, the fire-brigade is maintained out of general rates.

"This principle has also received recognition in this country. In 1872, when a fire-brigade was first established, it was provided by the Act II of 1872 of this Council, section 29, that, the full amount of the charges of the fire-brigade, over and above the monies which might accrue to the Fire-brigade Fund under sections 25 and 26 of the Act, which are the fees and fines in respect of licenses and the contribution by insurance companies, should be contributed by the Justices of Calcutta and the Commissioners of the Suburbs in the proportion of $\frac{7}{10}$ths and $\frac{3}{10}$ths. By Act III of 1884 of this Council, section 69, the Commissioners at a meeting were empowered, so far as the municipal fund permits, to apply that

Fund to any works within the municipality of public utility calculated to promote the health, comfort or convenience of the inhabitants, and amongst other objects stated in that Act, and which fall within this description, I find the maintenance of a fire-brigade along with the establishment and maintenance of schools and the maintenance of hospitals. Probably the clearest and widest enunciation of this principle is to be found in the Act which at the present moment regulates the Municipality of Calcutta. By section 35 of that Act, all the properties vested in the Commissioners, and all funds received or raised by the Commissioners in accordance with the provisions of that Act, shall be applicable to the purposes expressly authorized by that Act. What are the purposes expressly authorised by this Act? Section 36, the following section, answers the question. It runs as follows:—'The purposes expressly authorised by this Act shall be held to include the objects connected with the public safety, health and convenience hereinafter specified, that is to say, No. 1—the payment of all or any portion of the cost of the fire-brigade for the extinction of fires in Calcutta.' Then follow a number of objects, and the section concludes with the words 'and generally all objects connected with the public safety, health or convenience.' That the Legislature in this country has therefore in unmistakeable terms given in its adhesion to the principle of the maintenance of the fire-brigade as a matter of public utility, as a matter which affects the public safety, health and convenience of the inhabitants, is beyond all doubt.

"Why, then, has Calcutta been singled out for exceptional treatment? In 1871, several fires occurred in jute stores situated in the central part of this city. The Chamber of Commerce, the Trades Association, the British Indian Association and several other public bodies presented petitions to the Government to take this matter into its consideration and to adopt measures calculated to promote the public safety, and to protect the public from the occurrence of fires. On the presentation of memorials to this effect to the Government, a Bill was introduced into this Council, which was afterwards passed into law as Act II of 1875, and I shall have presently to point out the entirely different state and condition of jute warehouses and places for storing jute as they were then known to exist, and as they exist now. Suffice it to say for the present that, they were then in a totally different state and condition from those in which they are now found. They were, as I shall show from the observations of the HON'BLE MR. BERNARD in introducing that Bill, in an absolutely different state from what they are now as shown in the very able report of my hon'ble friend, Mr. Lambert, in his capacity as Commissioner of Police.

"Even then when jute warehouses were in such a state as they were when this Act was passed, it was not then the intention of the Legislature to impose the whole liability for the maintenance of the fire-brigade on the jute industry. That is manifest from the fact that, that Act provides for the meeting of the deficit, if any, from the funds of the municipalities of Calcutta and the Suburbs. It imposed a scale of fees on jute warehouses, which ranged, I think, from Rs. 100 to Rs. 1,000 a year, and fees on insurance companies. For whatever reason it was, whether for want of adequate information as to the number of places for the storing of jute or from other causes I know not, but it is manifest that the scale of fees imposed on jute warehouses was excessive—grossly excessive; and from the income derived therefrom, for practically it is with that alone we need concern ourselves, the whole cost of the fire-brigade was maintained. That, with but minor alterations not bearing on the present question, is the state of the law as it exists at present. The rates were so excessive that between the month of August, 1875 and the month of April, 1881, there was paid away out of the Fire-brigade Fund a sum of Rs. 1,26,552. Who received the benefit of that sum? The Municipality of Calcutta—Calcutta in that wider sense in which it is now dealt with under Act II of 1888 of this Council. It received in August, 1875, a sum of Rs. 35,000 towards the widening of a lane near the Municipal Office, and a subsequent grant of Rs. 5,000 for the same purpose in January, 1876. In November, 1875, Rs. 16,275 was given to the Alipore Lock-hospital; in January, 1876, a grant of Rs. 10,000 was made to the Suburban Municipality, and in 1881, Rs. 60,000 was given for widening Chitpore Road. That the Act of 1879 when passed into law tended but ineffectually to

reduce the incidence of this taxation on commercial interests, is manifest from the fact that, in 1881 there was surplus money to the extent of Rs. 60,000 to be paid away.

"The law stood so until 1883, when it was found that, owing to the limitation of $\frac{7}{10}$ths as against $\frac{3}{10}$ths, and to the further limitation as to the amount to which the $\frac{3}{10}$ths should run up to, the jute industry had, in a great measure removed from Calcutta to the outlying Suburbs. In 1883, there was passed Act IV of that year, which is the existing law. It did away with the proportion of $\frac{7}{10}$ths and $\frac{3}{10}$ths. The insurance companies had been relieved by the intermediate Act, but it still made the Fire-brigade Fund pay $1\frac{1}{4}$ times the cost of the fire-brigade. Eighty per cent. of the collections under the head of fees were paid to the Commissioner of Police for the up-keep of the fire-brigade; twenty per cent. went to the Municipality of Calcutta for the collection of those fees. There can be but little doubt that, during all these years, the Municipality has made a very good business of it in respect of that 20 per cent. in addition to the sums of money which I have shown it has received.

"Speaking of this state of affairs, the late hon'ble member of this Council, Sir Henry Harrison, in introducing the present Bill into Council, observed that, 'the jute legislation had reached that position rather by the process of drift than by any intention on the part of the Legislature.' I would recall the Council from this policy of drift, and ask that the matter be put on the fair, proper and reasonable footing by the incidence of taxation being thrown on the community at large. Why, I ask again, is it that Calcutta has been singled out? This retrospect in the history of the legislation in respect of the jute industry shows that the municipality had, like spoilt children, been educated into the belief that, they had a right to be exempted from the obligations which naturally and justly fall upon them. They ask, why should the previous state of things be altered? Why, to use the concurrent language of the Indian Association and the Municipality, who seem to be entirely in accord in the present matter—why should there be at one bound this relief to the jute industry? Is it the contention of hon'ble members who support the Bill that, continuance in wrong-doing is ground for its maintenance in perpetuity? Surely not; what are other reasons, then, can be suggested? That which I have just mentioned seems to me to be the one which ranks first in the minds of all those who have expressed an opinion on this subject in accord with the majority of the Select Committee. As this Bill has been introduced into Council for the purpose of relieving the jute and other cognate industries from the unjust and oppressive incidence of taxation, I ask why should not the matter be fully considered, and if justice demands it, let justice be done?

"But it is said, Sir, that there are other reasons. It is suggested that there is a radical difference between Calcutta and cities elsewhere throughout the civilised world. I deny this radical difference. It is said that, it has been found impossible in those other cities to make a fair apportionment between the amount of rate to be levied from ordinary ratepayers and from those engaged in commercial enterprises; in other words that, Calcutta is different from every other city in respect of the fire brigade, and it has successfully attempted and overcome difficulties which have been found insurmountable in other countries. If others failed, I think we shall fail too. But I deny that it has been found impossible in other countries to make a fair apportionment between the amount of rate to be levied from ordinary rates and those engaged in commercial enterprises, because there has never been made any such attempt. The principle involved in this endeavour does not commend itself to those who understand the principles of political economy. As soon as one makes this attempt, he finds himself beset by the most enormous difficulties. The hon'ble member, with a courage worthy of a better cause, has not shrunk from the abyssnal depths of differential taxation, and has succeeded in producing a Bill which commends itself to nobody. The Calcutta Municipality does not like it; the Chamber of Commerce object to it, the Trades Association, have intimated their dissent from some details of the Bill; the Bengal National Chamber of Commerce is not satisfied with it, and the last contribution from the Indian Association, also falls foul of it and challenges it on the ground that, it contravenes the principles of Local Self-Government. I do not see that it interferes with the principles of Local Self-Government in the least. The first principle of Local Self-Government is, that

all classes should bear the burden necessarily incident upon them, and that individual selfishness should give place to public interests.

"What is the difference between the houses in other cities and the houses in Calcutta? It is said that in the residential quarters of Calcutta, houses are built of uninflammable materials. But what about the residences of the citizens of Calcutta, whose lives and property are just as dear to them as the people who live in the residential quarters? Go up to the top of the tower in the Telegraph Office, or any other place of height in Calcutta, and look down upon what is spread before you. What will you see? With the very small exception of the quarter which is known as Chowringhee and some quarters in the north of the town, you will find a large mass of residences of the poor which are distinctly of an inflammable character, and those you will find fringed round by streets and lanes of pucka-built houses. In every one of these houses fire may break out, and in this city fires do frequently break out in such dwellings.

"In Bombay, the cost of the fire-brigade is borne by a three-fourth per cent. rate; in Rangoon, it is paid for out of the general rates; in Madras, so far as there are any appliances for extinguishing fires, they are paid for by the Municipality. Calcutta seems to stand alone. The houses in the residential quarters of Calcutta are no less substantially built than those in England. The sole difference, so far as I am aware, between the building of pucka houses in Calcutta and the building of every house in every street in London, is, that there are almost universally wooden floors in London houses, whereas they are to be found in but few houses here. On the other hand, in the Metropolitan district, there is a far more extensive, and a far more careful application of the rules relating to buildings by which the risk of fire is minimised to the utmost.

"Further, it is said that the cost of the fire-brigade should continue to be borne, though not in whole, yet at least to the extent of a moiety by the jute industry and other cognate industries, because, first, of the state of things which existed in 1871, and which led to the establishment of the fire-brigade. In the proceedings of this Council of December, 1871, the HON'BLE MR. BERNARD, in moving for leave to bring in a Bill to amend the law for the registration of jute warehouses and to provide for the establishment of an efficient fire-brigade in Calcutta and the Suburbs, spoke as follows:—'In January last, there were 247 jute warehouses in Calcutta alone, besides those in the Suburbs.' I believe, if my information be correct, that the number of jute warehouses in Calcutta now is less than half of that number. The hon'ble member went on to say:—

'As hon'ble members of Council well know, the custom at many warehouses and pressing places was to leave the jute drums and loose jute out in open yards, and to spread jute clippings over the courtyard when a press might be at work. These jute yards were generally in the heart of the most populous parts of the city; some of them were in the midst of the mercantile quarter on the river-bank. It would be in the recollection of most of us that a few weeks back a fire broke out in a jute screw-house in the quay, and that fire, if there had been any wind, must have reached an adjoining jute store, it might have destroyed the quarter of Calcutta which contained all the chief warehouses of foreign goods, and it would probably have spread to the shipping.'

The hon'ble member further said:—

'A few days ago two Calcutta firms which had their offices and godowns on the quay, complained to the Magistrate against a jute warehouse next door to them. In the enclosure of their store, there were some 200 square yards of ground covered with jute clippings; the stack of clippings was 12 feet high and topped the wall of the yard. On one side of this yard, was a steam-engine and its fire; on the other, was a large forge constantly at work. If a spark had fallen from either of these fires on the jute clippings, and there had been any wind, a most disastrous fire must have been the result.'

"It was, Sir, to meet cases of this kind, and with reference to circumstances of this nature, that that Bill was brought in. But that is not now the condition of the jute warehouses and jute presses—far from it. Secondly, because it is stated that by far the largest number of fires of an important character occur in jute warehouses. The meaning of the phrase is wrapped in obscurity from the use of the word 'important.' What is an 'important fire?' Is it a fire in which the largest amount of property belonging to any one person is consumed? Surely not! Regarded by the community at large, the burning of a jute warehouse in which there may be thousands of bales of jute, disastrous though it may be to the individual, is less disastrous than a fire occurring in a basti, in which all the property of the inhabitants may be utterly destroyed,

and even their very lives may be at risk. Such fires spread with a rapidity wholly unknown to the conflagration in a jute warehouse. But turning from the question of injury to the individual, the risk arising from fires in bastis and tiled huts is far more dangerous, because more widely spread and less under control. That appears to me to be the real test of importance. In a letter from this Government to the Government of India, dated the 3rd of February, 1892, the HON'BLE MR. RISLEY wrote:—'The measure of liability to contribute is the risk of fire incurred, not the value of the property or the amount of possible damage.'.

"But how does the matter stand as regards the question of fires? The HON'BLE MR. LEE, then untrammelled by the weight of legislative responsibility, and speaking in his character of Chairman of the Municipal Corporation of Calcutta—took up the position that 'ninety per cent. of the property destroyed by fire during the four years, 1886 to 1889, belonged to the jute and cotton interest.' [The HON'BLE MR. LEE said:—'I did not use those words. Those words are not to be found in any letter or statement of mine.'] If I misrepresent the hon'ble member, I sin in excellent company. In a letter from the Government of India, dated the 18th of February, 1891, (Municipal) I find it stated, over the signature of the hon'ble member opposite (Mr. Cotton), as Secretary to the Government of Bengal, that in a letter from the Chairman of the Corporation of Calcutta it was stated that, the Commissioners of Calcutta also object to any portion of the cost of the fire-brigade being defrayed by the general rate-payers; they consider, on the contrary, that the fire-brigade should still be maintained by the jute industry, 'and they adduce the following arguments in support of their opinion that, 90 per cent. of the property destroyed by fire during the four years, 1886-89, belong to the jute or cotton interest.' That objection was made on behalf of the Municipality by the HON'BLE MR. LEE. Mr. Cotton writes:—

'The letter from the Chairman to the Corporation of Calcutta was forwarded by Government to the Commissioner of Police for an expression of his opinion. Mr. Lambert's reply, dated the 26th December, 1890, takes exception to the argument put forward by the Municipal Commissioners. It is argued that, of the fires which took place during the four years (1886-89), only 15 occurred in places licensed under the Jute Warehouse Act, against 123 fires in other places, and that the value of property destroyed by other fires almost equalled that destroyed by fires in licensed warehouses, the damage caused in jute fires being estimated at Rs 8,70,810, against Rs. 7,64,265 in other fires. Mr. Lambert shows that the strength of the brigade is in a great measure fixed with reference to the prevention of the spread of a conflagration not from jute warehouses which are surrounded by high walls, which confine the flames and minimise the danger of the fire spreading, but from bastis, woodyards, straw stacks, &c., when the risk of the conflagration extending to adjacent buildings is very great. The supply of water, he admits, is a benefit to the brigade; but he observes that, as a fact, out of the 138 fires which occurred during the four years, pipe-water was used in 37 only. The Commissioner of Police also observes that a contribution from municipal funds to the fire-brigade would not do greater violence to the principles of Local Self-Government than the contribution now made by the Corporation to public hospitals or to the cost of surveying the town of Calcutta.'

"Dealing with this matter, the Fire-brigade Committee in their report to this Government stated in their tenth paragraph that, the statement of fires furnished by the Commissioner of Police for the four years, 1886-89, though it showed heavy losses in jute warehouses, showed clearly that 'the numerical majority of fires break out in other places, and that it is impossible to deny that the general public derive much protection from the fire-brigade.' The reports of the Commissioner of Police as Chief of the Fire-brigade showed that, for the four years ending in 1892, that is from 1888 to 1892, out of 139 fires, only 10, that is to say 7 per cent. of the whole, occurred in warehouses licensed under Act IV of 1883, and that the property which was destroyed in those fires only came up to 23 per cent. of the total value of the property destroyed in the 139 fires which occurred during those four years. This dispels at once the statement as to the number of fires occurring in jute and cotton warehouses, and the value of the property destroyed in them Extending the statistics so as to cover the period of seven years from 1886 to 1892, it would appear, from a representation made by the Bengal Chamber of Commerce to the Secretary of this Government during the time that this Bill was going through the Select Committee, that there were during

that period 247 fires; that of these, there were 17 fires in buildings registered or licensed under Act IV of 1883; six fires of jute in unlicensed places, and 11 fires on board vessels in the river; and that the fires in other places not falling within the above category amounted to 213, that is to say, 86 per cent. of the fires which took place in Calcutta in the seven years from 1886 to 1892, both inclusive, were in places other than in licensed jute warehouses, or in jute stored in unlicensed places or on board vessels, and it further appears that the total value of the property destroyed in all these fires amounted to Rs. 28,42,000, of which only Rs. 8,37,500, or 29 per cent. worth of property, was stored in licensed warehouses. It cannot therefore be contended that, the fires in Calcutta were solely or even to the extent of one-half contributed or occasioned by fires in jute warehouses.

"That argument therefore fails. But it is said that, the legislation which was necessary in 1872 is necessary to be maintained now in a modified form. That also I question; and I question it on the same most undoubted authority, namely that of the Commissioner of Police, who is specially charged with the working of the fire-brigade, and to whose services and that of the fire-brigade staff Calcutta owes so much. The Commissioner of Police, after dealing with the assertion of the Municipality, that 90 per cent. of the fires in Calcutta are due to the jute industry, thus deals with the HON'BLE MR. COTTON's argument that, if it had not been for the jute industry, a fire-brigade would not be required in the efficient state that it is. The Commissioner of Police says in the letter already quoted:—'The strength of the fire-brigade is in a great measure fixed by the reference to the prevention of the spread of a conflagration, not from jute warehouses which are surrounded by high walls, which confine flames and minimise the danger of the fire spreading, but from bastis, woodyards, straw stacks, &c., where the risk of the conflagration extending to adjacent buildings is very great.'

"There is the source of danger indicated in clear and unmistakeable terms, and it is pointed out by the Commissioner of Police that, these buildings are now of a substantial character; that the measures taken to prevent the spread of fire from them are effectual, and that, when a fire breaks out in a jute warehouse, it is often beyond the power of any fire-brigade, however well manned and however effective, to put out the fire. But there is a thing it can do and which it does do. It prevents the spread of fire from the place or building in which it occurs to the adjoining buildings, by pouring water on it and in preventing the rise of sparks by making a free passage and isolating the fire, or by so keeping it under in the place in which it occurs that the danger is entirely removed or most materially reduced.

"In more than one of the objections put forward by the Municipality there is involved this patent fallacy, that the cost of the maintenance of an institution required for municipal purposes generally affecting the public health, safety and convenience is to be borne only or mainly by certain persons deriving a certain special benefit. That is not the principle of civic life. The principle of civic life is, that every citizen shall, in accordance with his means and property, bear the burden or cost of those matters and things which subserve the public benefit, health, convenience and safety, though he may derive no benefit from them at all. As well, may we have blind men protesting that they ought not to be bound to pay a lighting-rate because they cannot see and do not require light. A doctor will tell you that, there are men who are particularly susceptible to malarial influences. Shall a heavier sewage-tax be imposed upon them as being more likely to be affected from want of proper sewerage? Why impose a tax on the unmarried for education? You might ring the changes from one end to the other of the system of taxation and find yourself confronted with matters of this kind. In each case, the individual must contribute to the public good. It may be asked—And what is the benefit which jute warehouses receive if a fire is not capable of being put out? The goods therein must burn, and the private individual suffers loss, but the benefit to the public remains. The fire does not spread.

"Now a few words more as to the difference in the state between jute warehouses in 1871 and 1872, and the present time. I quote again from the HON'BLE MR. LAMBERT's report. He says:—

'The jute industry was, it would appear, required in the first instance to contribute to the expense of maintaining an efficient fire-brigade, because jute warehouses and yards were situated in the heart of the most populous parts of the city, and because loose jute was spread out and stacked in open yards often in close proximity to steam engines.'

"The hon'ble member no doubt had the speech of the HON'BLE MR. BERNARD in his mind. He went on to say:—

'Open yards for the storage of jute were to be found in the wealthiest quarters of the town, and the danger arising from this condition of the trade laid upon that industry the burden of contributing to the support, and eventually of solely supporting the fire-brigade. But this state of affairs has entirely changed during the past 18 years. The largest jute warehouses now lie outside the mercantile quarter of the city; loose jute is no longer stored in open yards, and jute presses and warehouses are now substantial masonry buildings, well adapted to stop the spread of fire. At the present time, there is infinitely less risk of the spreading of a fire in a jute warehouse than of a fire in a basti or the centres of the mercantile community in the native quarters of the town.'

"That is the deliberate opinion of a gentleman who knows what is the state of things. Before I pass on, allow me to supplement what I have said with respect to fires. Mr. Lee, in his report No. 33J., dated 1st July, 1891, on the working of the Licensed Warehouses and Fire-brigade Act in Calcutta during the year 1890-91, states in paragraph 8:—'No case of fire in any jute godown has occurred in the year under report.' In that year' there were 104 licensed warehouses on the register, and not one single fire occurred. Mr. Lee was succeeded by Mr. Ritchie, and he, in his report for 1891-92, paragraph 7, states:—'There was no case of fire in any jute warehouse during the year' That brings the matter down to last year. It cannot then be said that, jute warehouses are in themselves such a source of danger to the community at large as to justify any special taxation upon them. The large and vast majority of fires occur elsewhere.

"And now I proceed to show, in addition to what I have pointed out to the Council, basing myself on the authority of the letter of the Commissioner of Police, that the danger of fire from jute warehouses is minimised by the use of every possible appliance to check the spread of fire. I believe it will not be denied that, there is no instance of fire spreading from jute warehouses to any other buildings. Their own brigade and the manner in which the jute warehouses are constructed, obviate the possibility of this. Not only are these buildings now constructed of a substantial character, and the storing of loose jute in open spaces entirely superseded, but most important steps have been taken towards safeguarding them from the risk of fire. Everybody knows that a prudent man insures his place of business, and in order to secure favourable rates from Fire Insurance Offices, jute warehouses have been provided with various means and appliances for preventing and extinguishing and circumscribing fires. At Messrs. Ralli Brothers' press at Golabari there is a Merryweather's portable steam-engine kept standing ready for use at all times, and there is a special staff of firemen always on duty at night to work the fire-service. The suction-pipe from that engine is let into the water-supply tank, and delivery hoses are attached to the two discharge branch pipes ready for immediate work. Besides that, there are two portable manual pumps which can be worked by about 20 men each at all times ready for immediate action. In addition to these, there are 39 hydrants distributed all over the premises and connected with the main engine. Each hydrant has a hose box adjoining it, containing the delivery hoses, nozzles, &c. There is an aggregate supply of 10,000 gallons, and the tank belonging to this Press is supplied from the river.

"To such a state of efficiency has this Press come that they are not only absolutely independent of any fire-brigade, but they were in March, 1890, and 1892 able to give the greatest assistance, at the fires which took place at the Bengal Hydraulic Press and at Baliaghatta. In the latter instance, at a time when the resources of the fire-brigade were taxed to the uttermost in consequence of there being at the same time a fire at Howrah, at the Sibpur Jute Mills. The Strand Bank Press is another well-equiped press, and so is the Canal Press, which possesses a Tangye's duplex pump with piping laid throughout the works. In these two presses, the pumps are supplied with water from the river.

"I mention these among others which could be mentioned. In the largest and which, according to the HON'BLE MR. COTTON, are the most important fires which are likely to occur, the persons concerned are practically independent of the fire-brigade. Not only is the condition of fires in 1872 not in existence now, but the jute industry has practically rendered itself almost secure from danger from fires, and is almost entirely independent of the fire-brigade itself.

"But there are other reasons why this principle, supposing it were a fair and just principle, should not be applied to Calcutta. I have dealt with one of them, namely, that the state of things is such as to show that there is no obvious reason for applying this most extraordinary principle in the most extraordinary manner to this most extraordinary town. And it is this. At the present moment, money is contributed by the jute industry towards the funds of the town, amounting to Rs. 6,327 per annum. There were transferred to the Municipality various sums standing to the credit of the Fire-brigade Fund, amounting to Rs. 1,66,752, and those monies have been spent in making substantial improvements, and it must be assumed that, those sums would not have been transferred by the Government without a necessity for such improvements. Those sums taken at a moderate rate of interest have made the municipal fund better than it would otherwise have been by Rs. 6,327 per annum. The Corporation has laid out those sums in making permanent improvements, and it is but fair and reasonable to suppose that otherwise they would have had to raise money to effect those improvements and pay interest thereon, and that, by reason of those improvements, they have received increased rates and taxes.

"There is but little more I need trouble the Council with, and I apologise for the length at which I have dwelt on the subject. The principle at stake is of the greatest importance, in that the interests of Calcutta centre in its commerce. But for its situation at the bottom of the Gangetic valley, Calcutta would have no importance whatever among the cites of India. It is to this port that the principal wealth of this country in the shape of produce comes, and by the establishment of railways and river communications, goods imported from foreign countries find their readiest market, and are most easily distributed.

"Mr. Lee, in dealing with this point as a Port Commissioner, justly observed that, this port was the most heavily taxed in the world, and that for his part, he would most gladly shift from the port to the municipality anything which could be so shifted. If we proceed further in the way of legislation by imposing taxation on commercial interests, we may arrive at a time when Calcutta will be but little better than a first class municipality. A gentleman, now deceased, who was on the Committee of the fire-brigade, objected to the system of general taxation on the ground that, the tax would fall on land which is not inflammable. I do not believe that Calcutta mud is one bit more inflammable than London clay. But what makes the mud so valuable? It is that thereon there are built houses in which the commerce of Calcutta is carried on. Remove that commerce. You may do so by improper legislation, as the Legislature of Great Britain demolished the ship-building trade, the linen trade and the woollen trade of Ireland. This Government may by legislation in like manner bring about a state of things in which there may be left Calcutta land and nought but Calcutta land, and it would not need the services of a fire-brigade.

"For these reasons, I contend first that, there are no grounds for imposing this tax on any special industries, such as jute and cotton, oil or other materials dealt with by this Bill, but also that there are good and abundant reasons why they should not be so dealt with. As far as I can find out, the rateable value of Calcutta and the Suburbs, which come within the provisions of the Bill, amounts to about 210 lakhs. The hon'ble member the other day produced a statement containing, as he himself admitted, some considerable inaccuracies. That statement was not before the Select Committee, and could not be considered there. Taking 210 lakhs as the basis of the rateable value of property, it is perfectly clear that a ¼ per cent. rate, that is one-third of what is imposed in Bombay, would meet all the expenses of the fire-brigade. As to how that may be done, if the resolution which I am putting to the Council meet with its assent, is a matter for future determination It may be, for the reasons adduced by the HON'BLE MR. COTTON, that the incidence of this rate should fall

more on occupiers than upon owners, upon the ground that the property in houses is more likely to be destroyed than the house itself. The Council should not attempt the impossible, as the HON'BLE MR. COTTON has attempted to do. The chorus of disapprobation which has arisen against the differential taxation is proof positive that, the hon'ble member has not been able to answer the demands of every one, and whether this motion receive the assent of the Council or not, of one thing I am confident, that in a time to come, the principles for which I am now contending will meet with acceptance. They are the only sound principles which can be applied; they are simple in their application; they are equitable in their distribution; they adopt the broad principle that, in a community all members must alike contribute towards the public good, though they may not enjoy equal advantages.

"For these reasons, I have the honour to move that the resolution which stands in my name be accepted."

THE HON'BLE MR. LEE said:—"The amendment which stands in the name of the HON'BLE MR. WOODROFFE is moved by him chiefly in the interests of commerce, and it is mainly in the true interests of commerce, which are identical with the best interests of this city, that I oppose the motion. The learned Advocate-General began by referring to the present Municipal Act II of 1888 of this Council, and read the whole of section 35 and the beginning of section 36. Section 35 states that 'all property vested in the Commissioners and all funds received or raised by the Commissioners in accordance with the provisions of this Act, shall be applicable to the purposes expressly authorized by this Act', and section 36 mentions what those purposes are and enumerates them all; whereas the learned Advocate-General stopped short at the first of those purposes, viz., 'the payment of the whole or any portion of the cost of the fire-brigade for the extinction of fires in Calcutta.' (Section 36 was here read by the speaker in full).

"The learned Advocate-General did not read or refer to the section of real importance in this case, (section 37), which lays down what the duties of the Commissioners are. These duties are there categorically stated, and the maintenance of a fire-brigade is not included among them. The Commissioners have to provide for the payment of interest on the municipal debt, to complete and extend throughout Calcutta drainage-works, and open out and improve bastis (expending for these purposes annually a sum of not less than two lakhs of rupees), to maintain a water-supply, to make adequate and suitable provision for the cleaning and conservancy of Calcutta, the maintenance and cleaning of drains and drainage-works, the construction and maintenance of public latrines and urinals and a number of other sanitary objects which I need not enumerate; and finally they have to devote a sum of three lakhs a year to the improvement of the newly-added area. In referring to the maintenance of a fire-brigade as being the first of the objects mentioned under section 36, it escaped the attention of the learned Advocate-General that this proviso represents merely a 'paper transaction.' The whole of the cost of the fire-brigade is paid to the Municipal Commissioners under another Act, and it was therefore necessary that in this Municipal Act an enabling clause should be added, so that the Commissioners might transfer their receipts under the Fire-brigade Act to the furtherance of the object for which those receipts are collected. The proposal, then, that is now moved is, in effect, to add another to the list of duties drawn up by this Council and enumerated by section 37. Now it is not open to me to question the legality of this course, since it has the approval of the learned Advocate-General, nor will I contend that it is not in the present circumstances necessary. But it is, I think, most unfortunate that an amendment of section 37 of the Municipal Act should be brought forward in this way, because we are precluded from going into the details of the receipts and expenditure of the Municipal Commissioners. None of the sections of the Act, except, perhaps, those regarding the assessment of the taxes of Calcutta, received more careful consideration in this Council than those two sections—37 and 36—and that was so short a time as four years ago.

"The learned Advocate-General has observed that it is incumbent on the community to provide for the cost of education. Now that, I think, is certainly

an object for which the Commissioners might as fairly be allowed to contribute something as that they should be asked to pay the greater part of the cost of the fire-brigade. But what happened when that very proposal on the subject of education was before this Council? The Director of Public Instruction brought forward a motion that, the Commissioners of Calcutta should be empowered to spend money on other than primary and technical education. He even did not ask that the Commissioners of Calcutta should be compelled to spend a certain amount of money on other than primary and technical education. His speech was an extremely powerful one; he adduced arguments that seemed very hard to meet as to the desirability of the Commissioners contributing towards the cost of higher education. But how did the Council regard the matter, and how did they decide? I will ask the attention of the Council to the following words which Sir Henry Harrison delivered at the time. He said:—'I am bound to admit that, so far as the precedents and practice of Bombay and other municipalities are concerned, they are all against me. * * * * '

"My hon'ble friend referred to two arguments which might bear specially against his proposal. One is, that the proposal is against the weight of practice or precedent elsewhere. That argument cannot be met because he proved successfully that both practice and precedent are against us. He also referred to the argument that, heavy expenditure is required for the sanitation of Calcutta and the Suburbs, and that is the only argument I feel bound to press upon the consideration of the Council. The first point to recollect is, that Municipalities in India are essentially poor bodies; the Municipalities of Calcutta and Bombay are by far the richest in India, but yet their means cannot compare with the means at the disposal of civilized municipalities elsewhere. Calcutta has to levy its taxation almost entirely by rates on property, and the assessable value of property in Calcutta does not exceed £1,200,000 a year. It is considerably less than one-twentieth of the rateable value of London, and the population of that city is only seven times larger. It is less than one-tenth of New York with a population twice as large. It is less than one-fourth of Philadelphia with a population only slightly larger; so that the Calcutta Municipality cannot command anything like the funds of other large cities. But when we come to the question of expenditure, then we find that sanitation in Calcutta attains such importance that, so far from the expenditure being less, expenditure quite on the same scale as in English cities becomes obligatory. We are to have a large area in the most insanitary condition added immediately to the town. Nobody would say that the town itself is in anything like a satisfactory sanitary condition. The difficulty in adding the suburban area has been simply and solely this, that no one could suggest the sources from which the funds should come. The Amalgamation Committee was distinctly of opinion that about six lakhs ought to be added to the funds of the Municipality from some source. I myself formed a more sanguine estimate, and leaned to the opinion that, probably four lakhs might suffice. I took a more sanguine estimate than any other member of the Committee. Can anyone in this Council doubt that, as soon as the suburban area is added to the town, we shall have the fullest possible use for all the funds at the disposal of the Municipality?

"And here, I will interpolate that the latest estimate I have received for the drainage of the suburban area, prepared under Mr. Baldwin Latham's advice by the Engineer of the Corporation, amounts to Rs. 1,70,69,570, which may or may not be capable of reduction; and we have spent quite lately 15 lakhs for giving a water-supply to the Suburbs, and other large sums on sanitary works.

'I admit,' continued Sir Henry Harrison, 'that education is a legitimate subject of municipal expenditure, but I also maintain that it is a secondary object. It is not to be put on the same plane as the primary objects, such as the repair of roads, the removal of refuse, cleansing, sewering, supplying water, and in one general word *sanitation*. If education is to supplant any of these objects, would it be right? I put it to the Council whether, if Rs. 50,000 be taken from the purposes of sanitation and given to education, it would not be a mistake. That is a point on which I am so satisfied that, I must press this view on the attention of the Council.'

"On that occasion the learned Advocate-General, Sir Charles Paul, observed that he could not vote for the inclusion of assistance to higher education among the purposes on which municipal funds could be legitimately spent. He said:—

'If I could approach the subject of this discussion with the fact that the municipal funds of this town were unencumbered and in a flourishing condition, and with the assurance that the money which would be raised would be more than sufficient to supply all the wants of the town in respect of its sanitation, I would consider the present a proper time for discussing the question raised. Unless we are satisfied that the requirements of the Municipality can be met in this respect, we are not in a position to introduce another subject of expenditure. Therefore, I do not intend to consider or discuss the question whether, strictly speaking, municipal institutions are concerned in education or not, nor even the merits of the smaller proposition put forward by the Hon'ble Dr. Gooroo Das Banerjee in reference to the larger measure advocated by the Hon'ble Sir Alfred Croft. I wish to impress upon the Council that, the time has not arrived for these amendments. If I were perfectly satisfied that the funds now in hand were not all required for sanitary purposes in particular parts of the town of Calcutta, then, as I said before, the question would arise. So long as the municipal funds are urgently required for sanitary and other purposes, I would protest against enlarging the area of the subject to which they might be applied. I would not enlarge it beyond the purposes stated in section 39 of the Bill.'

"And how did the representatives of commerce vote? They and the Hon'ble the Advocate-General voted against the proposal. There were in the minority, Sir Alfred Croft, Mr. Macaulay, Mr. Reynolds and His Honour the Lieutenant-Governor—four votes against nine. The commercial members, Mr. Moore and Mr. Irving, voted in the majority. Mr. Allen, the Advocate-General, Sir Henry Harrison, Dr. Gooroo Das Banerjee, Dr. Mahendra Lal Sircar, Babu Kali Nath Mitter and Maulvi Abdul Jubbar completing the nine.

"A matter of the supremest importance to the interests of this city is, the rigid maintenance of the principle that its sanitary funds should not be whittled away. It is said that a special rate will be added to the rates that we have already in Calcutta on general property, and therefore there will be nothing taken from the receipts that now come in. I reply, Sir, that in fact it will not be so. For the last four years Sir Henry Harrison, and each year subsequently I, as Chairman of the Corporation, have asked the Commissioners, when the budget has been before them to consider whether, they ought not to raise the general tax above 9½ per cent. We knew that the water-rate, the lighting-rate and the sewage-rate were levied at their maxima. We were very reluctant to ask the Commissioners to raise the general tax because the four property taxes, coming as they do to an aggregate of 19½ per cent. on the yearly value of property, fall very hardly on the masses. It is with the greatest difficulty that many persons in Calcutta can meet the tax-payers' call; so that when the Commissioners were appealed to raise the taxes, they found that they could not, and they did not. It was thought that the objections to raising the taxes were greater than the benefits which could result. The taxes can only be raised to 22 per cent.: they are now, as I have said, at 19½ per cent. If the property taxes which are now so heavy in Calcutta be added to by a tax of even ⅓ per cent., it would simply mean that the collections will fall off, that the Commissioners will not be able to increase the general tax as soon as they otherwise might, or it may be that they will feel themselves compelled to even reduce the 9½ per cent. they are now levying to 9 per cent., or slightly over 9 per cent.

"The HON'BLE MR. WOODROFFE has referred to the case of Bombay, and has asked why, if a ¾ per cent. rate is levied in Bombay, a general rate should not be also raised in Calcutta? Now, Sir, I will take this opportunity of dealing the death-blow, if I can, to this pestilent comparison between Bombay and Calcutta, in the matter of municipal expenditure. In Bombay, the Commissioners received last year town duties to the amount of Rs. 8,40,222, and liquor license fees and tobacco duty fees, amounting to Rs. 3,29,900, making a total of over Rs. 11,70,000 from sources not at all available to the Commissioners of Calcutta. It is impossible for any one to ask the Commissioners of Calcutta to follow the example of the Commissioners of Bombay in their expenditure on education, police, the fire-brigade, and in their liberal policy of exempting from taxation charitable institutions, and in various other similar directions, unless and until the Government puts itself in the same position towards the Corporation of Calcutta that the Government of Bombay assumes towards the Corporation of Bombay. If it should happen that the Government of Bengal will make over to the Commissioners of Calcutta the canal dues, and a consi-

derable proportion of the license fees received from excise, then, or in like case, will it be possible for the Commissioners to incur any other expenses than those they have now to meet.

"As regards the difference between Calcutta and Bombay in this special matter of jute-licenses and the fire-brigade, I do not propose myself, Sir, to deal with that subject in detail. There are others present who can do so better and with more authority, but I will venture to call the attention of the Council to an extract from the last report on the Bombay fire-brigade. A list is there given of the fires where property to the value of Rs. 2,000 and upwards was destroyed: there were eight such cases, and only one of them was in a place where the material stored would have been taxable under our Fire-brigade Act, and there property of the value of only Rs. 2,000 was destroyed. The largest fire was in a house where Rs. 20,000 worth of property was destroyed: the next largest was of Rs. 13,500, and the next of Rs. 9,000 worth of property in houses, and actually the very lowest in the list was in the warehouse, where some loose cotton was destroyed I would ask you to compare that with the list in the last report that I have seen published in the Calcutta Gazette on the working of the Calcutta Fire-brigade, as the HON'BLE MR. WOODROFFE has referred to recent figures to show that, there have been of late few fires in jute houses in and near Calcutta. The supplement to the Calcutta Gazette of the 21st of September last contains a list of the fires during the year 1891-92 that occurred in Howrah. First, there is the fire in the Sibpur Jute Mills, where property to the value of Rs. 3,35,000 was destroyed. In all the other fires taken together, property to the extent of Rs. 760 was destroyed, such as here one tiled hut, there one stack of straw, there one boat load of straw, and the like. That is the list for Howrah only. I have said that I do not propose on this occasion, at all events, to go into the history of the fire-brigade, or the demands which the jute industry has made and still continues to make on the fire-brigade establishment; but that the jute industry should still continue to bear a considerable proportion of the cost of the brigade there can be no doubt, and that will be established by figures which will be given by my hon'ble friend, the Commissioner of Police.

"As I have been reported to have said what I never did say, and have been so reported, not only once, but twice, I endeavoured to correct the misapprehension in the Select Committee, but it escaped the attention of the Advocate-General or he would not have repeated the mistake to-day. I never used the words '90 per cent. of the property so destroyed by fire during the past four years (1886-89) belong to the jute and cotton interests.' I quite understand how the HON'BLE MR. WOODROFFE was misled, because those words appear in a letter from the Chamber of Commerce to the Government of Bengal in inverted commas. It says:—'Mr. Lee, Chairman of the Municipality, has committed himself in his letter No. 90 (J), dated 18th August, 1890, to the statement that, 90 per cent. of the property destroyed by fire during the past four years (1886-89) belong to the jute and cotton interests.' That would naturally lead any one to suppose that, I used those words. But what I wrote was this:—

'I append a statement of property destroyed by fire in the course of the last four years in the town, the suburbs and Howrah, which I have extracted from the Annual Administration Reports of the Commissioner of Police. It shows that Rs. 16,35,075 worth of property was so destroyed, and that out of this, no less than Rs. 14,45,109 was property of the jute and cotton interests. The ratio is nearly 90 per cent. No stronger confirmation could be needed of the fact that, this proportion, which holds for the last four years, is not higher than the proportion, which would be found to hold through a prolonged period, than is afforded by the insurance rates paid for different classes of goods and property. I am informed that the rate for insuring jute presses is Rs. 3½ per cent., and for jute warehouses Rs. 2 per cent.; while the rates for ordinary masonry house property and non-hazardous goods stored therein is, 1½ annas per cent. The proportion of Rs. 2-12 to 1½ annas is 88 to 3.'

"That was in the form of an argument. I appended a list of the fires that had occurred with full details. The reason that there afterwards appeared a misconception in the matter was due to the fact that, the Commissioner of Police in making out his comparative list excluded, from his list of fires that had occurred of property belonging to the jute and cotton industries, two large fires, in which a certain amount of jute gunny-bags only was destroyed with other property. One of those two fires burned Rs. 3,00,000 of property in the Port Commissioners' warehouse, containing gunny-bags and piece-goods. Simi-

larly, regarding another item of Rs. 10,000 worth of gunny-bags and tobacco destroyed by fire. These two being transferred out of the list of fires debitable to the jute and cotton interests, the percentage would be, of course, lowered; for it would make a total difference in the calculation, of twice Rs. 3,10,000, but my view is, that the only available method of taxing the jute interests at all is through the warehouses. We did try in Select Committee to find some other way of spreading the incidence of taxation on the industry, but found none possible. Finally, I would observe that even the calculation, as made by the Chamber of Commerce, showed that Rs. 8,60,100 worth of property belonging to the jute industry was destroyed in those four years as compared with other property worth Rs. 7,64,975.

"The speech of the hon'ble mover of the amendment divides itself into two parts—one to show that some alteration of the existing law is necessary, and the other to show that the alteration should be by way of imposing a general tax on property in Calcutta. As regards the first, I do not think it is necessary at this stage to enter into the details which will have to be considered when we come to decide how the taxation should be distributed. As regards the latter contention, I think that I have shown that, the Corporation of Calcutta is not in a position to accept the whole responsibility or any great portion of it, and that it would be unwise and wrong to try to put it on the general funds of the Municipalities."

THE HON'BLE MR. PLAYFAIR said:—"Twenty years ago the hon'ble member who then represented the mercantile community in this Council took exception to the original Fire-brigade Bill, as imposing 'a tax on persons for the benefit of the community;' and the merchants of Calcutta, upholding this view, have ever since expostulated against such a system of taxation, contending that as the whole community of Calcutta enjoys the protection of the brigade, the cost should be contributed by all through a municipal assessment. And while the merchants of Calcutta were pressing their views upon the Government of Bengal, it has transpired that the merchants of London, through the Association of Fire Insurance Companies, gave expression to similar views to the Metropolitan Board of Works, under date the 14th of January, 1886, and in these words:—

'The protection of life and property from fire is as much a public duty as are protection from murder and robbery, sanitary arrangements, maintenance of roads, &c., and, as such, it should in the interests of the community at large, be provided at the public expense. In cities and large towns the extinction of fires is the public duty of the municipal or governing body thereof, who are bound to make the necessary provision for the same, and to defray the cost out of the rates which they are authorized to levy for the purpose. The principle has been recognized by the Legislature, which not only on passing the Town Police Clauses Act, 1847, but in every other general public Act, authorizing the maintenance out of rates to be levied thereunder of firemen, fire-engines and other appliances and requisites for extinguishing fires, has not authorized any charge to be made for the use thereof in the case of fires occurring within the boundaries of any city or town to which such Act applies.'

"And, Sir, this representation is continued as follows:—

'Taxation of a commercial interest for matters affecting the public good and public convenience is opposed to all sound principles of political economy. It is never suggested that Life Insurance Offices should contribute towards sanitary improvements, or Marine Insurance Offices to the cost of harbours of refuge, lighthouses, &c., and yet they are no less interested in such works than are Fire Insurance Offices in arrangements for fire extinction.'

"The fire-brigade was established twenty years ago under Act II of 1872, on account of the then dreaded frequency of fires in jute godowns scattered throughout a wealthy part of the native quarter. Many of these jute press-houses and godowns were then situated in and around Clive Street and Radha Bazar, within gunshot of this Council Chamber; and owing to the lax manner in which jute was stored in inferior godowns and stacked in open yards, the trade was considered a source of danger to the community.

"The tax for the maintenance of the fire-brigade was, in consequence, mainly levied upon the jute trade. The trade has, however, remodelled itself, both as regards situation and working. Jute is now pressed for export in hydraulic press-houses, which are situated, for the most part beyond the town of Calcutta. There is no attraction to bring these back to within the limits of the town, and

the Justices who grant the licenses for warehouses will doubtless be careful to prevent their return. The press-house buildings, as they now exist, are of substantial masonry construction, mostly fireproof, and are equipped so fully with fire-extinguishing appliances and a fire-brigade staff of their own that, it has become a matter of indifference to them whether or not a public fire-brigade exists. The companies are encouraged to maintain this high state of efficiency by a liberal reduction or discount allowed in the rate of insurance, amounting to 15 per cent. according to the highest standard of efficiency, and to 10 per cent. according to a lower standard of efficiency.

"It is found that 6 of the largest hydraulic presses out of a total of 23 have become entitled to the full reduction of 15 per cent. and that the rest, with exception of 3, claim a reduction of 10 per cent. Eight of the press-houses are owned by native merchants. The conditions that carry these discounts are both practical and complete in themselves. To obtain a rebate of 15 per cent. of the premium, the establishment, according to the Insurance Schedule, must include—'A steam fire-engine, a manual fire-engine, boiler pumping-engine, fire-plugs, buckets, cans, extincteurs with, in each case, water (available from public or other sources), and with those sufficient to command the premises insured, and with a trained fire-brigade consisting of not less than 8 men.' The 10 per cent. allowance contemplates less efficient appliances, and stipulates for—'A steam fire-engine, or stationary fire-engine worked by steam or water, or fire-pump worked by steam or water, or fire-plugs with, in each case, water (available from public or other sources) and hose sufficient to command the premises insured.' These arrangements have been promoted in the interests of owners of press-houses and insurance companies, by the experience that, unless a fire in a peel of jute is discovered and extinguished when it commences, it burns itself out, and no public fire-brigade, however alert and efficient, is of the least use. Such being the case, owners of well-built, efficiently-equipped and isolated press-houses naturally not only demur, but strongly protest against being taxed for the maintenance of a fire-brigade, the head-quarters of which is situated one-and-a-half miles distant from them, and which has been chiefly of use in dealing with conflagrations in bastis and marts.

"The native jute mart is confined to Hatkhollah and to Durmahatta, situated on the river bank. The jute is for the most part stored in brick buildings. Fires are infrequent, and the owners do not insure. No instance has been reported of a conflagration having extended to neighbouring property from a fire breaking out in premises licensed under the Act. On the other hand, the whole community sleeps secure, knowing that, in the event of fire, the brigade is at call. Houses and dwellings between Chowringhee and Intally, between the Strand and Sealdah, schools, colleges, theatres, Government offices, godowns, stores, shops, are all protected by the brigade; and such being the case, I contend that the owners or occupiers are called upon to contribute generally to the cost. If the owners do not wish to do this, the brigade may be abolished. It is for the public to choose whether, they will control fires or pay higher rates of insurance premium.

"In no other country, and in no other city of this empire, is a particular industry separately assessed for the support of a fire-brigade. In Bombay, Madras and Rangoon the cost is defrayed by general taxation. In Bombay, cotton is not separately taxed, as it is with jute in Calcutta. Calcutta, therefore, stands out as the exception to a general common-sense and reasonable rule. The European and Native jute and cotton merchants naturally object to be so penalised. The practice, too, in Calcutta, is certainly not supported or justified by facts as to the occurrence of fires.

"The learned Advocate-General has pointed out that, during the past seven years only 7 per cent., that is to say, only 17 out of 247 fires, occurred in warehouses licensed under Act IV of 1883. The reports for the two years ending April, 1892, show that, no fires occurred in jute warehouses in that period. And it may be added that no fires in jute warehouses have occurred during the ten months of the current year. The owners and occupiers of licensed warehouses, therefore, protest that the history of fires in Calcutta in no way proves them liable to be assessed for the cost of a fire-brigade, when

the maintenance of that brigade is so plainly for the benefit of the whole community. The other fires include what may well be termed, the devastating conflagrations in bastis, when hundreds of houses have been destroyed, fires in wood and hay stores at the Port Commissioners' jetties, and in Government stores, including an important loss of property which lately occurred in the Government Clothing Department at Alipore, and, I believe, a fire once occurred in Government House.

"It is proposed by the present Bill that the rate of taxation on hazardous trades, for the most part represented by the jute and cotton industries, should continue at 10 per cent. of the municipal assessment, with a maximum fee of Rs. 750 for any one license, and provided that the total trade contributions shall not exceed 50 per cent. of the annual cost of the brigade. In effect, this points to taxation to the extent of 4 per cent. to 5 per cent. of the municipal assessment, or even more; whereas, if spread over the community, the incidence would not exceed ¼ per cent. In Bombay, the tax does not exceed ¾ per cent. and includes the provision of interest on a special fire-brigade loan. In other words, a godown to hold cotton assessed by the municipality at Rs. 8,000 would in Bombay pay a fire-brigade tax of Rs. 60, and in Calcutta, under the proposed Bill, will pay Rs. 750. If the cost of the brigade is spread over the community, this godown would pay about Rs. 20. Again, the Bill will operate most unfairly upon the small trader in comparison with the large. An Hydraulic Press Company at Cossipore, with an assessed valuation of Rs. 42,000, will be limited to a payment of Rs. 750, or about 1¾ per cent.; while a press-house in Calcutta, with a municipal assessment of Rs. 12,000, will also pay Rs. 750, or 6¼ per cent., and Babu Gooroogobind Shaw having godowns close by, assessed by the Municipality at Rs. 9,000, will also pay Rs. 750, or 8⅓ per cent.

"The Chamber of Commerce, at the suggestion of the Fire-brigade Committee, examined the subject very closely, with a view to arrive, if possible, at a differential rate that might be fair to all, and after careful study have had to abandon the attempt. I do not consider the efforts of the Select Committee have been more successful.

"The pressing trade has not always been a profitable industry. It continued unprofitable until a confederacy in the working of the Hydraulic Press Companies was inaugurated. This system of working is still of necessity upheld, but it yet implies that, while the companies have a combined capacity to screw forty-four lakhs of bales of jute in a season, only about sixteen lakhs of bales are screwed, because exporters find it more advantageous to screw elsewhere; and the port of Chittagong reaps the benefit. This is a matter of serious consideration to those interested in the port of Calcutta, and is of itself a warning that no unnecessary impost should be placed upon the trade of the port. The castor-oil industry, too, owing to the keen competition there now is with American mineral oil for lubricating purposes, is in no way fit to bear further special taxation, as is suggested by the Bill.

"The late Sir Henry Harrison considered that, the interest of the mercantile community of the town was of the first importance, and Mr. Harry Lee, Port Commissioner, lately delivered himself of the following clear opinion, which, I hope, will be echoed in this Council:—

'Nothing can be more certain than that the prosperity of the town is involved in the prosperity of the port, and that this is already an expensive port. These truths are so obvious that, we and the Municipal Commissioners and the Local Government must be alike alive to them; and any burdens that the Municipal Commissioners or the Local Government can with fairness remove from the shoulders of the port to the public, must undoubtedly be shifted.'

"There is still a further reason in support of the tax becoming a general rate. The history of the Calcutta fire-brigade is unique. The jute and cotton industries have not only paid for the up-keep of the fire-brigade; they have not only paid for establishments to collect the funds and towards pension funds, but they have also paid for the cost of establishing the brigade and, in addition, have been taxed to such an extent as to yield a very large surplus amounting to over a lakh and a quarter of rupees. This sum has neither been used to perfect the brigade nor to provide pension and depreciation funds; but it has been appropriated by the Municipality to widen streets and enlarge the lock-

hospital, I may add, to the utter astonishment of the whole mercantile community. If an account were now taken between the Fire-brigade Fund and the Municipality, these sums would, at 6 per cent. interest, represent a capital of Rs. 2,40,000 due by the Municipality. I take this rate on the authority of the hon'ble member, the Chairman of the Corporation, who elsewhere has remarked:—

'In fixing the rate of assessment for the Municipal Consolidation Act, it was considered, after the fullest argument, that no sane person would invest money in property in Calcutta, except in the hopes of securing considerably over 5 per cent. on his capital. Allowance was made for occasional disappointments, and an all-round rate of 5 per cent. was deemed fair.'

"If, therefore, the Municipality has been presented with these contributions and with a ready-made fire-brigade also, it will have obtained a gift from a single branch of trade that is without precedent. In Bombay, a loan of five lakhs of rupees was raised by the municipality to establish a brigade; and in London, the Metropolitan Board of Works paid £30,000 sterling to the Fire Insurance Association when taking over their brigade. It is clear that the jute and cotton industries have already done a very great deal for the general public good, and the commercial community consider that the time has come when, in common justice, they should be afforded the relief prayed for, and the justice of such has been admitted by Government since 1878, and declared, moreover, in the last Municipal Act for Calcutta passed by this Council, Act II of 1888. The mercantile community cannot be expected to rest satisfied until this is granted.

"In conclusion, I would venture to say that the Bengal Chamber of Commerce will never approach the Government of Bengal as a suppliant for legislative favours on behalf of any particular industry; but it will come, asking that just remedies may be applied to redress a grievance and remove a wrong which, in the present instance, the Chamber does."

THE HON'BLE MR. COTTON said:—"I only wish to trouble the Council with a very few words in reply to some of the arguments brought forward by the mover of this proposal and by the hon'ble member who has just sat down. At the last meeting of this Council, I referred to the principle maintained by the HON'BLE MR. WOODROFFE that, taxation in this matter of the fire-brigade should be evenly spread among all branches of the community. There is much to be said in favour of that principle, and the Advocate-General has supported it with conspicuous ability. But he certainly appears to me to have failed to recognise the peculiar circumstances of this metropolis. He has described Calcutta as an 'extraordinary' city. This is the language, as I understand it, of sarcasm; but if he had as thorough a knowledge of the town as I have, he would have used the word seriously. The position of Calcutta is not comparable to that of any large city in Europe. If there were no other difference, it would be this, that Calcutta is situated in the tropics or very near the border of the tropics. In a cold country fires break out repeatedly in residential houses and in shops, and they are due mainly to accidents occurring from the fires which are daily lighted in those houses. Fires at certain seasons of the year are burned in every room of each house. They are also due to the inflammable character of the houses themselves; to the large amount of wood used in the furniture, and in the wooden flooring.

"These are the circumstances which establish a radical distinction between European capitals and this city; and if there were no other reasons which justify a distinction being drawn in the source for the realization of funds fo the maintenance of a fire-brigade, this one would be sufficient. The fire-brigade maintained in European cities would have to be maintained in all of them, whether there were large commercial warehouses in those cities or not. But, as I observed at the last meeting of the Council, it can admit of no dispute that, were it not for the existence of commercial warehouses, principally jute warehouses, in Calcutta, the brigade of this city would never have been maintained at its existing strength. In London, the majority of fires that break out are in residential houses, and the greater portion of the time of the fire-brigade is taken up in extinguishing those fires. I shall be succeeded to-day by the HON'BLE MR. LAMBERT, who will be able to state to you, with more authority than I can, the proportion

of time taken up by the present fire-brigade in extinguishing fires in jute warehouses, and in other dwellings including bastis. He will tell you that there is no comparison between the amount of work done by the fire-brigade for warehouses and the amount done in bastis and private residences. And this is what I meant when I said that, the majority of important fires occurred in warehouses. By the word 'important' I mean important in the point of view of the fire-brigade. If a fire takes the brigade a week to extinguish, it is immeasurably more important than a fire which takes one hour to extinguish. Therefore it is that I said that, the majority of important fires occurred in warehouses, and that it was mainly on account of these warehouses that the brigade had to be maintained at its present strength.

"Now I shall recur to the observations of the HON'BLE MR. PLAYFAIR. He observed, and observed justly, that great improvements have been effected in warehouses where jute is stored—improvements which no doubt greatly reduce the risk of fire. But notwithstanding these improvements, Sir, it is still the case that jute warehouses pay a rate of insurance far and away above the rate paid by other buildings in this city. I attach great weight to this consideration. If it is a fact, and I am credibly assured that it is so, it is in itself sufficient to justify the special treatment of these warehouses by this Council. I hold in my hand a statement of the rates paid to one of the largest fire insurance companies in this city, and it is there stated that jute presses and jute warehouses pay a premium of 3½ per cent. That, in comparison with rates paid by other buildings, is absolutely a penal rate. Were it not that the jute contained in these buildings is an eminently inflammable material; were it not that there is great risk of this jute taking fire, such a high rate would certainly not be levied; and so long as the rate levied on jute warehouses is out of all proportion higher than the rates of insurance levied on other buildings in this city, so long will it be justifiable to levy a special fee from these warehouses on account of the maintenance of the fire-brigade. This is a further reason why, in the opinion of the majority of the Select Committee, it was considered fair and reasonable that jute should still continue to pay special rates for this purpose.

"I entirely agree that it is exceedingly unfair that, the jute industry should continue to pay the whole cost of the fire-brigade. I recognise that the general community is undoubtedly benefited by the maintenance of the brigade, and that they should pay some share of the cost; and this principle we have endeavoured to give effect to in the Bill before you. But it was also recognised by the majority of the Select Committee that, considering the inflammable nature of jute, it was reasonable that it should still continue to pay a large proportion of the cost. The Hon'ble the Advocate-General observed that the differential rates of tax contemplated by the Bill must be bad because they were condemned on all sides. Now, Sir, it is my experience that every measure of taxation will be opposed by people who are called upon to pay the tax, and I would indeed have been surprised if the Municipality, represented in this Council by my hon'ble friend, the Chairman of the Corporation, and other hon'ble members, who are also members of the Corporation, should have accepted with equanimity those additional charges upon the public which the Bill contemplates. I should have been surprised if the hon'ble gentleman who represents the Chamber of Commerce should not have protested on behalf of the jute interest. It is natural also that, those who represent the other particular interests affected should protest against any new form of taxation imposed upon them. But when I observe that the Bill is opposed to the bitter end on both sides, that on one side, it is argued that the whole rate should continue to be borne by the jute interest, and that on the other hand, my hon'ble friend, the Advocate-General, says:—'No, there should be no special rate on any commodity or any interest; let there be an equal rate on all alike.' When I see these extreme views taken up, I am disposed to think that we have adopted the only fair and equitable course, which I have been told more than once is impossible, when we have tried, as we have done, to steer a middle channel avoiding either extreme, and to impose a differential rate in proportion to the inflammability of the commodities affected and the degree of protection afforded and benefit derived."

THE HON'BLE MR. LAMBERT said:—"I desire to say briefly why I am unable to support the amendment brought forward by the learned Advocate-General.

If the question now before the Council was the establishment in Calcutta of a fire-brigade for the first time, no doubt the case made out by the Advocate-General would be a very strong one; but the matter now under consideration is not, whether a fire-brigade is to be maintained, but who is to maintain it, whether, in fact, any change is to be made. Therefore, before those principles which were accepted twenty years ago regarding the impost of taxation are set aside, we should not lose sight of the causes which rendered it necessary to establish and maintain an efficient fire-brigade. Up to 1872, Calcutta had no brigade worthy of the name; but in 1871, serious fires had broken out, endangering the safety of the town, and these fires were caused by the laxity with which the jute trade was conducted. Therefore, several bodies—the Chamber of Commerce at their head—pressed on the Government the necessity of bringing the jute trade under better supervision and of organising an efficient brigade; and so in 1872, a fire-brigade was formed—not so large or costly as that now maintained, but that was the beginning of it. At first, steam fire-engines were stationed only at the head police office. Then the jute industry spread to the suburbs of Chitpore and Cossipore, and the cry was, that better protection against fire was needed there. So in 1887, an out-station was established at Chitpore at an outlay of about Rs. 40,000. Meanwhile the Act had included Howrah, and it was soon urged on the Commissioner of Police that the fire-brigade arrangements, which had been sufficient for the general community at Howrah, were altogether insufficient for the protection of the jute industry there. So in 1889 at Howrah, too, an out-station was established at a further cost of about Rs. 40,000. It will be noticed that these large outlays have been incurred in recent years. Now it seems that having got its fire-brigade, the jute industry want some one else to maintain it.

"It has indeed been suggested that, at the large mills and presses the appliances for extinguishing fires are now so complete that the fire-brigade is not wanted. But this statement has yet to find general acceptance. So far as I am aware, at only one press is the equipment on such a scale that a large fire could be dealt with. At several others, something has been done to provide fire-appliances, but more, I think, to satisfy the insurance offices than to be prepared to extinguish a serious fire. Certainly the owners of the smaller warehouses, numbering about 160, have no fire-appliances at all. My experience is, that when a fire breaks out in a jute press, all who are interested—owners, managers and fire insurance agents—are on the look-out for the arrival of the brigade; and generally those interested in the fire, detain the brigade on the spot long after in the opinion of those responsible for the working of the brigade think that it could be removed without risk. Certainly, these jute fires tax the resources of the brigade more severely than any other fires. How great is the strain is shown by the average period at which the brigade is employed at such fires. The records for 1888 to 1892 show this. During this period, 15 fires occurred in licensed buildings; and the average duration of the employment of the brigade at each fire, was a little over three days. During this same period, 141 large fires occurred in other places, and among these was the fire at Baliaghata, which lasted seven days. Yet the average period of attendance at these 141 fires was only five hours—five hours against three days!

"Taking into consideration, therefore, the fact that, in Calcutta the strength and cost of the fire-brigade has been fixed chiefly to meet requirements arising from the jute trade, I see no reason why that industry should now be relieved entirely of its liability to maintain the brigade. But there are good reasons why the burden should be lightened. Among these reasons I may name two: one, that the conditions under which the trade is now carried on are widely different from those which existed twenty years ago, and that the risk of a fire spreading to contiguous buildings is thereby very greatly diminished—I cannot say with the learned Advocate-General entirely removed, for it is not the case that fires in press houses never spread outside of the press premises. I can quote one serious instance. On the 20th December, 1888, the Canal Jute Press caught fire, and the damage sustained amounted to Rs. 4,00,000. Sparks flew from this press, and ignited a large flat lying on the river laden with 17,890 maunds of jute, valued at Rs. 1,19,490, and the whole of this cargo was destroyed. My second reason is, that experience has shown that the general community benefits

largely by the maintenance of the fire-brigade, which is now wholly supported by the jute industry. During the last ten years, the brigade has attended at only twenty-five fires in licensed warehouses, against 219 fires in bastis and 107 other fires. Therefore the jute industry is, in my opinion, entitled to very substantial relief. What that relief should be, will be best considered when the clauses of the Bill come under discussion."

THE HON'BLE MR. WALLIS said:—"It would scarcely have been necessary for me to have addressed the Council on this occasion but for a remark which had fallen from the learned Advocate-General in the course of his speech to the effect that, the Calcutta Trades Association had expressed its dissent to some of the provisions of the Bill, although in accord with its general principles. As Master of that Association, I deem it expedient to point out that, I am yet to learn in what way the Committee of the Association dissent from the provisions of the Bill. The Bill, as amended, has been considered by the Committee, and they are in complete accord with the principles of taxation recommended. The suggestions put forward by the learned Advocate-General and supported by the HON'BLE MR. PLAYFAIR are not such as are likely to commend themselves to the approval of this Council, as they fail to adduce any grounds for the imposition of a general rate, which have not already been duly considered and rejected. It will be within the recollection of hon'ble members that, throughout the discussions which have taken place in connection with the raising of funds for the up-keep of the fire-brigade, this question of an all-round rate to be levied on the general tax-payer by the municipalities has from time to time been advanced, has often to be put on one side as wholly unsuited to a place like Calcutta, where the risk of fire in the majority of buildings is so remote, and where the danger from warehouses for the storage of goods of a highly inflammable nature and in bastis presents the opposite extreme. Owing to the continued representations made to Government by those concerned, a Resolution, dated the 18th of February, 1891, was issued by this Government, appointing a most influential and representative Committee for the consideration of the question in all its bearings.

"This Committee held its first meeting on the 7th of April, 1891, at which those present were unanimous in the opinion that, it was manifestly unfair that any one industry should be saddled with the entire cost, as it was impossible to deny that the general public derived much benefit from the brigade. At this meeting it was admitted that, the jute industry should be taxed to the extent of one-half of the total cost of the brigade. At the second meeting, held on the 14th of April, this question of a general rate was freely discussed, but the majority of those present decided against its imposition; and at each of the five meetings held by this Committee, the question was brought forward, but was as often vetoed, the Committee being of opinion that it was not desirable to place all buildings on an equal footing, and finally recommended that the cost should be met by several industries of a more or less hazardous nature, and partly by the general tax-payer. These lines have been followed in the Bill as amended.

"In like manner, when the Bill (as originally drafted) was referred to the Select Committee of this Council, this point of a general rate was discussed at great length, but the majority were against its adoption, accepting the principles set forth by the Committee of 1891. It may, therefore, be accepted that, the consensus of opinion of those most competent to judge is, that a differential rate is more suited to Calcutta than a general one. The Bill as now amended recognizes the claim to relief put forward on behalf of the jute industry; it provides that, goods of a less hazardous class shall pay a lighter rate than that imposed on highly inflammable goods; that bastis shall contribute a half per cent. rate, and it affirms the principle that, the general public should, in a still lesser degree, (*i.e.*, ⅛ per cent. on the value of property as assessed for municipal taxation), help in maintaining an institution, having for its objects the protection of life and property from fire.

"It, therefore, seems to me, Sir, that the recommendations made in the Bill must meet with the approval of the majority of the members of this Council, as being perfectly equitable in all the provisions referring to the raising of funds to meet the cost of the fire-brigade."

THE HON'BLE MR. RISLEY said:—"I wish to say a very few words in support of the arguments in favour of the general principle advocated by the learned Advocate-General. He has laid stress very justly on the impolicy of imposing a special tax on a special branch of industry. Whilst his speech was going on, I was reminded of the analogy between this and the special rates charged on special crops of land. I venture to say that if we were now discussing a Rent Bill, no words would be too bad, which for the rapacious landlord who should impose special high rátes of assessments on specially valuable crops. This case is just the same. It deals with an industry which is specially valuable and profitable—an industry which has brought prosperity to Calcutta by drawing trade to it—and you set to work and discourage the trade generally by imposing a special property tax on those who are engaged in the industry. Under similar circumstances, a Continental Government would give the trade a bounty, as France and Prussia actually do in the case of beetroot sugar.

"Moreover, it is difficult to say, when you come to consider it, where this principle is to stop. It admits of almost unlimited application. You may tax horses and carriages and apply the proceeds to keeping up the roads, you may tax unwholesome trades for sanitation, and the dealers in indigestible articles of food for the support of the hospitals. Certainly, if you carry the principle to its logical consequence, so far from taxing the jute trade for the support of a lock-hospital, you would be bound to impose a poll-tax on the *demi-monde* of Calcutta. In that case, at any rate, there would be no question about the persons taxed getting their money's worth, which is more than can be said in the case of the jute warehouses. These, indeed, derive comparatively little benefit from the tax, because, as I understand, jute warehouses and presses have been much improved in their construction, and any fire which may break out will be pretty well circumscribed, as each building is surrounded by a high wall, and most of them are provided with fire and manual engines and extincteurs for the extinguishing of fire, so that the fire can hardly spread further.

"There is, moreover, another reason why persons connected with the jute trade do not benefit by the maintenance of a fire-brigade, because it is absolutely out of the question for the fire-brigade to think of putting out a fire which has once broken out in a jute warehouse; and further, the general public are probably less injured by jute fires than by fires in other cases. The premises are carefully guarded, and the fire has a less tendency to damage the property of the general public than a fire which occurs in a basti. On the other hand, a fire occurring in a basti has a greater tendency to spread.

"Then there is the question, of the value of the property destroyed with reference to the proportion of the cost of maintaining the brigade. We ought to look to the interest of the general public. The general public do not know what may be the value of the property destroyed. What concerns them is, whether a fire is liable to spread. In the case of fires in jute warehouses, we are told that the fire is not liable to spread. In the case of a basti fire, it spreads so rapidly that the whole basti is on fire before the brigade can arrive at the spot.

"Then there is a minor point as to the advantage of uniformity in legislation. If we are to legislate on any particular subject, it is no doubt a good thing to be guided by the experience of the rest of the world. We have had reference made to English experience, and to the practice at Bombay and Madras and Rangoon. I have also looked up the question, and find, as far as I have been able to ascertain from the authorities to which I have had access show, that the obligation of maintaining a fire-brigade is regarded on the Continents of Europe as strictly a municipal obligation. Endeavour is made to restrict fires as much as possible by having very strict building regulations expressly with the object of preventing the occurrence of fires, and I know that houses on the Continent are very much more carefully built, so as to prevent the occurrence of fires, than are houses in England."

THE HON'BLE BABU GONESH CHUNDER CHUNDER said:—"I should have had no hesitation in supporting the recommendation of the Select Committee if I found

that it was proposed to distribute the incidence of taxation on account of the fire-brigade on all those who derive benefit directly from it; but as I find that it proposes to levy a rate not only on basti lands but on pucka houses and other lands, I do not agree with the Committee. The Bill, as amended by the Select Committee, enables the Commissioners to levy a rate of eight annas per cent. on all basti lands, and a rate not exceeding two annas per cent. on all pucka houses and other lands. The amendment of the learned Advocate-General, if carried, will have the effect of reducing the rate from eight annas to four annas per cent. on basti lands, and of increasing the two annas rate on houses and lands to four annas. We all know that bastis are occupied by poor people, and any measure which will tend to lighten the burden of these people, should have our support. I entertain a very strong view that pucka houses in this city ought not to bear any share of the cost of maintaining the fire-brigade, and as I find that the learned Advocate General's proposal of this all-round tax of four annas per cent. on occupiers of premises will lessen the burden on bastis, I think I cannot do better than support his amendment."

(*To be continued in the next Gazette.*)

C. H. REILY,

Assistant Secretary to the Government of Bengal,
Legislative Department.

CALCUTTA;
The 28th February, 1893.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE OPIUM DEPARTMENT FOR THE YEAR 1891-92.

REVENUE DEPARTMENT—OPIUM.

Calcutta, the 18th February 1893.

RESOLUTION No. 1020.

READ—

The Report on the Administration of the Opium Department for the year 1891-92 (1st September 1891 to 31st August 1892).

General.

The opium year 1891-92 is the fourth in succession with an unfavourable record—a record worse by far than of either of the two years immediately preceding. The total area engaged for in the two Agencies was 799,771 bighas. Poppy was actually sown on 787,041 bighas, but the crop failed on 45,178 bighas, or over 5½ per cent. of the area sown; the net area of cultivation was thus reduced to 741,863 bighas against an average of 770,208 bighas during the three years, and 836,358 bighas during the nine years preceding. The abandonment of the policy of extending cultivation when the outturn of the seasons has been so deficient as to diminish seriously the quantity of opium held in reserve, and the disappointment of the cultivators during several years consecutively, are the principal causes of the diminished area of poppy cultivation. In the four years preceding 1888-89, the average gross yield of crops in a year was 55,000 maunds, and the average produce per bigha a little above 5 seers in the Bihar Agency, and 65,120 maunds and 5¾ seers respectively in the Benares Agency; but during the three years immediately preceding the year of report, namely, 1888-89 to 1890-91, the average gross yield amounted to 38,035 maunds only, and the produce per bigha to 3⅝ seers in Bihar, and in Benares to only 44,198 maunds and 4⅔ seers respectively. There is, however, another factor which is steadily gaining importance, namely, the competition with other commercial crops, chiefly tobacco, oilseeds, potato and sugarcane, which are less delicate and more remunerative in an average year than poppy. There are no data for the Bihar Agency regarding the extent to which poppy has been supplanted by other crops. The report of the Land Records Department, North-Western Provinces, of the kharif season ending with 31st December 1891 in those Provinces shows that the area sown with sugarcane during that season was in excess of the area of the preceding season by as much as 402,900 bighas. Some European firms are reported by the Benares Agent to have organized a regular system of advances to stimulate the cultivation of cereals which, for the last few years, have commanded high prices. Poppy is no longer cultivated on the best of the soil everywhere, and, as observed by the Opium Agent, Bihar, it must be satisfied with such land as it gets, while Government must trust to more efficient supervision and to the grant of more aid in the way of loans for irrigation to secure better outturn. It may also perhaps be necessary, if the rise in the price of other produce continues, to raise the Government price of opium by 8 annas per seer, in order to keep pace with that rise. It is reported by the Bihar Agent that a well-known planter of Tirhut cultivated 30 bighas of land formerly under indigo with poppy last year, and that, encouraged by the success obtained, five more planters intend to try the experiment during the current season. The land which these planters are expected to devote to poppy cultivation during the present season is 75 bighas. These figures as yet are too insignificant for any general conclusions. It may be anticipated, however, that a successful season now will do much to restore the popularity of poppy cultivation.

Outturn.

2. In spite of the decrease in the area of cultivation, and the dryness of the season (the monsoon having closed early and hardly any rain fallen during the winter), the prospects up to the end of February continued favourable and promised a good outturn. But the setting in of strong westerly winds at the time

of gathering the produce entirely upset all previous calculations, and proved to be particularly disastrous by drying up the juice which exudes from the capsules when lanced. These disadvantages were further aggravated by the occurrence of hailstorms in portions of the Benares Agency. The produce, reduced to a standard of 70 per cent. consistence, amounted only to 31,955 maunds 19 seers 2 chitaks in the Bihar Agency, and to 38,490 maunds 10 seers 13 chitaks in the Benares Agency, against 38,759 maunds 3 seers and 44,373 maunds 19 seers 2 chitaks, respectively, during the previous year. The total produce was 70,445 maunds 30 seers against 83,132 maunds 22 seers in 1890-91, and the average produce per bigha was 3 seers 6½ chitaks in the Bihar Agency and 4 seers 3 chitaks in the Benares Agency, against 3 seers 12⅝ chitaks and 4 seers 8 chitaks, respectively, in 1890-91. In the Bihar Agency the average produce per bigha was highest in Tehta, Gaya, and Shahabad, where it was 4 seers 2½ chitaks, 4 seers 2 chitaks, and 4 seers 0¾ chitaks, respectively, and lowest in Tirhut, where it was 1 seer 3½ chitaks. In the Benares Agency the highest average was in Ghazipur, 4 seers 13¾ chitaks, and the lowest in Etawa, 3 seers 8¼ chitaks. The average was higher in Gaya, Basti, Mirzapur, and Faizabad than in the previous year.

Manufacture.

3. The amount of provision opium manufactured during the season was 20,846 chests, eight cakes, in Bihar, and 12,833 chests in Benares, which was less than the quantity manufactured in the previous year by 988 chests, 12 cakes in the former, and 9,855 chests in the latter Agency. The great disparity in the outturn of the two Agencies is accounted for by the fact that more than 9,000 maunds of the Ghazipur drug, which was of too high a consistence for Benares provision opium, the standard consistence of which is 71°, were transferred to Bihar and there manufactured with the produce of that Agency for Bihar provision opium, of which the standard consistence is 75°. In consequence of abnormal climatic conditions, the consistence of opium at both the Agencies was unusually high, Bihar opium being manufactured at an average consistence of 77°, and Benares at an average of 74°, the former being two degrees above the standard and the latter three degrees. The fact of the standard consistence of the Benares provision opium having been raised from 70° to 71°, has been publicly notified.

Reserve.

4. The number of chests to be sold in 1893 has been fixed at 43,704, and the reserve on the 31st December 1893 will fall to 1,947 chests of Patna opium, with a deficit of 33 chests of Benares opium, which will have to be provided in 1893, contrary to the usual practice, from the manufacture of the produce of the cold weather of 1892-93. The prospects of the current season have been hitherto reported to be above the average, but experience has shown how delusive such forecasts may prove in the case of opium. Should the results of the outturn of the cold weather crop of 1892-93 be again unfavourable, the question of the reserve will, as the Board observe, assume a serious aspect.

Receipts and expenditure of opium.

5. The principal point in the Board's report which the Lieutenant-Governor has to criticize is the difficulty of finding out what the actual receipts and expenditure of opium were. The statement given in paragraph 4, page 1 of the Board's Report shows the quantity produced in the year, and the amount of provision opium, but does not include excise opium or opium manufactured for medical purposes. The Board are requested to devise a clear statement in maunds and seers reduced to a uniform consistence, of opium in stock, opium received in the year, opium used in different ways, and balance in stock at end of the year. The accounts give the expenditure in cakes, maunds, and chests, which is somewhat confusing.

Nepal opium.

6. The quantity of Nepal opium delivered amounted to 136 maunds only, against 157 maunds in the previous season. It is reported that the bad season was felt in Nepal also. Under the orders of Government, Nepal opium will in future be received from the Nepalese cultivators direct on the same terms as opium brought by British subjects, as the arrangement under which this opium used to be supplied through an intermediary approved by Government was found to be unsatisfactory.

Expenditure.

7. The expenditure in the Bihar Agency amounted to Rs. 73,73,691 against Rs. 88,19,349 in the preceding year, and in the Benares Agency to Rs. 88,72,927 against Rs. 1,02,28,196 in 1890-91. The combined expenditure in the two Agencies was thus Rs. 1,62,46,618, which is less than the expenditure in 1890-91 by Rs. 28,00,927. A detailed statement of the expenditure is furnished by the Benares Agent. The Bihar Agent explains that he has been unable to furnish the statement in consequence of Part IV of the Opium Manual containing all the revised forms and tables for calculation being still in the press. This explanation is accepted by the Board, but it appears to the Lieutenant-Governor that the Board need not have failed to obtain a detailed statement of the expenditure in the Bihar Agency if they had made any attempt to get it or had prescribed a form for Bihar. The Benares statement (reprinted in paragraph 41 of the Board's report) is arranged under 18 budget heads (which should have been numbered): these can be grouped under—

			Heads.
1.	Cost price of opium	... ...	3, 4, 5
2.	Establishment	... ...	1, 2, 7, 10, 11, 12
3.	Transit, weighment, and freight	... ...	6, 8
4.	Manufacturing	... ...	9
5.	Miscellaneous	... ...	13 to 18

The Bihar expenditure should be divided in the same way, and the rateable incidence of the several heads of expenditure should be divided over the quantity of opium produced so as to separate permanent establishment, which cannot vary, from the temporary or variable establishment which ought to rise and fall with the weight of the crop. The statement ought to show at a glance the cost per maund to Government divided into (1) price paid to cultivators; (2) cost of manufacturing; (3) cost of supervising establishment. Column 5 of the abstract statements for Bihar and Benares divided by column 3 shows the cost per maund to have been Rs. 231 in Bihar and Rs. 230 in Benares.

Outstanding balances.

8. In the Bihar Agency the outstanding balance of advances to cultivators is said to be Rs. 12,020, exclusive of Rs. 270 written off as irrecoverable. The Benares Agent states in paragraph 96 of his report that the balance on the 1st November 1891 on account of season 1891-92 was Rs. 1,49,735-12, the amount realised between 1st November 1891 and 1st November 1892 Rs. 1,38,017, and the net balance on the 1st November 1892 of advances for the season Rs. 11,718-12-1. These figures require explanation. The Opium Manual shows that in the Benares Agency the arrangements with cultivators are begun about the middle of August, and simultaneouly with the engagements advances are given at the prescribed rate, the first advance being about one-third of the estimated value of the return. No second advance is generally made in the Benares Agency. It is obvious that under this system the amount of advances for season 1891-92 on the 1st November 1891 would be much higher than Rs. 1,49,735-12. Statement B appended to the Benares Agent's report shows that the total amount of advances during 1891-92 for provision opium was Rs. 78,43,539, which was in excess of the value of the produce by Rs. 1,35,249. The Bihar Opium Agent considers it to be a specially unsatisfactory feature of the accounts of the year that the cultivators of Bihar should have had to refund out of the advances taken by them as much as Rs. 80,530, which sum exceeds the corresponding amount for any previous year except the year 1882-83, which is memorable for its disastrous blight. In His Honour's opinion the poor outturn fully explains why the advances exceeded the value of the crop brought in for weighment and the cultivators had to refund the balance; but it is an exceptional circumstance. In Benares the amount, viz. Rs. 1,38,017, which the cultivators had to refund for the year's advances far exceeded that in Bihar.

Irrigation.

9. Statement A of the Bihar Agency shows that out of a total area of 375,586 bighas, 68,057 bighas, or above 17 per cent., were unirrigated, against 81,678 bighas, or 20 per cent, in the preceding year. In the corresponding statement for the Benares Agency the unirrigated area is only 8,345 bighas, or a little above 2 per cent. The Bihar statement reduces the bighas into acres, which should in future be done

in the Benares statement, the Agency bigha in both Bihar and Benares being equal to $\frac{5}{8}$ths of an acre. In the Bihar Agency a strong prejudice, which the Agent reports to be well founded, exists against the use of canal water for poppy cultivation in the Shahabad and Patna districts. The amount advanced for the construction and repairs of wells was Rs. 49,535, against Rs. 24,355 in the previous year in the Bihar Agency, and Rs. 11,359 against Rs. 15,583 in 1890-91 in the Benares Agency. The Benares Agent reports that the reasons which operate against the expansion of the system are (1) insecurity of the tenure on which the raiyats generally hold their lands; (2) fear of the cultivators of their inability to repay the loan; and (3) want of sound and sufficient security. It appears to Sir Charles Elliott to be very remarkable and contrary to the belief which has hitherto prevailed if the raiyat in Bihar feels more secure in his tenure than the raiyat in the North-Western Provinces. This matter will be brought to the notice of the Government of the North-Western Provinces.

Saw Mills.

10. The account furnished in the Board's report of the working of the Patna Saw Mills and Chest Department is very confused. From the report of the Bihar Opium Agent it appears that during the year 1891-92 22,388 chests were made, of which 11,892 were sâl and 10,496 mango wood, against 26,113 chests, all of sâl, in the previous year. The cost of a sâl wood chest was Rs. 5-14-7, and of a mango wood chest Rs. 2-7-5. The difference between these two prices represents the saving effected by the substitution of mango wood for sâl wood. The total amount of saving in this way is represented by Rs. 35,937. With a view to economy the Mill was, with the sanction of Government, closed for the month of October 1891, and for April, May, and June 1892. The net expenditure on account of the mills in 1891-92 is stated by the Board to have been Rs. 19,384, after deducting certain receipts, against Rs. 22,425 in the preceding year. The separate letter on this subject referred to by the Board shows, however, that the actual expenditure was Rs. 24,434 against Rs. 27,751. This shows a satisfactory saving. But it appears from the Bihar Agent's report that 33,000 ready-made chests purchased for contractors with lids were sent to Ghazipur. This appears to have been hardly wise, unless the cost of a purchased chest is less than that of a chest made at the Saw Mill, as *primâ facie*, instead of keeping the Mill closed for some months, it might have been utilized for the chests required for the Ghazipur Agency. The reason also why 33,000 chests were required for Ghazipur when 22,388 sufficed for Patna requires explanation.

Breaches of Opium Laws.

11. Compared with the year 1890-91, there was a decrease of 72 in the number of cases in Bengal, and an increase of 41 cases in the North-Western Provinces and Oudh, the total number during the year 1891-92 being 501 in the former and 605 in the latter. Three of the cases in Bengal during the year were of considerable importance. In one case 19 seers of opium were sent up from Hooghly: it was reported that the opium was dropped by some up-country men who were passing through the town and ran away when challenged, leaving their property behind them. In another case four jars, containing about 3 maunds 15 seers, supposed to have been stolen during transit to Ghazipur out of a truck in the Bengal and North-Western Railway, were found on board some boats in the river at Calcutta. In May last about 11 maunds 35 seers of opium smuggled from Nepal were seized in a station on the Tirhut State Railway. The opium was concealed in packages said to contain spices. The Lieutenant-Governor notices with satisfaction that in the Bihar Agency, as well as in the Benares Agency, the requisite enquiries are made by the local opium officers to ascertain from what source the illicit drug in any case of smuggling which comes to light has been obtained. A large number of cases in Benares consisted of those in which a cultivator's wife or mother claimed to have retained a few grains of opium for medical purposes. The Agent did not think it necessary to punish the accused departmentally in addition to the punishment inflicted in the Criminal Court, as they were good cultivators. Mr. Rivett-Carnac considers that the existence of any organized contraband trade assisted by the cultivators is improbable, but he appears to think that smuggling to Calcutta is carried on by the purchase of excise opium at Rs. 16 per seer, which is the price fixed for the Patna

Division, and also for adjoining districts of the North Western Provinces. The propriety of raising this figure is now under discussion with the Board, and an additional argument for such a measure may be found in the fact that the State loses considerably by selling at the present price. The statistics of the average price of provision opium sold at Calcutta from October 1891 to September 1892 show that Bihar provision opium sold at Rs. 17 per seer. Considering the higher consistence of excise opium, Rs. 16 per seer represent a much lower price than the Calcutta price of provision opium.

Tours.

12. Mr. Stevens, while in charge of the Miscellaneous Revenue Department in the Board of Revenue, visited both the factories as well as the weighing station at Ekdari in the Nepal frontier. He submitted notes to Government of discussions with the local opium officers on (1) the question of obtaining Nepal opium through Mr. Cockell; (2) the partial introduction of the assamiwar system prevalent in the Benares Agency in a part of the Motihari Agency; and (3) an improved method of packing opium jars. Orders have been passed separately by Government on these matters. With regard to the introduction of the Benares system of engagements, the Lieutenant-Governor is of opinion that it is hardly worth while to discuss the merits of the system or to make an experiment in a single kothi, unless there is a definite intention of carrrying out a change. At present there is no such intention, and it is not worth while to enquire whether the reason given by Mr. Kemble, namely, the additional cost which the Benares system would entail, is valid or not. The Agents and the Sub-Deputy Agents made useful tours within their respective charges. Under orders of Government directing the mutual interchange of visits between the Factory Superintendents, the Superintendent of the Ghazipur Factory visited the Patna Factory in September last. The Lieutenant-Governor has no doubt that these visits will be of decided benefit to the factories and to the interests of Government by the interchange of ideas.

Merits of officers.

13. The Board have reported to Government the names of Messrs. Tytler, Ryves, Harrison, Bryson, Murray and Blair among the Sub-Deputy Opium Agents as having worked well in the Bihar Agency. The Benares Agent has not made any recommendations this year. Dr. Sedgefield, Dr. Owen and Mr. Gregory are favourably reported on for their able discharge of their duties. The Lieutenant-Governor has again to acknowledge the efficient management of the Opium De, artment by the Agents, Mr. Kemble, Mr. Rivett-Carnac, and Mr. Hopkins, who held charge during the year, and the careful supervision exercised by the Board of Revenue.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

The 28th February 1893.

THE correspondence below regarding the construction of a bathing ghat at Ramkrishnapore at the expense of Babu Chintamoni De is published for general information. Arrangements have been made with the Port Commissioners, Calcutta, for the construction of the ghat—

Copy of a letter No. 868M., dated 8th December 1892, from the Commissioner of the Burdwan Division, to the Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to enclose, for the information of Government, a copy of a letter received from the Magistrate of Howrah (his No. 1306G., dated 9th ultimo), together with a copy of its enclosure, relating to an offer of promissory notes of the nominal value of Rs. 35,000 made by Babu Chintamoni De for construction of a bathing ghat at Ramkrishnapore in Howrah to be called after his name.

2. The Magistrate has deposited the amount for safe custody in the Howrah Treasury, and requests, that this really munificent offer may be accepted and that a public acknowledgment of it be made by the Local Government in the *Calcutta Gazette*. I beg to recommend the Magistrate's proposal and the publication of the correspondence in the Gazette.

Copy of a letter No. 1306G., dated 9th November 1892, from the Magistrate of Howrah, to the Commissioner of the Burdwan Division.

I HAVE the honour to forward a copy of a letter received from Babu Chintamoni De, in which he states that he sends Rs. 35,000 to build a bathing ghat at Ramkrishnapore in Howrah, to be called after his name. The promissory notes to that amount have been deposited for safe custody in the Howrah Treasury pending orders, and I would urge that the public-spirited offer of this gentleman be accepted, and that public acknowledgment of the fact be made by the Local Government in the *Calcutta Gazette*.

Copy of a letter, dated 9th November 1892, from Babu Chintamoni De to the Magistrate of Howrah.

I HEREWITH send you Government securities, the numbers whereof are hereinafter mentioned, amounting to Rs. 35,000, duly endorsed to you for the purpose of having a masonry or iron ghat built on the west bank of the river Hooghly in front of the Ramkrishnapore ghat road, and beg you will be pleased to obtain the necessary site from the Port Commissioners and order the building of the ghat according to a plan to be approved of by me at a cost of about Rs. 35,000.

I further beg to suggest the following conditions:—

1st.—That the ghat be made in front of the Ramkrishnapore ghat road or thereabout.

2nd.—That a metalled road be made from the foreshore road to the site of the said ghat.

3rd.—That the ghat be divided into two parts with a fencing in the middle—one for gentlemen and the other for ladies.

4th.—That a chadney on iron pillars be put up at the ghat, of which a portion should be enclosed for the ladies.

5th.—That no traffic be allowed to be taken by the ghat.

6th.—That it be strictly a bathing ghat and be called after me.

In the last place I beg to state that I am willing and ready to pay a further sum of rupees three or four thousand if it be absolutely necessary for the execution of the works aforesaid.

Copy of a letter No. 3101 Marine, dated 30th December 1892, from the Secretary to the Government of Bengal, Marine Department, to the Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your letter No. 868M., dated the 8th instant, with which you submit a copy of a letter from the Magistrate of Howrah, and of its enclosure, relative to an offer of Rs. 35 000 made by Babu Chintamoni De for the construction of a bathing ghat at Ramkrishnapore in Howrah.

2. In reply, I am to say that the Lieutenant-Governor has much pleasure in accepting the offer made. Sir Charles Elliott recognises the liberality and public spirit evinced by Babu Chintamoni De in giving this handsome donation for a structure which will be of so much use to the public.

C. W. ODLING,

Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 25th February, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
Burdwan Divn.	1	Burdwan Feb. 25, '93 Kalna ... Katwa ... Raniganj ..	3·39 3·67 2·74 2·67	Weather—rainy and cold. The heavy rainfall will damage to some extent the *rabi* crops No more rain wanted now. Condition of cattle good. Fodder and water sufficient. Prices of common rice :— Srs. Burdwan ... ... 11 to 13 per rupee. Kalna ... ... 10 to 13 per rupee. Katwa ... ... 13½ per rupee. Raniganj ... ... 13 per rupee.
	2	Bankura „ 25, '93 Vishnupur ...	2·85 2·41	Weather—cloudy and rainy. The copious showers during the week will cause some damage to the standing crops. Fodder and water sufficient. Common rice is selling at— Srs. Sadar ... ... 11½ per rupee. Visnupur ... ... 12 per rupee.
	3	Birbhum „ 25, '93 Rampur Hát ...	3·12 1·99	Weather—clouds and rainy throughout the week. The excessive rain will do some injury to the *rabi* crops. Price of common rice 13 to 15 seers per rupee. Cow-pox prevails in some villages of thana Dubrajpur and outpost Mahmedbazar.
	4	Midnapore „ 25, '93	2·71	Weather—unusually cold with heavy storms of rain. *Rabi* crops still being gathered. Ploughing going on. Prices of common rice :— Srs. Sadar ... ... 12 per rupee. Contai ... ... 9 to 13 per rupee. Tamluk ... ... 12 to 14 per rupee. Garhbeta ... ... 11 to 12 per rupee.
	5	Hooghly „ 25, '93 Serampore ... Jahanabad ...	2·22 1·84 1·79	Weather—chilly and rainy. The Subdivisional Officer of Serampore says that the continual rain has to some extent rendered the prospects of potatoes, mangoes and *kalai* still more worse. *Rabi* crops slightly damaged in the Jahanabad subdivision. In the Sadar subdivision the state of the *rabi* crop is not good, but harvesting of potatoes finished. Difficulty of water and fodder-supply still felt at Pandua and Dwarbasini; elsewhere fodder and water sufficient. Prices of common rice :— Srs. Sadar ... ... 11 per rupee. Serampore ... ... 10 to 11½ per rupee. Jahanabad ... ... 12 to 13 per rupee.
	6	Howrah „ 25, '93 Ulubaria ...	2·74 1·95	Weather—disagreeably wet and cold. *Khesari* crop, which is being reaped, has been somewhat injured by the rain. Pressing of sugarcane in progress. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 11 to 11½ seers per rupee.
Presidency Divn.	7	24-Parganas „ 25, '93	2·37	Weather—cold and rainy. Excessive rain has done injury to the standing *rabi* crops. Cultivation has been retarded. Fodder sufficient. Prices of common rice :— Srs. Srs. c. Sadar ... ... 10 to 14 8 per rupee. Dum-Dum ... ... 12 0 per rupee. Barasat ... ... 10 5 per rupee. Barrackpore ... ... 12 4 per rupee. Diamond Harbour ... 13 0 per rupee. Basirhat ... .. 12 5 per rupee.
	8	Nadia „ 25, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat .	4·11 1·77 2·70 1·23 3·76	Heavy rainfall during the week. Prospects of wheat and barly good, but the heavy rain of the week has caused some damage to linseed, gram and mango blossoms, but it has facilitated ploughing. Price of rice almost stationary. Health of cattle good. Fodder and water-supply sufficient.
	9	Khulna „ 25, '93 Bagerhat ... Satkhira ...	1·68 1·33 1·90	Weather—unusually rainy. Transplantation of *boro* going on. The heavy and constant rain will probably do some damage to tobacco and some other *rabi* crops. Common rice selling at from 11 to 14 seers per rupee. Supply of fodder and water sufficient
	10	Jessore „ 25, '93 Jhenida ... Magura .. Narail ... Bangaon ...	2·18 2·51 1·62 1·27 1·95	Weather—cold, cloudy and rainy. The rainfall of the week has done some injury to the *rabi* crop, the harvesting of which has commenced. Mango blossoms have also been injured to some extent. Cultivation of paddy has been progressing well. Prices of rice have risen slightly. Fodder and water sufficient.
	11	Murshidabad „ 25, '93	2·56	Weather—cold and cloudy with constant showers. It has been raining constantly the last three days. This untimely rain will probably damage all the standing *rabi* crops. Common rice selling at 13 seers per rupee. Fodder sufficient for cattle.

Division	No.	District and date of return.		Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
BENGAL—*concld.*					
CHITTAGONG DIVN.	12	Chittagong	Feb. 25, '93	0·73	Weather—seasonabe. Prospect of crops good. *Rabi* cultivation in progress. Prices stationary. Condition of cattle good. Supply of fodder sufficient.
	13	Noakhali	" 25, '93	0·89	Weather—cloudy and variable. *Rabi* crops are thriving well. Lands are being ploughed for *aus* paddy. Fodder and water available. No cattle-disease except in thana Sundip and outpost Companiganj. Price of rice stationary.
	14	Tippera	" 25, '93	1·70	Weather—cold, cloudy and damp. Standing crops doing well. Ploughing going on vigorously. Prospects excellent.
	15	Chittagong Hill Tracts.	" 24, '93	1·03	Weather—cloudy and rainy. Chillies, tobacco and vegetables progressing. Condition of cattle reported to be good. Common rice is being sold at 10 seers per rupee.
DACCA DIVN.	16	Dacca	" 25, '93	Not reported.	Weather—cold and cloudy. *Rabi* crops being gathered. *China* and *kaon* thriving. Cultivation and sowing of *aman* and *aus* paddy going on. Fodder available. No cattle-disease. Common rice selling at from 11 to 14 seers per rupee.
	17	Faridpur	" 25 '93	3·57	Weather—rainy. Continued rain is doing harm to pulses, but will probably benefit cereals. It will also retard ploughing on low lands. Common rice sells at 13 seers per rupee at Goalundo and Madaripur and 12 seers at Sadar. Cattle doing well and get fodder.
	18	Backergunge	" 25, '93	1·94	Weather—stormy and cold. Prospects of crops good. Ordinary rice sells at from 10 to 14 seers per rupee. Fodder and water sufficient.
	19	Mymensingh	" 25, '93	2·04	Weather—very wet. Prospects of standings crops good. Rice sells at from 11½ to 14 seers per rupee.
RAJSHAHI DIVN.	20	Dinajpur	" 25, '93	0·68	Weather—very cold and cloudy. The sky has been cloudy for the whole week. It has been raining more or less almost daily. The rain has facilitated the preparation of lands for *bhadoi* and jute. Pressing of sugarcane still continues in places. Price of rice at Sadar 14 seers 12 chitaks per rupee; that at Thakurgaon stationary. Condition of cattle good. The cattle-disease, which broke out in the Thakurgaon subdivision, has disappeared. Fodder and drinking water sufficient.
		Thakurgaon	...	0·56	
	21	Rajshahi	" 25, '93	2·65	Weather—cold and rainy. Prospects of cold-weather crops generally good. The rain that has fallen during the week has been injurious to the standing *rabi* and ganja crops. Lands are being prepared for sowing of *aus*, *aman* and *til*. Some cases of small-pox among cattle reported from the Tanore thana. Fodder and water generally sufficient. Price of common rice ranges from 12 to 15½ seers per rupee.
		Nator	...	2·56	
		Naugaon	...	2·07	
	22	Rangpur	" 25, '93	0·70	Weather—cold and rainy. Prospects of crops continue good. Fine weather wanted for mustard harvest. Common rice 12 to 15 seers per rupee.
		Kurigaon	...	0·51	
		Nilphamari	...	0·59	
		Gaibanda	...	Nil	
		Ulipur	...	0·43	
	23	Bogra	" 25, '93	1·75	Weather—cloudy and wet. Lands are being ploughed for *aus* paddy and jute. Condition of *rabi* crops good. Outturn of sugarcane estimated at 14 annas. Common rice sells at 13½ seers per rupee. Fodder and water sufficient.
		Sherpur	...	2·02	
		Naukhila	...	1·85	
	24	Pabna	" 25, '93	2·01	Weather—cloudy and rainy. Owing to excessive rain that fell during the week some damage is done to the standing crops. Sugarcane is being reaped. Rice selling at 12½ seers per rupee at Pabna and Rs. 3-8 to Rs. 5 per maund at Sirajganj. Jute sells at Rs. 4 to Rs. 5 per maund. Condition of cattle good. Fodder and water-supply sufficient.
	25	Darjeeling	" 25, '93	0·83	Weather—very cloudy and foggy. Snow on Wednesday (22nd) afternoon. Very cold for the time of year. *In the hills*:—Wheat, barley and potatoes progressing favourably. Mustard and *phaphur* being harvested. *In the terai*:—Mustard and potatoes are nearly all harvested. Tobacco coming to perfection. Barley in ear. Prices of coarse rice:— Srs. Hills ... ... 11 } per rupee. Terai ... ... 13 } per rupee.
		Siliguri	...	0·48	
	26	Jalpaiguri	" 25, '93	0·58	Weather—cold and cloudy. Ploughing commenced for *aus* and *bhadoi* crops. Potato is being harvested; outturn 14 annas. Prospects of tobacco continue good. Common rice sells at 14 seers per rupee. Supply of fodder and water sufficient.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.				
Bhagalpur Divn.	27	Monghyr Feb. 25, '93	1·53	Continual showers. Weather damp and cold. The present weather is injurious to much of the *rabi*, but it is hoped the wheat and other late kinds may benefit to some extent. Poppy must suffer severely as the extraction had already commenced, and each day's rain takes away some of the value. The loss may be now roughly put down at 3 annas, and the outturn is likely to be less even than that of last year, although the land sown is 2,000 bighas more and the failure of crop reported was 300 bighas less than in the previous year. The renewed moisture will be very advantageous for indigo lands. Prices of common rice :— Srs. Sadar ... ... 13 to 16¼; Begusarai ... ... 16; Jamui ... ... 15 } per rupee.
		Begusarai ...	0·65	
		Jamui ...	0·77	
	28	Bhagalpur „ 25, '93	1·33	Weather—unusually cloudy and cold. Gram and *rahar* suffered slightly by this rain. Indigo and castor oil-seed much benefited. Cattle also reported to be affected slightly by the rain. Common rice 15 seers 2 chitaks per rupee.
		Banka ...	2·01	
		Madhipura ...	0·92	
		Supaul ...	0·40	
	29	Purnea „ 25, '93	0·62	Weather—cloudy with slight showers; damp and very chilly, but it is getting warmer now. The recent rain is expected to do some injury to the tobacco if it is not followed soon by bright sun. Otherwise it will benefit the standing *rabi* crops. The *tori* harvest is finished in Araria with a very fair outturn; elsewhere that crop is being reaped. The rain will also facilitate ploughing of the *bhadoi* lands. Fodder and water sufficient. No cattle-disease. Price of rice almost stationary.
		Kishanganj ...	0·76	
		Araria ...	0·62	
	30	Malda „ 25, '93	1·27	Weather—rainy and wet throughout the week. Rainfall has improved the condition of standing *rabi* crops except within Kaliachuk thana, but it has damaged the mango blossoms which are out. Lands are being prepared for *bhadoi* paddy and jute. Common rice sells at from 13 to 17 seers per rupee. Fodder and water-supply ample.
		Chanchal ...	1·06	
		Shibganj ..	2·39	
		Gajole ...	1·03	
	31	Sonthal Parganas „ 25, '93	1·69	Weather—cold and rainy, with thunder. The excessive rain has injured the standing *chaiti* crops, the *mahua* and the mangoes. It has helped the sugarcane. Price of new rice 14 to 15 seers per rupee, as high as last year at this time. Many cattle killed by the cold.
		Deoghur ...	1·45	
		Godda ...	2·04	
		Jamtara ..	2·86	
		Pakur ...	3·30	
		Rajmahal ...	1·64	
Patna Division.	32	Patna .. 25, '93	0·86	Cloudy weather with rain on and off during the whole week, which is distinctly unfavourable to the *rabi* and poppy crops. The rain has damaged both the standing and harvested *rabi* crops such as gram, peas, mustard and *masur*. Prices of common rice :— Srs. Sadar ... ... 17; Barh ... ... 12; Bihar ... ... 17; Dinapore .. .. 14 } per rupee.
		Barh ...	1·57	
		Bihar ...	1·86	
		Dinapore ...	0·80	
	33	Gaya .. 25, '93	2·14	Weather—very cloudy and rainy throughout the week. The rainfall has done some good to the late *rabi* crops, while it has done some injury to the early crops. The crops cut and stored in open fields have been specially damaged, but their proportion is still small. The weather still continues cloudy and rainy, and if there is no bright sunshine soon much damage will be done to the *rabi* crops. The repeated showers have washed off some lanced drugs of the poppy, and the high winds have done some damage to the plants. This crop is, however, still in flower in many places, and the damage will not be very serious if there is bright sunshine soon. Fodder and water for cattle sufficient.
		Aurangabad ...	1·36	
		Nawada ..	2·24	
		Jahanabad ...	1·83	
	34	Shahabad .. 25, '93	0·88	Weather—cloudy and variable with constant showers. The rainfall has done a certain amount of damage to the standing *rabi* crop and the opium, but if the weather now clears up and a dry west wind sets in, the damage will not be serious. Extraction of opium has begun. Prices stationary. Fodder and water sufficient. No cattle-disease reported.
		Buxar ...	0·77	
		Sasaram ...	1·10	
		Bhabhua ...	0·73	
	35	Darbhanga .. 25, '93	0·32	Weather—cloudy. Prospects of *rabi* still continue favourable, but some damage is likely to be caused to linseed, *rahar*, tobacco and gram by the rain. Extraction of opium commenced in places. No damage is reported to have been done to this crop by the rain. Condition of cattle good. Prices stationary.
		Samastipur .	0·82	
		Madhubani ..	0·53	
	36	Muzaffarpur .. 25, '93	0·60	Weather—cloudy with east wind. Peas growing. *Rahar* and wheat much damaged by the rainfall. No injury done to poppy so far, but clear weather and west wind much wanted. Lancing commenced in advanced crops. Water and fodder ample. No disease among cattle.
		Sitamarhi (23rd) ..	0·38

	BIHAR—*concld.*		
	Patna Division—concld.		
37	Saran „ 25, '93 Siwan .. Gopalganj ..	0·42 0·61 0·58	Weather—cloudy and rainy throughout the week; unusually cold. The Sub-divisional Officer of Siwan says that rain has been doing harm to the standing crops. The Subdivisional Officer of Gopalganj reports that no damage has been done yet, but dry weather is required. The cloudy weather is likely to bring caterpillars. No reports received yet from the Sub-Deputy Opium Agents as to damage to poppy. The Sub-Deputy Opium Agent, Siwan, said on 19th that clear settled weather with light west winds was much required and was then becoming a necessity. Poppy lancing has commenced. Fodder and water abundant. Prices of common rice are:— Srs. c. Chapra ... ... [redacted] } per rupee. Siwan ... ... [redacted] Gopalganj 14 3
38	Champaran „ 25, '93	0·83	Weather—cloudy and rainy. Some of the *rabi* crops are in flower and others in ear. Prospect of crops good, but sunshine is now much wanted, or the crops will suffer. Moisture in the soil is more than sufficient. Poppy plants are healthy and looking well, and much improved by the rain. Even where they suffered from hail in the end of January, the latest reports are more hopeful. Cattle in good condition. Water and fodder sufficient. Prices unaltered.
	ORISSA.		
	Orissa Divn.		
39	Cuttack Feb. 25, '93	Nil	Weather—cloudy. What crops are on the ground are doing well. Supply of fodder and water sufficient. Average prices of common rice:— Srs. c. Srs. c. Sadar .. ... 10 8 to 15 1 } Jajpur ... ... 18 6 to 21 0 } per rupee. Kendrapara ... ... 16 0 to 19 0 } Banki ... ... 17 0 }
40	Puri „ 23, '93 Khurda ... Banpur ...	0·02 0·25 0·60	Weather—cloudy. Lands are being ploughed for the ensuing *sarad* crop. *Dalua* paddy thriving. *Rabi* crops doing well. Rice sells from 14 seers 7 chitaks to 17 seers 8 chitaks per rupee.
41	Balasore „ 25, '93	1·57	Weather—cloudy and rainy. Ploughing almost stopped owing to continuous rain. Prices stationary. Fodder and water sufficient.
	CHOTA NAGPUR.		
	South-West Frontier Agency.		
	Chota Nagpur Divn.		
42	Hazaribagh Feb. 25, '93 Giridi ...	1·85 2·52	Weather—cloudy and rainy. Rain has been harmful to the crops. Lands are being ploughed. Common rice 11 to 11 seers per rupee. Poppy being damaged. It is reported that two days' lancings have been washed away, but that the rain has benefited the backward plant.
43	Lohardaga „ 25, '93	3·24	Weather—cold and cloudy. Ploughing of land commenced. Prospect of *rabi* continues favourable, but if the fall of rain continues, some damage will be done to this crop. Common rice selling at 13 seers per rupee. Fodder and water sufficient.
44	Palamau „ 24, '93	0·98	Weather—cloudy. Rain in almost all parts of the district. The rainfall and the weather will tell upon the *rabi* which promised a good outturn. Cattle-disease in some parts. Prices generally stationary.
45	Singhbhum „ 25, '93	3·18	Weather—rainy and cloudy thoughout the week; raining to-day (25th). In the Kolhan it is reported that the crops (*rahar, masuri*, gram and linseed) are damaged by the rain. Unless fair weather sets in soon the damage to the *rabi* crops will be heavy. Rice selling at 14 seers per rupee.
46	Manbhum „ 25, '93 Gobindpur ...	3·45 1·67	Weather—rainy throughout the week. Harvesting of *rabi* crops nearly over. Prospects of standing crops, such as wheat, gram, and sugarcane and also *mahua*, are bad on account of the rainfall. Rice selling at from 10 to 14 seers per rupee. Fodder and water-supply sufficient.

* Mean of 6 days. | † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period
The humidity of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 01
rainfall the normal mean are the numerical means or average of the rainfall in that district determined from the returns sent in by the subdivisional station
district, i.e., from total rainfall at the subdivisional stations in the district sending in returns divided by the number of stations. A rainy day is one or

for the week ending Saturday, the 25th of February 1893.

					DISTRICT OBSERVATIONS.										
					Of week				Rainfall						
									Since 1st of month.			Since 16th October 1892.

for the last ten years. The variations are *negative* when the mean for the week is less than the corresponding normal mean, and *positive* when greater. The numbers denoting cloud amount represents the part of the sky covered the whole sky being denoted by 10. Under the head District observations of for the period in question during the past ten years. The means of the district are the numerical average of the rainfall returned received in the which at least a tenth of an inch fell.

Statement of Rainfall in Bengal for the week ending Saturday (8 a.m.), the 25th of February 1893.

Explanation.—... indicates that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 28th February* 1893.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 25TH OF FEBRUARY 1893.

AT the close of the previous week a barometric depression had passed in an easterly direction over Bengal, and on the 18th, or the last day of the week, had apparently reached Burma. Hence rain had been received at many stations in Bengal, and the falls were general and rather heavy in the eastern and southern districts, while conditions over Bengal remained very disturbed. On the 19th, or the first day of the present week, the barometric changes in Bengal were irregular, a low pressure area existed over the Central Provinces and the neighbouring parts of Orissa, and also over the northern parts of Madras. Pressure was also falling rather rapidly on this day at Darjeeling, pointing to the existence of disturbed weather in and near the Himalayas, and at Gnatong a snowstorm was reported, while a few rain showers also fell in parts of Bengal. On the 20th the area of low pressure had apparently passed over the north of the Bay, and pressure was generally rising over Bengal, though at Gnatong a fall had been reported. The weather from the 19th to the 20th had been very disturbed in Bengal, heavy rain had fallen at many stations, and in several cases the rain accompanied rather severe thunderstorms, while at Jessore hail was also reported. On the 21st the area of low pressure in the Bay apparently filled up or disappeared, and weather generally in Bengal improved rapidly and the sky cleared to a great extent, and only a few light showers were reported, and these were confined to parts of Orissa and South-East Bengal. In the hills, however, the disturbed conditions continued and Gnatong again reported a snowstorm. On this date, however, a fresh barometric disturbance or depression was entering North-Western India from the westward, which was advancing in an easterly direction, and on the 22nd one barometric depression was over the Central Provinces while a second large depression existed over the Punjab. Hence pressure was falling generally in Bengal except in and near the hills, and rain had recommenced at some of the Bihar and Chutia Nagpur stations, while at Gnatong snow was again reported. On the 23rd the depression from the Central Provinces had reached Orissa, and the depression in the Punjab had passed eastward into the hills, while a new depression had advanced from the westward into North-Western India. Hence again conditions were exceedingly disturbed and rain became general in Bengal, and on the 23rd heavy rain, exceeding one and two inches, was reported at many stations, while Gnatong again reported a snowstorm. On the 24th the depression in Orissa had advanced a little in an easterly direction and had become more diffused, while pressure was generally rising slowly, and rain was again received in the southern districts of Bengal. Finally on the 25th pressure had again risen slowly in Bengal, and apparently the depression was moving from Orissa in a south-easterly direction, but weather in Bengal was still very disturbed, and over the whole of the south of the province the sky was heavily overcast, though from the 24th to the 25th the rainfall reported was confined to parts of South-West Bengal, Bihar and Chutia Nagpur. Hence throughout the whole week and quite up to its close very unsettled weather prevailed in Bengal, and considerable amounts of rain had fallen over the whole province.

Pressure.—Notwithstanding the passage of several depressions over and near the province during the week, the general pressure has been in excess of the normal by from about 0·02" to 0·04." At the extreme western and south-western stations, however, which have been mainly affected by the passage of the depressions, pressure has been in slight defect of the normal, and this has been the case at Gopalpur, False Point, and Cuttack in Orissa, and also at Hazaribagh and Ranchi. At Darjeeling also pressure has been no less than 0·04" in defect of the normal.

Temperature.—Owing to the unusually heavy rainfall during the week, and the heavily clouded skies in the plains, and to the comparatively large snowfall in the hills, temperature has been unusually low during the week, and the mean of the province has been no less than 4·1° in defect of the normal. This defect has been largest in South-West Bengal, South Bihar and Chota Nagpur, where it has been about 6° and upwards.

The distribution of temperature during the week and its variation from the normal value are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the period. It will be seen that the defects have again been largest in the day or maximum temperatures, which have been in many cases 10° and upwards in defect, and at Burdwan the day temperature has been even 14·1° lower than usual. At Calcutta the defect in the maximum temperature has been 9·7°:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 25th February 1893.

	Normal mean maximum temperature for the week ending 25th February.	Actual mean maximum temperature for the week ending 25th February 1893.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 25th February.	Actual mean minimum temperature for the week ending 25th February 1893.	Variation of actual mean from the normal. Darjeeling	48·3	46·5	−1·8	35·9	32·1	−3·8	42·2	38·2	−4·0

Rainfall.—The falls during the week have been exceedingly heavy, and have averaged nearly two and-a-half inches in Chota Nagpur and South-West Bengal, more than one and-a-half inches in East Bengal and South Bihar, an inch and-a-quarter in Orissa and North Bengal, and about two-thirds of an inch in North Bihar. It is needless to say that these falls have been many times larger than the normal for the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 25th of February 1893:—

Meteorological Divisions.	Temperature.						Rainfall.									
			Averages for week.				Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1892.	
	Highest observed during week.	Lowest observed during week.	Of highest of each day.	Of lowest of each day.	Of mean for each day.	Average mean of week above or below normal mean of week.	Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	1·36

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; d, drizzling rain; p, passing temporary showers; K, thunderstorm; ⌓, dew; ≡, fog.

CONTENTS.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament, 24 and 25 Vic., Cap. 67.

THE Council met at the Council Chamber on Saturday, the 18th February, 1893.

Present:

The HON'BLE SIR CHARLES ALFRED ELLIOTT, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The HON'BLE J. T. WOODROFFE, *Offg. Advocate-General.*
The HON'BLE T. T. ALLEN.
The HON'BLE H. J. S. COTTON, C.S.I.
The HON'BLE H. H. RISLEY, C.I.E.
The HON'BLE J. LAMBERT, C.I.E.
The HON'BLE H. LEE.
The HON'BLE DR. MAHENDRA LAL SIRCAR, C.I.E.
The HON'BLE A. H. WALLIS.
The HON'BLE GONESH CHUNDER CHUNDER.
The HON'BLE P. PLAYFAIR.
The HON'BLE MAULVI SYED FAZL IMAM, KHAN BAHADUR.

(Continued from last week's Gazette.)

THE HON'BLE MR. WOODROFFE in reply said:—"Sir, there has been, if I may be permitted to say so, a not unprofitable discussion on this motion of mine, and it is admitted that, if this matter were now before the Council for the first time, the case which I have attempted to lay before the Council is one which could not be satisfactorily met, that it is, in other words, a strong case. But it is said, and this is the only answer that has been attempted, that this is not now before the Council for the first time, and that the industries concerned ought to be satisfied with the partial relief secured to them by the Bill as it left the Select Committee. But I say with great submission that the whole question, whether these commercial interests should be subjected to taxation for the maintenance of the fire-brigade, is before the Council. It is because the present state of things is undesirable, because the injustice of it is apparent, that legislation has been recommended and held to be absolutely necessary.

"It is said that, the Committee of 1891 favoured a proposition adverse to that for which I am contending. But it is to be observed from the proceedings of that Committee that, the Chamber of Commerce was not addressed till the fundamental lines had been previously settled. Sir Henry Harrison stated so in express terms. When the Chamber and other bodies came before that Committee they were met, so to speak, with a foregone conclusion on this point. But notwithstanding that, the general principle was over and over again asserted after the door had been practically closed to its admission. In the first meeting, at which Mr. Malcolm, the representative of the Chamber of Commerce, was present, he contended 'that jute warehouses should be placed on the same footing as regards taxation for the maintenance of the fire-brigade as residential houses, mills and depôts for goods other than jute;' and quoted figures to show that, the value of the property (not jute) destroyed by conflagrations was nearly equal to the value of the jute which had been burned. He returned to the charge again at a later meeting, and said that 'he could only repeat what he urged on the last occasion, namely, that to do justice to all and to conform to the practice of other countries, there should be equal taxation on all classes for the support of the fire-brigade, and that the proposal to reduce the fees on jute warehouses by 50 per cent. was only a tardy act of justice to jute industries; but not, in the opinion of the Chamber, that entire measure of justice which they were entitled to claim, which consisted in jute owners being subjected to equal taxation with others whose goods are likewise protected by the fire-brigade.'

"It was in consequence of that position of affairs, that in a letter of this Government to the Government of India, I find it stated that the recommendations which the Committee arrived at were arrived at mainly by a sort of compromise and did not profess to be passed on any definite principle whatever. It was, in fact, the result of that species of drift which the late Sir Henry Harrison, to whose memory so just a tribute was paid by the HON'BLE MR. COTTON the other day, pointed out, was not due to any deliberate policy on the part of the Government. For these reasons, I venture to submit that the conclusions to which the Fire-brigade Committee arrived, are not of much weight in this matter. It is true they did suggest that, the jute industry should be relieved to the extent of 50 per cent., but that suggestion was made tentatively. It was sought to ascertain if it was possible, whilst not ignoring that there existed great difficulty in carrying out that principle. It is said that the Bill as it has left the Select Committee provides a final solution of the difficulty. But I venture to think that, in the attempted solution proposed by the majority of the Committee, so many serious difficulties exist that the solution can only be described, as Sir George Jessel once said of a case before him:—'It reminds me of nothing so much as a cullender, it is so full of holes.'

"It was suggested by the HON'BLE MR. COTTON that Calcutta is not so extraordinary a place as I spoke of it in the language of sarcasm, and that its position on the borders of the tropics renders it incomparable to other large cities. Bombay is not so far from the equator as Calcutta. Rangoon is at about the same distance, and Madras is nearer the equator than Calcutta. Further, it is said that, but for the jute industry, the fire-brigade would not have been consti-

tuted in its present state of efficiency. That may be. But for the growth of inhabitants in this town, it would still perhaps be permeated with those large open sewers which existed some twenty years ago. The frightful mortality from cholera necessarily led to increased taxation for sanitary purposes. Could it be suggested that an aditional tax should be imposed upon persons coming into Calcutta so as to prevent the population from growing, and rendering it less necessary to construct sewers and other sanitary appliances? I trow not.

"Now as to the meaning of the word 'permanent' in regard to fires. It has been said that, those are important fires which for a length of time require the services of the fire-brigade. Surely that is not the test of importance in regard to fires! It may be of great importance to the fire-brigade as regards the amount of work it has to perform. But is it suggested that those fires are therefore the more dangerous? Not so. Which really are the most dangerous fires? The fires which are dangerous are those which blaze and spread within so short a space of time, that very often the fire-brigade is unable to come before the conflagration has most widely spread. I am therefore not surprised to find that, the time occupied in putting out fires in jute warehouses is three days in the one and in bastis only five hours.

"There is one further matter to which I desire to refer. The HON'BLE MR. COTTON referred to a paper which he laid before the Select Committee with respect to the rate of insurance, as showing that jute presses paid a premium of $3\frac{1}{2}$ per cent. The hon'ble gentleman said that a rate of $3\frac{1}{2}$ per cent. in jute press-houses is an excessive rate as compared with the rates of insurance on godowns with loose jute (2 per cent.) and on baled jute (one per cent.) and $\frac{1}{8}$ per cent. on private houses. But I wish to draw the Council's attention to the note which is set opposite to that statement in the paper. In that note, the Commercial Union Company through their manager point out that, the premium on jute presses is $3\frac{1}{2}$ per cent., such premium is subject to a deduction of from 5 to 15 per cent, according to the nature of the appliances for putting out fires. But there is another note, and that the latest quotation which the writer had heard of was $3\frac{1}{2}$ per cent. less 30 per cent., or nearly one-third, so that the rates have come down to one-third of $3\frac{1}{2}$ per cent.

"One word more as to another matter, and I conclude. It is with reference to the observation of the HON'BLE MR. LEE dealing with the question of Act II of 1888. I had not forgotten the language of section 37. I did not refer to it because it is irrelevant. It is irrelevant because, when the Municipal Act was passed, the cost of the fire-brigade was borne by the jute and other industries, and the amendment of the Fire-brigade Act was not then in the contemplation of the Legislature. Consequently, although section 36 says, that the maintenance of the fire-brigade is one of the proper objects of municipal expenditure, it did not find a place in section 37. The object of my amendment is to remedy that state of affairs.

"THE HON'BLE MR. LEE referred at some length to the discussion which took place on the passing of Act II of 1888, with respect to education. But with every respect for educational projects, I for one do not see that the preservation of life and the protection of property from fire, stand on the same footing as education.

"Again, it is observed that, there is a project here of having special rates, which extend to all classes of property, and in that I am at one in saying that, I recognise to the full, the propriety of the imposition of these rates if there are to be differential rates on occupiers rather than upon the owners of houses. That, however, is a matter for subsequent consideration.

"I do not make any observations about the proportion of jute fires to other fires. I could not follow, though with every desire to do so, the HON'BLE MR. LEE in his attempted explanation of this matter. I still understand him to say that, 90 per cent. of the property consumed belongs to the jute industry. With the HON'BLE MR. RISLEY, I venture to express the opinion that, the value of property consumed is no element whatever in the consideration of the matter now before the Council.

"The time has now arrived in which this question, which has been so repeatedly brought forward, but which has hitherto not received that full discussion which is necessary, should receive its final solution. There can be

but one final solution—the acceptance of the principle of a general rate of taxation. If that solution is not arrived at on the present occasion, I feel sure that the time will come when the justice and fairness of the demand which I now formulate in this Council in this matter will render itself more and more apparent."

THE HON'BLE MR. WOODROFFE's Motion being put to the vote the Council divided:—

Ayes 4.	*Noes* 7.
The Hon'ble Mr. Playfair.	The Hon'ble Maulvi Syed Fazl Imam, Khan Bahadur.
The Hon'ble Babu Gonesh Chunder Chunder.	The Hon'ble Mr. Wallis.
The Hon'ble Mr. Risley.	The Hon'ble Dr. Mahendra Lal Sircar.
The Hon'ble Mr. Woodroffe.	The Hon'ble Mr. Lee.
	The Hon'ble Mr. Lambert.
	The Hon'ble Mr. Cotton.
	The Hon'ble Mr. Allen.

So the Motion was negatived.

The Motion, that the Report of the Select Committee be taken into consideration in order to the settlement of the clauses of the Bill, was then put to the vote and agreed to.

The Council adjourned to Saturday, the 25th February, 1893.

CALCUTTA;
The 6th March, 1893.

C. H. REILY,
Assistant Secretary to the Govt. of Bengal,
Legislative Department.

THE EMBANKMENT REPORTS FOR 1891-92.

No. 278I.

GOVERNMENT OF BENGAL,—PUBLIC WORKS DEPARTMENT.

Irrigation.

Dated Calcutta, the 7th March 1893.

RESOLUTION.

READ—

The Embankment Reports for 1891-92.

The public embankments in Bengal are of two classes—

First.—Embankments the property of Government which are maintained at the public expense.

Second.—Embankments maintained by Government officers at the cost of the persons interested.

In the first class there are—

A.—The embankments in Orissa which are maintained under Act XXXII of 1855.

B.—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Ráj estate taken over in 1804, and some additional lengths which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also two short lengths of embankments in the Pabna and Bankura districts.

Embankments of the second class are situated in several districts, the most important being those on the banks of the river Gandak in the Champaran, Muzaffarpur and Saran districts, and those in the Midnapore district. These again are divided into two classes—

C.—Those in which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding 30, as provided for in sections 63-68 of Act II (B.C.) of 1882.

D.—Those on which the cost of maintenance is recovered from the persons benefitted by an annual apportionment of the actual charges.

2. The lengths of embankments in each class and the total charges for maintenance during the year were as follows :—

Embankments.	Miles.	Feet.	Actual cost of works and repairs.	Charges of the year (inclusive of establishment and tools and plant).	Corresponding charges for 1890-91.
1	2	3	4	5	6
Embankments maintained at the expense of Government—			Rs.	Rs.	Rs.
A.—In Orissa	793	1,875	91,478	1,18,420	1,35,787
B.—Schedule D and other Government embankments.	1,135	3,677	2,37,275	3,16,513	2,55,186
Embankments not maintained at the expense of Government—					
C.—Maintained under contract ...	483	1,563	92,707	1,35,214	1,26,648
D.— Ditto by annual apportionment of charges.	75	840	13,398	16,029	17,475
Total for 1891-92 ...	......	......	4,34,858	5,86,176	5,35,096
Corresponding total for 1890-91 ...	......	......	3,84,252	5,35,096	......

The distribution of the above by districts is given in the appended statement B.

(A) Embankments of the first class in Orissa.

3. In Orissa the total length of the embankments at the close of the year was less than that in 1890-91 by 45 miles 2,920 feet, owing to the formal exclusion from the list of

certain embankments which had been superseded by more recently-constructed canal and other embankments. All these embankments are now being re-classified according to their comparative utility for purposes connected with the new settlement in progress in Orissa, and further reductions may not improbably be effected. The cost of repairs fell from Rs. 96,991 in 1890-91 to Rs. 77,565 in 1891-92, notwithstanding heavy damages caused by floods and by a cyclone which visited the district during the year under review.

4. In addition to the ordinary repairs to embankments, certain original works were carried out during the year at a cost of Rs. 13,803, the principal of which was the construction of six groynes at Pattamundi close to the canal in order to prevent further erosion of the right bank of the river Brahmani.

(B) Embankments of the first class—Schedule D and other Government embankments in Pabna and Bankura districts.

5. The total length of Schedule D embankments was nearly the same as last year. Two Government embankments in Pabna and Bankura were added during the year, but have not yet been brought on the schedule. Decreases occurred owing to the abandonment of 3 miles 4,082 feet of embankments in the Burdwan and Hooghly districts, while 2 miles 1,690 feet were added in the Rajshahi district. The actual charges for repairs, however, increased from Rs. 1,82,276 in the previous year to Rs. 2,37,275 in 1891-92. The main causes of the increase, amounting to Rs. 54,999, were as follows

6. A new embankment, called the Godágari road embankment, 2 miles 1,690 feet in length, was constructed in the Rajshahi district at a cost of Rs. 24,934 for the protection of the country north of Rampur-Boalia up to the Baral river, while four small retired lines of embankment, costing Rs. 5,860, in addition to Rs. 2,892 for land compensation, were necessitated in the 24-Parganas district by the encroachment of the rivers Hooghly and Bidiadhari and Diamond Harbour Creek, which seriously threatened the safety of the embankments at those places. The removal of portions of the embankments, including $3\frac{1}{4}$ miles of Schedule D and $1\frac{1}{2}$ miles of Takávi embankments on the right bank of the Damodar river to allow a free passage for the flood spill, coupled with the necessity for filling in breaches made by the floods, caused an expenditure of Rs. 24,013 in the Burdwan district, and in Midnapore Rs. 9,125 were spent on emergent repairs due to flood damages and the construction of retired lines. The last-mentioned district was the only one in which any high floods occurred, and here they were of ordinary character.

7. In the four districts mentioned above the cost of repairing these embankments aggregated Rs. 73,273 more than in the previous year, and savings were effected to the extent of Rs. 12,322 in the Murshidabad and Rs. 7,382 in the Hooghly districts. In theformer of these two districts the level to which the flood of the Bhagirathi river rose during the year was the lowest since the year 1883, but notwithstanding this the embankment was breached rather extensively in the 23rd mile at Mahula No damage, however, resulted owing to the dwarf bunds which had been thrown up in rear of the main embankment during the year 1890-91 for the protection of the town of Berhampore. A diversion channel for the Gobra nala, involving a weir at the outfall, was constructed in rear of the Lalthákuri bund, and acted effectively in intercepting drainage water and thus preventing percolation under that embankment.

8. The embankments, which protect the Burdwan Ráj Estate in the districts of Burdwan, Hooghly, Birbhum, and Midnapore are kept up by Government in consideration of an addition of Rs. 53,742 to the land revenue of the estate. The cost of repairs during the year amounted to Rs. 89,246, against Rs. 69,794 in 1890-91.

9. The Government embankment in Pabna alluded to above and situated on the right bank of the river Ichamati is 5,150 feet in length, and was constructed in 1890-91 for the protection of the Pabna civil station. It was repaired during the year at a cost of Rs. 443. The other embankment added during the year at Bankura is 4,600 feet in length, and was constructed in 1889-90 for the protection of the Government estates Pithaipur and Rajarbari from the floods of the river Darkeswar. During the year Rs. 702 was expended on protective works.

(C) Embankments maintained by contract.

10. The length of embankments maintained by Government under contract with the persons interested was increased during the year by 4 miles 1,901 feet owing to the construction of retired lines in the Champaran district. The sums payable under contract compared with the outlay, including book charges for establishment and tools and plant, on account of the maintenance of these embankments, from the introduction of the system to the end of 1891-92 are shown in the following statement:—

Year.	Midnapur District.		Saran District.		Champaran District.		Muzaffarpur District.		Total.

1891-92	26,291	55,000	31,038	23,900	63,275	13,000	9,393	10,415	1,20,997	1,02,315
Total ...	4,82,051	6,05,000	3,58,915	2,62,900	3,07,025	1,04,000	1,63,208	83,320	13,11,189	10,35,220

The total amount payable yearly by the persons interested is Rs. 1,02,315, while the expenditure incurred purely on works and repairs amounted to Rs. 92,707, and including all charges to Rs. 1,35,214.* Government is therefore a loser of Rs. 32,899 on the results of the year.

11. Looking at the result of the year under review, the expenditure on repair works only in Midnapore, Muzaffarpur and Saran was within the contract amount, while in Champaran it was more than four times the amount owing to the erosion of the banks of the river Gandak, necessitating the construction of retired lines. In Saran a further expenditure of Rs. 8,759 was incurred by Government in surveying the river Gogra as a preliminary to deciding the question of embanking one or both banks. The cost of this survey is not included in the figures given above. The survey has been completed, and detailed estimates are under preparation for an embankment along the north bank from Gatni to Chapra.

(D) Embankments maintained on repayment of actual cost.

12. A decrease of 1 mile 2,047 feet occurred in the length of the embankments maintained under the system of annual apportionment of the actual charges, and the cost of repairs, excluding charges for establishment and tools and plant also fell from Rs. 14,551 in 1890-91 to Rs. 13,398 in the year under review.

13. The principal embankments maintained under this system are the Turkí main embankment on the right bank of the Bagmati river, in the Muzaffarpur district, and the Bazitpur and Monghyr embankments on the left bank of the river Ganges in the Darbhanga and Monghyr districts The repairs of the Turkí bund were carried out at a cost of Rs. 5,617, against Rs. 8,228 in 1890-91, the reduction being mainly due to the absence of heavy floods. A scheme, having for its object the protection of a considerable tract of country from the floods of the river Bagmati, and involving the construction of a masonry weir in the Turki embankment, and raising a portion of the Titariya road at an estimated cost of Rs. 19,970, has been approved by the Chief Engineer in the Irrigation Department, and a notification for carrying out the work under the provisions of section 14 of Act II (B.C.) of 1882 was published in Part I, page 1141 of the *Calcutta Gazette* of 21st December 1892. The amount of the estimate was deposited in the Muzaffarpur Collectorate in January 1892 by the proprietors of the Kánti Concern, who are the persons principally interested in the work. Ordinary repairs of the Bazitpur and Monghyr embankments were carried out during the year at a cost comparing favourably with that incurred in 1890-91, no damage having been caused to the embankments by floods.

* Exclusive of a deduction of Rs. 5,217 under suspense accounts, which reduces the amount to Rs. 1,29,997.

14. In this class (D) are also included six drainage schemes carried out under the provisions of Act VI (B.C.) of 1880, the heaviest expenditure having been Rs. 77,375 on the Dainan basin scheme in Midnapur, including Rs. 37,954 for the construction of a sluice at Srirámpur, which was completed in August 1891.

15. An amended estimate, amounting to Rs. 65,344, for capitalization of the maintenance charges of the Dankúni Drainage Project was sanctioned in Bengal Government No. 1793*I*., dated 21st December 1891, the date of apportionment of the capitalized amount being fixed as 1st April 1891, and an estimate, amounting to Rs. 5,178, being sanctioned to provide for the cost of repairs and maintenance during the year 1891-92, against which an expenditure of Rs. 4,070 was incurred. The annual cost of maintenance is calculated at Rs. 4,390, and it is expected that, on the average of a number of years, this amount will not be exceeded.

16. Details of the expenditure incurred during the year under review, the recoveries made and outstanding balances at the beginning and end of the year for each of the works in class D are given in the appended table A.

17. Among other works chargeable to the Provincial grant for agricultural works, the most important is the conversion of the Balliagahi Branch Canal into a drain, which was undertaken with the double object of improving the bed of the Rasúlpur river by causing an increased scour and of draining a tract of country known as the Barachauka jalla, and that lying to the west of the Argawal circuit embankment. In the above respects the work has so far proved successful, and it has further proved to be of considerable use as a navigation channel. The expenditure of the year amounted to Rs. 53,464. A sum of Rs. 1,119 was spent on remodelling the Partapkhali khal to provide for the drainage of a tract of 16 square miles of country in the Midnapore district. Repairs to the Balli Bhil drainage works involved an expenditure of Rs. 1,902. The question of the drainage of the south of the Midnapore district, involving proposals for the removal of the Argawal and Udbadal circuit embankments, and schemes for the retirement of the marginal embankments on the Rupnarayan, and for the abandonment of 31 miles of the Bhagirathi embankment in the Murshidabad district are still under consideration.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

Secretary to the Government of Bengal.

STATEMENT A.

Statement showing the outlay incurred, recoveries made, and balance outstanding on account of embankments and drainage works (Class D) maintained during the year 1891-92.

Names of Embankments and drainage works.	District.	Balance at end of 1890-91.	Outlay during 1891-92.	Total to end of 1891-92.	Amount recovered and adjusted with the Civil Departments during 1891-92.	Balance unadjusted on 31st March 1892.

NOTE.—The figures given in this list as cost of repairs are exclusive of charges for establishment and tools and plant. The embankments in the Pabna and Bankura districts are embankments maintained at the expense of Government, but they have not yet been included in Schedule D.

(a) Exclusive of Rs. 8,759 expended on a new work during the year, viz., Survey of the river Gogra from Gatni to Chapra.
(b) Includes Rs. 24,934 expended on the construction of the Godagari road embankment.
(c) Exclusive of Rs. 34,384 expended on improvement and maintenance of certain drainage projects in the Midnapore and 24-Parganas districts, on repairs to opium tar shoots in the Eastern Sone Division, and on improvement of Balli Bhil and other works in the Circular and Eastern Canals, and Nadia Rivers Divisions, which the Examiner has shown as expenditure under Government embankments in his Finance Accounts for 1891-92.
(d) Exclusive of Rs. 13,803 expended on new works, and Rs. 110 on repairs to river gauges, &c., as shown in Examiner's Finance Accounts for 1891-92.

GIFT OF LAND REQUIRED FOR THE CONSTRUCTION OF THE HOWRAH FORESHORE ROAD.

GOVERNMENT OF BENGAL, PUBLIC WORKS DEPARTMENT.

Dated Calcutta, the 7th March 1893.

Notification No. 59.—The following correspondence is published for general information.

F. J. JOHNSTONE,
Secretary to the Govt. of Bengal.

No. 681R.L., dated Burdwan, the 10th February 1893.

From—A. POWER, ESQ., Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Public Works Department.

WITH reference to your No. 6492C., dated the 21st December, to the address of the Board of Revenue, I have the honour to submit copy of a letter written by the Mukhtear of Moharani Swarnamoyi of Kasimbazar, to the Covenanted Deputy Collector of Howrah, waiving all her claims to compensation for her land in front of Shalimar House, required to be taken up for the new road connecting Howrah with the Botanical Gardens. It is reported that the actual value of the land is small, but the Moharani might have put in claims for severance which would have amounted to many thousands of rupees, which would have been very difficult to settle, and which, if accepted, would have made the road so expensive that it would have been impossible to construct it.

2. The road will not only be a great boon to the public, uniting Calcutta and Howrah with the Botanical Gardens along the riverside, but will also save a circuitous journey.

3. Mr. Grierson has suggested that she may be publicly thanked by Government for this very handsome gift. I support the Magistrate's recommendation.

Dated the 28th January 1893.

From—MOHARANI SWARNAMOYI, by her Mukhtear BABU TROYLUCKO NATH BARAT,
To—The Covenanted Deputy Collector, Howrah.

WITH reference to the notice No. 4 of 1892-93, dated the 21st December 1892, served upon me, requiring me to file a claim in respect of the acquisition of land required for the foreshore road in front of my Shalimar property in the village of Sibpur, I beg to state that I forego all my claims for compensation in respect of the acquisition of land aforesaid claimable under Act X of 1870.

No. 1272C., dated Calcutta, the 1st March 1893.

From—F. J. JOHNSTONE, ESQ., Secy. to the Govt. of Bengal, P. W. Dept.,
To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your letter No. 681R.L., dated the 13th February 1893, submitting, for information, copy of a letter (dated the 28th January 1893) from the Mukhtear of the Moharani Swarnomoyi, of Kasimbazar, waiving all her claims to compensation for the land in front of Shalimar House required for constructing the Howrah foreshore road.

2. The actual value of the land given is small, but you rightly say that the Moharani might have put in claims for severance which would have amounted to many thousands of rupees. These, as you remark, would no doubt have been very difficult to settle, and, if accepted, would have made the foreshore road so very expensive that it would have been impossible to construct it.

3. In reply, I am to state that the Lieutenant-Governor notes with satisfaction this graceful act on the part of the Moharani in foregoing all her claims to compensation, and I am desired to request that you will convey to her the thanks of His Honour for her handsome gift, which will now enable the Government to proceed with the construction of the road, which will be a great boon to the public.

4. The correspondence on this subject will be published in the *Calcutta Gazette* for general information.

LIBERALITY OF RAJA NAM NARAIN SING AND BABUS SURUP NARAIN SING, TORAL NARAIN SING AND RAMESHAR NATH SING, ZAMINDARS IN THE DISTRICT OF HAZARIBAGH.

No. 764Med., dated Calcutta, the 1st March 1893.

From—H. H. Risley, Esq., C.I.E., Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Chota Nagpur Division.

I am directed to acknowledge the receipt of your letter No. 250T.M., dated the 25th January 1893, with which you forward a copy of a letter from the Honorary Secretary to the Dufferin Fund Committee, Ranchi Branch, reporting that the following donations were made to the Fund on the occasion of the visit of His Honour the Lieutenant-Governor to Chota Nagpur in November last:—

		Rs.
1.	Raja Nam Narain Sing, of Ramgurh	5,000
2.	Babu Surup Narain Sing, of Padma	1,500
3.	„ Toral Narain Sing, of Gowar	2,000
4.	„ Rameshar Nath Sing, of Kunda	1,000

You report that it is proposed to spend all the money subscribed in founding a hospital for women in the town of Hazaribagh, with the exception of Rs. 500, which is intended by Babu Surup Narain Sing for the benefit of the people of Lohardaga.

2. In reply, I am directed to say that the Lieutenant-Governor accepts the donations, and to request that you will be so good as to convey to the donors an expression of His Honour's thanks for their liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 4th March, 1893.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
Burdwan Divn.	1	Burdwan March 4, '93 Kalna ... Katwa ... Raniganj ..	0·21 0·91 0·25 0·70	Weather—cloudy and much warmer since the last rain The late rain did damage to all *rabi* crops. Ploughing going on everywhere. No want of fodder and sufficient water in tanks. Prices of common rice:— Srs. Sadar ... ... 11 to 13 per rupee. Kalna ... ... 10 to 13 per rupee. Katwa ... ... 13 per rupee. Raniganj ... ... 13 per rupee.
	2	Bankura „ 4, '93 Vishnupur ...	0·21 0·24	Weather—fair. Ploughing going on. Pressing of sugarcane continues. Fodder and water sufficient. Rice selling at— Srs. Sadar ... ... 11½ per rupee. Vishnupur ... ... 12 per rupee.
	3	Birbhum „ 4, '93 Rampur Hát ...	0·02 0·40	Weather—seasonable. State and prospects of *rabi* crops good. Fodder and water plentiful. Price of common rice continues from 13 to 15 seers per rupee.
	4	Midnapore „ 4, '93	0·22	Rain at the begining of the week, since which the weather has become fine and much hotter. *Rabi* crops mostly gathered. Ploughing going on extensively. Prices of common rice:— Srs. Sadar ... ... 12 per rupee. Contai ... ... 13 to 14 per rupee. Tamluk ... ... 12 to 14 per rupee. Garhbeta ... ... 11 to 12 per rupee.
	5	Hooghly „ 4, '93 Serampore ... Jahanabad ...	0·22 0·25 Nil	Weather—becoming hot. *Rabi* crops and potatoes reported to be considerably damaged by the late rain. Ploughing in progress. Mangoes not so much damaged as was supposed. Prices of common rice:— Srs. Sadar ... ... 11 per rupee. Serampore ... ... 10 to 11 per rupee. Jahanabad ... ... 12 to 12½ per rupee.
	6	Howrah „ 4, '93 Ulubaria ...	0·16 0·32	Weather—seasonable. Reaping of *khesari* continues. Condition of cattle good. Fodder and water-supply sufficient. Price of rice 11 to 11½ seers per rupee.
Presidency Divn.	7	24-Parganas „ 4, '93	0·15	Weather—seasonable. Winter crops being gathered. Cutting of sugarcane going on. Prospect fair. Sufficient fodder. No cattle-disease. Prices of common rice:— Srs. c. Sadar ... ... 10 to 14 8 per rupee. Barrackpore ... ... 12 4 per rupee. Parasat ... ... 10 5 per rupee. Diamond Harbour ... ... 13 0 per rupee. Basirhat ... ... 12 5 per rupee. Dum-Dum ... ... 12 0 per rupee.
	8	Nadia „ 4, '93 Kushtia ... Meherpur ... Chuadanga ... Ranaghat ...	0·14 0·75 0·46 0·07 0·96	Weather—cool and fine. Prospects of *rabi* crops fair. The harvest is beginning. Lands are being ploughed for *aus* paddy. Fodder and water sufficient. Prices of common rice almost stationary—about 13 seers per rupee.
	9	Khulna „ 4, '93 Bagerhat ... Satkhira ...	0·10 0·48 0·15	Weather—becoming warm. *Boro* doing well. *Rabi* harvest nearly over; outturn slightly damaged by recent rain. Coarse rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.
	10	Jessore „ 4, '93 Jhenida ... Magura ... Narail ... Bangaon ...	0·22 1·73 1·66 0·77 0·73	Weather—cloudy with occasional rain in the first part of the week; now rather hot. The rainfall of the week has done injury to some of the standing *rabi* crops and to mango blossoms. Land is being extensively prepared for the cultivation of paddy. Indigo and *til* sowings have commenced. Cattle-disease reported from Gadkhali, Garapota and Gaighatta. Fodder and water sufficient. Price of rice stationary.
	11	Murshidabad „ 4, '93	0·08	Weather—seasonable. The recent rain has partially damaged the *rabi* crops, viz.—*mutar*, gram, *masuri*, rye, &c., both standing on fields and those stacked for threshing, excepting wheat and barley. Indigo and sugarcane plants progressing well. Common rice sells at 13 seers per rupee. There is sufficient fodder for cattle.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and State and prospects of the crops.
	BENGAL—*concld.*		
	Chittagong Divn.		
12	Chittagong Mar. 4, '93	Nil	Weather—seasonable. Prospects of crops good. *Rabi* cultivation in progress. Prices stationary. Condition of cattle good. Supply of fodder sufficient.
13	Noakhali „ 4, '93	0·15	Weather—seasonable *Rabi* crops doing well. Land being ploughed for *aus* paddy. Cattle-disease reported from Begumganj and Chhagalnaya. Fodder and water sufficient. Price of rice varies from 13 to 14 seers per rupee.
14	Tippera „ 4, '93	0·19	Weather—getting hot by day and cold at night. Mustard has almost been harvested and the outturn has been an average one. Both food-crops and fodder are sufficient.
15	Chittagong Hill Tracts. „ 3, '93	0·03	Weather—cold in the morning. Lands for *jum* cultivation being selected. Vegetables progressing. No cattle-disease reported. Prices of common rice :— Srs. Rangamati ... ... 10 } Bandarban ... ... 9½ } per rupee. Manicksury ... ... 20 }
	Dacca Divn.		
16	Dacca „ 4, '93	Nil	Weather—seasonable. *Rabi* crops being gathered Cultivation and sowing of *aman* and *aus* paddy going on. Fodder available. No cattle-disease. Common rice selling at from 12 to 14 seers per rupee.
17	Faridpur „ 4 '93	0·16	Weather—much warmer and more seasonable. Standing *rabi* crops fair, and no report of great damage by the late rain, although some harm has probably been done. Ploughing for early rice going on. *Til* and sugarcane being sown. *Boro* and *jali* paddy doing well. Common rice sells at 11½ seers per rupee at Sadar and 13 seers at Goalundo and Madaripur. Cattle get fodder and no cattle-disease.
18	Backergunge „ 4, '93	Nil	Weather—seasonable. Slight rain in the subdivisions. Prospects of crops good. Common rice selling from 10 to 14 seers per rupee. Fodder and water sufficient.
	Pirojpur ...	0·13	
	Bhola ...	0·14	
	Patuakhali ...	0·26	
19	Mymensingh „ 4, '93	0·09	Weather—getting warm. Prospects of standing crops good. Rice sells at from 11½ to 14 seers per rupee. Supply of water and fodder sufficient.
	Rajshahi Divn.		
20	Dinajpur „ 4. '93	0·01	Weather—getting hot. Cultivation of lands for *bhadoi* paddy and jute continues. Pressing of sugarcane nearly finished. Outturn of mustard reported to be 14 annas. Prices of rice both at Sadar and Thakurgaon continue stationary. Cattle reported to be in good condition. Fodder and drinking water continue sufficient.
	Thakurgaon ...	Nil	
21	Rajshahi „ 4, '93	Nil	Weather—cold and seasonable. Notwithstanding the unusual rain, it is hoped that the *rabi* crops will give a fair outturn. Ploughing has been much facilitated for future rice crops. Very little cattle-disease reported. Price of common rice varies from 12 to 16 seers per rupee. Fodder and water-supply ample.
	Nator ...	1·12	
	Naugaon ...	0·15	
22	Rangpur „ 4, '93	Nil	Weather—getting warmer with westerly wind. Lands still under preparation for *bhadoi* crops. Common rice from 11 to 15 seers per rupee.
	Kurigaon ...	Nil	
	Nilphamari ...	Nil	
	Gaibanda ...	0·82	
23	Bogra „ 4, '93	0·50	Weather—fine and warm. Lands are being ploughed for *aus* and jute. *Rabi* crops in good condition. Common rice 13½ seers per rupee. Fodder and water sufficient.
	Sherpur ...	0·89	
	Naukhila ...	0·67	
24	Pabna „ 4, '93	0·14	Weather—clear and cool. Standing *rabi* crops somewhat damaged by the incessant fall of rain last week, but it enabled the raiyats to plough their lands for the early rice crop. Rice selling 12½ seers per rupee at Pabna and Rs. 3-8 to Rs. 5 per maund at Sirajganj. Condition of cattle good. Water-supply and fodder sufficient.
25	Darjeeling „ 4, '93	0·04	Weather—fair and less cold. *In the hills* :—Barley and wheat progressing favourably. *Bhutta* being sown. Potatoes are being gathered. *In the Terai* :—Harvesting of potatoes and mustard finished. Tobacco and barley doing well. Lands being ploughed for *bhadoi* crops. Prices of coarse rice :— Srs. Hills ... ... 11 } Terai ... ... 13 } per rupee.
	Siliguri ...	Nil	
26	Jalpaiguri „ 4, '93	Nil	Weather—getting warm. Harvesting of tobacco commenced and that of mustard nearly finished. Ploughing for *aus* going on. Price of common rice 13 seers 5½ chitaks per rupee. Condition of cattle good and water and fodder sufficient.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR.			
Bhagalpur Divn.			
27	Monghyr March 4, '93 Begusarai ... Jamui ...	Nil 1·64 2·30	Weather—partly fair and partly cloudy. Although the rain has done some damage to the *rabi* crops and poppy, still they are promising. The rain has done much good to indigo. Fodder and water sufficient. Considerable deaths of cattle during the late foul weather are reported from Jamui subdivision. Prices of common rice:— Srs. Sadar ... ... 13 to 16¼ } per rupee. Begusarai ... ... 16 } Jamui ... ... 15 }
28	Bhagalpur „ 4, '93 Banka ... Madhipura ... Supaul ...	0·10 0·40 Nil Nil	Weather—seasonable. Standing crops are reported not to have been very badly affected by the late rain. Wheat and linseed are expected to yield 12 annas. Price of common rice 15 seers 2 chitaks per rupee.
29	Purnea „ 4, '93 Kishanganj ... Araria ...	0·12 0·17 0·36	Weather—cloudy at the beginning of the week; west winds getting hot daily. Tobacco being gathered everywhere; outturn good. Pressing of sugarcane going on. Other *rabi* crops doing well. Lands being prepared for the next *bhadoi*. Fodder and water sufficient. No cattle-disease. Prices of common rice:— Srs. Sadar ... ... 14 to 16 } per rupee. Araria ... ... 18 } Kishanganj ... ... 15 }
30	Malda „ 4, '93 Shibganj ... Gajole ...	0·08 0·06 0·07	Weather—clear and cool, but cloudy at intervals. Wheat and other *rabi* crops ripening and their prospect continues favourable. Transplantation of *boro* rice progressing. Common rice sells at from 12 to 17 seers per rupee. No want of fodder or drinking water.
31	Sonthal Parganas „ 4, 93 Deoghur ... Godda ... Jamtara ... Pakur ...	0·08 0·35 0·41 0·35 0·8	Weather—cold with occasional clouds. West wind beginning. It is hoped that the damage feared to the *chaiti* crops, *mahua* and mangoes has been exaggerated. The dry weather this week is much in their favour. The intense cold caused many deaths among cattle. Water and fodder sufficient.
Patna Division.			
32	Patna „ 4, '93	0·08	Weather—cool and clear. Prospects of the *rabi* crops are not favourable. The standing and harvested *rabi* crops, such as gram, peas, mustard and *masur*, have been damaged by the rain. Poppy has sustained very little injury from rain. Common rice selling at Sadar 16 seers per rupee.
33	Gaya „ 4, 93 Aurangabad ... Jahanabad ... Nawada ...	0·10 0·46 0·44 0·91	Weather—cloudy on the first two days of the week, bright sunshine during the remaining days. Harvesting of *rabi* crops going on. The rain ceased at the beginning of this week. The bright sunshine after the rain is also a little injurious to the pulses, as the pods crackle and the grain is thus thrown away in fields. The sunshine is, however, very favourable to poppy. Lancing of poppy is in progress, and the yield is reported good, about 6 annas collection having been already made. Fodder and water for cattle sufficient. Prices rose when the weather was cloudy, and have been stationary since.
34	Shahabad „ 4, '93 Buxar ... Sasaram ... Bhabhua ...	0·07 0·29 Nil 1·03	Weather—seasonable. Prospects of *rabi* crops continue to be favourable. Slight damage is reported to have been done to peas and opium by rain, but the favourable weather which has followed has given an impetus to the later sowing of poppy, that it will fully if not more than make up for the slight loss sustained by the first sowing. Price of common rice at Sasaram has risen by 4 chitaks in the rupee; elsewhere it is stationary. Cattle in good condition with sufficient fodder and water.
35	Darbhanga „ 4, '93	Nil	Weather—clear with west winds. Prospects of *rabi* continue good, but *rahar* and peas much damaged by the late rain. Mustard being harvested, and the yield is estimated at 16 annas. The late continuous rain and cloudy weather spoiled the poppy leaves. The produce from capsules lanced is reported to have been small, but will improve if clear weather and the west wind continue. Prices remain stationary. Condition of cattle good.
36	Muzaffarpur .. 4, '93 Sitamarhi (on the 24th and 26th Feb.) . Hajipur ...	Nil 0·49 0·06	Weather—cloudy in the beginning of the week, but now seasonable. The *rabi* crops, except for the damage done by the late rainfall, are doing well. Poppy leaves injured by rain. Opium produce so far from the capsules lanced very small, but will probably improve now. No disease among cattle. Fodder and water ample.

Division	No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—*concld.*				
PATNA DIVISION—*concld.*	37	Saran Mar. 4, '93 Siwan .. Gopalganj ..	0·23 0·06 0·02	Weather—cleared up since Sunday last (26th February), but patches of clouds visible since yesterday (3rd March). Standing crops doing well. The Sub-divisional Officer of Gopalganj reports the yield of mustard at 18 annas. The sunshine since the clearing of weather with west winds has averted the danger that was imminent to poppy. *Rahar* and peas have suffered in Sadar and Siwan subdivisions from continued rain and east wind; but on the whole prospects are fairly good. Fodder and water abundant. Prices of common rice :— Srs. c. Chapra ... ... 14 3 } per rupee. Siwan ... ... 12 8 } Gopalganj ... ... 14 3 }
	38	Champaran „ 4, '93	Nil	Weather—fine. *Rabi* crops generally promising, but in places somewhat injured by heavy rain. Poppy plants in Bettiah are very promising. In the Sadar a little damage was done to the poppy, but with the present sunshine the outturn will be good. No disease among cattle. Fodder and water abundant. No marked change in prices.
ORISSA.				
ORISSA DIVN.	39	Cuttack „ 4, '93	1·01	Weather—cloudy. The rainfall has been beneficial. Local hailstones have done some damage to crops on the ground. Supply of fodder sufficient. Price of common rice remains unchanged.
	40	Puri „ 2, '93	0·49	Weather—seasonable. Ploughing for next *sarad* crop going on. *Dalua* paddy growing well. Miscellaneous crops thriving. Common rice sells at from 14 seers 7 chitaks to 17 seers 13 chitaks per rupee.
	41	Balasore „ 4, '93	0·51	Weather—warmer and more settled. Ploughing continues. The late *rabi* crop is being harvested. Rice sells at 15 seers per rupee at Balasore and 18 seers at Bhadrak.
CHOTA NAGPUR. *South-West Frontier Agency.*				
CHOTA NAGPUR DIVN.	42	Hazaribagh Mar. 4, '93 Giridi ...	0·12 0·48	Weather—getting warmer; occasionally cloudy. Rain has injured the crops. *Mahua* and *arhar* have suffered. Lands are being ploughed. Poppy has been damaged by rain. Common rice 12 to 14 seers per rupee.
	43	Lohardaga „ 4, '93	0·17	Weather—seasonable. Ploughing commenced; some damage has been caused by the recent rain to *rahar*, *musari* and *khesari*. Common rice selling at 13 seers per rupee. Fodder and water plentiful.
	44	Palamau „ 3, '93	0·53	Weather—seasonable. A little rain in some parts. Rainfall is not favourable to the *rabi* crops. Cattle-disease reported from some stations. Fodder sufficient. Prices stationary.
	45	Singhbhum „ 4, '93	0·20	Weather—cloudy at times; getting warm. The late heavy rain has damaged the *rabi* crop to some extent in the Kolhan, but it is considered that an average 12 annas crop for the whole district will be reaped. Common rice selling at from 12 to 16 seers per rupee. Cattle-disease on a small scale is reported from Baharagara outpost in Dhalbhum.
	46	Manbhum „ 4, '93 Gobindpur ...	Nil 0·27	Weather—bright and getting warmer daily. The late heavy rain has done considerable damage to the mango blossoms and *rabi* generally. There is also cause of anxiety regarding *mahua*. Rice selling at from 10 to 14 seers per rupee. Fodder and water-supply sufficient.
